"(4) a description of the manner in which the State will evaluate programs and activities conducted with payments made to the State under subsection (c) and assurances that the State will report periodically to the Secretary on the results of such evaluations; and

"(5) assurances that payments made to the State under subsection (c) will supplement and not supplant any State or local expenditures for the treatment and rehabilitation of alcohol; abuse and drug abuse that would have been made in the absence of such payments.

"(e)(1) Except as provided in subsection (f) and (i), amounts paid to a State under subsection (c) may be used by the State for alcohol abuse and drug abuse treatment and rehabilitation programs and activities, including—

"(A) activities to increase the availability and outreach of programs provided by major treatment centers and regional branches of such centers which provide services in a State in order to reach the greatest number of people;

"(B) activities to expand the capacity of alcohol abuse and drug abuse treatment and rehabilitation programs and facilities to provide treatment and rehabilitation services for alcohol abusers and drug abusers who have been refused treatment due to lack of facilities or personnel; and

"(C) activities to provide access to vocational training, job counseling, and education equivalency programs to alcohol abusers and drug abusers in need of such services in order to enable such abusers to become productive members of society.

"(2) A State may request the Secretary to waive the provisions of section 1915(b)(1) (as such section applies to this section pursuant to subsection (i) of this section) in order to permit such State to conduct model programs for the provision of inpatient hospital services for alcohol abuse and drug abuse treatment, and the Secretary may grant such a waiver.

"(f) Of the total amount paid to any State under subsection (c) for a fiscal year, not more than 2 percent may be used for administering the funds made available under such subsection. The State will pay from non-Federal sources the remaining costs of such administering such funds.

"(g) The Secretary may provide training and technical assistance to States in planning and operating activities to be carried out under this section.

"(h) The Secretary may conduct data collection activities to enable the Secretary to carry out this section.

"(i) Except as provided in subsection (e)(2), the provisions of subsections (a) and (d) and paragraphs (1) through (5) of subsection (b) of section 1917 and the provisions of sections 1914(b), 1915(b), 1918, 1919, and 1920 shall apply to this section in the same manner as such provisions apply to payments made under section 1914 from allotments made under section 1913.

"TRANSFER TO THE ADMINISTRATOR OF VETERANS' AFFAIRS

"SEC. 1922. The Secretary shall transfer to the Administrator of Veterans' Affairs the amount which, under the second sentence of section 1921(a), is available for such transfer. The amount transferred pursuant to the preceding sentence shall be used for outpatient treatment, rehabilitation, and counseling under section 612 of title 38, United States Code, of veterans for their alcohol or drug abuse dependence or abuse disabilities and for contract care and services under section 620A of such title for veterans for such disabilities.

"TREATMENT PROGRAM EVALUATIONS

"SEC. 1923. One percent of the total amount appropriated under section 1921(a) for any fiscal year may be used by the Secretary, acting through the Administrator of the Alcohol, Drug Abuse, and Mental Health Administration, to develop and evaluate alcohol and drug abuse treatment programs to determine the most effective forms of treatment. Such programs may be developed and evaluated through grants, contracts, and cooperative agreements provided to nonprofit private entities. In carrying out this section, the Secretary shall assess the comparative effectiveness of various treatment forms for specific patient groups.".

SEC. 4003. ADVISORY COUNCILS.

(a) Part A of title V is amended by redesignating sections 505 and 506 as sections 506 and 507 respectively, and by inserting after section 504 the following new section:

ADVISORY COUNCILS

"SEC. 505. (a)(1) The Secretary shall appoint an advisory council for the National Institute on Alcohol Abuse and Alcoholism, for the National Institute on Drug Abuse, and for the National Institute of Mental Health. Each such advisory council shall advise, consult with, and make recommendations to the Secretary and the Director of the Institute for which it was appointed on matters relating to the activities carried out by and through the Institute and the policies respecting such activities.

"(2) Each advisory council for an Institute may recommend to the Secretary acceptance, in accordance with section 2101, of conditional gifts for—

"(A) study, investigation, or research respecting the diseases, disorders, or other aspect of human health with respect to which the Institute was established;

"(B) the acquisition of grounds for the Institute; or

"(C) the construction, equipping, or maintenance of facilities for the Institute.

"(3) Each advisory council for an Institute—

"(A)(i) may on the basis of the materials provided under section 507(d)(2) respecting research conducted at the Institute, make recommendations to the Director of the Institute respecting such research;

"(ii) shall review applications for grants and cooperative agreements for research or training and for which advisory council approval is required under section 507(e)(2), and recommend for approval applications for projects which show promise of making valuable contributions to human knowledge; and

"(iii) may review any grant, contract, or cooperative agreement proposed to be made or entered into by the Institute;

"(B) may collect, by correspondence or by personal investigation, information as to studies which are being carried on in the United States or any other country as to diseases, disorders, or other aspect of human health with respect to which the Institute was established and with the approval of the Director of the Institute make available such information through appropriate publications for the benefit of public and private health entities and health professions personnel and scientists and for the information of the general public; and

"(C) may appoint subcommittees and convene workshops and conferences.

"(b)(1) Each advisory council shall consist of nonvoting ex officio members and not more than 12 members appointed by the Secretary.

"(2) The ex officio members of an advisory council shall consist of—

"(A) the Secretary, the Administrator, the Director of the Institute for which the advisory council is established, the Chief Medical Director of the Veterans' Administration, and the Assistant Secretary of Defense for Health Affairs (or the designees of such officers), and

"(B) such additional officers of employees of the United States as the Secretary determines necessary for the advisory council to effectively carry out its functions.

"(3) The members of an advisory council who are not ex officio members shall be appointed as follows:

"(A) Nine of the members shall be appointed by the Secretary from among the leading representatives of the health and scientific disciplines (including public health and the behavioral or social sciences) relevant to the activities of the Institute for which the advisory council is established.

"(B) Three of the members shall be appointed by the Secretary from the general public and shall include leaders in fields of public policy, public relations, law, health policy, economics, and management.

"(4) Members of an advisory council who are officers or employees of the United States shall not receive any compensation for service on the advisory council. The other members of an advisory council shall receive, for each day (including travel time) they are engaged in the performance of the functions of the advisory council, compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule.

"(c) The term of office of an appointed member of an advisory council is 4 years, except that any member appointed to fill a vacancy for an unexpired term shall be appointed for the remainder of such term and the Secretary shall make appointments to an advisory council in such manner as to ensure that the terms of the members do not all expire in the same year. A member may serve after the expiration of the member's term until a successor has taken office. A member who has been appointed for a term of 4 years may not be reappointed to an advisory council before 2 years from the date of expiration of such term of office. If a vacancy occurs in the advisory council among the appointed members, the Secretary shall make an appointment to fill the vacancy within 90 days from the date the vacancy occurs.

"(d) The chairman of an advisory council shall be selected by the Secretary from among the appointed members, except that the Secretary may select the Director of the Institute for which the advisory council is established to be the chairman of the advisory council. The term of office of chairman shall be 2 years.

"(e) The advisory council shall meet at the call of the chairman or upon the request of the Director of the Institute for which it was established, but at least 3 times each fiscal year. The location of the meetings of each advisory council is subject to the approval of the Director of the Institute for which the advisory council was established.

"(f) The Director of the Institute for which an advisory council is established shall designate a member of the staff of the Institute to serve as the executive secretary of the advisory council. The Director of the Institute shall make available to the advisory council such staff, information, and other assistance as it may require to carry out its functions. The Director of the Institute shall provide orientation and training for new members of the advisory council to provide them with such information and training as may be appropriate for their effective participation in the functions of the advisory council.".

(b) The amendment made by subsection (a) does not terminate the membership of any advisory council for the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, or the National Institute of Mental Health which was in existence on the date of enactment of this Act. After such date—

(1) the Secretary of Health and Human Services shall make appointments to each such advisory council in such a manner as to bring about as soon as practicable the composition for such council prescribed by section 505 of the Public Health Service Act;

(2) each advisory council shall organize itself in accordance with such section and exercise the functions prescribed by such section; and

(3) the Director of each such institute shall perform for such advisory council the functions prescribed by such section.

(c) Section 217 is amended—

(1) by striking out subsections (a), (b), (c), and (d);

(2) by striking out "(e)(1)" and inserting in lieu thereof "(a)";

(3) by striking out "(2)" and inserting in lieu thereof "(b)";

(4) by striking out "(3)" and inserting in lieu thereof "(c)";

(5) by striking out "(4)" and inserting in lieu thereof "(d)"; and

(6) by redesignating clauses (A) and (B) of subsection (c) (as redesignated by the amendment made by paragraph (4) of this subsection) as clauses (1) and (2), respectively.

SEC. 4004. OFFICE FOR SUBSTANCE ABUSE PREVENTION.

(a) Part A of title V (as amended by section 4003 of this Act) is further amended by adding at the end thereof the following new sections:

"OFFICE FOR SUBSTANCE ABUSE PREVENTION

"SEC. 508. (a) There is established in the Administration an Office for Substance Abuse Prevention (hereafter in this part referred to as the 'Office'). The Office shall be headed by a Director appointed by the Secretary from individuals with extensive experience or academic qualifications in the prevention of drug or alcohol abuse.

"(b) The Director of the Office shall—

"(1) sponsor regional workshops on the prevention of drug and alcohol abuse;

"(2) coordinate the findings of research sponsored by agencies of the Service on the prevention of drug and alcohol abuse;

"(3) develop effective drug and alcohol abuse prevention literature (including literature on the adverse effects of cocaine free base (known as 'crack');

"(4) in cooperation with the Secretary of Education, assure the widespread dissemination of prevention materials among States, political subdivisions, and school systems;

"(5) support programs of clinical training of substance abuse counselors and other health professionals;

"(6) in cooperation with the Director of the Centers for Disease Control, develop educational materials to reduce intravenous drug abusers;

"(7) conduct training, technical assistance, data collection, and evaluation activities of programs supported under the Drug Free Schools and Communities Act of 1986;

"(8) support the development of model, innovative, community-based programs to discourage alcohol and drug abuse among young people; and

"(9) prepare for distribution documentary films and public service announcements for television and radio to educate the public concerning the dangers to health resulting from the consumption of alcohol and drugs and, to the extent feasible, use appropriate private organizations and business concerns in the preparation of such announcements.

"(c) The Director may make grants and enter into contracts and cooperative agreements in carrying out subsection (b).

"(d) Of the amounts available under the second sentence of section 1921(a) to carry out this section and section 510, $20,000,000 shall be available to carry out section 510.

"ALCOHOL AND DRUG ABUSE INFORMATION CLEARINGHOUSE

"SEC. 509. The Secretary, through the Director of the Office, shall establish a clearinghouse for alcohol and drug abuse information to assure the widespread dissemination of such information to States, political subdivisions, educational agencies and institutions, health and drug treatment and rehabilitation networks, and the general public. The clearinghouse shall—

"(1) disseminate publications by the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, and the Department of Education concerning alcohol abuse and drug abuse;

"(2) disseminate accurate information concerning the health effects of alcohol abuse and drug abuse;

"(3) collect and disseminate information concerning successful alcohol abuse and drug abuse education and prevention curricula; and

"(4) collect and disseminate information on effective and ineffective school-based alcohol abuse and drug abuse education and prevention programs, particularly effective programs which stress that the use of illegal drugs and the abuse of alcohol is wrong and harmful.

"PREVENTION, TREATMENT, AND REHABILITATION MODEL PROJECTS FOR HIGH RISK YOUTH

"SEC. 510. (a) The Secretary, through the Director of the Office, shall make grants to public and nonprofit private entities for projects to demonstrate effective models for the prevention, treatment, and rehabilitation of drug abuse and alcohol abuse among risk youth.

"(b)(1) In making grants for drug abuse and alcohol abuse prevention projects under this section, the Secretary shall give priority to applications for projects directed at children of substance abusers, latchkey children, children at risk of abuse or neglect, preschool children eligible for services under the Head Start Act, children at risk of dropping out of school, children at risk of becoming adolescent parents, and children who do not attend school and who are at risk of being unemployed.

"(2) In making grants for drug abuse and alcohol abuse treatment and rehabilitation projects under this section, the Secretary shall give priority to projects which address the relationship between drug abuse or alcohol abuse and physical child abuse, sexual child abuse, emotional child abuse, dropping out of school, unemployment, delinquency, pregnancy, violence, suicide, or mental health problems.

"(3) In making grants under this section, the Secretary shall give priority to applications from community based organizations for projects to develop innovative models with multiple, coordinated services for the prevention or for the treatment and rehabilitation of drug abuse or alcohol abuse by high risk youth.

"(4) In making grants under this section, the Secretary shall give priority to applications for projects to demonstrate effective models with multiple, coordinated services which may be replicated and which are for the prevention or for the treatment and rehabilitation of drug abuse or alcohol abuse by high risk youth.

"(c) To the extent feasible, the Secretary shall make grants under this section in all regions of the United States, and shall ensure the distribution of grants under this section among urban and rural areas.

"(d)(1) In order to receive a grant for a project under this section for a fiscal year, a public or nonprofit private entity shall submit an application to the Governor of the State in which the project will be conducted. Such application shall be in such form, shall contain such information, and shall be submitted at such time as the Secretary may by regulation prescribe.

"(2) The Governor of each State shall review each application received under subsection (a) for a fiscal year and shall submit to the Secretary, by a date prescribed by the Secretary for such fiscal year, the recommendations of the Governor concerning the approval or disapproval of each such application and a ranking recommended by the Governor of the priority for approval of such applications. In making recommendations under the preceding sentence, the

Governor shall consider the priorities and requirements for grants established by subsections (b) and (c).

"(e) The Director of the Office shall evaluate projects conducted with grants under this section.

"(f) For purposes of this section, the term 'high risk youth' means an individual who has not attained the age of 21 years, who is at high risk of becoming, or who has become, a drug abuser or an alcohol abuser, and who—

"(1) is identified as a child of a substance abuser;

"(2) is a victim of physical, sexual, or psychological abuse;

"(3) has dropped out of school;

"(4) has become pregnant;

"(5) is economically disadvantaged;

"(6) has committed a violent or delinquent act;

"(7) has experienced mental health problems;

"(8) has attempted suicide; or

"(9) is disabled by injuries.".

(b)(1) Section 502(e) is repealed.

(2) Section 503(d) is amended—

(A) by inserting "and" at the end of paragraph (2);

(B) by striking out "; and" at the end of paragraph

(3) and inserting in lieu thereof a period; and

(C) by striking out paragraph (4).

SEC. 4005. PUBLIC HEALTH EMERGENCIES.

Part A of title V (as amended by sections 4003 and 4004 of this Act) is further amended by adding at the end thereof the following:

"RESEARCH ON PUBLIC HEALTH EMERGENCIES

"SEC. 511. (a) If the Secretary determines, after consultation with the Administrator, the Commissioner of Food and Drugs, or the Director of the Centers for Disease Control, that a disease or disorder within the jurisdiction of an Institute of the Administration constitutes a public health emergency, the Secretary, acting through the Administrator—

"(1) shall expedite the review by advisory councils and by peer review groups of applications for grants for research on such disease or disorder or proposals for contracts for such research;

"(2) shall exercise the authority in section 3709 of the Revised Statutes (41 U.S.C. 5) respecting public exigencies to waive the advertising requirements of such section in the case of proposals for contracts for such research;

"(3) may provide administrative supplemental increases in existing grants and contracts to support new research relevant to such disease or disorder; and

"(4) shall disseminate, to health professionals and the public, information on the cause, prevention, and treatment of such disease or disorder that has been developed in research assisted under this section.

The amount of an increase in a grant or contract provided under paragraph (3) may not exceed one-half the original amount of the grant or contract.

"(b) Not later than 90 days after the end of a fiscal year, the Secretary shall report to the Committee on Energy and Commerce of the House of Representatives and the Committee on Labor and Human Resources of the Senate on actions taken under subsection (a) in such fiscal year if any actions were taken under such subsection in such fiscal year.".

SEC. 4006. PEER REVIEW.

Subsection (b) of section 507 (as redesignated by section 4003(a) of this Act) is amended by inserting "applications made for" after "review of" in the matter preceding paragraph (1).

SEC. 4007. NATIONAL ALCOHOL RESEARCH CENTERS.

Section 511(b) is amended—

(1) by striking out "or rental" before "any land"; and

(2) by striking out "rental," before "purchase".

SEC. 4008. EXPANSION OF DRUG ABUSE RESEARCH.

Section 515(a) is amended—

(1) by striking out "and" after the semicolon in paragraph (4);

(2) by striking out paragraph (5) and inserting in lieu thereof the following:

"(5) effective methods of drug abuse prevention, treatment, and rehabilitation, particularly methods of intervention to treat abuse of specific drugs; and"; and

(3) by adding at the end thereof the following:

"(6) the development of chemical antidotes and narcotic antagonists for use in the treatment of cocaine and heroin addiction.".

SEC. 4009. RESEARCH AUTHORIZATION.

(a) Section 513 is amended to read as follows:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 513. There are authorized to be appropriated to carry out this subpart $69,000,000 for fiscal year 1987.".

(b) Section 517 is amended to read as follows:

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 517. There are authorized to be appropriated to carry out this subpart $129,000,000 for fiscal year 1987.".

SEC. 4010. SUICIDE.

(a) Section 504 is amended by adding at the end thereof the following new subsection:

"(h) The Director shall—

"(1) develop and publish information respecting the causes of suicide and the means of preventing suicide; and

"(2) make such information generally available to the public and health professionals.

Information developed, published, and distributed under this subsection shall especially relate to suicide among individuals under the age of 21.".

(b) Not later than one year after the date of enactment of this Act, the Director of the National Institute of Mental Health shall report to Committee on Labor and Human Resources of the Senate and the Committee on Energy and Commerce of the House of Representatives on the activities undertaken under section 504(h) of the Public Health Service Act and shall include in such report an assessment of the effectiveness of such activities.

SEC. 4011. MENTAL HEALTH NEEDS OF THE ELDERLY.

Section 504(c) is amended by adding at the end thereof the following: "Special consideration shall be given to programs for training and research on the mental health needs of the elderly.".

SEC. 4012. TECHNICAL AMENDMENT.

Section 504(e) is amended by striking out the period at the end of paragraph (2)(A) and inserting in lieu thereof a semicolon.

SEC. 4013. INFANT FORMULAS.

(a) Section 412 of the Federal Food, Drug, and Cosmetic Act is amended—

(1) by redesignating subsections (e), (f), and (g) as subsections (g), (h), and (i), respectively,

(2) by amending the last sentence of paragraph (1) of subsection (g) (as so redesignated) to read as follows: "Such records shall be retained for at least one year after the expiration of the shelf life of the infant formula.",

(3) by striking out "(a) and (b)" in the first sentence of subsection (h)(1) (as so redesignated) and inserting in lieu thereof "(a), (b), and (c)",

(4) by striking out "(c)(1)" in the second sentence of such subsection and inserting in lieu thereof "(e)(1)",

(5) by striking out "(e)(1)(B)" in such sentence and inserting in lieu thereof "d)(1)(B)",

(6) by striking out "(a) and (b)" in subsection (h)(2) (as so redesignated) and inserting in lieu thereof "(a), (b), and (c)", and

(7) by striking out subsections (a) through (d) and inserting in lieu thereof the following:

"(a) An infant formula, including an infant formula powder, shall be deemed to be adulterated if—

"(1) such infant formula does not provide nutrients as required by subsection (i),

"(2) such infant formula does not meet the quality factor requirements prescribed by the Secretary under subsection (b)(1), or

"(3) the processing of such infant formula is not in compliance with the good manufacturing practices and the quality control procedures prescribed by the Secretary under subsection (b)(2).

"(b)(1) The Secretary shall by regulation establish requirements for quality factors for infant formulas to the extent possible consistent with current scientific knowledge, including quality factor requirements for the nutrients required by subsection (i).

"(2)(A) The Secretary shall by regulation establish good manufacturing practices for infant formulas, including quality control procedures that the Secretary determines are necessary to assure that an infant formula provides nutrients in accordance with this subsection and subsection (i) and is manufactured in a manner designed to prevent adulteration of the infant formula.

"(B) The good manufacturing practices and quality control procedures prescribed by the Secretary under subparagraph (A) shall include requirements for—

"(i) the testing, in accordance with paragraph (3) and by the manufacturer of an infant formula or an agent of such manufacturer, of each batch of infant formula for each nutrient required by subsection (i) before the distribution of such batch.

"(ii) regularly scheduled testing, by the manufacturer of an infant formula or an agent of such manufacturer, of samples of infant formulas during the shelf life of such formulas to ensure that such formulas are in compliance with this section.

"(iii) in-process controls including, where necessary, testing required by good manufacturing practices designed to prevent adulteration of each batch of infant formula, and

"(iv) the conduct by the manufacturer of an infant formula or an agent of such manufacturer of regularly scheduled audits to determine that such manufacturer has complied with the regulations prescribed under subparagraph (A).

In prescribing requirements for audits under clause (iv), the Secretary shall provide that such audits be conducted by ap-

propriately trained individuals who do not have any direct responsibility for the manufacture or production of infant formula.

"(3)(A) At the final product stage, each batch of infant formula shall be tested for vitamin A, vitamin B1, vitamin C, and vitamin E to ensure that such infant formula is in compliance with the requirements of this subsection and subsection (i) relating to such vitamins.

"(B) Each nutrient premix used in the manufacture of an infant formula shall be tested for each relied upon nutrient required by subsection (i) which is contained in such premix to ensure that such premix is in compliance with its specifications or certifications by a premix supplier.

"(C) During the manufacturing process or at the final product stage and before distribution of an infant formula, an infant formula shall be tested for all nutrients required to be included in such formula by subsection (i) for which testing has not been conducted pursuant to subparagraph (A) or (B). Testing under this subparagraph shall be conducted to—

"(i) ensure that each batch of such infant formula is in compliance with the requirements of subsection (i) relating to such nutrients, and

"(ii) confirm that nutrients contained in any nutrient premix used in such infant formula are present in each batch of such infant formula in the proper concentration.

"(D) If the Secretary adds a nutrient to the list of nutrients in the table in subsection (i), the Secretary shall by regulation require that the manufacturer of an infant formula test each batch of such formula for such new nutrient in accordance with subparagraph (A), (B), or (C).

"(E) For purposes of this paragraph, the term 'final product stage' means the point in the manufacturing process, before distribution of an infant formula, at which an infant formula is homogenous and is not subject to further degradation.

"(4)(A) The Secretary shall by regulation establish requirements respecting the retention of records. Such requirements shall provide for—

"(i) the retention of all records necessary to demonstrate compliance with the good manufacturing practices and quality control procedures prescribed by the Secretary under paragraph (2), including records containing the results of all testing required under paragraph (2)(B),

"(ii) the retention of all certifications or guarantees of analysis by premix suppliers,

"(iii) the retention by a premix supplier of all records necessary to confirm the accuracy of all premix certifications and guarantees of analysis,

"(iv) the retention of—

"(I) all records pertaining to the microbiological quality and purity of raw materials used in infant formula powder and in finished infant formula, and

"(II) all records pertaining of food packaging materials which show that such materials do not cause an infant formula to be adulterated within the meaning of section 402(a)(2)(C).

"(v) the retention of all records of the results of regularly scheduled audits conducted pursuant to the reguirements prescribed by the Secretary under paragraph (2)(B)(iv), and

"(vi) the retention of all complaints and the maintenance of files with respect to, and the review of, complaints concerning infant formulas which may reveal the possible existence of a hazard to health.

"(B)(i) Records required under subparagraph (A) with respect to an infant formula shall be retained for at least one year after the expiration of the shelf life of such infant formula. Except as provided in clause (ii), such records shall be made available to the Secretary for review and duplication upon request of the Secretary.

"(ii) A manufacturer need only provide written assurances to the Secretary that the regularly scheduled audits required by paragraph (2)(B)(iv) are being conducted by the manufacturer, and need not make available to the Secretary the actual written reports of such audits.

"(c)(1) No person shall introduce or deliver for introduction into interstate commerce any new infant formula unless—

"(A) such person has, before introducing such new infant formula, or delivering such new infant formula for introduction, into interstate commerce, registered with the Secretary the name of such person, the place of business of such person, and all establishments at which such person intends to manufacture such new infant formula, and

"(B) such person has at least 90 days before marketing such new infant formula, made the submission to the Secretary required by subsection (c)(1).

"(2) For purposes of paragraph (1), the term 'new infant formula' includes—

"(A) an infant formula manufactured by a person which has not previously manufactured an infant formula, and

"(B) an infant formula manufactured by a person which has previously manufactured infant formula and in which there is a major change, in processing or formulation, from a current or any previous formulation produced by such manufacturer.

For purposes of this paragraph, the term 'major change' has the meaning given to such term in section 106.30(c)(2) of title 21, Code of Federal Regulations (as in effect on August 1, 1986), and guidelines issued thereunder.

"(d)(1) A person shall, with respect to any infant formula subject to subsection (c), make a submission to the Secretary which shall include—

"(A) the quantitative formulation of the infant formula,

"(B) a description of any reformulation of the formula or change in processing of the infant formula,

"(C) assurances that the infant formula will not be marketed unless it meets the requirements of subsections (b) (1) and (i), as demonstrated by the testing required under subsection (b)(3), and

"(D) assurances that the processing of the infant formula complies with subsection (b)(2).

"(2) After the first production of an infant formula subject to subsection (c), and before the introduction into interstate commerce of such formula, the manufacturer of such formula shall submit to the Secretary, in such form as may be prescribed by the Secretary, a written verification which summarizes test results and records demonstrating that such formula complies with the requirements of subsections (b)(1), (b)(2)(A), (b)(2)(B(i), (b)(2)(B)(iii), (b)(3)(A), (b)(3)(C), and (i).

"(3) If the manufacturer of an infant formula for commercial or charitable distribution for human consumption determines that a change in the formulation of the formula or a change in the processing of the formula may affect whether the formula is adulterated under subsection (a), the manufacturer shall, before the first processing of such formula, make the submission to the Secretary required by paragraph (1).

"(e)(1) If the manufacturer of an infant formula has knowledge which reasonably supports the conclusion that an infant formula which has been processed by the manufacturer and which has left an establishment subject to the control of the manufacturer—

"(A) may not provide the nutrients required by subsection (i), or

"(B) may be otherwise adulterated or misbranded, the manufacturer shall promptly notify the Secretary of such knowledge. If the Secretary determines that the infant formula presents a risk to human health, the manufacturer shall immediately take all actions necessary to recall shipments of such infant formula from all wholesale and retail establishments, consistent with recall regulations and guidelines issued by the Secretary.

"(2) For purposes of paragraph (1), the term 'knowledge' as applied to a manufacturer means (A) the actual knowledge that the manufacturer had, or (B) the knowledge which a reasonable person would have had under like circumstances or which would have been obtained upon the exercise of due care.

"(f)(1) If a recall of infant formula is begun by a manufacturer, the recall shall be carried out in accordance with such requirements as the Secretary shall prescribe under paragraph (2) and—

"(A) the Secretary shall, not later than the 15th day after the beginning of such recall and at least once every 15 days thereafter until the recall is terminated, review the actions taken under the recall to determine whether the recall meets the requirements prescribed under paragraph (2), and

"(B) the manufacturer shall, not later than the 14th day after the beginning of such retail and at least once every 14 days thereafter until the recall is terminated, report to the Secretary the actions taken to implement the recall.

"(2) The Secretary shall by regulation prescribe the scope and extent of recalls of infant formulas necessary and appropriate for the degree of risks to human health presented by the formula subject to the recall.

"(3) The Secretary shall by regulation require each manufacturer of an infant formula who begins a recall of such formula because of a risk to human health to request each retail establishment at which such formula is sold or available for sale to post at the point of purchase of such formula a notice of such recall at such establishment for such time that the Secretary determines necessary to inform the public of such recall.".

(b)(1) Subsection (1) of such section (as so redesignated) is amended—

(A) by inserting "(1)" after "(i)",

(B) by striking out "subsection (a)" and inserting in lieu thereof "paragraph",

(C) by striking out the colon and inserting in lieu thereof a period, and

(D) by adding at the end the following:

"(2) The Secretary may by regulation—

"(A) revise the list of nutrients in the table in this subsection, and

"(B) revise the required level for any nutrient required by the table.".

(2) Section 301(s) of the Federal Food, Drug, and Cosmetic Act is amended to read as follows:

"(s) The failure to provide the notice required by section 412(c) or 412(d), the failure to make the reports required by section

412(f)(1)(B), the failure to retain the records required by section 412(b)(4), or the failure to meet the requirements prescribed under section 412(f)(3).".

SEC. 4014. STUDY ON ALKYL AND BUTYL NITRITES.

The Secretary of Health and Human Services, through the Commissioner of Food and Drugs, should conduct a study on alkyl and butyl nitrites and report to the appropriate committees of the Congress recommendations concerning whether alkyl and butyl nitrites should be treated as a drug under the Federal Food, Drug, and Cosmetic Act.

SEC. 4015. SENSE OF THE SENATE WITH RESPECT TO POSSESSION OR DISTRIBUTION OF DRUGS UNDER STATE LAW.

It is the sense of the Senate that, if the possession or distribution of a drug is an offense under the Controlled Substances Act, the laws of the States should not be amended or revised to provide that the possession or distribution, respectively, of such drug is not a criminal offense.

SEC. 4016. STUDIES ON HEALTH WARNING LABELS FOR ALCOHOLIC BEVERAGES.

(a) The Senate finds that—

(1) the most abused drug in America alcohol;

(2) alcohol abuse costs the American economy nearly $120,000,000,000 per year, including increased medical expenses and decreased productivity;

(3) in 1984, 53 percent of the traffic fatalities in the United States, accounting for more than 23,500 deaths, were related to the consumption of alcohol;

(4) over 12,000,000 American adults have one or more symptoms of alcoholism, and this represents an 8.2 percent increase in problem drinking since 1980;

(5) in 1984, almost 3,300,000 individuals between the ages of 14 and 17 experienced serious problems at home, in school, or with the law because of alcohol consumption;

(6) fetal alcohol syndrome is the third leading cause of birth defects, and is the only preventable cause of birth defects among the top three causes;

(7) nearly 5,000 babies per year are born with birth defects related to fetal alcohol syndrome;

(8) the statistics cited in the preceding paragraphs of this subsection indicate that many Americans are not aware of the adverse effects that the abuse of alcoholic beverages may have on health;

(9) it is necessary to undertake a serious national effort to educate the American people of the serious consequences of alcohol abuse; and

(10) carefully drafted warning labels on the containers of alcoholic beverages concerning serious health consequences resulting from the abuse of alcohol may assist in providing such education.

(b) Therefore, it is the sense of the Senate that—

(1) the Public Health Service should focus attention on the problem of educating the American people on the serious health consequences of alcohol abuse;

(2) the Public Health Service should review available knowledge and conduct studies to assess the most effective means of providing such education, including an assessment of the potential educational impact of health warning labels on the containers of alcoholic beverages; and

(3) the Public Health Service should transmit a report to the Congress within 6 months after the date of enactment of this Act concerning any activities described in paragraph (2) which have been undertaken, and should include in such report any findings respecting the impact and potential benefits of displaying health warnings on the containers of alcoholic beverages and recommendations for specific language for such labels.

SEC. 4017. EFFORTS OF THE ENTERTAINMENT AND WRITTEN MEDIA INDUSTRY.

It is the sense of Congress that—

(1) whereas illegal drug and alcohol consumption and the trafficking in those illegal drugs and alcohol is a major problem in the United States,

(2) whereas the problem of alcohol abuse is particularly prevalent among and harmful to the Nation's young people, and

(3) whereas the values and mores portrayed in various forms of commercially produced entertainment have a profound effect on the attitudes of young people in this country,

the entertainment and written media industry should refrain from producing material meant for general entertainment which in any way glamorizes or encourages the use of illegal drugs and alcohol and the entertainment and written media industry should develop films, television programs, records, videos, and advertising which discourage the use of illegal drugs and alcohol.

SEC. 4018. SENSE OF THE CONGRESS URGING THE CATEGORIZATION OF FILMS WHICH PROMOTE ALCOHOL ABUSE AND DRUG USE.

(a) The Congress finds that—

(1) the abuse of alcohol and the use of drugs has become a societal problem of epidemic proportions,

(2) it is in the interest of all citizens to contribute to the reduction of alcohol abuse and drug use, particularly among youth,

(3) the entertainment industry, particularly the motion picture industry's production of youth-oriented films, often depicts alcohol abuse and drug use in a benign, even glamorous way,

(4) the motion picture industry has a profound impact of societal norms and is a powerful medium which exerts great influence on the values of youth, and

(5) the motion picture industry has recognized the need to inform parents about the contents of movies regarding violence, sex, language, and nudity and therefore currently employs a voluntary rating system.

(b) It is the sense of the Congress that the Motion Picture Association of America should incorporate a new rating in its voluntary movie rating system to clearly identify films which depict alcohol abuse and drug use.

In section 4122(a)(2) of the amendment, insert after "counselors" a comma and the following: "athletic directors".

In section 4125(a) of the amendment, strike out clauses (D) through (I) and insert in lieu thereof the following:

(D) programs of in-service and pre-service training in drug abuse and alcohol abuse prevention for teachers, counselors, athletic directors, and other educational personnel, public service personnel (including law enforcement officials), and community leaders, including cooperative programs with higher education institutions;

(E) programs in primary prevention and early intervention, such as the interdisciplinary school-team approach developed by the Department of Education;

(F) community education programs and other activities to involve parents and communities in the fight against drug abuse and alcohol abuse;

(G) public education programs on drug abuse and alcohol abuse, including programs utilizing professionals, and former drug abusers and alcohol abusers and drug dependent and alcohol dependent individuals;

(H) special programs and activities to prevent drug and alcohol abuse among student athletes, involving their parents and families in such efforts and using athletic programs and personnel to prevent drug and alcohol abuse among all students;

(I) on-site efforts in schools to enhance identification and discipline of such drug abusers and alcohol users, and to enable law officials to take necessary action in cases of drug possession and of drug and alcohol supplying to the student population; or

(J) other programs of drug abuse and alcohol abuse education and prevention consistent with the purposes of this subtitle.

In section 4125(a) of the amendment, strike out clauses (D) through (I) and insert in lieu thereof the following:

(D) programs of in-service and pre-service training in drug abuse and alcohol abuse prevention for teachers, counselors, athletic directors, and other educational personnel, public service personnel (including law enforcement officials), and community leaders, including cooperative programs with higher education institutions;

(E) programs in primary prevention and early intervention, such as the interdisciplinary school-team approach developed by the Department of Education;

(F) community education programs and other activities to involve parents and communities in the fight against drug abuse and alcohol abuse;

(G) public education programs on drug abuse and alcohol abuse, including programs utilizing professionals, and former drug abusers and alcohol abusers and drug dependent and alcohol dependent individuals;

(H) special programs and activities to prevent drug and alcohol abuse among student athletes, involving their parents and families in such efforts and using athletic programs and personnel to prevent drug and alcohol abuse among all students;

(I) on-site efforts in schools to enhance identification and discipline of such drug abusers and alcohol users, and to enable law officials to take necessary action in cases of drug possession and of drug and alcohol supplying to the student population; or

(J) other programs of drug abuse and alcohol abuse education and prevention consistent with the purposes of this subtitle.

In section 4122(a)(2) of the amendment, insert after "counselors" a comma and the following: "athletic directors".

On page 432, strike all beginning with "verifying" on line 7 through "with respect to," on line 8 and insert in lieu thereof "making aid available to".

On page 432, lines 14 and 15, strike "verifying the eligibility of, and".

In section 12004(a)—

(1) strike "and" at the end of paragraph (9);

(2) strike the period at the end of paragraph (10) and insert in lieu thereof a semicolon; and

(3) add immediately after paragraph (10) the following:

(11) establish requirements for the disqualification of any person operating a commercial motor vehicle for a period of not less than 60 days who, in a 3-year period, is found to have committed two serious traffic violations involving a commercial motor vehicle operated by such person; and

(12) establish requirements for the disqualification of any person operating a commercial motor vehicle for a period of not less than 120 days who, in a 3-year period, is found to have committed three serious traffic violations involving a commercial motor vehicle operated by such person.

In section 12006(10), strike all after "section" and insert in lieu thereof "12004(a)(5), (6), (7), (11) and (12) of this title.".

Strike out section 4023.

On page 548, line 12, strike "both within and outside" and insert "within."

On page 73, line 10, after the word "property.", insert the following: "Such property when forfeited pursuant to subsection (a)(1)(B) of this section may also be transferred to a foreign country pursuant to a treaty providing for the transfer of forfeited property to such foreign country. A decision by the Attorney General pursuant to this paragraph shall not be subject to review."

On page 548, strike lines 14-20.

ADDITIONAL STATEMENTS

THE REMAINING CHALLENGES OF TEXTILE POLICY

● Mr. HART. Mr. President, the textile and apparel industries' problems are more severe than any recitation of unemployment or falling market share statistics can convey. The human cost is paid in broken families, lost homes, educations cut short, and productive lives shortchanged. And this tragedy affects industries across this land.

Workers in steel, machine tools, electronics, automobiles, and others are paying the price for the absence of national leadership on trade. The problem isn't limited to manufacturing workers—our Nation's farmers face a trade crisis that is costing their livelihoods and their land.

We need to take action. Recently, the House of Representatives declined to override the President's veto of the textile bill. But the issue does not end there. We still need a policy to ensure a competitive textile and apparel industry. We still need to replace this administration's laissez-faire trade policy with an active commitment to make our Nation's industries competitive.

Our choice is not, as some would have it, between doing nothing on the one hand, and protectionism on the other. There is a third and immeasurably better course. We should, simply, get competitive.

What steps are needed to get competitive in the textile industry? First and foremost, we need to stop making our textile, apparel and other trade sensitive industries pay for the irresponsible fiscal policies of the past 5 years. The overvalued dollar taxed our exports and subsidized our competitors. The current, long overdue decline of the dollar will help some, but as long as the fundamental problem—sky high deficits—remains, we will be leaving ourselves open to repeating the recent past.

We need other economic reforms as well. The international monetary system needs to be restructured. The debt crisis faced by the developing world has stymied all American exporters, including the textile and apparel industries. Indeed, while much attention has been paid to the problem of rising textile and apparel imports, many fail to note that exports of American textile and apparel products have dropped by 40 percent since 1981. And the developing world accounts for more than half of the export market. Until these markets are freed of a debt burden that forces them to sell their products here at cutrate prices and prevents them from buying ours, we will see trade problems grow in industry after industry.

I have laid out a general trade and competitiveness strategy in the Competitive America Trade Act, cosponsored by my colleagues Senators BRADLEY and NUNN. This approach will help ensure that fair trade can grow. But it recognizes we can't do it all by ourselves. We've got to get tough on those foreign producers who would ignore fair trading practices. We don't need to turn to blanket protectionism. What we instead need is the reform and enforcement of our trade laws.

Title III of my trade bill would streamline our trade laws and make enforcement automatic. It would establish a clear definition of what constitutes an unfair trade practice and then make enforcement mandatory. When we find that a country has violated the law, the President shouldn't be able to back off on imposing penalties, except when true national security is at stake or when real progress is being negotiated. Perhaps most important for the textile and apparel industries, we need to increase funds for the Customs Service, not slash them—either as the administration has proposed in every budget it has submitted or in the haphazard and senseless way contemplated by Gramm-Rudman.

The textile and apparel industry would benefit greatly from a sensible and comprehensive trade policy. Clear and strong enforcement of streamlined trade laws would bring the worst abuses of our market to a quick halt. New technologies can continue to be developed with the assistance of joint business-Government research. Training programs can be designed to ensure that technology leads to better jobs, not the unemployment line, for current textile and apparel workers. But this may not be enough.

We need a coordinated policy toward the textile and apparel industries. An Office of Textile Enforcement under the Special Trade Representative could serve as a useful focus point. The National Science Foundation and the National Bureau of Standards should be engaging in cooperative research with the industry. Pursuing real reforms in the MFA and GATT treaties is critical.

What is needed is a positive program. We must make clear to the President that we don't subscribe to laissez faire, "let it happen," economic theology. We believe in aidez faire—which means, literally, "to make it happen." We need a policy to help us master the forces of economic change and to use those forces to America's advantage.

Trade policy is a key aspect of international relations and foreign policy.

This Senator recently delivered three lectures on the broad scope of foreign policy and made the following observation:

> If our alliances and friendships are to survive the next few decades, we must remember this: protectionism is isolationism—no less dangerous to our people or our alliances or our collective security than the isolationism of the 1930's. The economic pain that many of our people feel because of trade is real, as are the flaws in the world's trading system. But we must address these flaws directly, not paper them over with . . . trade restrictions that would suffocate prosperity and alliance.

Mr. President, I would urge all Senators to work cooperatively on the trade issue. An effective competitiveness policy would be good for workers, consumers, trade sensitive industries and the foreign policy of the United States.●

RAIL-TRUCK ACQUISITIONS

● Mr. DANFORTH. Mr. President, this bill includes a provision designed to clarify the standards to be used by the Interstate Commerce Commission [ICC] in certain cases in which a rail carrier requests authority to acquire a motor carrier. Under this amendment, the ICC—as well as any court reviewing the ICC's action—would be required to follow the standards set forth in Ex parte 438 in three categories of cases. By following Ex parte 438, the controlling standard for review of the acquisition would be whether the acquisition will enable the rail carrier to improve its overall transportation operations, rather than just its rail operations.

This provision would cover, first, cases where a rail carrier filed an application with the ICC between July 20, 1984, and September 30, 1986, to acquire a motor carrier; second, cases where a rail carrier entered into a contract or signed a letter of intent during that period to acquire a motor carrier; and, third, cases where a rail carrier made a public tender offer during that period to acquire a motor carrier. For these purposes, a rail carrier includes any person controlled by or affiliated with a rail carrier.

This amendment is necessary because recently the U.S. Court of Appeals for the District of Columbia

ruled in the Norfolk Southern/North American Van Lines acquisition case that the ICC must limit its consideration to whether the rail carrier's acquisition of the motor carrier will improve its rail service. This is an overly strict interpretation of the law. Under this amendment, the ICC would be required to apply the broader overall transportation operations standard when it reconsiders the North American Van Lines acquisition case, as well as when it considers other categories of cases.

I urge my colleagues to support the provision.

Mr. FORD. Does section 3403, the provision on ICC review of motor carrier acquisitions, address section 11343 of title 49 as well as section 11344?

Mr. DANFORTH. No; the only section that needs to be addressed is section 11344. That section was the subject of a recent court decision that overruled the ICC policy change that had been relied on by the parties. This provision of the bill reinstates the standards applied by the ICC for certain limited cases.

Mr. FORD. What, then, is the status of the ICC exemption decisions under section 11343(e)?

Mr. DANFORTH. The exemption decisions under section 11343 are not directly affected in any way by this provision. Those decisions however are entirely consistent with the ICC policy statement under section 11344, consistent with this provision of the bill, and I believe accurately reflect congressional intent regarding the standards to be used in section 11343 exemption proceedings.●

NAUM AND INNA MEIMAN: TRAPPED

● Mr. SIMON. Mr. President, the importance of arms control cannot be overestimated. Human rights, too, cannot receive enough attention. I was disappointed, therefore, that human rights did not receive much attention at the Reykjavik meeting.

Perhaps the case of my friends Naum and Inna Meiman could have been resolved at the meeting. The Meimans are Soviet citizens trapped behind the bars of the Iron Curtain. Inna suffers from a rare type of cancer. After the removal of four tumors from her neck, the Soviet doctors feel they can do no more for her fifth and most recent tumor. All the Meimans want is to be permitted to emigrate to the West where there is experimental treatment available to Inna.

I implore the Soviet Union to allow the Meimans to emigrate to Israel.●

ALPHA DELTA KAPPA WEEK

● Mr. PELL. Mr. President, this week, October 12-18, we celebrate Alpha Delta Kappa Week. It is with great pleasure that I stand in this Chamber to pay tribute to the Alpha Delta Kappa sorority for women educators. This year marks the 39th anniversary of this important institution, which is recognized worldwide.

The Alpha Delta Kappa sorority has more than 104,000 members in 1,913 local chapters throughout this country and also has chapters in 8 foreign nations. My home State of Rhode Island in fact now boasts eight energetic chapters.

This sorority is dedicated to the highest professional standards for its members. Its activities include the recognition of outstanding women educators, and promoting charitable projects including college scholarships. The most important function of this excellent organization, however, is the close fraternal fellowship it establishes among women in the teaching profession, and the goal it sets of teaching excellence.

I would urge my colleagues to join me in celebration of Alpha Delta Kappa Week. For, this week we not only celebrate the anniversary of this sorority; we also recognize the fine work and dedication of its members, and the outstanding contribution they make to the education of our society.●

SENATE IMPEACHMENT TRIAL OF JUDGE HARRY E. CLAIBORNE

● Mr. BUMPERS. Mr. President, on October 10, 1986, the Senate completed the impeachment trial of Harry E. Claiborne, U.S. district judge for the district of Nevada, finding the judge guilty under three of the four Articles of Impeachment presented by the House of Representatives.

I voted guilty on all four Articles, and I take this opportunity to set forth my reasoning and some comments concerning the trial.

Article II, Section 4 of the U.S. Constitution provides that "all civil Officers of the United States shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors." Article I provides that the House of Representatives shall have the sole power of impeachment and that the Senate shall have the sole power to try all impeachments.

On August 10, 1984, in the U.S. District Court for the District of Nevada, Judge Harry E. Claiborne, while serving as a judge of the U.S. District Court for the District of Nevada, was found guilty by a 12-person jury of making and subscribing a false and fraudulent income tax return for the calendar years 1979 and 1980, and in violation of section 7206(1) of title 26, United States Code. A judgment of conviction was entered against Judge Claiborne for each violation of section 7206(1), and a sentence of 2 years imprisonment for each violation was imposed, to be served concurrently, together with a fine of $5,000 for each violation. The U.S. Court of Appeals for the Ninth Circuit affirmed the conviction, and the U.S. Supreme Court denied defendant's petition for a writ of certiorari. Judge Claiborne began serving his sentence last May at the Federal prison at Maxwell Air Force Base in Alabama. He refused to resign from office and continued to draw his $78,700 judge's annual salary up until his removal from office by the Senate.

The House of Representatives has adopted four Articles of Impeachment against Judge Claiborne for misbehavior and for his crimes and misdemeanors while in office. Those articles, exhibited in House Resolution 461, were passed unanimously by the House on July 22, 1986. The Senate sat as a Court of Impeachment on October 7 through 9, 1986, to determine whether Judge Claiborne was guilty or not guilty of each of the charges stated in the Articles of Impeachment.

First, I think it important to note that impeachment trials in the Senate are sui generis. The Senate, while sitting as a Court of Impeachment, is not bound by the rules of evidence or any other rules of procedure followed in Federal courts. The Senate has adopted its own rules of practice and procedure to be followed in impeachment trials. Under rule XI of those rules, the Senate may choose to appoint a committee of Senators to receive evidence and take testimony during the Senate's consideration of the Articles of Impeachment. Pursuant to this rule, a 12-member, bipartisan committee was appointed by the presiding officer.

That committee, chaired by the distinguished senior Senator from Maryland, Senator MATHIAS, received evidence and took testimony from several witnesses during 7 days of meetings. The committee provided a full record of these proceedings to the Senate. After studying this evidentiary record and listening carefully to the comments of my colleagues who served on the committee as well as the argument by the distinguished managers on the part of the House and by both the respondent and his counsel, I determined that Judge Claiborne should be found guilty under each Article of Impeachment.

Articles I and II charge Judge Claiborne with willfully and knowingly filing false income tax returns for the years 1979 and 1980. Under 28 U.S.C. section 2706(1), any person who willfully makes and subscribes any tax return, under penalties of perjury, which he does not believe to be true and correct as to every material matter is guilty of a felony offense. In *United States* v. *Pomponio*, 429 U.S. 10 (1976), the Supreme Court held that willfulness as used in section 2706(1) simply means a "voluntary, intention-

al violation of a known legal duty." The Court has held that the taxpayer's intent can be inferred from a variety of factors, including evidence of surreptitious cash transactions, inadequate recordkeeping, withholding of material information from the taxpayer's bookkeepers by providing only summary sheets of records in question, and the substantial understatement of taxable income for the years in question. *United States* v. *Hughes*, 766 F. 2d 875, 877-878 (5th Cir. 1985).

I note that the respondent was tried twice on the charge of income tax evasion. In his first trial, he was charged with acceptance of certain bribes in addition to the income tax charges, and the jury was unable to reach a verdict. Upon retrial, the Government elected to drop the charges pertaining to bribery and pursue only the income tax charges.

The evidence presented at Judge Claiborne's second trial, as well as evidence reported by the Senate Impeachment Trial Committee, overwhelmingly supports the finding of willfulness.

Judge Claiborne admits that he kept faulty records and provided his accountants with summary sheets and that he cashed very large checks at local casinos, a change from his previous practice of depositing such checks in banks. He underreported his income for the years in question by over $100,000. In his own words, the tax return, at least for the year 1980, was "abominable." Filing a false return is a felony offense, and thus an impeachable offense. Therefore, I voted "guilty" on both Article I and II, which essentially restate the underlying facts which were the basis of his conviction on two counts of violation of Sec. 2706(1).

Article IV charges that Judge Claiborne, by willfully and knowingly filing false income tax returns and having been convicted of the same while serving as a judge of the U.S. District Court for the District of Nevada, has betrayed the trust of the people of the United States and reduced confidence in the integrity and impartiality of the judiciary. Judge Claiborne has undoubtedly brought disrepute on the Federal courts by refusing to resign his post following his conviction and by continuing to draw his salary while serving his prison term. Public confidence in the Federal judiciary is essential to both the administration of justice and to the preservation of our freedoms which are, in the last analysis, protected by the courts under Article IV of our Constitution. Therefore, I also voted "guilty" on this Article.

I would note that Judge Claiborne was convicted under each of Articles I, II and IV by an overwhelming majority of Senators.

Article III, the only Article under which Judge Claiborne was not convicted by a two-thirds vote in the Senate, presented the Senate with a peculiar question on precedent for future Senate impeachment trials. I write separately to emphasize my views of both the meaning and the limits of the Senate's decisions with respect to the third Article. Article III asserts that Judge Claiborne should be impeached by the Senate because he has been convicted in the district court of filing a false income tax return.

Some Senators obviously believed that had the Senate voted to convict Judge Claiborne under this Article, this could possibly have established an unwanted and unwarranted precedent for future impeachment proceedings. They believed that adopting the standard set forth in Article III would suggest that a conviction by the judicial branch should establish incontrovertible grounds for impeachment in the legislative branch, and that such a standard would overlook the constitutional standard for impeachment established in Articles I and II of the Constitution, which states that the Senate shall have the sole power to try all impeachments.

Conversely, a jury's acquittal of a criminal charge is by no means preclusive of any finding of guilt by the Senate in the event of a subsequent impeachment by the House. The Senate could take judicial notice that an investigation is currently pending in the Court of Appeals for the 11th Circuit against a district judge on conduct for which that judge was tried and acquitted by a jury, but which may cause the House to bring impeachment proceedings against that judge.

The Senate's decisive vote against the respondent's motion to establish guilt beyond a reasonable doubt as the Senate's standard of proof in trying impeachments indicates the desire of this body to retain the independent nature of the impeachment process. While this clearly is an essential component of due process in the criminal justice system, it has no place in the constitutionally distinct process of impeachment.

The vote on this Article was a difficult one for me, but I voted to find Judge Claiborne guilty under Article III as well because I believe that there was a sufficient amount, indeed, an overwhelming amount, of evidence to support his conviction under this Article. However, I was troubled by allegations of new evidence presented to the Senate Impeachment Trial Committee, as well as by the opinions of the three circuit judges who dissented from the order denying Judge Claiborne's petition or rehearing en banc.

Those judges referred to exculpatory evidence which was allegedly withheld from the defense in violation of *Brady* v. *Maryland*, 373 U.S. 83 (1963) and statements by prosecution witnesses requested under the Jencks Act. That evidence pointed to allegedly improper activity on the part of FBI agents assigned to the agency's Strike Force on Organized Crime and other Federal agents operating in Las Vegas.

The judge's allegations of official misconduct are deeply troubling, but they do not undercut the overwhelming evidence of the respondent's guilt. Therefore, I will support the resolution to be offered by Senator PRYOR which will call for a full investigation of strike-force type acivities carried out by Federal law enforcement and intelligence agencies. These Government agencies are, of course, not above the law, and if their activities unfairly deprive citizens, whether they be Federal officers or not, of their constitutional rights, then those activities should be eradicated.●

GRAMM-RUDMAN-HOLLINGS

● Mr. MOYNIHAN. Mr. President, I wish to note some of the more recent effects of the Gramm-Rudman-Hollings law.

Gramm-Rudman-Hollings has not brought the solutions to the deficit crisis that were promised last fall. I cannot say that I am surprised. Instead of decreasing the deficit by magic, or presenting so draconian an alternative that Congress would be forced to undertake responsible deficit reduction, GRH has instead resulted in broken promises and the proliferation of budget gimmickry.

If we have learned anything in the last year, it is that there is no substitute in budgeting for leadership, setting priorities, and making choices. John F. Kennedy was fond of saying: "To govern is to choose." He was right.

The law mandates a declining series of deficit ceilings: $171.9 billion in fiscal year 1986, $144 billion in fiscal year 1987, $108 billion in fiscal year 1988, $72 billion in fiscal year 1989, $36 billion in fiscal year 1990, and $0 in fiscal year 1991.

Despite the inclusion in the law of a deficit target of $171.9 billion for fiscal year 1986, it was understood that such a target could not be reached. By the time a final agreement on GRH was reached last December, the authorizing appropriations processes were near completion, and nearly a quarter of the fiscal year had passed. So, instead citizens were promised a deficit of $208 billion for fiscal year 1986.

That promise was not kept. The deficit for fiscal year 1986 is estimated to be between $224 billion and $230 billion—higher than the deficit estimate prior to the March 1, 1986, sequester of $11.7 billion.

For fiscal year 1987, GRH promised a deficit of $144 billion. We now find that the deficit need be reduced only to $154 billion to meet the terms of the law.

How will we get there? We saved $680 million in fiscal year 1987 when the Treasury Department advanced the payment of the final quarter of general revenue sharing by 5 days, thus increasing the fiscal year 1986 deficit by $680 million, and reducing the fiscal year 1987 deficit the same amount. I should note that the Treasury did no act on its own. The Department took that action only after the Senate passed a reconciliation bill including such a provision.

What else will we do? According to an article in the October 4 Congressional Quarterly, it seems likely that the Defense authorization bill, if we indeed have one, will delay all paydays 1 day so that the disbursement currently scheduled for September 30, 1987, will occur on October 1, 1987. As a result, $2.9 billion of outlays will be charged to fiscal year 1988 instead of fiscal year 1987. It is also likely that operations and maintenance accounts for the Department of Defense will be cut in large part because in such accounts, cuts in budget authority lead to approximately equal reductions in outlays.

We will take advantage of an $11 billion windfall to the Treasury in fiscal year 1987 due to tax reform bill.

Despite all this, at the end of fiscal year 1987, I expect that we will not even come close to a $154 billion deficit. Economic growth will likely be less the rate assumed in the GRH deficit forecast, and outlays for farm programs and the FDIC will be higher than currently expected. The deficit will much more likely be in the $180 to $200 billion range for fiscal year 1987.

Next year we will have to reduce the deficit some $70 or $80 or $90 billion to meet the next GRH target of $108 billion.

If history is a guide, I suspect that after we realize that we have missed the fiscal year 1987 deficit targets, we will begin to advance expenditures due to be made in fiscal year 1988 into fiscal year 1987 to help reach the otherwise unreachable target for fiscal year 1988. And so we will go, until we recognize the folly of Gramm-Rudman-Hollings, and scrap the law instead of spending our time inventing new ways to make it look like we're following the rules.

I ask that on op-ed written by Prof. Benjamin M. Friedman, which appeared in the October 18 New York Times, and an editorial which appeared in the New York Times on October 14 appear in the RECORD at this point.

The material follows:

[From the New York Times, Oct. 13, 1986]

GRAMM-RUDMAN: A SHAM

(By Benjamin M. Friedman)

CAMBRIDGE, MASS.—The Gramm-Rudman-Hollings deficit reduction law has become a sham. Sooner or later, Americans will discover that the legislation that was supposed to halt the spiraling Federal deficit is merely covering it up. When they do, they are likely to be angry. They should be.

Congress passed the bill last year in response to growing public awareness that two of the Reagan Administration's most persistently argued claims were simply not correct. First, despite yearly predictions to the contrary, tax cuts have not unleased any surge of economic growth to narrow the Government's deficit. Instead, business has expanded at an average pace and the deficit has surged.

Second, despite repeated reassurances of growth from Donald Regan, the former Treasury Secretary, and on occasion from President Reagan, Government deficits have impaired the economy's productivity growth and international competitiveness. Interest rates have fallen but remain extraordinarily high in relation to inflation. As a result, investment is sluggish in most industries. The dollar has fallen against foreign currencies but remains historically high, and now not just manufacturers but farmers also cannot compete against foreign sellers.

The deficit reduction law was supposed to change all that. After four record deficits since 1981, culminating with a $212 billion deficit in fiscal year 1985, the Gramm-Rudman-Hollings law mandated deficits of no more than $172 billion for 1986, $144 billion in 1987 and so on down to a balanced budget in 1991. The device for achieving this miracle was supposed to be spending cuts, split evenly between defense and non-defense programs other than Social Security. Even President Reagan hailed the law as a good solution.

It is now clear the Gramm-Rudman-Hollings act has solved nothing. It's easy to blame the Supreme Court, because it ruled invalid the provision mandating across-the-board spending cuts. But even if the Court had left that alone, lawmakers would have found a way to circumvent it rather than make unpopular cuts.

The Government's 1986 fiscal year ended last month with an estimated deficit of $222 billion—yet another new all-time record, an even $50 billion above the target level set by the deficit reduction law.

Now Congress is struggling to set the budget for fiscal 1987. Last week, the Congressional Budget Office and the Office of Management and Budget jointly reported that Congress needed to cut spending by only $19 billion to narrow the deficit to the mandated level. In the end, Congress will instead probably point to a temporary increase in revenues expected as a result of technicalities in the new tax law, in order to claim that the deficit will be within the legal limit. All this comes from the same people who said last year's tax and spending plans were consistent with a $172 billion deficit.

The reality is different from such silliness. Today, an optimist is anyone who thinks the first digit in next year's budget deficit will be a one. No one seriously believes the 1987 deficit will be anything close to $144 billion, because there are no real plans—more importantly, there is no political will—to make that happen.

The Gramm-Rudman-Hollings law is not just ineffective, it is counterproductive. Last year, it took the heat off the President and Congress by letting everyone claim the deficit problem had been solved. This year, Congress and the President will likely escape political pressures by devising a way to pretend that the deficit will be within the legislated limit.

Meanwhile, the combination of tax and spending policies now in place is bleeding our economy's strength and dissipating its prospects. We cannot put off indefinitely the tough choices. We must resolve the issue of defense versus non-defense spending priorities, address hard questions, like what to do about the explosion in farm support payments, and accept a level of taxes not wholly inconsistent with the spending level we choose.

Instead of seriously addressing these tough choices, President Reagan and many in Congress will focus the public's anger on a debate about the technicalities of the deficit reduction law. Legislating mechanical devices is no substitute for facing the hard issues. An unproductive debate would probably lead to a renewed call for a constitutional amendment to balance the budget. That would only delay tough decisions for another five years until everyone finally realizes the amendment worked no better than the deficit reduction law.

[From the New York Times, Oct. 14, 1986]

BUDGET DEADLINE? WHAT DEADLINE?

The Gramm-Rudman-Hollings law to balance the Federal budget was supposed to make Congress discipline itself. As it ignored the law's final deadline for fiscal 1987 last Friday, Congress made clear that it is complying about as well as a teen-ager told to enforce his own curfew.

Congress began the charade by adopting forecasts that the deficit would drop to $173 billion in fiscal 1986, just ended. Instead it rose to some $220 billion. The new law called for more cuts in a 1987 budget to be enacted by Oct. 1. But Congress came up with no budget at all and is still at work on a monster bill that recklessly puts more than $550 billion of appropriations to a single vote. Only by inflating revenue estimates and squeezing spending estimates will it fabricate a $154 billion deficit.

President Reagan's budget office has joined in verifying the fiction that this will meet the law's target. But the law itself says if the target isn't met by Oct. 10, Congress must vote on a bill to cut spending across the board. Silently, everyone just let that deadline go by.

Meanwhile, Senators Gramm, Rudman and Hollings want to fix the part of the law ruled unconstitutional by the Supreme Court. It would have had the Comptroller General impose automatic spending cuts if Congress missed the deficit target. The Senators would now shift the automatic power to the President's Budget Director.

Such an erosion of Congressional authority might satisfy the Court but would make for a dubious technical fix. It would hardly undo the larger damage: in 10 months as law, this scheme has wrecked due budget process and failed as discipline. It is highly unlikely that the 99th Congress would admit error and scrap this exercise in fiscal fantasy. Let voters measure candidates for the 100th by their attention to reality.●

U.S. MACHINE TOOL 232 PETITION

● Mr. GRASSLEY. Mr. President, I know that, last May, many of my colleagues joined me in applauding the President's long-awaited decision to seek voluntary restraint agreements on certain machine-tool imports with the Governments of Japan, Switzerland, Taiwan, and West Germany. The President's national security directive was issued in response to the U.S. machine-tool industry's 232 petition—submitted to the Secretary of Commerce in March 1983 and forwarded by him to the White House in February 1984. It was based upon the Secretary's finding that machine-tool imports pose a very real threat to U.S. national security. I was gratified that the President finally recognized the machine-tool industry for exactly what it is: a small yet essential component of the U.S. defense base.

But I want my colleagues to understand that the issue is far from over. It has been nearly 5 months since the President's decision, and, while I understand that negotiations are underway, no agreements have yet been reached. I intend to continue to follow the course of these negotiations very carefully and, if our trading partners are unwilling to cooperate with us to help maintain this critical element of our defense base, I will strongly urge the President to assert his statutory authority under section 232 and impose mandatory quotas. There is simply too much at stake to let these negotiations drag on interminably. And if the need for Presidential action goes unfulfilled. I am confident that my colleagues will join me in developing an appropriate legislative response.

Mr. HEINZ. If the Senator will yield. I would like to indicate my wholehearted agreement with his concerns. I, too, was appalled at the unconscionable delay which has characterized the administration's response to the machine-tool industry's efforts to secure temporary import relief. I am relieved that our Government is now actively involved in efforts to address the compromise to our national security currently being posed by machine-tool imports. But the Senator from Iowa is correct—the need for import restraints has been firmly established. Whether those restaints will be voluntary or mandatory remains to be seen: that restraints will be imposed is not in question. Our Japanese friends should make no mistake about that.

Mr. DANFORTH. If my colleague from Pennsylvania will yield, I would like to associate myself with his comments and with the remarks of the gentleman from Iowa. Both Senators are to be commended for their leadership on this important issue. While I do not object to the President's decision to seek VRA's instead of acting immediately to restrict imports, I am not prepared for the implementation of the voluntary restraint plan to be "negotiated to death." The Secretary of Commerce has already determined that machine-tool imports theaten to impair the national security. If negotiations cannot be successfully concluded in the very near future and if the President does not assert his statutory authority to take unilateral action, Congress must ensure that the Commerce Secretary's recommendation is put into effect automatically, as provided for in S. 1860.

Mr. GRASSLEY. I agree. Japanese trade negotiators have had a history of prolonging discussions in the hopes that the problem will somehow go away. I want to be sure that both they and the administration understand that this Senator is not prepared to let that happen—and neither are my colleagues. I hope that our Japanese friends don't misread the tea leaves.●

THE DEBT CRISIS

● Mr. HART. We all know, and regularly pay oratorical tribute to, the key role our economic policy plays in our foreign policy. America's greatest strength in the world is our greatest strength at home—the dynamic and powerful combination of democracy and markets. We can extol these virtues endlessly, but it is far more difficult to put our words into action.

In this sense, international economic policy stands much as tax reform did several years ago. We all called for a fundamental revision in our Tax Code. But year after year passed, and the status quo remained largely unchallenged. It took courageous and consistent leadership to push tax reform—and that leadership was in large part supplied by my friend and respected colleague—Senator BILL BRADLEY.

Now again, on the debt crisis, Senator BRADLEY is blazing a better trail. As with tax reform, he is proposing a sweeping, new approach. The details may well need changes here and there, but we now have a bold basis for further discussion.

In a series of lectures on foreign policy this Senator delivered at Georgetown University this past summer, I laid great emphasis on the threat of the debt crisis and the need to develop real solutions. In my comprehensive trade bill, S. 2127—of which Senator BRADLEY is a cosponsor—we call for an international approach to the debt crisis. I am grateful to Senator BRADLEY for, once again, putting forward a good idea and moving us closer to a time when our actions will speak more convincingly than our words.

I ask that the attached article by Senator BRADLEY be inserted in the RECORD.

The article follows:

[From the Washington Post, Oct. 5, 1986]

DEFUSING THE LATIN DEBT BOMB

(By Bill Bradley)

Numerous meetings with U.S. bankers and Latin American politicians during the past week's World Bank and International Monetary Fund annual conferences have reinforced my conviction that the Latin American debt crisis presents the U.S. with a strategic opportunity.

This moment compares in importance with the opportunity at Versailles after World War I, which slipped through our hands, and with the opportunity in Europe after World War II, which we seized with the Marshall Plan.

The meetings this past week have also underlined the high price of failure. In the early 1930's international financial leadership failed—inducing Germany to repudiate its foreign debt, contributing to the rise of the Nazis and eliminating Germany's last hope for parliamentary democracy. The stakes are just as high today in Latin America.

The Latin debt crisis threatens us in two ways—not only by the potential danger to our own security that it poses in terms of communist insurgencies and waves of illegal immigrants but also by the real damages that it is already doing to our own economy.

Until last autumn, the Reagan administration regarded Latin debt as a bankers' problem. Obsessed with debt collection, the administration endorsed austerity programs that offered a trickle of emergency lending if debtors cut consumption and investment to the bone. Growth in Latin America was already faltering. Austerity threw the region into recession. Latin nations could no longer feed their poor or invest in their future. Mexican real wages fell 30 percent. Argentina's investment in health, education and infrastructure fell to zero. And malnutrition spread in Brazil even as that country forced itself to become a grain exporter to the world. All in all, Latin America transferred more than $100 billion to wealthier creditors in the last four years.

Given the dreary possibilities in 1982—payment moratoria, default, repudiation, economic collapse—nobody would have predicted that Latin America would meet most of its debt payments through 1985. Their success in doing so may have been, in relative terms, a windfall for the banks. But it proved disastrous for U.S. farmers, factory workers and exporters.

To earn dollars, Latin countries boosted exports. Since 1981, Argentina's soybean drive has claimed 80 percent of the worldwide markets lost by U.S. soybean growers. Between 1980 and 1984, Brazil expanded textile and apparel exports by a factor of 11. To retain those dollars for debt service payments, Latin countries slashed imports. Between 1981 and 1983, U.S. machinery exports to Latin America dropped 38 percent, steel and motor vehicles dropped 50 percent, construction equipment dropped 80 percent, agricultural equipment dropped 86 percent. By 1985, U.S. wheat exports to Mexico had dropped 98 percent.

The increase in the U.S. trade deficit with Latin America from 1981 to 1984 was bigger than the increase in the deficit with Japan. The loss of U.S. exports to Latin America since the onset of the debt crisis has destroyed 800,000 U.S. jobs; imports from Latin America flooded U.S. markets and destroyed more jobs. The cost of the debt crisis has been well over 1 million U.S. jobs.

Last November, the administration changed course abruptly and recognized the debt crisis as more than a bankers' problem. Treasury Secretary James Baker reoriented the goal of U.S. policy in Latin America toward growth rather than austerity. But the Baker plan is too little, too late. By prescribing more debt and a rigid economic agenda for stricken debtors, it prolongs the disease rather than curing it.

The $12 billion Mexican loan package, the Baker plan's first application, is getting some tough questions even before it is complete. Some of Mexico's largest creditors have been asking how long we can hope to go on piling new debt on troubled debt without destabilizing the banking system. Latin leaders from outside Mexico question whether the infusion of new loans alone can help in the long run.

Mexico needs to stop capital from leaving the country more than it needs new money. As a country goes deeper and deeper into debt, domestic investors lose confidence and ship their capital to safer investments in other countries. In the last three years, Mexico has lost more money in capital flight than it has received in new loans. In fact, according to Morgan Guaranty, Mexico's foreign debt would be $12 billion, not $97 billion if capital flight had been controlled. Capital flight simply cancels the benefits of new loans. If the new $12 billion package just fuels more capital flight, Mexico's precarious situation will rapidly deteriorate as it struggles to service the additional foreign debt next year.

The debt crisis is fundamentally political. It will determine whether democracy thrives in Latin America or whether it dwindles whether people sustain their hopes for a better, freer life or whether repression of the right or left crushes that hope. It will influence whether the American economy regains those 1 million lost jobs or whether we fall back into protectionism, further sealing off opportunity and hope.

Specifically I suggest the following:

Interest rates on existing Latin American debt should be lowered, and, equally important, debts should be selectively written down and forgiven.

Both of these actions could free capital for growth and investment. The forum for determining the precise level of relief should be an annual trade/debt summit during the first three years of the new round of multilateral trade talks. At these meetings, creditor banks and governments should offer interest relief and debt forgiveness to complement debtor reforms that will generate growth. Relief would vary from year to year, and from country to country, depending on individual debtor commitments and results. Without dictating means, creditors should seek certain broad results in debtor countries: policies that will reverse capital flight, increased internal investment, liberalized trade, broad internal political support for reform proposals and freedom from scandal in reform programs.

As a part of the new round, debt relief would give countries like Brazil a reason to offer serious trade concessions and it would expand U.S. exports in goods and services.

Smaller banks should forgive some Mexican loans and interest payments.

Thus far, only the larger banks have been involved in the negotiations with Mexico, although they are pressuring smaller banks to contribute new loans to the rescue package. Smaller banks will find it difficult to resist because of their broader relationships with the larger institutions, even in cases where they would prefer providing other forms of relief. To begin the debt/interest rate relief process, the most exposed banks in the Mexican negotiations should give the smaller, less exposed banks some options that might keep them involved in the workout of Mexico's debt. Instead of contributing yet more loans to what they regard as an unreliable borrower, smaller banks should be allowed to forgive some of their Mexican loans altogether. This would help Mexico in the long run by shrinking its future debt burden and by reducing the incentive for Mexico's investors to ship their money abroad. At the same time, U.S. banks would become more sound, as write-downs removed bad loans from their books and decreased their exposure and vulnerability to Latin default.

In addition, larger banks should allow smaller banks to forgive Mexican interest rather than go through the charade of lending Mexico the money Mexico needs to make those interest payments. The end result is the same, except the level of Mexico's debt would not rise.

One important difference between this approach and the administration's is that it would not increase a debtor nation's debt level and therefore would not frighten domestic investors into withdrawing their funds, thereby making the problem worse.

The role of government leadership is to see clearly and to act boldly. In the matter of Latin debt we can no longer afford to lurch from one crisis to another. Piling new debt on old debt only fuels capital flight. It does not restore U.S. jobs, strengthen U.S. banks or rekindle Latin growth. The recent meetings of the IMF and World Bank conveyed the growing unease felt by all parties with the present policy. Far from signaling a victory, the Mexican package is but a continuation of the marginalist approach that simply delays the day of reckoning.

Our fate in the 21st century depends on our relationship with Latin America. Will it be a growing partner in our own prosperity? Will it be a stronghold for democracy? Or will it be a region overrun by poverty and infested with communist insurgency? The answer in large part will be determined by how bold we are in resolving the Third World debt crisis.●

ABORTION AND INFORMED CONSENT: MISSISSIPPI

● Mr. HUMPHREY. Mr. President, this letter from Wanda is typical of those received in my office from nearly 200 women who insist that they received inadequate counseling regarding abortion. No one tells them they may experience severe depression which the abortion will not solve. It appears that they are ill-informed because more knowledge would compel fewer to abort their children. This would be disastrous for the lucrative abortion industry.

Women must be informed about all of the risks surrounding abortion. It is their right to have enough information to give consent to the procedure. Without information, consent is a mere euphemism. I urge my colleagues to consider Wanda's letter and cosponsor S. 2791.

The letter follows:

U.S. SENATE,
Washington, DC, October 6, 1986.

DEAR SENATOR HUMPHREY: I hope as you read my letter concerning the informed consent legislation for abortions that you'll keep in mind how much my heart aches as I rethink again the memory of my child that I aborted.

When I was about in the fifth grade my parents divorced. I moved around a lot and did not have a "great" childhood. So, when I got 16 and was dating I "fell in love." We thought if I got pregnant that our parents would let us get married. I got pregnant and he left town . . . talk about dumb. I was so excited to think I was going to at last "have a happy home." Well he wasn't excited. I was living with my mother at the time. She just kinda took care of everything. I was really out of what was happening. I had known two other girls that had had abortions and lived so I didn't think too much about it. I didn't think I would die and after all, at two weeks it's just a blob, right? Wrong. Why didn't anybody show me a picture of a six week fetus? Nobody said anything. . . . We went in with many others, this was 1974. We were given forms to sign, antibiotics, Tylenol and sent back to the waiting room. During this time we were given no information to help us understand what we were about to do. No warnings of any danger, nothing about the baby and his development.

The whole thing took an hour at the most. When it was over and I felt the emptiness, I knew that what I had done was wrong. The baby was gone. I cried and had nightmares for months. I still cry and during my last pregnancy I had a nightmare that was only dealt with by God's grace. I couldn't handle it alone. My only comfort is that my baby is with his Heavenly Father, perfectly formed and happy. I can't tell you the torment this has put me through. My mother also has talked about the guilt she has felt helping me murder her first grandchild. Yes murder's a tough word. Believe me it's no easy thing to live with.

I do have that happy home I dreamed about now. Two beautiful children I've given birth to and one special son God allowed me the privilege to care for. We are active in our church and are thankful to live in America. But oh, how it grieves my heart to know that in my country these unknowing girls and women are taking the lives of their children and then as me feeling the emptiness and finding out what they had done—too late.

Thanks for listening, Love,
Wanda Wilson.

TAX TREATMENT OF SMALL AND MID-SIZED MUTUAL INSURANCE COMPANIES

● Mr. DANFORTH. Mr. President, several small and mid-sized mutual insurance companies have approached me to raise a concern relating to section 809 of the Internal Revenue Code as added by the Deficit Reduction Act of 1984. According to these companies, the legislation we enacted in 1984 has the anomalous effect of imposing a larger tax burden on small and mid-sized mutual insurance companies than it imposes on larger mutual insurance companies. If this is the case, I believe the law as written and cur-

rently being implemented does not coincide with our intentions at the time we enacted section 809. Mr. President, this is an issue we should examine in the coming months and, if appropriate, redress with corrective legislation during the 100th Congress.●

TRIBUTE TO BEN-GURION

Mr. SIMON. Mr. President, when I was a young reporter, I had the privilege to interview one of the finest persons I ever expect to meet. He was David Ben-Gurion, then the Prime Minister of Israel.

I visited with him in his small, modest office in Jerusalem, and it remains a vivid memory.

He was one of those people who had a sense of where not only his country must go but where humanity must go.

These memories came to me as I read the fine article by Prime Minister Shimon Peres in the New York Times, a tribute to Ben-Gurion on the 100th anniversary of his birth.

Israel has been fortunate to have had a leader like David Ben-Gurion.

But, much more than that, all of us who populate the Earth are richer for that contribution.

I ask that the article be inserted in the RECORD, and I urge my colleagues to read it.

The article follows:

IN HOMAGE TO BEN-GURION

(By Shimon Peres)

I first met David Ben-Gurion when I was yet a youth, and he already a legend. I spoke with him for the first time when he took me in his car from Tel Aviv to Haifa, a two-hour trip at that time. He was not a man of small talk, and most of the drive passed in disappointment for me, as he sat in silence. Toward the end of the trip, he suddenly turned to me and said: "You know, Trotsky wasn't a true leader. Lenin was." I was dumb-founded. I did not understand why he had suddenly chosen to raise this subject, but I was curious, and I wanted to start a conversation, so I asked: "Why?" And he, as though waiting for the question, immediately replied: "What is this 'no-peace-and-no-war'? This is a Jewish invention. A leader must know how to decide—either war, with all the risks this involves, or peace, and pay the price. Even though intellectually Lenin was inferior to Trotsky, Lenin became the leader of the Russian people because he knew how to decide."

Being a leader is not a profession. It cannot be learned in a university. In a period that demands decisions, sometimes irrevocable decisions, the character of the man who must meet these challenges is part of the synthesis that may lead either to great historical success or to painful national failure.

The period in which Ben-Gurion led our people, first as secretary general of Histadrut, then as chairman of the Jewish Agency and finally as Prime Minister, was unprecedented in the history of the Jewish people, and perhaps in the history of mankind. Never, in the 4,000 years of their existence, did the Jewish people experience anything like that which befell them in the 20th century: the greatest of holocausts, and the greatest of rebirths. Never before has a people matched the achievement of the Jewish people: After 2,000 years of exile, the Jews reassembled anew in their homeland—a land with its own language, its various communities, its teachings, its vitality.

Leading the Jewish people is not an easy task—we are a divided, obstinate, highly individualistic people who have cultivated faith, sharpwittedness and polemics to a very high level. But it is not only the psychology of the people that makes them so exacting—their geographical situation has been equally problematic. To quote Isaiah Berlin: "This is a people richer in history than in geography."

It is therefore no wonder that Ben-Gurion—born 100 years ago, on Oct 16, 1886, an anniversary to be marked in New York on Oct. 19, when East 43d Street, from Vanderbilt Avenue to Madison Avenue, will be renamed David Ben-Gurion Place—found himself surrounded by contradictions. The great migration of East European Jewry—the heart of the Jewish people—that began in 1882 proved very disappointing for Zionism. Of the three million Jews who emigrated from Russia and Poland before the outbreak of World War I in 1914, only 50,000 went to Palestine, and even all of those did not remain. The land to which they came, while indeed the Holy Land, was desolate and uninviting; a land that had been laid waste, thirsty for water, filled with swamps and malaria, lacking in natural resources. And in the land itself there lived another people—a people who neglected the land, but who lived on it. Indeed, the return to Zion was accompanied by ceaseless violent clashes with the small Arab population in Israel, and with the Arab states that incited them and fought alongside them.

What, then, did Ben-Gurion have, aside from a broken and exiled people, a poor and unproductive land, a tangible enemy and a world so indifferent that even the survivors of the Holocaust sailing to the shores of Palestine came up against the British fleet?

Ben-Gurion was a realist. But of what use was his realism, when nothing seemed real after the Holocaust, except for faith, prayer and a stubborn obstinacy? Of all the leaders this world has known, none made more strategic use of faith than he.

I worked with him for almost two decades, beginning in the early 1950's, often day and night, when Ben-Gurion was Defense Minister as well as Prime Minister. For me, this was a time of celebration and a time of enigma. Even today, I am not sure that I fully understood him, so complex was he.

One contradiction in his nature I perceived immediately—the contradiction between his abilities and his character. He had the traits of a true intellectual: an intense curiosity that was never quenched; a phenomenal memory; and extraordinary ability to learn and to absorb; the ability to express himself orally and in writing; a knowledge of languages; the ability to think in abstract terms; a true love of history and philosophy. But he lacked one intellectual quality: the ability to hesitate; the readiness to remain neutral, or at least objective; the patience to wait before reaching binding decisions. He was incapable of acquiring knowledge on a subject without forming an opinion of his own.

For he had the character of a fighter. He knew that some things were frightening, but he could never be a coward. He knew that some things were permanent, yet refused to believe that they could not be changed. He was always eager for battle. He did not believe there were hopeless battles, only fighters who had lost hope. He was eager for ideological battle, and was not dismayed by physical battle. He respected the time factor: Only one who takes the initiative, who uses the element of surprise, understands the hour-glass of history and can adjust it accordingly. The rules of the game must be respected only if they cannot be changed. He believed that change was more important than routine. He had the courage to question all accepted conventions in history, in reality, in philosophy. "All the experts," he used to say, "are experts on what was. There are no experts on what will be."

Thus, he was not afraid of conventions, nor was he intimidated by those who sought to give him advice—Jews and non-Jews alike. On Ben-Gurion's 80th birthday, in 1966, I invited our greatest writer, the Nobel laureate S.Y. Agnon, to come with me to Kibbutz Sde Boker, where Ben-Gurion was then living, to celebrate the occasion. On the way, Agnon said to me: "I thought that Jews are afraid of Gentiles. Ben-Gurion evidently wasn't afraid of them." And, after a pause, he added: "He wasn't afraid of Jews either."

Ben-Gurion questioned everything anew. He formed his own opinions. And once he had formed an opinion there was no one who could make him change his mind.

Yet, without the moral dimension of his nature, his personality would have remained merely dramatic. He was not a leader for the sake of leadership, but was the leader of the Jewish people. He believed with all the fervor of his personality that the greatest contribution of the Jewish people to the world lay in the priority they accorded to morality above all else in the life of the individual and the nation. More than esthetics, more than wealth, more than physical size.

He rejected all the accepted definitions of the Jewish people and the Jewish faith. Judaism is not a religion, he argued, but a belief. It is not a framework, but substance—both national and universal. The national substance requires us to relate to land, language and history; the universal substance requires our dedication to one God, to love for our fellow man, to human equality, justice and truth. These two components are inseparable. They lay the foundations for civilized existence.

For years, Ben-Gurion was prejudiced against Charles de Gaulle. He never reconciled himself to the retreat of the French Army before Hitler's invasion. Although he knew that de Gaulle headed the Frenchmen who resisted this defeat, he never forgave him his excessive pride in his relations with the Allies. When de Gaulle published his memoirs, I tried to convince Ben-Gurion to write an introduction to the Hebrew translation. He refused, and I wrote it in his stead. But, in time—and, what is more, with the improvement in de Gaulle's attitude toward Israel—there was a marked shift in Ben-Gurion's assessment of de Gaulle. Nevertheless, I awaited the first meeting between the two in 1960 with trepidation.

It soon became apparent that my fears were unfounded. Each immediately awakened appreciation and respect in the other. Ben-Gurion later told me that de Gaulle was an intellectual giant. De Gaulle told me that he found Ben-Gurion truly "a lion with a lion's countenance."

After lunch at the Elysée, on a wonderfully sunny Paris day, we sat on the lawn to drink tea. Around our table were de Gaulle, Ben-Gurion, Premier Michel Debré and

myself, as Deputy Defense Minister. De Gaulle suddenly turned to Ben-Gurion and said: "My Prime Minister, what are your secret dreams? Tell me. I won't tell anyone. Do you covet the waters of Lebanon? The Sinai deserts? The mountains of Moab? After all, yours is such a small country . . . ." Ben-Gurion reddened slightly. After reflecting for a moment, he replied: "Had you asked me this question 20 or 30 years ago, I would have sketched my dream on a map, but today my dream is different. Today I dream of more Jews, not more territory . . . ."

"More what?" De Gaulle asked taken aback. "More Jews? Why? Where will they come from?"

"Ours is a land built more on people than on territory," Ben-Gurion said. "The Jews will come from everywhere: from France, from Russia, from America, from Yemen.

"From France?" De Gaulle asked. "They will come from France, and give up everything? From America? Will they give up their Cadillacs and televisions? From Russia, and free themselves from the fetters of ideology? And from Yemen—have they indeed maintained their Jewishness?"

Ben-Gurion raced ahead. "Yes, they will give up everything, except their faith. Their faith is their passport. Their yearning for their homeland is the greatest force in their lives."

Ben-Gurion's great love affair was with history. "A man can truly be judged only by his record," he said. Ben-Gurion's record is unique. If not for him, the State of Israel would not be what it is today; indeed, it might never have been born. He assembled the scattered fragments of the Jewish people and consolidated them into a nation. He stood at the head of a great enterprise to make the desert bloom. He insisted that the Hebrew language must be revived, and Israel is the only place where a people has returned to its ancient language. He conducted a war even before there was a state. And although the odds were heavily against Israel, he emerged the victor.

He altered the image of the Jew from that of rabbi, merchant, wanderer to that of scientist, farmer and soldier. He restored the Bible to its people; he restored the people to the Bible. In his last years he embarked on all-out war against what seemed to him the perversion of truth (in the Lavon Affair, in which Defense Minister Pinhas Lavon was cleared of wrongdoing by Ben-Gurion's cabinet in a security scandal). Ben-Gurion argued with the fervor of youth that ministers cannot be judges, that government must remain separate from justice, that we must take care that even in times of danger or bloodshed the democratic principle of the separation of authorities must be maintained.

Did he leave us a satisfied man? I doubt it. I doubt whether he sought satisfaction. I once accompanied him on a visit to a school in Dimona, in the Negev, where a 10-year-old girl asked him: "Mr. Ben-Gurion, what was the day in your life that cuased you the most satisfaction?" He looked at her, thought a moment and said: "What is satisfaction? We cannot be satisfied. If you are satisfied, you begin to be pampered, to be lazy, you cease to create, to struggle, to believe."

No. He left us in 1973 still unsatisfied. The Negev, where he was buried, still remains largely vacant. The Jewish people have yet to understand the meaning of statesmanship. Peace has not yet been achieved. Most of the Jewish people still live in the Diaspora. And even in Israel there are signs of self-satisfaction.

Yet the memory of David Ben-Gurion lives with us as a leader who achieved the impossible.●

GSA VEHICLE PROCUREMENT

● Mr. GOLDWATER. Mr. President, some time ago my curiosity was aroused at the increasing number of Chrysler-manufactured vehicles I was seeing in the Federal fleet. So, I made a little study of this by contacting the General Services Administration, and was surprised to find out that the last fiscal year—fiscal year 1985—the Federal Supply and Services Office of the GSA purchased over half of their new car procurements from the Chrysler Corp. Moreover, in the last 5 years—fiscal year 1981 through fiscal year 1985—the Federal Government has done roughly $6.5 billion worth of business with Chrysler.

Now, Mr. President I have not finished this study yet, but I find the figures most interesting, and I ask that a chart I have showing GSA vehicle procurement be printed at this point in my remarks.

The material follows:

GSA VEHICLE PROCUREMENT

	All suppliers	Chrysler	Chrysler percentage
Fiscal year:			
1981	51,779	18,967	
	$340,030,674.00	$112,307,971.00	33
1982	28,682	14,519	
	$226,295,448.71	$94,540,786.00	40
1983	48,018	16,640	
	$439,468,430.75	$110,468,203.05	20
1984	50,314	5,938	
	$401,287,251.39	$49,305,104.60	12
1985	56,628	33,796	
	$541,891,523.01	$282,744,855.77	52
Total	$1,948,973,326.00	$649,366,919.00	33

NICARAGUA

● Mr. McCONNELL. Mr. President, during the past session of Congress, aid to the Nicaraguan freedom fighters has been a matter of continuing concern. The issue has been extensively debated on the Senate floor and has been considered in closed sessions of the Senate Intelligence Committee. In fact, I cannot think of another foreign policy issue that has consumed so much of the Senate's time and attention.

As I have listened to the debate, I have been struck by the all or nothing quality to the rhetoric. Either you support the Contras or you support the Sandinistas. The debate on the floor is representative of the mail I have received from my constituents. I am urged to oppose the Sandinistas or oppose aid to the Contras.

However, recently I received a letter from Russell Greenleaf of Louisville, KY that I would like to share with my colleagues. I think his letter fills in the gulf between the all and nothing positions. What makes the letter a credible and thoughtful contribution to the Senate's discussion is Mr. Greenleaf's personal history of involvement on Central American issues.

After working for several months on the steering committee of the Louisville chapter of the Committee on Solidarity with the People of El Salvador [CISPES], Mr. Greenleaf spent 3 months in Nicaragua. As he states in his letter, "I discovered what most of my fellow peace activists back home were preaching bore a strong resemblance to the official Sandinista party line. Yet they believed it to be the unbiased truth. And so did I, until my last couple of weeks in Nicaragua (when) . . . I began to venture off the beaten paths that peace activists tend to follow." Mr. Greenleaf goes on to say he "still does not understand the real nature of the situation in Nicaragua but I did come away with a better sense of what it was not."

I will let the substance of the letter stand on its own merits. I would draw two points to my colleagues attention. First, after his visit to Nicaragua, Mr. Greenleaf resigned from the CISPES steering committee because he disagreed with their position on Nicaragua. Second, Mr. Greenleaf is still not completely certain that it is wise for the United States to provide aid to the Contras.

I would like to insert Mr. Greenleaf's letter to me into the CONGRESSIONAL RECORD because I believe my colleagues will find his observations informative. The Congress will continue to debate the question of assistance to the Nicaraguan freedom fighters in future sessions as frequently and vigorously as we have over the past 2 years. I hope that Mr. Greenleaf's views make a constructive contribution to this debate.

The letter follows:

RUSSELL D. GREENLEAF, JR.,
311 BELVAR AVENUE,
Louisville, KY, September 23, 1986.

Hon. MITCH MCCONNELL,
U.S. Senate, Russell Senate Office Building, Washington, DC.

DEAR SENATOR MCCONNELL: You asked me to write to you about my experiences in Nicaragua. I am the former peace activist (now Sandinista critic) with whom you talked after speaking at the Wednesday night dinner at Crescent Hill Baptist Church during last Easter break. I enjoyed your talk. I had not realized that your path to the Senate was so arduous. Your stamina and persistence are to be admired, as is your commitment to foreign policy.

I am sorry it has taken so long to write. Part of the reason is that it is still difficult for me to write about what I experienced in Nicaragua. It shook the foundations of my political beliefs (ultra-liberal Democrat), and left me feeling somewhat like a credulous fool. Perhaps "useful idiot" would be a better term.

I went to Nicaragua on November 29, 1985 after working for several months with a

group of Louisville peace activists who were protesting U.S. policy in Central America. They call themselves the Committee in Solidarity with the People of El Salvador (CISPES) and are involved with the people who got arrested for staging sit-ins in your office on June 12, 1985 and July 15, 1986. Like them, I was confident that I understood the situation: the U.S. was clearly wrong, supporting fascism and oppression as usual. The Sandinistas were clearly the good guys. After three months in Nicaragua, many of my initial leftist beliefs had either been disproven or replaced by major unanswered questions. I discovered that what most of my fellow peace activists back home were preaching bore a very strong resemblance to the official Sandinista party line. Yet they believed it to be the unbiased truth. And so did I, until my last couple of weeks in Nicaragua. It took two and one half months in that country before I, with a small but functional knowledge of Spanish, began to venture off the beaten paths that peace activists tend to follow. It was then that I began to see through the propaganda to the reality beyond. Yet my remaining two weeks in the country were only enough time to get a small glimpse of that reality. So I must admit that I still do not understand the real nature of the situation in Nicaragua, but I did come away with a better sense of what it is not.

Actually, one of the few things I can state for certain is that now I truly understand how a perfectly honest, well-intentioned, pro-Sandinista peace activist can go to Nicaragua for a few weeks and end up seeing only what he expected to see, and what the Sandinistas wanted him to see, without ever seeing the other side of Nicaragua. But it would take an entire letter to explain how this "solidarity syndrome" (as I call it) works, so I won't go into it here. I would be happy to write you another letter about that, if you are interested. In the present letter I will just relate a few facts that I learned in Nicaragua, along with some of my very inexpert opinions. Unless otherwise stated, the following applies to the situation during the period from November 29, 1984 to February 25, 1985 in the city of Managua, where I spent most of my time.

One of the facts that I discovered is that Nicaragua was not a revolutionary paradise providing food, education, and medical care to all of the people for the first time in their lives. It was a revolution that had failed in many ways. Nearly all of the people with whom I talked (except the Sandinistas) said they were worse off economically than in the time of Somoza. Inflation was very high. Prices had risen, but wages had not kept pace, so the buying power of the Nicaraguan currency was way below what it had been under Somoza. The result was a loss in the standard of living, much dissatisfaction, and a significant amount of hunger. The Sandinistas supplied rations of basic foods at a fixed price. But many people complained that the rations were not enough to last the week, and besides, the government sometimes ran out of food so there were no rations at all that week. People had to supplement their diets by buying on the free market (dubbed the black market by some) where prices continued to rise. One working class woman who happens to be a genuine Sandinista supporter—I will call her Maria—believed that at least 25 percent of the people in Managua were going hungry, and she knew that some had resorted to stealing to survive.

The story seemed to be the same in medical care. Maria said the government clinics were very crowded, and she seriously questioned the quality of care. She admitted to me "I don't even waste time going there. The best thing is just to go to a private physician, definitely." Even if a person did get to see a doctor, he probably would not have been able to fill his prescription. Most medicines were very hard to find. There were shortages of antibiotics and other essential drugs. I talked with a nurse who said that in the hospital where she worked the only treatment available for serious wounds was to keep the flies off and hope they didn't get infected. There were shortages of many other things as well: deodorant, toilet paper, clothing, gasoline, etc. Shortages had become a way of life in Managua. When I asked Nicaraguans on the street how things were going, they frequently responded: "The situation is critical now. We can't take much more of this." That was in 1985. I hear things have gotten worse since then.

However, as I said, I am no expert. I am uncertain about the real extent of the shortages or the percentage of people going hungry in Nicaragua. Sandinista officials with whom I talked believed that the rations were sufficient if you got them, and that the poor were better off than under Somoza. I don't know for sure. My inexpert opinion is that everyone is economically worse off now, except the higher level Sandinistas, who were about the only ones I saw driving new cars. I do not understand the cause of Nicaragua's economic problems. Some said it was the same economic crisis that is affecting all of Latin America. Others said it was contra attacks on food supplies. Others said it was Sandinista mismanagement of the economy. Still others said it was due to purposeful economic sabotage by the United States. I do not know for sure.

Another fact that I discovered is that Nicaragua was not a country where the whole population was willing to fight for the Sandinistas in their war against the contras. As bad as the economy was, many considered the military draft to be a worse hardship. Everyone between the age of seventeen and thirty was required to serve, but draft evasion was widespread. Various sources told me that 70 percent of those called do not show up for enlistment, and hide from the authorities. Some said this is because the boys do not want to die to strengthen the Sandinista cause, which they do not believe in. Maria's explanation was different. (I keep quoting Maria because the fact that she is pro-Sandinista ensures that she was not simply making these things up to discredit the government. She rated the Sandinistas performance a seven out of ten with ten being perfect.) Here is my paraphrased translation of what Maria had to say about the draft, known as the Patriotic Military Service (SMP):

Yes, I would agree that about 70 percent of the boys don't want to be drafted. It's not that they're afraid to fight the contras, it's just that they fear they will receive insufficient training and then be sent to die in some faraway place. They would rather stay and defend their homes. The draft is definitely the worst aspect of the government. The kids are forcibly pulled off buses and out of cinemas and taken away. I know of plenty of cases of this. It's very common. Just a few days ago in this neighborhood a city bus carrying a lot of boys was stopped by the army. They started pulling boys off and putting them into an army truck. Word spread quickly through the neighborhood and mothers came running. They surrounded the truck and began shouting and throwing rocks at the soldiers, but it was too late. They were only able to save one boy. The rest were taken away.

It's really terrible. A lot of boys are afraid to go out into the streets. They stay indoors all of the time. Some of them become mentally disturbed because of this.

It is humorous to recall something that happened a few months before I left Louisville for Central America. One of my fellow CISPES members stood up and addressed a public gathering in Louisville on the subject of Nicaragua. He presented himself as more or less qualified to fill us in on the situation there because he had visited the country himself. Concerning the draft, he explained that people wanted to fight to defend the gains of the revolution, so there were plenty of volunteers. The draft had simply been instituted as a random method of deciding who would serve, in the interest of fairness. His remarks gave me the impression that there were so many volunteers that they could not take them all. I find this laughable now, but at the time I believed it.

It is interesting to note that, although Maria would disagree with the CISPES member's facts, she would agree with his efforts to end U.S. support for the contra forces that are trying to overthrow her country's government. She believed that the Sandinistas were doing the best they could under the circumstances. She felt that, unlike Somoza, the present leaders genuinely care about the welfare of ordinary Nicaraguans like herself and that they have done a lot of good things for the country—built schools and hospitals, and given poor campesinos land to farm and money to buy seeds. She believed that the problems with the economy and the draft were due to the contra war, and that if the U.S. would just get off the Sandinistas' backs and let them carry on with their programs to help the people then things would be fine in Nicaragua.

One final note on the draft: to say that 70% of those called did not want to serve is not the same as saying that 70% of the draft-aged population did not want to fight. It actually refers to 70% of those who had not already voluntarily enlisted in the regular army, known as the Sandinista Popular Army (EPS). Although I have heard that this army is quite large for the size of the country, I do not know what percent of the draft-aged population it represents, therefore I cannot calculate the actual percentage who remained unwilling to fight for the Sandinistas. I can only say that not all were willing, and that the draft was very unpopular.

I could cite a few more instances where the facts I discovered belied my peace activist friends' glowing accounts of life in Nicaragua, but I do not want to give you a lopsidedly negative and thus untruthful portrayal. So let me also say that one of the facts I discovered is that Nicaragua was not another Cuba. It was not a Stalinist police state with a captive population straining under the yoke of communism, where everyone was afraid to step out of line for fear of being informed on and punished. And this belies the image of Nicaragua as a "communist totalitarian state" that President Reagan has given to the American people on television.

While in Nicaragua I traveled about freely, except that I was not allowed to fly to the Atlantic coast, and I was once denied permission to enter a contra-held area which the Sandinistas were about to attack.

However, travel was so unrestricted that I heard of at least one case in which a Canadian woman wandered around and eventually ended up in a battle zone. The Sandinista officer in charge reportedly asked in amazement "What are you doing here?", explained to her how dangerous it was, and then went about trying to find her some transportation back to a safer area.

I was only asked for my passport once in three months, and the young soldier looked at it and politely handed it back to me saying, "Enjoy your visit." That was in the town of Esteli only a few weeks before the contras launched a major attack against it. Nicaraguans travelled around as freely as I did.

From all that I have ever heard, such freedom of movement is not exactly the hallmark of a communist totalitarian state. So, obviously, there exist both Sandinsita and anti-Sandinista propaganda, and I believe that neither represents an accurate view of the situation in Nicaragua.

This is very true on the subject of freedom of expression. The contra cheerleaders in the United States give the impression that dissent is thoroughly suppressed in Nicaragua. they tell stories of individuals who criticize the government and are informed on, arrested, and thrown into prison, or worse. The peaceniks on the other hand paint a glowing picture of a new "Nicaragua Libre" in which the citizens are bubbling over with outspoken political commentary for the first time in their lives, revelling in freedom of speech now that Somoza's death squads are gone.

I discovered that neither propaganda extreme is accurate. To the dismay of my leftist friends, I found quite a few people who were afraid to criticize the government in public if there were men in uniform or known Sandinista supporters around. And I met one man who convincingly testified that he had spent months in a political prison under very unpleasant conditions (known as "psychological torture") for the simple reason that he had very publicly criticized the government. I heard reliable reports of similar cases in which other critics were imprisoned and mistreated for several months, in an apparent attempt to silence them.

On the other hand, dissent was not effectively suppressed in Nicaragua. Not by a mile. I heard quite a lot of it. The former political prisoner mentioned above seemed in good health when I talked with him, and was criticizing the government again with renewed vigor but more privately. Once out of earshot of probable Sandinistas, the critics were amazingly brash. "The revolution is a failure—we've been tricked by the Sandinistas!" one woman on the street declared. She was wearing a "United States Embassy" sweatshirt emblazoned with a large version of the same eagle and shield symbol that was on my passport (she said she had bought it from an embassy employee). A fellow walked up to me on a beach in San Juan del Sur and talked for a while about how terrible the Sandinistas were, and then he said flatly: "We're waiting for the U.S. invasion. That's the only thing that can save us now." He should have known that nearly all of the gringos in that tiny resort town were either Sandinista employees or supporters (I was a supporter at that time), yet he was asking me, a perfect stranger, to go home and tell my country to invade his country. Wouldn't that pass for treason in most countries at war? But he was not the least bit worried about informers or arrest. He even invited me to his home to hear more, and meet some of his like-minded friends. I had just met my first open contra supporter. He was the first of many. Of course, I also met many people who strongly supported the Sandinista government. There was a broad range of opinion on the subject. I am quoting the most extreme dissenters as an illustration of the level of freedom of expression that actually did exist in Nicaragua. It became apparent that this was not a country where all the walls have ears.

The following week in Managua I walked into the office of one of the opposition political parties where I was told that U.S. aid to the contras is a good thing. Later, I visited the headquarters of another opposition party where I was told that the only solution to Sandinista oppression is a U.S. invasion of Nicaragua. Even in these offices, where one might reasonably suspect electronic eavesdropping, there was flagrant dissent that bordered on treason. So I conclude that either President Reagan's dire description of life in Nicaragua was a bit misleading or else they're just not building communist dungeons the way they used to.

But seriously, Senator McConnell, I assume you are aware that such dramatic and rhetorically effective televised speeches are too one-sided to capture the true nature of life in Nicaragua. When the President quickly reads a litany of Sandinista misdeeds—an arrest for dissent, a mob attack, harassment of a clergyman, mistreatment of a prisoner, etc.—he makes it sound as though these things happen to everyone every day, and that does make Nicaragua sound like a rigid totalitarian state. In fact, I did not see any of these things happen in the three months while I was there. My conversations with over 35 Nicaraguans who had diverse political views gave me the impression that, while such things did occur, they were relatively rare. I got the impression that arrest for dissent, for example, affected only the most publicly vocal criticis. I am not at all condoning it. I am just trying to convey the fact that for most average Nicaraguans, life seemed to go on as usual without a pervasive fear of "big brother."

My first thought was that surely you must already have accurate knowledge of the true nature of things in Nicaragua, because as a U.S. Senator you must have access to reports from the agents of our intelligence services who are bound to be in Nicaragua now and should be in a better position to give you the facts than I. But then I realized that, because the legislative and executive branches are separate, even a Republican Senator may not be able to get those original unedited reports (unless they happen to say what the executive branch wants you to hear). It would be great if you could get them. After all, one needs to know the facts in order to make good policy decisions. But whatever the sources, I hope that you and all of our leaders are relying on first-hand, objective intelligence rather than articles and editorials in the mass media, which are too infrequent and usually too limited in scope to give the complete picture.[1] One thing I have learned in this whole Nicaraguan adventure is that it is very hard to get an accurate understanding of what is really going on in a country unless you actually go there and live for a while and talk with the people in their own language, or, I suppose, unless you have access to a trustworthy person who has recently been living there in that manner, and whom you are able to question at length.

Well, I hope I have not bored you with a lot of things that you already know. But now I would like to do what I, unlike a CIA agent, am uniquely qualified to do as one of your constituents, and that is to give you my personal opinions about Nicaragua and U.S. policy there.

The first half of this letter contains, to the best of my knowledge, very factual information. I'd stake my reputation as an observant person on the accuracy of the statements I made. However, what follows is pure unqualified guessing and speculation. I will be the first to admit that I do not clearly understand what is going on in Nicaragua.

As I said, I know a little bit about what was not going on there during three months in 1984-85, but that is the extent of my reliable knowledge. However, most Americans have opinions, accurate or not, and that is normal. So here is what I believe (speculate, guess) about Nicaragua after spending three months there.

Communism in Nicaragua: When I was there, Nicaragua seemed to be ruled by a dictatorship with a velvet glove. Massive repression was not needed to control the population, as it is in South Africa. Unlike Cuba, the neighborhood Sandinista Defense Committee (CDS) that I observed seemed lackadaisical and ineffective rather than being the feared eyes and ears of "big brother." When I did hear of repression in the cases of several political prisoners, they had been released alive and their treatment, albeit terrible, was mild compared with what the Salvadoran Death Squads have done to people (I saw photos of their grisly handiwork when I was in San Salvador). Frankly, the Sandinistas seemed to treat their people more humanely than some of the governments that the U.S. supports.

So why worry about them? Well, the danger lies not in what Nicaragua was in 1985, but in what it showed signs of becoming, and that is a communist totalitarian state. Many totalitarian features were already in place when I was there, but they were loosely applied. The state had not used them to clamp an iron grip on the people, but the potential for that was evident. One political party, the Sandinista National Liberation Front (FSLN), controlled everything, including all government ministries and services, from the police and judicial system right down to the agencies that issued drivers licenses and food rations. It controlled the army, which is 100 percent politicized and indoctrinated with the ideology of the ruling party. The party controlled the highly political neighborhood watch committees (CDS). It controlled the secret police, called the General Directorate of State Security (DGSE), also known as the "political police" or the "ideological police." (It is they who occasionally arrest dissenters while in pursuit of their main quarry: suspected contra agents.) The party even controlled the fire departments. And, of course, all laws were made by the one party through the decrees of the nineman dictatorship known as the General Directorate of the Sandinista National Liberation Front. And for what it's worth, I got the in-

[1] I have concluded that the mainstream press, such as the Courier-Journal, are pretty accurate in what they report about Nicaragua. The problem is that the concise, news-oriented format of the medium requires them to leave unsaid much of what one needs to know in order to really understand the situation.

tuitive feeling that this one party had no intention of relinquishing power for any reason, elections included. You can bet that this monopoly of power gave me a very uncomfortable feeling, since I am accustomed to the functioning pluralistic democracy that we have here in the United States.

But even more disturbing was the party's zeal for controlling information. All newspapers were thoroughly censored. I recall looking through the door of an office at the only opposition newspaper, La Prensa, and seeing an employee holding a page of the newspaper with over half of the copy blacked out. It remains a haunting image. The only independent radio station, Radio Catolica, was censored. The government owned the only television station. Thus, the party controlled all of Nicaragua's mass media, either directly or by censorship. Amazingly, it even censored the small weekly publications distributed by the opposition political parties! Equally disturbing, I learned that the party controlled the entire public education system, from grade school to the university, and was actively using it for political indoctrination. The doctrine being taught seemed to be Marxism.

By the time I left Nicaragua, the peace activists' standard apologetic explanations for these distressing facts had begun to wear a little thin, and I began wondering "What are these Sandinistas really up to?" I had planned to do some serious research to find out, but personal priorities changed and the research went undone. But since I left Nicaragua, the Sandinistas have banned public gatherings, suspended civil rights, and restricted freedom to travel. They have closed Radio Catolica; closed La Prensa; and censored the Permanent Human Rights Commission (CPDH), which made me particularly angry because its director, Marta Baltodano, was, in my opinion, one of the most truthful, objective, and well-intentioned people with whom I talked during my entire visit. And there have also been press reports about fraud in the government's own human rights commission, and reports confirming atrocities against the Miskito Indians, and most recently, the Time magazine interview in which Robert Leiken made assertions about the level of popular contra support that are believable in light of what I observed there in 1985.

If I were forced to make a guess right now, without having all of the facts, I would guess that the top Sandinista leaders are, as you said at the Wednesday night dinner, true believers. They are probably well-intentioned public-minded people who sincerely (but, I think, erroneously) believe that a Nicaraguan form of communism, patterned after Cuba, is in the long-term best interest of their people. Either that, or they are agents of international communism working for Moscow. It is hard to tell which. Although they have been ruling with a velvet glove, I would have to guess that their ultimate goal is to tighten the grip and create another Cuba—on the American mainland. I believe that that would be bad for both the United States and the Nicaraguan people. If that is what the Sandinistas really intend to do, then the question would become "how to stop them?"

The Contras: From what I saw, I am inclined to suspect that the Sandinistas have lost a lot of popular support, and that the contras have gained some of that support, and are a more potent military threat than most people think. I suspect that if the contras were truly reformed (got rid of their Somocista ties and reputation for human rights violations), and if they convincingly showed that they intend to bring real democracy to Nicaragua, then it is possible that they might become the hub of a popular revolution that could pressure the present Sandinista leadership to step down and open up the country to real pluralism.

But war is a terrible thing. It is one of the worst scourges that can befall a people. And civil war is especially atrocious. I cannot with good conscience support the inflicting of war upon a people unless there are very compelling reasons for it, and strict conditions have been met. Liberty and justice are compelling reasons. And the necessary conditions are: that all nonviolent solutions must have been tried and have failed, that our side must conduct itself honorably according to the Geneva Convention, and finally that the war must be waged as quickly and effectively as possible by honest and competent men (and not be a drawn out tragedy of errors as was the case in Viet Nam).

While in Nicaragua, I met individuals who had been so offended by the Sandinistas that they felt supporting the contras was their only means of redress—the only way to defend their liberty against the consolidation of communist control of their country. I can respect that choice if, after having tried everything else, they really believe that war is the only alternative to communism.

I feel the same way about U.S. policy. If the Sandinistas are trying to create a Cuban-style communist state then they should be stopped. Liberty and justice are at stake. But for me to support the contra war, I must become convinced that the necessary conditions have been met. The U.S. must have exhausted all of the nonviolent means at its disposal, such as: good faith negotiations with the Sandinistas, economic inducements and pressures, covert attempts to generate a bloodless coup that would replace the present leaders with moderate non-communist nationalists, etc. Also, the war must be waged as a just war. The contras will have to clean up their act and abide by the Geneva Convention regarding the fair and humane treatment of prisoners and civilians. A conservative American and leading champion of contra aid recently said that he was shocked to personally witness over twenty contras rape a twelve-year old girl to death because "she was a Sandinista." We cannot use the methods of fascism to fight for freedom. If we use torture and intimidation, we are playing right into the hands of the communists: they make wonderful propaganda out of it and use it to win more converts. And besides those methods are disgusting and immoral and the American people don't want any part of them. Word will have to go down the contra chain of command: "Absolutely no more abuses. From now on, you're Mr. Clean." Any sadistic misfits who can't handle that should be purged. And finally, the war will have to be waged efficiently. Financial accountability must be tightened, corruption rooted out. The incredible corruption that we generated in Saigon should have taught us that we cannot win wars by blindly throwing money at them. That aid has to get to the troops in the field, not into the private bank accounts of their commanders. And those commanders must be honest, competent men who really want to win, and have the military skill and popular support needed to win.

So I think that when you fellows in Washington vote for aid, you create for yourselves the very big and complicated job of properly accounting for, monitoring, and managing the war. And you (or someone) must do that job very thoroughly, or else you may as well have not voted for the aid because it will be unlikely to produce the results you intended.

Popular Support for the Contras: To win, the contras need the support of the Nicaraguan people. I don't think they have a chance without it. First they need it as a local base for military operations. But secondly, they need it in order to get the U.S. aid required to offset the hundreds of millions of dollars' worth of armaments that the Soviets have invested to keep the Sandinistas in power. To ensure an adequate, uninterrupted supply of U.S aid, the contras must eventually win the support of the American people, and the best way to do that is to clearly show us that they have the support of the majority of Nicaraguans.

So how do the Nicaraguan people really feel about what is going on in their country? What do they want? Who do they support? It is crucial for U.S. policy makers to know the answers to those questions. Unfortunately, I do not have the answers. Based on brief interviews of twenty-five Nicaraguans met at random in public places, along with more extensive conversations with eight other Nicaraguans, I would guess that in February, 1985, around 20 percent of the Nicaraguan people still strongly supported the Sandinistas, at least 20 percent supported the contras, and the remaining 60 percent or so were unsure, and just wanted the war to be over and the economy to improve. My two most objective sources (one was Marta Baltodano—certainly no Sandinista sympathizer) said that the 1984 election was fair in terms of the actual voting and counting of the votes—that there was no significant fraud involved. According to Ms. Baltodano, the unfairness lay in the fact that opposition candidates did not have an equal opportunity to campaign: they were granted limited media time, their rallies were sometimes harassed by mobs (turbas), and "a climate of openness and freedom of expression did not prevail." I can only assume that this extreme advantage of incumbency, along with the prevalent mob psychology, allowed the Sandinistas to turn their 20 percent solid support into a 63 percent victory in the election without resorting to actual fraud.

Conclusion: It can become confusing to think that we are inflicting war on a people to overthrow a government that has been more or less humane by Central American standards, and has won an election that may have been pretty fair by Central American standards (even by Mexican standards), and we are doing it in order to save the people from what we think the government is going to do to them but hasn't quite done yet. If that is not confusing enough, try going to Nicaragua where you will find many people like Maria who know that the government does some bad things, but figure it is still a lot better than what the U.S. had to offer, which was Somoza (whose Guardia shot boys dead in the streets rather than just drafting them into the army), and who, like Maria, retain a loyalty to the Sandinistas because they got rid of Somoza (or at least got the credit for it). Throw in a few reports that our side is using torture and gang rape, and you have the makings for total confusion and skepticism. I'm confused, and I know more about it than most Americans. Perhaps that is why the polls show that they oppose contra aid by two to

one. This is the confusion that must be dispelled if the contras are to win our support.

Thank you, Senator McConnell, for reading this letter. I know that as a U.S. Senator you have a difficult and demanding job. This must be especially true when you have to decide whether or not to fund a war. I can scarcely imagine the heavy burden of moral responsibility that you must bear, having power over the lives of so many other people, and knowing that whether thousands live or die may depend on your decisions. I hope that you, and President Reagan, are making the morally right decision on the issue of contra aid. I wish I could congratulate you for doing so, but I am still uncertain about it. At the Wedensday night dinner when I heard you say that you were sure you were right about what was going on in Nicaragua, and about supporting the contras, I reacted with automatic skepticism. I remembered how sure I was about Nicaragua before I actually went there, and how the longer I stayed the less sure I became about everything. As I got closer to the facts of the culture, attitudes, and history of the Nicaraguan people, broad generalizations became less and less adequate.

I honestly believe that you may be right in your position (but, for all I know, you may be wrong). As I said at the time, I am not unhappy with your support of the contras. I am not happy with it either. I just do not understand the situation in Nicaragua well enough to make such a life or death moral decision as sending men to kill and die in war. Nor do I want to make the opposite decision and risk withholding aid from a just cause. I believe the facts are available that would allow a person to arrive at a sound decision on the matter. I think if I thoroughly researched the existing literature and news accounts on the history of the Sandinista and contra revolutions, and then distilled from these a few key questions, and then went to Nicaragua one more time to personally verify the answers, then I would have a strong position on the subject. I have not yet done that. I hope that when you say you are sure of your position on Nicaragua it means that you have really wrestled with the complexity of that situation and have decided that all other solutions have been tried and failed, leaving lethal violence as, regrettably, the only solution.

Thanks again for taking the time to read this letter, and good luck in dealing with these difficult issues. If I can be of any assistance, please let me know.

Sincerely,

RUSSELL D. GREENLEAF, JR.

P.S.: If you are interested, I can send you accurate accounts of several revealing conversations that I had with Nicaraguans. You might be particularly interested in the opinions of a law student, and of a conservative businessman who is acquainted with both the Sandinistas and the opposition. I offer this in the interest of letting the Nicaraguans speak for themselves. After all, it is their country and they understand it much better than I do.

P.P.S.: On August 21, 1985, I resigned from the steering committee of the Louisville Chapter of the Committee in Solidarity with the People of El Salvador (CISPES) because I disagreed with their position on Nicaragua.●

DRUG ABUSE

(By request of Mr. DOLE the following statement was ordered to be printed in the RECORD:)

● Mr. SYMMS. Mr. President, drug abuse is one of the most acute social problems of our time, and its grip on American society is greater than at any time in our history. As the focus of national attention moved to drugs in recent years, horrifying facts came to light which were new to most Americans.

According to the Alcohol, Drug Abuse, and Mental Health Administration, 28 percent of 18- to 25-year-olds have tried cocaine; between 4 and 5 million Americans use cocaine or other drugs at least once a month; and a half million Americans are hooked on heroin.

Mr. President, the supply of drugs coming into the United States has overwhelmed drug enforcement officials; the statistics are staggering. From 1975 to 1984, the amount of cocaine smuggled into the U.S. quadrupled. The most recent report showed that in 1984 alone, 85 tons of cocaine crossed our borders, most of which made it to the streets. And along with the cocaine came 15,000 tons of marijuana and 10 tons of heroin.

Not long ago, the drug scene was confined to a certain class of people: criminals. But today drugs have permeated all segments of our society; schools, business, industry, and even government. And because even respectable people use drugs for recreation, President Reagan has mounted a national campaign for a drug-free America. I support him 100 percent.

Although the drug problem in my State is not nearly as bad as in many urban areas, the problem still exists. When just one life is ruined by dependence on substances calculated only to produce an empty thrill, there is a problem.

Mr. President, fighting illicit drug use must be done on two fronts: At the point of distribution—the pusher—and the point of consumption—the user. Drug enforcement procedures must be improved and penalties against pusher increased. But the primary front for fighting drug abuse is in educating our youth, which will reduce the demand for drugs and put the pusher out of business.

Granted, penalties for those who profit from the destruction of lives should be swift and sure; but along with enforcement of the law, there must be education. An understanding of what drugs really have to offer—dependence, illness and even death—is the key to solving the problem.

Mr. President, teaching our children the devastating effects of drug abuse and the responsibility they have to preserve and develop their own lives is a big job, but it must be done. From the home, the church, and the schoolroom to the athletic field and the workplace, the dangers of drug abuse and the benefits of staying clean must be instilled within our people. Combined with strict enforcement of drug laws, with penalties commensurate with the severity of the offense, education will help preserve the American way of life.●

THE CONVICTION OF HARRY E. CLAIBORNE—OPINION OF SENATOR J. JAMES EXON

● Mr. EXON. Mr. President, it is a sad day when the Senate is compelled to remove an individual from office. Harry E. Claiborne is only the fifth individual in our Nation's history to be removed from office by the congressional power of impeachment.

Our founding fathers designed a Federal Government which stands on the foundation of checks and balances between the three equal branches of Government. Under our Constitution, judges "hold their offices for good behaviour." Life appointments for Federal judges insulate the judicial branch from shifting political winds and allow the judicial branch to operate with independence. Therefore, it should be difficult to remove a Federal judge from office.

The House of Representatives has the power to impeach a Federal officer and the Senate has the "sole power to try all impeachments." In convicting Judge Harry E. Claiborne of three articles of impeachment the Senate rose to one of its most solemn constitutional tasks.

THE COMMITTEE ON TWELVE

For the first time in the Nation's history, the Senate employed a committee of 12 Senators to receive and digest evidence relating to the Articles of Impeachment. The committee is to be commended for its efforts and its diligence. Although the committee did not make a recommendation to the full Senate, or prejudge evidence, their work made the Senate's task manageable.

The usefulness of such a committee in future impeachment trials will depend on the nature and facts of individual cases. In the case of Harry E. Claiborne, the case was comparably simple and the objective facts not in serious dispute. I voted to hear additional witnesses because I felt that there would have been some personal testimony before the full Senate which would have been helpful in the Senate's deliberations. However, just as a judge determines the scope of evidence in a trial, the Senate, as a body, determined that the evidence before the Court of Impeachment was sufficient to reach a judgment on the articles of impeachment.

However, I urge the Senate to further investigate the actions of the ex-

ecutive branch and the events which led to the indictment of Harry E. Claiborne. If the defendant's assertions regarding an executive branch "vendetta" are true, the Senate should review law enforcement practices and the status of the relationship between the executive and judicial branches of our Federal Government. The existence of a "vendetta" does not alter the issue of whether Harry E. Claiborne violated section 7206(1) of title 26 of the United States Code. The evasion of income tax liability is in and of itself an act of misbehavior and a high crime and misdemeanor sufficient to impeach any Federal judge.

THE ARTICLES OF IMPEACHMENT

The four Articles of Impeachment centered around Harry E. Claiborne's tax returns for 1979 and 1980. The first article alleged that Harry E. Claiborne willfully and knowingly made and subscribed a U.S. individual income tax return for calendar year 1979 which failed to report substantial income. The second article alleged that Harry E. Claiborne willfully and knowingly made and subscribed a U.S. individual income tax return for calendar year 1980 which failed to report substantial income. The third article alleged that Harry E. Claiborne was found guilty of two violations of making and subscribing a false income tax return for the calendar years 1979 and 1980 and was, therefore, guilty of misbehavior and of high crimes in office. The final article alleged that by violating income tax laws, Harry E. Claiborne betrayed the trust of the American people; reduced confidence in the judiciary; brought disrepute on the Federal courts and the administration of justice by the courts, and as such was and is guilty of misbehavior and misdemeanors.

ARTICLE I

The objective facts before the Senate indicated that Judge Claiborne received $41,072.93 in ordinary income from the practice of law prior to becoming a Federal district judge. The money was paid in 14 separate checks. Harry E. Claiborne reported only $22,332.87 of this income on his 1979 tax return. In March of 1980, Harry E. Claiborne prepared a memorandum too for the purpose of applying for a loan. In March 1980, Harry E. Claiborne estimated his fee income to be approximately $46,000. In June 1980, Harry E. Claiborne prepared a worksheet for his accountant which set forth his earnings from "private law practice before judgeship." That worksheet which formed the basis of Harry E. Claiborne's 1979 tax return listed his earnings as $22,332.87.

The March memorandum clearly indicates, as the House of Representatives alleges, that Harry E. Claiborne knew his actual fee income when it served his interests. It is unfathomable that an individual could "forget" nearly $20,000 of income in such a short period of time. It is also significant Harry E. Claiborne suddenly changed his routine procedure of depositing each fee check into his bank account. Harry E. Claiborne knew that his accountant prepared his income tax from the bank deposit records.

The defense suggests that the defendant delivered a letter to his accountant which correctly stated his fee income. This assertion is questionable. Whether the April 11 letter was delivered or authentic would not alter my opinion, as to the willfulness of Harry E. Claiborne's understatement of earnings on his 1979 tax return. Furthermore, there is no evidence that Harry E. Claiborne attempted to correct his 1979 tax return prior to his criminal indictment.

There is sufficient evidence to infer that Harry E. Clairborne willfully and knowingly failed to report substantial income on his 1979 tax return.

ARTICLE II

In 1980, Harry E. Claiborne received four checks totaling $87,912 and sold his home for $725,000 incurring a $214,812 taxable gain. On April 13, 1981, Harry E. Claiborne filed with the Internal Revenue Service form 4868 an application for an automatic extension of time to file a U.S. individual income tax return. In that application, Harry E. Claiborne estimated his total tax liability to be $42,847.96

Harry Claiborne retained Jerry Watson of "Creative Tax Planning" to prepare his 1980 tax return. After several discussions, Mr. Watson produced a tax return which resulted in a July tax refund of $44,256.

Harry E. Claiborne working with his "creative tax planner" reduced his tax liability from $97,864 to $1,103. Harry E. Claiborne is a well educated individual who has handled tax matters as a private attorney. The explanations of the defense that Harry E. Claiborne relied in good faith on his tax preparer defy belief. Given the background of Harry E. Claiborne and his tax preparer, Jerry Watson, combined with the tremendous discrepancy between the April tax estimate and July refund check, there can be no case of "good faith" reliance by Harry Claiborne on Watson's advice.

The facts clearly lead to the conclusion that Harry E. Claiborne willfully and knowingly understated his income on his 1980 income tax returns.

ARTICLE III

The third article of impeachment alleged that Harry E. Claiborne was and is guilty of misbehavior and high crimes in office due to the fact that he was convicted of two felonies.

The decisions of the judicial branch do not and should not compel a decision of the U.S. Senate sitting as a Court of Impeachment. However, the U.S. Senate cannot ignore the criminal conviction of a sitting U.S. judge.

At the very least the conviction of Harry E. Claiborne must be considered as evidence of misbehavior and high crimes in office. Mr. Claiborne did not assert that he did not receive a fair trial. In this case, the evidence is conclusive. Because the conviction was valid and the underlying offenses are the type which merited removal from office, I voted guilty on article III.

ARTICLE IV

The final article of impeachment alleged that Harry Claiborne "betrayed the trust of the people of the United States and reduced the confidence in the integrity and impartiality of the judiciary." The facts which compelled a vote of guilty on the first three articles also compelled a similar vote on the fourth and final article. The specter of a convicted felon maintaining the title and honor associated with being a Federal judge, brings disrepute to the Federal judiciary. The Constitution gives the Congress only one method, impeachment, to remove such an individual from the bench.

CONCLUSION

After a careful examination of the evidence, an evaluation of the personal appeal of Harry E. Claiborne before the U.S. Senate, the deliberations and careful reflection, I came to the inescapable conclusion that Harry E. Claiborne committed impeachable offenses and should be removed from office on all four articles of impeachment. This first impeachment trial in over 50 years serves as a disturbing reminder to the U.S. Senate that it has an awesome responsibility in confirming Federal judges to lifetime appointments.●

ORDER FOR RECESS UNTIL 9 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 9 a.m. on Thursday, October 16, 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on tomorrow, there be a period for the transaction of routine morning business, not to extend beyond 9:30 a.m., with Senators permitted to speak therein for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

71-059 O-87-9 (Pt. 22)

PROGRAM

Mr. DOLE. Mr. President, at 9:30 a.m. tomorrow, the Senate can be expected to turn to the consideration of any of the following items: The immigration conference report; House Concurrent Resolution 395, technical corrections tax conference report; conference report to accompany reconciliation; conference report to accompany the continuing resolution; conference report to accompany clean water; the debt limit conference report.

I think it probably goes without saying that tomorrow will be a very busy and perhaps a very long day. The first thing we will need to do in the morning, I guess, will be to pass either the 1-day or the 2-day CR extension, so that it will be on the President's desk before noon. As soon as we have that, I will be in touch with the distinguished minority leader.

IMMIGRATION REFORM AND CONTROL ACT OF 1986—CONFERENCE REPORT

Mr. SIMPSON. Mr. President, I submit a report of the committee of conference on S. 1200 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1200) to amend the Immigration and Nationality Act to effectively control unauthorized immigration to the United States, and for other purposes. Having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, October 15, 1986.)

Mr. SIMPSON. Mr. President, I bring to the attention of my colleagues the conference report on the immigration bill, which was reported yesterday, October 14.

The conference bill contains the very essence of immigration reform: Employer sanctions, a secure system to determine work eligibility, significantly increased authorizations for the Immigration Service, agricultural worker programs, antidiscrimination provisions, and a legalization program.

The House passed this conference report earlier this afternoon by a vote of 238 to 173, a very large margin for that body in immigration matters, which has had trouble with the bill before.

CLOTURE MOTION

Mr. President, I am filing a cloture motion now, only as an insurance policy that there will be a final Senate vote on this measure before we adjourn sine die.

It is certainly not my intent to foreclose debate on this issue. I think there will be some serious discussions, some serious questions asked, and there will be ample opportunity for that. But in assuring that we deal with that in this session, I submit this cloture motion.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close the debate upon the conference report to accompany the bill, S. 1200, to amend the Immigration and Nationality Act to effectively control unauthorized immigration to the United States, and for other purposes.

Alan K. Simpson, Robert Dole, Lloyd Bentsen, Jim Sasser, Robert T. Stafford, Bob Packwood, Thad Cochran, Nancy L. Kassebaum, Jake Garn, Slade Gorton, J.R. Biden, Robert C. Byrd, John H. Chafee, Claiborne Pell, J.C. Danforth, and Chuck Grassley.

Mr. SIMPSON. Mr. President, I now ask unanimous consent that the conference report be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SIMPSON. Mr. President, it is my understanding that even though now set aside, the cloture motion will recur Friday morning, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. SIMPSON. I thank the Chair.

RECESS UNTIL 9:00 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until the hour of 9 a.m., October 16, 1986.

The motion was agreed to, and at 9:55 p.m., the Senate recessed until Thursday, October 16, 1986, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate October 15, 1986:

DEPARTMENT OF STATE

Arnold Lewis Raphel, of New Jersey, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Pakistan.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

James H. Duff, of Pennsylvania, to be a member of the National Museum Services Board for a term expiring December 6, 1991. (Reappointment)

CONFIRMATIONS

Executive nominations confirmed by the Senate October 15, 1986:

DEPARTMENT OF STATE

L. Paul Bremer III, of Connecticut, a career member of the Senior Foreign Service, Class of Career Minister, to be Ambassador at Large for Counter-Terrorism.

David C. Fields, of California, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Central African Republic.

Alexander Fletcher Watson, of Maryland, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Peru.

Charles J. Pilliod, Jr., of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mexico.

James Daniel Phillips, of Kansas, a career member of the Senior Foreign Service, Class of Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Burundi.

Peter O. Murphy, of the District of Columbia, for the rank of Ambassador during the tenure of his service as Special Negotiator for United States-Canada Trade and Investment Issues.

James Roderick Lilley, of Maryland, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Korea.

Ronald DeWayne Palmer, of the District of Columbia, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mauritius.

David A. Korn, of the District of Columbia, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Togo.

James Wilson Rawlings, of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Zimbabwe.

Everet E. Bierman, of Virginia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Papua New Guinea, and to serve concurrently and without additional compensation as Ambassador Extraordinary and Plenipotentiary of the United States of America to Solomon Islands.

Everett Ellis Briggs, of New Hampshire, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Honduras.

Theodore E. Gildred, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Argentina.

Frank Shakespeare, of Connecticut, to be Ambassador Extraordinary and Plenipoten-

tiary of the United States of America to the Holy See.

James Edward Nolan, Jr., of Maryland, to be Director of the Office of Foreign Missions, with the rank of Ambassador.

Donald K. Petterson, of California, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the United Republic of Tanzania.

Walter Edward Stadtler, of New York, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the People's Republic of Benin.

Edward Joseph Perkins, of Oregon, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of South Africa.

Elinor Greer Constable, of New York, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Kenya.

Arnold Lewis Raphel, of New Jersey, a career member of the Senior Foreign Service, Class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Islamic Republic of Pakistan.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

James H. Duff, of Pennsylvania, to be a Member of the National Museum Services Board for a term expiring December 6, 1991. (Reappointment)

UNITED NATIONS

Joan Clark, of California, to be an Alternate Representative of the United States of America to the Forty-first Session of the General Assembly of the United Nations.

The following-named persons to be Representatives and Alternate Representatives of the United States of America to the Forty-first Session of the General Assembly of the United Nations:

Representatives:

Vernon A. Walters, of Florida.

Herbert Stuart Okun, of the District of Columbia.

Thomas F. Eagleton, U.S. Senator from the State of Missouri.

Larry Pressler, U.S. Senator from the State of South Dakota.

Helen Marie Taylor, of Virginia.

Alternate Representatives:

Patricia Mary Byrne, of Ohio.

Hugh Montgomery, of Virginia.

Joseph Verner Reed, of New York.

John Kerry, U.S. Senator from the State of Massachusetts.

Paul S. Trible, Jr., U.S. Senator from the State of Virginia.

EXECUTIVE OFFICE OF THE PRESIDENT

Jorge L. Mas, of Florida, to be a Member of the Advisory Board for Radio Broadcasting to Cuba for a term expiring August 12, 1989.

WORLD HEALTH ORGANIZATION

Frank E. Young, of Maryland, to be Representative of the United States on the Executive Board of the World Health Organization,

DEPARTMENT OF AGRICULTURE

Peter C. Myers, of Missouri, to be a Member of the Board of Directors of the Commodity Credit Corporation,

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

SENIOR FOREIGN SERVICE

The following-named Career Member of the Senior Foreign Service of the Department of State for promotion in the Senior Foreign Service to the class indicated:

Career Member of the Senior Foreign Service of the United States of America, Class of Career Minister:

Edwin G. Corr, of Oklahoma.

HOUSE OF REPRESENTATIVES—*Wednesday, October 15, 1986*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Gracious and ever-loving God, Your blessings have been upon us and You have filled our lives with all good things. We place before You the petitions of our hearts, asking that You would strengthen us when we are needful, correct us when we are wrong, and encourage us when we do right. May Your benediction be with each Member of this assembly as they seek to do justice, and cause Your good spirit to accompany them and give them grace now and ever more. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mrs. Emery, one of his secretaries, who also informed the House that on the following dates, the President approved and signed bills and joint resolutions of the House of the following titles:

On October 8, 1986:

H.J. Res. 547. Joint resolution to designate October 1986 as "Polish American Heritage Month";

H.J. Res. 611. Joint resolution to designate the period of December 1, 1986, through December 7, 1986, as "National Aplastic Anemia Awareness Week";

H.J. Res. 721. Joint resolution to designate the week of October 12, 1986, through October 18, 1986, as "National Job Skills Week";

H.R. 1246. An act to establish a federally declared floodway for the Colorado River below Davis Dam;

H.R. 5506. An act to amend the International Claims Settlement Act of 1949 to provide that the value of claims be based on the fair market value of the property taken; and

H.R. 5521. An act to extend until October 13, 1986, the emergency acquisition and net worth guarantee provisions of the Garn-St Germain Depository Institutions Act of 1982.

On October 9, 1986:

H.J. Res. 749. Joint resolution waiving the printing on parchment of certain enrolled bills and joint resolutions during the remainder of the second session of the Ninety-ninth Congress; and

H.J. Res. 750. Joint resolution making further continuing appropriations for the fiscal year 1987, and for other purposes.

On October 11, 1986:

H.J. Res. 751. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

On October 14, 1986:

H.R. 2183. An act to amend title 28 of the United States Code to make certain changes with respect to the participation of judges of the Court of International Trade in judicial conferences and for other purposes;

H.R. 2721. An act to amend title 13, United States Code, to require the collection of statistics on domestic apparel and textile industries;

H.R. 2971. An act granting the consent of the Congress to the amendments to the Susquehanna River Basin Compact;

H.R. 4217. An act to provide for the settlement of certain claims of the Papago Tribe of Arizona arising from the construction of Tat Momolikot Dam, and for other purposes; and

H.R. 4588. An act to authorize appropriations for the Administrative Conference of the United States, and for other purposes.

THAT'S "HOLLYWOOD"—AS IN "FLORIDA"

(Mr. SMITH of Florida asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Florida. Mr. Speaker, Tinseltown has thrown down the gauntlet, but the city of Hollywood, FL, will not back away.

The Tinseltown chamber of commerce wants to obtain a trademark for the name "Hollywood." If successful, no item could be marketed with the word "Hollywood" without the Californians' consent. As the Congressman from and for Hollywood, FL, I say, "No Way!"

If Tinseltown is successful, what next? Rome, GA, versus Rome, NY? Portland, OR, versus Portland, ME? We may have a war between the cities starting on the steps of the U.S. Patent Office.

And what does Tinseltown plan to do with the royalties from its trademark? The money would be used to improve Tinseltown's Walk of Fame and sign on the mountainside. As Gary Stein, of the Fort Lauderdale Sun-Sentinel, noted, "I am only surprised they don't want to use the money to buy more chains for Sammy Davis, Jr."

I just want to tell my friends who represent Tinseltown: Don't tread on me or my Hollywood. We will retain our right to Hollywood. The mayor, city commissioners, and citizens are as one.

After all, this is America. The almost 150,000 residents of Hollywood, FL, love their name, all 60 years of history, and they will resist—to the death if necessary—to protect and preserve Hollywood, FL. We have just begun to fight.

THE IVEZAJ CASE IS JUST THE BEGINNING: THE FUTURE OF U.S. TRAVELERS IN YUGOSLAVIA

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, I am happy to report that Mr. Pjeter Ivezaj will finally be back in the United States today. He will arrive at Kennedy Airport at 2:30 this afternoon. I appreciate the assistance of the Yugoslav Government in making his release possible.

The freeing of Mr. Pjeter Ivezaj and two other Americans from jails in Yugoslavia is just the beginning of my efforts to resolve the problems faced by American travelers of Yugoslav origin in that country.

While I am gratified that Mr. Ivezaj and two other Americans are now free, I am concerned about future unjustified incidents of this kind. We must ensure that innocent Americans of Yugoslav origin traveling in that country are not picked off the street and imprisoned.

I look forward to working with the Department of State and the Yugoslav Government to ensure that such questionable arrests never happen again.

TRIBUTE TO ELIE WIESEL

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, for 10 years after he was released from Buchenwald—a Nazi death camp—Elie Wiesel was scared to talk and he kept totally silent.

But, 10 years of silence was long enough. As a survivor of man's greatest inhumanity to man, Elie Wiesel felt he had a duty to talk—a duty to serve as a messenger of the 6 million Jews who perished in the Holocaust—a duty to never let the world forget history's darkest hour.

So, in the words of an editorial in today's New York Post, Elie Wiesel "became the conscience of all men of goodwill. A survivor of Auschwitz and Buchenwald—the spiritual voice of the 6 million who perished, including his

mother, father, and sister—Wiesel has come to speak for all victims, regardless of nation, class or creed. He is the champion of those who suffer—and have no voice."

Yesterday, I shared in the joy of millions when Elie Wiesel was honored with the Nobel Peace Prize. Quite simply, there is no one more richly deserving of this award than Elie Wiesel.

Mr. Wiesel, who has stated "I do not want to live off of Jewish suffering," will donate his $290,000 prize to charity. So, just what does the Nobel Peace Prize mean to Elie Wiesel? He has said, "Until now I spoke. Some people listened. Now I hope more people will listen."

ESSENTIAL ARMS CONTROL PROVISIONS LACKING IN DEFENSE AUTHORIZATION BILL

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I was one of the conferees on the defense authorization bill in the area of arms control, and I thought after Friday we had an agreement and, therefore, I signed as one of the conferees.

I now find out that the agreement was changed. I tried to find out procedurally if there is any way to remove my name from the defense conference in that section, and I understand that I cannot.

Let me tell Members what changed. Regrettably, it is in the area of chemical weapons. Our hope was we were splitting the difference with the Senate and that we would go ahead with production of the shells but not with the Bigeye.

□ 1010

That was the agreement that we had on Friday, but I find out today that we have left the Bigeye in and the shells in, so we will be producing everything.

I think that is just further disarming of the best part of this bill which was beginning to get some arms control provisions in it. This is not the time to do that. Had I known that, I would have never signed as one of the conferees.

UNPRICED DEFENSE CONTRACTS: FINALLY SOME LIMITS

(Mr. WYDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYDEN. Mr. Speaker, imagine that you hire a builder to construct your new home. It's not likely you would permit the builder to start work before a price is agreed on—or that you would agree to be liable for all the builder's costs until a final price is negotiated.

Unfortunately, through a special financial arrangement known as the unpriced contract, this is the way the Pentagon does a lot of its purchasing. In 1985, the Pentagon had $27 billion of contracts where work begins before the final price is agreed on, and the taxpayers are liable for all costs incurred.

These unpriced contracts have become a breeding ground for massive waste and inefficiency. Instead of limiting their use to necessary safety and readiness needs, the Pentagon has used these unpriced contracts for the sake of convenience and to avoid the loss of appropriated funds.

The good news is that the Defense bill we will vote on today, for the first time, places significant limits on these contracts and the profits that can be made on them.

Clearly, this is a victory for taxpayers who want a strong defense, but are demanding a dollar's worth of value for a dollar spent.

PROMISING REALITY SACRIFICED TO A VISION

(Mr. MOODY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOODY. Mr. Speaker, this week already holds great disppointment for many of us. Rarely have we come so close to a significant arms control agreement, only to have the agreement slip away hours after it was tentatively achieved. Real cuts in offensive forces have been sacrificed to a research program and a vision known as SDI.

In the President's mind SDI is a peace shield worth saving at any cost. In reality it is a complex and phenominally expensive array of mirrors, rockets, and nuclear-powered laser weapons. In theory, it will work perfectly and save the United States from the nuclear threat. In reality it may not work at all and may well increase the likelihood of war. On balance, I believe we have real cause to question the wisdom of the Iceland tradeoff.

President Reagan's own advisors agree that a successful defensive system depends on arms control and limits on offensive forces. Yet the administration is dangerously close to making the two mutually exclusive. I find it frighteningly ironic that in their frenzy to protect the peace shield vision from even a modest delay, the administration is willing to sacrifice the very thing that might make SDI possible. The net result of this weekend's minisummit might well be greatly diminished prospects for both SDI and future arms control talks.

In the interests of all Americans, I hope the President can thaw the freeze that developed in Iceland. His fallacious promise to share SDI technology with the Soviets will not suffice. If he and his advisors cannot find a way around this problem, Congress should not hesitate to fill the void. Mr. Reagan has not taken us to any summit, on the contrary, he seems to have led the way into one of the deepest valleys in recent arms control history.

TWENTY-FIRST ANNUAL REPORT OF THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, 1985—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Banking, Finance and Urban Affairs.

(For message see proceedings of the Senate of today, Wednesday, October 15, 1986.)

CONFERENCE REPORT ON H.R. 4613, FUTURES TRADING ACT OF 1986

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 590 and ask for its immediate consideration.

H. RES. 590

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (H.R. 4613) to reauthorize appropriations to carry out the Commodity Exchange Act, and to make technical improvements to that Act, the conference report shall be considered as having been read when called up for consideration, and all points of order against the conference report and against its consideration are hereby waived, except against any matter in the conference report originally contained in sections 406, 504 and title VI of the Senate amendment to the bill, under clause 4 of Rule XXVIII.

The SPEAKER. The gentleman from Massachusetts [Mr. MOAKLEY] is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 590 waives all points of order against the conference report on H.R. 4613, the Futures Trading Act of 1986, with certain exceptions.

The rule states that points of order against three specific portions of the conference report for failure to comply with clause 4 of rule 28 are not waived. Clause 4 of rule 28 prohibits conferees from agreeing to include in a conference report the provisions of

any Senate amendment which, if offered on the floor of the House during the bill's consideration, would have violated clause 7 of rule 16—the germaneness rule.

Mr. Speaker, the first of these provisions consists of an amendment adopted by the Senate that would adjust the basis for computation of emergency compensation for wheat producers under the 1986 Wheat Price Support Program. The second provision contains a Senate amendment that would authorize the transfer of certain national forest land in Nebraska to that State's game and parks commission. The third provision of the conference agreement against which a point of order may be brought under the rule contains amendments to the Federal Meat Inspection Act.

The effect of not waiving clause 4 of rule 28 against these three provisions of the conference report is to permit any Member to raise a point of order that the provision constitutes an agreement of conferees to a nongermane Senate amendment. If such a point of order is sustained, it would then be in order to move to strike the nongermane provision from the conference report. Forty minutes of debate would be in order on each motion to strike.

After debate and votes have occurred on all such motions to strike, the House would vote either on adoption of the conference report, or on a motion to concur in the Senate amendment to the bill with an amendment consisting of the text of the conference report less any provisions which have been stricken by vote of the House.

Mr. Speaker, the provisions of the conference report relating to reauthorization of the Commodity Futures Trading Commission are broadly supported by Members on both sides of the aisle. In reaching a conference agreement, House conferees agreed to accept some of the Senate amendments which are unrelated to the Commodity Futures Trading Commission and succeeded in having several others removed from the bill.

Since the three provisions of the conference report which I identified earlier are controversial and unrelated to the bill's original provisions, the Rules Committee chose to agree to the Agriculture Committee leadership's request to allow separate votes to occur on those issues. I urge my colleagues to support this rule so that the House may move expeditiously to the disposition of these important issues.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I support this rule. It makes possible consideration of the conference report on the Futures Trading Act of 1986. The conference report provides a 3-year extension through fiscal year 1989 of funding authority for the Commodity Futures Trading Commission. It also includes provisions designed to tighten the agency's regulatory authority in several areas.

Mr. Speaker, this rule waives all points of order against the conference report and against its consideration with three exceptions. The matter in the conference report originally contained in sections 406, 504, and title VI of the Senate amendment to the bill is not protected from the provisions of clause 4 of rule 28. Clause 4 allows a point of order to be made against nongermane material inserted in the conference report by the other body. If the Chair sustains the point of order that the material objected to is not germane, then there can be a separate 40-minute debate and a separate vote on the nongermane material added by the other body.

Mr. Speaker, the first item in this conference report which may be subject to a separate debate and a separate vote is section 406 which provides for a transfer of approximately 173 acres to the State of Nebraska for use as part of a State park.

The second part of the conference report which may be subject to a separate debate and vote is section 504 which provides for changing the time that deficiency payments for wheat alone are made

The second part of the conference report which may be subject to a separate debate and vote is section 504 which provides for changing the time that deficiency payments for wheat alone are made. Under this provision, wheat farmers would receive deficiency payments sooner than other feedgrain farmers. I favor advancing these payments for all feedgrain farmers, Our farmers can use these payments now.

And the third provision which may be subject to a separate debate and vote is title VI which provides for less than continuous inspection of meat plants.

Mr. Speaker, I will support this rule so that the House may proceed to consider the conference report on the Futures Trading Act of 1986.

□ 1020

Mr. Speaker, I have no requests for time, and I reserve the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, pursuant to the provisions of House Resolution 590, the rule just adopted, I call up the conference report on the bill (H.R. 4613) to reauthorize appropriations to carry out the Commodity Exchange Act, and to make technical improvements to that act.

The Clerk read the title of the bill.

(For conference report and statement, see proceedings of the House of Tuesday, October 14, 1986.)

POINT OF ORDER

Mr. WHITLEY. Mr. Speaker, I make a point of order against the nongermane amendment contained in the conference report relating to the transfer of national forest lands in the State of Nebraska.

The SPEAKER. The gentleman from North Carolina [Mr. WHITLEY] will identify that portion of the bill.

Mr. WHITELY. Mr. Speaker, the point of order is specifically made against section 207 of title II of the conference report.

The SPEAKER. Does the gentleman from Texas desire to be heard on the point of order?

Mr. DE LA GARZA. Yes, Mr. Speaker, briefly.

Mr. Speaker, the committee and the conference committee agreed on the text of the legislation which is the Commodity Futures Trade Commission.

The other body then added various and sundry other bills and we have to concede the point that they were not germane and they were extraneous to the matter. Therefore, I find myself in the situation where I could not but otherwise yield to the point of order, Mr. Speaker.

The SPEAKER. The point of order is conceded and sustained.

Does the gentleman from North Carolina [Mr. WHITLEY] move to reject that part of the conference committee report?

Mr. WHITLEY. Mr. Speaker, I do.

MOTION OFFERED BY MR. WHITLEY

Mr. WHITLEY. Mr. Speaker, I move to delete section 207 from the conference report.

The SPEAKER. The gentleman from North Carolina [Mr. WHITLEY] is recognized for 20 minutes.

Mr. WHITLEY. Mr. Speaker, section 207 of title II of the conference report authorizes the conveyance of approximately 173 acres of land in the Nebraska National Forest to the Nebraska Game and Parks Commission, to be added to the Chadron State Park in Nebraska.

I would like to recite to the House just briefly the history of this matter. This is a tract of land which adjoins a State park in Nebraska. Negotiations have been going on between the U.S. Forest Service and the Nebraska Game and Parks Commission for a number of years for the commission to acquire the property. In fact, at one stage, it was agreed between the Nebraska Game and Parks Commission and the Forst Service to bring about this transfer by an exchange of lands,

which is a customary and normal procedure for transferring national forest lands to non-Federal entities.

I certainly would concede that section 207 of title II of the conference report provides that this land is to be used for a public purpose. The understanding is that there would be a reverter in the deed that if it were not used for public purposes, it would revert to the State of Nebraska.

I do not have any problem with the idea of conveying the land. The problem is that the section specifically provides that the property shall be conveyed without consideration.

Mr. Speaker, I have been unable to find a single precedent anywhere where the Subcommittee on Forests, Family Farms, and Energy, the Committee on Agriculture, or the House has ever approved a conveyance of acquired Forest Service land with no consideration.

We were unmistakably led to understand in the conference that if we did not give away this 173-acre tract of land without consideration, there would be no CFTC bill.

Mr. Speaker, I do not think that we should submit to this kind of a threat and I believe that this section ought to be stricken. We can deal with it in the orderly processes that are established for that purpose.

The SPEAKER. The question is on the motion offered by the gentleman from North Carolina [Mr. WHITLEY].

The motion was agreed to.

POINT OF ORDER

Mr. MADIGAN. Mr. Speaker, I make a point of order against the conference report to H.R. 4613 under rule XXVIII, clause 4, of the House rules for the reason that it contains a Senate amendment that is in violation of rule XVI, clause 7, because it contains matter nongermane to H.R. 4613 as passed by the House.

H.R. 4613, as reported by the Committee on Agriculture, and adopted in the House, was a bill "to authorize appropriations to carry out the Commodity Exchange Act, and to make technical improvements in that act."

The Senate added a nongermane amendment to H.R. 4613, section 504, entitled "Basis For Computation Of Emergency Compensation Under the 1986 Wheat Program" that amends the Agricultural Act of 1949 relating to the wheat program for cooperating farmers. It is an amendment that would have violated rule XVI, clause 7, had such matter been offered as an amendment in the House.

Some other such Senate amendments to H.R. 4613 have been provided a waiver by the rule (H. Res. 590) to the conference report. The Senate amendment to H.R. 4613 originally contained in section 504 and now contained in section 202 of the conference report has not been provided a waiver by the rule.

The SPEAKER pro tempore (Mr. MOAKLEY). Does the gentleman from Texas [Mr. DE LA GARZA] desire to be heard on this point of order?

Mr. DE LA GARZA. Yes, Mr. Speaker.

Mr. Speaker, the House version of the CFTC, as I have explained previously, did not contain this item of legislation. The other body amended the bill and added other items.

Mr. Speaker, this is a very difficult situation for us inasmuch as a majority of the members of the conference, indeed a majority of the members of the committee, would support the item that the other body has inserted into the legislation. I support it, Mr. Speaker, and the fact is that it is a needed item as far as income and cashflow for the very, very precarious situation of agriculture.

The problem is that we tried and we could not work a similar amendment for corn, as the gentleman from Illinois [Mr. MADIGAN] was desirous of. As difficult as it was for us, we had to go along with the request of the other body.

□ 1030

Therefore, I would hope that the Members of the House would support the committee, because we will not be helping anyone by taking away something that could assist farmers in trouble. It will not be of any benefit to corngrowers, and goodness knows they need the help as much as the wheatgrowers.

We tried, we honestly tried. It was just not technically feasible to do what we would have liked to do.

I had hoped that the distinguished gentleman from Illinois would not interject this point of order and would not request a vote on this issue; but, inasmuch as he has, I reluctantly and with great respect would hope that the House would sustain our position and give assistance to those who need it and not prejudice them by not helping anyone, as much as we would like to help the other sector, because you do not help a friend by injuring another one. This is a no-win situation as far as the House is concerned.

I might add that it is not a money-budget item. It does not impact upon the budget. That is the reason we had difficulty with the corn. No matter how we drafted it, it would impact negativewise upon the budget and goodness knows that no one more than I would want to satisfy the needs and the request of the gentleman from Illinois, but it was just physically and technically impossible.

We would hope that the House would support the committee and not grant the point of order, or if the point of order is granted, that the House then by voting will support the committee and help those farmers who are indeed in trouble and in need and not prejudice them because we cannot help others, because you cannot say that you will benefit one by taking from another. No one gains in that manner, Mr. Speaker.

The SPEAKER pro tempore (Mr. MOAKLEY). The Chair is prepared to rule.

In the opinion of the Chair, section 202 of the conference report as added in the Senate would not have been germane to the House-passed bill; so the point of order is sustained.

MOTION OFFERED BY MR. MADIGAN

Mr. MADIGAN. Mr. Speaker, I move to reject the matter in the conference report originally contained in section 504 of the Senate amendment to H.R. 4613 and now contained in section 202 of the conference report entitled "Basis for Computation of Emergency Compensation Under the 1986 Wheat Program" (H. Rep. 99-995).

The SPEAKER pro tempore. The gentleman from Illinois [Mr. MADIGAN] is recognized for 20 minutes.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, during the deliberations on the 1985 farm bill and in order to make it possible to bring that bill in at a fiscal figure in keeping with the target that was being worked on as a result of the Budget Committee instructions to the House Committee on Agriculture, a decision was made to delay the advance deficiency payments to all growers of agricultural commodities entitled to received advance deficiency payments. That was a policy decision made by the managers of the 1985 rewrite of the agriculture bill in order to comply with the budget target.

Growers of all covered commodities, whether they be wheat or corn or whatever, would like to have the advance deficiency payments paid to them as previously was the case, but because of the budget restrictions it is not possible to do that.

Now in a bill that has nothing whatsoever to do with the 1985 farm bill, but is a bill that is supposed to have the purpose of rewriting the Commodity Futures Trading Commission authorization, we see an amendment that would extend to wheat growers only that privilege to receive advance deficiency payments denied to all growers of all covered commodities in the rewrite of the 1985 farm bill. A special consideration is being given here for wheat growers, but for no one else.

It is difficult to object to doing this for wheat growers because they can use the advance deficiency payments made to them on an earlier schedule than that provided in the 1985 farm bill; however, it is very difficult to justify doing that for wheat growers only and not doing it for others, since growers of all commodities face the same type of financial circumstances that

are being faced by the wheat growers. In fact, some in drought-striken areas face financial circumstances much worse than those being faced by the wheat growers.

So it is my purpose in moving to strike this provision from the bill to keep the spirit of the 1985 farm bill alive, to not in effect begin rewriting the 1985 farm bill with amendments that are not germane to the CFTC legislation before us, to keep in spirit and in purpose the decisions that we made in 1985 and to continue to treat all growers of all covered commodities in exactly the same way that we agreed that they should be treated in 1985.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore. Does any Member wish to rise in opposition?

Mr. STENHOLM. Yes, Mr. Speaker.

The SPEAKER pro tempore. Is the gentleman opposed to the motion?

Mr. STENHOLM. Yes, I am, Mr. Speaker.

The SPEAKER pro tempore. The gentleman from Texas [Mr. STENHOLM] is recognized for 20 minutes.

Mr. STENHOLM. Mr. Speaker, it is with some considerable reluctance that I rise to oppose the gentleman from Illinois on his motion to strike. He has described very accurately the condition that exists as the result of this amendment being added.

The choice those of us who served on the conference had, though, was whether or not we were going to deny some much-needed assistance for wheat growers because we were unable within the confines of the budget to do the same for feed grains and corn producers.

It boiled down to me that it really did not make a lot of sense for us at this time to deny these increases for the speeding up of the payments to wheat growers because we could not, because of the intricacies of the budget process, do it for corn, et cetera.

So as I say, it is with some reluctance that I oppose, and I say to the House that this amendment as it was added in the Senate has the support of the administration. It is budget neutral, I should say, not with the support of the administration per se, but it is budget neutral. Therefore, it was not opposed as we deliberated this in the conference.

That is basically the decision we have to make today. I would urge a "no" vote on the motion to strike.

This is one way we can, in fact, provide some additional assistance to so many of our grain farmers who are having extreme difficulty. It is one way we can do it.

As a member of the House Agriculture Committee, I will assure the gentleman from Illinois and others who are concerned about the equity of this, that it bothers me, too; but I would certainly encourage the Members to look forward to next year in a way in which we can in fact address the equity question and point out that this is for 1 year only. This does not do anything for fiscal year 1988. It is for fiscal year 1987 that we are doing this.

I would assure all my collegues concerned about this that this one Member will seriously attempt to address the equity question when it is possible for us to address that equity question in the next year.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I want to make a little report on what just happened in the Appropriations Committee. We had a chance to address the equity question.

The amendment I proposed in that bill would have included 1986 through 1990 wheat, and 1987 through 1990 feed grains. The difference was to meet that claim that there was a budget problem in fiscal year 1987 unless the 1986 crop of feed grains were excluded.

The administration vigorously opposed the part relating to 1987 through 1990. They are going to oppose it next year, too. They are not going to change on that.

So what we are doing in that bill is separating out wheat for 1986 and then leaving for another time the feed grains part which they will oppose then, too.

I think we should make the deficiency payments based on the first 5 months of the marketing year for both crops. In other words in December for wheat and February for feed grains. It is one of those things that really should have been done in the farm bill. It is one of those mistakes I think that was made, and I understand why it was made, but the fact of the matter is that we started a new policy of paying $1 a bushel deficiency payment on feed grains to reduce the price in the marketplace by $1 a bushel so we could move more of it in world markets, but now the corn producer cannot receive the second half of his deficiency payment until after the next crop is grown. He needs the money before planting the next crop. It is not right. He needs this equity and somehow we need to address it in some bill, but we were denied the opportunity to do it in the appropriations bill due to strenuous opposition by the administration.

Mr. ENGLISH. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Speaker, I thank the gentleman from Texas for yielding.

I think it is very important for us to point out that the real opposition to this amendment is not on the basis of the merit of the amendment. The real reason for the opposition is because of the fact that corn receives its payment in a different fiscal year than wheat does, or would in this particular circumstance; so the real objection that comes about as far as this particular provision is concerned is because in order for it to have an advance deficiency payment it would have to be moved from fiscal year 1988 up to fiscal year 1987; whereas as far as wheat is concerned it would all be paid within the same fiscal year. That shift is what brings about the problem with regard to the budget.

I think the real issue that we are going to have to decide here today is whether wheat producers are to be deprived of receiving an advance deficiency payment because of the fact that corn is not paid in the same fiscal year as wheat in this particular case. That is the real issue.

I would simply plead, and plead very strongly with my colleagues, that what we are looking at particularly in States such as Oklahoma where we have had such a disastrous situation as far as floods are concerned, farmers are hard pressed and in extremely difficult conditions already. Why should they be deprived of this opportunity to survive? What we are talking about is the opportunity to survive, because of the fact that corn is not going to be able to receive a benefit that would be available because of the budget situation, because of the fiscal year. That is what it is all about. It is simply because of when the fiscal year happens to fall, and that is the reason it has that particular budgetary impact.

Mr. SMITH of Iowa. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Speaker, I say that the gentleman is mistaken. I am not speaking in favor of the motion to strike, as a matter of fact. I do not want to deny wheat producers; but it is not so that advancing the second half of the payment for feed grains requires the payment be made in a different fiscal year. The effective date of the end of the marketing year for corn is the 1st of September. A second payment at the end of the marketing year could be made in September and that is in the same fiscal year as the first half which is due in February. The effective date for the end of the marketing year is in the same fiscal year for corn as it is for wheat. It is in the same fiscal year.

Mr. STENHOLM. Mr. Speaker, if I might reclaim my time, I would point out that both gentlemen are entirely correct in what they are saying.

The problem is that we could not work out because of time restraints at the end of the fiscal year those problems associated with the budget that the gentleman from Oklahoma brings up.

The problem is that we just could not do it for corn and feed grain and meet the constraints of the budget under Gramm-Rudman-Hollings that we are committed to live with on the floor of this House.

The basic question then comes, as both speakers on this side have acknowledged, as to whether or not we deny to wheat producers a little extra earlier benefit because we cannot do it for corn and feed grain producers. That is the basic question.

Mr. ENGLISH. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Speaker, the other point that should be stressed and stressed very strongly is that this will have no budgetary impact as far as the fiscal year 1987, no additional cost to the taxpayers. It is simply a question of when the wheat producer is going to receive that benefit, whether it is going to be later when many are already going to be out of business, or whether it is going to be earlier.

Mr. DURBIN. Mr. Speaker, will the gentleman from Texas yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Illinois.

Mr. DURBIN. Mr. Speaker, this was debated, as the gentleman from Iowa mentioned, in the Appropriations Committee on the continuing resolution.

I just heard my colleague from Oklahoma state the same proposition as was stated in the Appropriations Committee, that there is no fiscal impact involved in this.

I would ask the gentleman from Texas, is it true or is it not true that if a wheat grower should receive under this proposal a larger payment in 1986, rather than 1987, that that wheat grower would be able to income average this year because of our Tax Code changes, whereas he could not do it in 1987, thereby meaning there would be a loss to our Federal Treasury of the funds that otherwise would have been received in tax revenues?

Mr. STENHOLM. That could very well be; but the question here, though, and I am not capable of answering the question of what the tax liability of all the individual wheat farmers, what their income would be in 1986 versus 1987 at this time. We have been told, and maybe the gentleman was told something different, but the best that anyone can estimate today is that it is budget neutral.

Yes, the gentleman is correct in pointing out there could be some budget impact regarding income averaging.

Yes, there can be some budget impact regarding the advanced payments and the interest cost of those advanced payments. That is very possible in this; but those whom we depend upon, the CBO and the OMB, et cetera, have told us that this is the best that we can estimate to date, that it is budget neutral. It can have some effect one way or the other.

□ 1045

Mr. DURBIN. With this issue, as many others, we look for the reason behind it. As in most cases, there is a good reason and a real reason. I am not sure that we have figured out which is which here, but I think that one of the real reasons behind this move is a transition rule for wheat growers so that they will be able to income average more income in 1986 than they otherwise would have been able to. That means a loss to our Treasury, as does the loss of interest that otherwise would have been earned if the money was paid out in 1987 as opposed to 1986.

So I would suggest to the gentleman that there has to be some fiscal impact, a negative fiscal impact, of adopting this provision.

Mr. ENGLISH. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Speaker, I would simply point out that before you can have a budget impact, before you can pay taxes, you have to have income. That is exactly what the problem has been with the American farmer today: not many farmers have income. I can assure you that if you just got finished getting wiped out with a flood, you do not have much to average, and that is what it all comes down to.

I would point out to the gentleman that the real question that we are talking about here is whether the farmers are going to have a chance to survive, whether we are going to give these wheat farmers an opportunity to survive. I wish that we could make it available to corn; I wish that we could make it available to other commodities. But as I pointed out, because of the way that the fiscal year is structured, that is where the difficulty is.

So the question is now, are you simply going to wipe those farmers out that have already been hit with that flood, or not? That is the question: Is compassion going to be available, or not?

Mr. DURBIN. Mr. Speaker, will the gentleman yield?

Mr. STENHOLM. I am happy to yield to the gentleman from Illinois.

Mr. DURBIN. Mr. Speaker, I would say to the gentleman from Oklahoma that the flood waters do not parse out the wheat growers from the corn growers, and in fact we have losers in virtually every major crop in America. I have voted for and supported disaster relief across the board, but in this situation the point that I am trying to make is that we have clearly provided an exception and a benefit to wheat growers that is not going to be made available to growers of other crops.

Mr. STENHOLM. Mr. Speaker, on the point regarding the income averaging, I really believe due to the financial plight of feedgrain corn and wheat growers that the income effects of this are going to be minimal, if any. That would be my judgment.

Mr. ROBERTS. Mr Speaker, will the gentleman yield?

Mr. STENHOLM. I yield to the gentleman from Kansas.

Mr. ROBERTS. I thank my friend and colleague for yielding.

Mr. Speaker, it is most unfortunate that we are having this discussion. As far as I am concerned, as you go back into the history of advance deficiency payments, they are made for very good reasons, whether you have an embargo or whether the farm bill was late or whatever, so this does follow that kind of a tradition.

I would suggest to my colleagues that it is not because of the tax advantages. Let me point out that farmers have already made their tax plans, and when we come with an advance deficiency payment, that that is going to cause them some problems as well.

It is true, however, what the gentleman from Illinois has pointed out, that this will be the case in terms of income averaging, and that is why we should have it.

I would also point out to my colleagues that I thought at least at last report from the administration it was a 50–50 chance that we were going to get the advance deficiency payments anyway. So I think that this action merely confirms what we hope will take place with the administration, but if we make a big fuss about it and we get into fighting like cats and dogs between corn and wheat, why I think that obviously we are hurting our chances.

Mr. MADIGAN. Mr. Speaker, how much time do I have remaining?

The SPEAKER pro tempore (Mr. MOAKLEY). The gentleman from Illinois has 16 minutes remaining.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois [Mr. BRUCE], a member of the Committee on Agriculture.

Mr. BRUCE. I thank the gentleman for yielding time to me.

Mr. Speaker, I would just like to talk about this particular provision, and I rise in support of the motion to strike of the gentleman from Illinois [Mr. MADIGAN].

Mr. Speaker, the House has seen some interesting developments in the last couple of weeks. We had a nontrade trade for Daniloff. We had a nonsummit summit over the weekend. We had a nonagreement agreement on arms control. Now we have a noninequity inequity.

We are talking about an advance payment to only one commodity. The chairman and the minority spokesman as we went through the 1985 farm bill told me on several occasions, when I would like to have done something special for corn growers or people in my district, they said, "No, we have to stay together. Every commodity is interconnected. If one commodity leave another commodity, it will be to the detriment of the farm bill as a whole, and the farm community must move together. All interests of agriculture must move together. No one should take special advantage." So throughout the 1985 farm bill, more than a year and a half, the chairman and minority spokesman told me, "Stay with the plan. Do what is fair with everybody, and then everyone will get their fair share of what comes out of this Congress."

We are interconnected. There is a balance between every commodity, whether it be wheat or corn or soybeans or rice or any other commodity. We work together, and right now we are trying to break that bond between commodities, and there will be a cost.

The cost that we have talked about here is a cost to the Treasury. We have said that so many dollars will be spent for wheat growers, and we cannot afford to give money to the corn growers because that is too much money. But the cost is not going to be measured in dollars to the Treasury, it is going to be in the cost to the agriculture community when we find a division between the corn growers and the wheat growers.

I think the wheat growers ought to take a look at this particular provision and draw back from it. Everybody would like to have an advance deficiency payment. Everyone would like to have some extra money this year. Corn growers and wheat growers have both had tough times and low prices, but you cannot turn around and say, "I want mine, and nothing for corn," because it drives a wedge between us. It is not going to be just the cost to the Treasury, it is going to be a cost between commodity versus commodity on this floor.

We ought to stick with the plan. We ought to stick with the agreements that we have made over a year and a half, that advance deficiency payments would go out equitably, fairly, and evenly between corn and wheat. No one would get special advantage, no one would be advantaged against the other, and now we have changed that.

The last couple of days, someone wants to say, "Let us give one commodity a special advantage," as Mr. DURBIN has indicated, a transition rule under the farm bill that says to one group, "You get a little something that somebody else does not."

No commodity should get special consideration. This advance deficiency payment should be defeated, and the vote should be with Mr. MADIGAN on his motion to strike.

Mr. STENHOLM. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I hate to see us get into an internecine battle between commodities, corn versus wheat, and I do not think that it is necessary. The fact of the matter is, this provision probably should have been in the 1985 farm bill, and it was not. It was put into this reauthorization. The chairman of the full committee did his best to make it applicable across the board for all commodities, and could not because of budgetary impact.

The wheat producers of this country, as well as the corn producers, need this provision desperately. Because of budget considerations, corn did not fare as well at this particular time as wheat, but that is no reason to deny the benefits to those needy wheat farmers that need these advance deficiency payments so desperately. We will just have to work all the harder next year to try to deal with the problems that the gentleman from Iowa [Mr. SMITH] talked about, to ensure that the corn producers are adequately protected, and this Member will do his best to ensure that.

So do not look at this as some sort of a Big Ten football battle between wheat versus corn. The fact of the matter is that both need help. Let us vote down the Madigan motion, and next year let us do our best to help the corn producers as well.

Mr. MADIGAN. Mr. Speaker, is it correct that I am entitled to close the debate?

The SPEAKER pro tempore. The gentleman is not correct. The gentleman from Texas [Mr. STENHOLM] has the right to close debate.

Mr. MADIGAN. Mr. Speaker, I ask unanimous consent to insert in the RECORD a letter from the Director of the Congressional Budget Office relative to the item of discussion before the House this morning.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The text of the letter is as follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, DC, October 14, 1986.

Hon. EDWARD R. MADIGAN,
Ranking Minority Member, Committee on Agriculture, House of Representatives, Washington, DC.

DEAR CONGRESSMAN: At the request of the Committee staff, the congressional Budget Office has reviewed an amendment agreed to by the conferees on H.R. 4613 that would give the Secretary of Agriculture discretion to base the final 1986 crop feed grain deficiency payment of prices observed during the first five months of the marketing year. Currently, this final deficiency payment for corn and grain sorghum, the major feed grains, would be determined by the average market price observed during the entire crop year, which extends from September 1, 1986 through August 31, 1987, and the payment would be made during the first few months of fiscal year 1988. Changing the basis for determing the final deficiency payment rate would not change the size of the final payment but would cause it to be made during the spring of 1987. CBO has assumed that this discretion would be used, resulting in an estimated $2.8 billion increase in Commodity Credit Corporation outlays during fiscal year 1987 and a corresponding decrease during fiscal year 1988.

In the absence of an unequivocal policy statement from the Administration as to how it would implement this provision, CBO must make an assumption about how the Secretary of Agriculture would use the discretion provided in the amendment to develop an estimate of its effect on the budget. We have assumed that this discretion would be used. We believe that the financial sistuations of many farmers will not improve substantially by next spring and that the Department of Agriculture would find the opportunity to advance these payments quite attractive as a means of providing needed funds to farmers during planting time. Moreover, the conference agreement on H.R. 4613 would reuire the Secretary to use the five-month period for determining deficiency payments for wheat producers. The Administration might find it difficult to delay feed grain payments while making earlier wheat payments. We also believe that the Administration would find this shifting of outlays from fiscal year 1988 to 1987 useful in attempting to meet the 1988 deficit target required by the Balanced Budget and Emergency Deficit Control Act of 1985.

If you wish further details on this estimate, we will be plesed to provide them.

With best wishes,

Sincerely,

RUDOLPH G. PENNER, *Director.*

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in summary, I would like to make three points, the first of those being to reemphasize the remarks of the gentleman from Illinois [Mr. DURBIN] with regard to the fact that what we do if we do not strike this provision, this nongermane provision in the CFTC bill, is that we allow for one segment of American agriculture the discretion to determine whether or not they want to receive this money from the Government in 1986 under the terms of the existing Tax Code or in 1987 under the terms

of the new tax bill—a transition rule, as the gentleman from Illinois described it, for wheat growers only, and not for any other agriculture producers.

The second point that I would make is that if advance deficiency payments are calculated on a 5-month rather than a 12-month basis, I do not believe that one can say that that cannot have a budgetary impact, because in that first 5 months, as a result of the harvest, the market prices are going to be lower than they would be over the 12-month period of time, and as a result of the lower market price, the amount of the deficiency payment being made on that 5-month average is going to be greater, and thus I believe that there is a budgetary impact beyond the tax implications described by the gentleman from Illinois.

□ 1055

Finally, let me just reiterate that we made a decision when we wrote the farm bill in 1985 to live within the budget guidelines given us by the Budget Committee. One of the things required in order to do that was that we calculate the advance deficiency payments on a 12-month basis for the growers of all commodities entitled to receive those payments.

Now we are coming back in a bill that has nothing to do with the 1985 farm bill a fews weeks before the election and we are saying that for one segment of American agriculture, whether or not that segment happens to be in the drought stricken areas of this country, or in the flood plagued areas of this country, for one segment of American agriculture we are going to do a special deal a few weeks before the election. But for all other segments of American agriculture we are going to stick with the agreement that we made in 1985.

I do not think that bodes well for the future of working together on agriculture related matters in this assembly, and thus I would urge my colleagues to support the motion to strike.

Mr. Speaker, I yield back the balance of my time.

Mr. STENHOLM. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. DE LA GARZA] chairman of the Committee on Agriculture.

Mr. DE LA GARZA. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, again let me reiterate what I have stated before. If it had been technically possible, if it had been feasible to do for all of the commodities that was done in the other body, we would have done it in the conference.

I will have to cede the point that this is not the best way to legislate. But once having been done, we have no control over what the other body did and our control then is here with what we do now.

I find myself in a situation I think of a parent that has two children but he can only buy shoes for one. Shall he not buy for the one and leave the two barefoot, or should he buy for the one and hope that he can buy for the other down the line? That is about the situation we are in. Everything else I think is superfluous.

We worked together on the farm legislation. Our intent is to continue working together.

But I do not think that we can in effect punish one sector for the ingenuity of some of the Representatives by denying them what they request under the guise that we have not done it for all of the others. I do not think that is fair.

I wish that I could just step aside and let the House work its will. I will ask in all fairness that the House work its will, but I feel in my heart that I cannot say no to a farmer in need because we cannot help the others.

One at a time perhaps we can get to all and that will be done, and we will continue working toward that end.

Mr. STENHOLM. Mr. Speaker, Chairman DE LA GARZA has expressed those words that I might wish to add very, very well.

Mr. DASCHLE. Mr. Speaker, I rise in reluctant opposition to the motion offered by Mr. MADIGAN to strike the wheat deficiency payment provision from the legislation before us this morning. I say reluctantly not because I disagree with the Senate's decision to speed up the deficiency payments for wheat producers. I am reluctant only because my disappointment that the provision did not apply to corn producers as well.

The 1985 farm bill changed the procedure by which wheat and feed grain producers received deficiency payments. Instead of providing the entire deficiency payment based on a 5-month marketing period, the 1985 farm bill changed the calculation period to 12 months. This change could delay by 12 months as much as 50 percent of a producer's deficiency payment.

I have been advised that the House conferees sought the same treatment for corn producers that the Senate amendment afforded wheat producers. I strongly support returning to a 5-month calculation period. This change should apply to both wheat and feed grains, not just wheat as provided by the Senate amendment.

This administration has advocated a farm bill that depresses farm prices, and makes farmers totally reliant on Government payments. Yet, as the gentleman from Iowa, a member of the House Appropriations Committee considering a similar amendment, the administration adamantly opposed an acceptable compromise. This compromise would speed up deficiency payments for 1986–90 wheat and 1987–90 corn.

Mr. Speaker, I will oppose this motion to strike the wheat deficiency payment amendment from this legislation. Corn producers do not deserve less treatment, as the Senate provision provided, and this discrepancy should be eliminated in future legislation.

Mr. STENHOLM. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MOAKLEY). The question is on the motion offered by the gentleman from Illinois [Mr. MADIGAN].

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. MADIGAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 162, nays 239, not voting 31, as follows:

□ 1115

The Clerk announced the following pair:

On this vote:

Miss. SCHNEIDER for, with Mr. TOWNS against.

Messrs. BONIOR of Michigan, HUNTER, and SWINDALL, and Mrs. JOHNSON changed their votes from "yea" to "nay."

Messrs. VENTO, KASICH, BEILENSON, SHARP, PACKARD, BERMAN, CARR, and Mrs. JOHNSON changed their votes from "nay" to "yea."

So the motion was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. WILLIAMS. Mr. Speaker, on section 202 of the conference report on the Futures Trading Act of 1986, I intended to vote "nay"; however I inadvertantly pushed the "aye" button on the voting device. The record should show that I intended to vote "nay" and that my vote did not materially affect the outcome of the final tally which was 162 to 238.

(By unanimous consent, Mr. O'NEILL was allowed to speak for 1 minute out of order.)

WELCOME BACK, MRS. BURTON

Mr. O'NEILL, Mr. Speaker, I just want to say that one of our most beloved and dear Members of the Congress for whom we have so much respect, an outstanding member of the Rules Committee, has had a bout with a serious illness. All of us are so pleased to welcome her back today: SALA, we are very happy to have you back with us.

Mrs. BURTON of California. Mr. Speaker, will the Speaker yield?

Mr. O'NEILL. I yield to our beloved colleague.

Mrs. BURTON of California. I thank the Speaker, and I thank you all. Mr. Speaker, thank you so very much.

You do not know how I missed this House.

I just want to say that, although I am a Democrat, I had a Republican disease. I had the same thing as the President. However, I came through with flying colors just like he did.

I thank you all for your kindness, thank you.

The SPEAKER pro tempore (Mr. MOAKLEY). Are there any other points of order against this bill?

VACATING PROCEEDINGS BY WHICH SECTION 207 OF THE CONFERENCE REPORT ON H.R. 4613 WAS DELETED

Mrs. SMITH of Nebraska. Mr. Speaker, I ask unanimous consent to set aside and vacate the proceedings on the motion of the gentleman from North Carolina, [Mr. WHITLEY] to reject the Senate amendment to section 406 of H.R. 4613 that is now section 207 of the conference report.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nebraska?

Mr. WHITLEY. Mr. Speaker, reserving the right to object, I want to advise the Members that earlier in the proceedings today I made a point of order against one of the sections of the bill. I do not have the language in front of me at this moment. My point of order was sustained, and I moved that that section of the bill be stricken. Speaker O'NEILL was in the chair at the time. He ruled that the motion had carried and announced that the section was stricken.

Subsequent to that time, the gentlewoman from Nebraska approached me and told me that the proceedings were somewhat hasty, that she was taken by surprise and did not have an opportunity to present arguments in opposition to my motion.

Mr. Speaker, I will not object to the gentlewoman's request with the clear understanding that I will have the same time to argue in support of my motion that I was originally assigned if the proceeding is vacated.

The SPEAKER pro tempore. If there is no objection and the proceeding is vacated, the Chair will resume as if nothing had happened so that the gentleman from North Carolina [Mr. WHITLEY] will be protected and will have his time.

Mr. WHITLEY. I thank the Chair.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Nebraska?

There was no objection.

The SPEAKER pro tempore. The gentleman from North Carolina [Mr. WHITLEY] is recognized for 20 minutes.

Mr. WHITLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise to urge the House to vote for the motion to reject the nongermane Senate amendment included in the conference report on H.R. 4613, specifically section 207 of that conference report, which will convey approximately 173 acres of Nebraska National Forest to the Nebraska Game and Parks Commission to be added to a State park in Nebraska.

This provision is nearly identical to a Senate bill which passed in the other body and was referred to the Committee on Interior and Insular Affairs. That bill has not been reported nor considered by that committee. In addition, it contains matters which are clearly within the jurisdiction of the Committee on Agriculture and its Subcommittee on Forests, Family Farms, and Energy. Certainly this is a matter that should be duly referred to our committee, and that has not taken place.

Mr. Speaker, my objection to the inclusion of this nongermane amendment is not just the fact that it is not germane to this conference report or the fact that it has not been considered either by the Committee on Interior and Insular Affairs or the Com-

mittee on Agriculture, but it clearly violates a longstanding policy of the House and of the Committee on Agriculture that public lands belonging to the Forest Service that have been purchased with taxpayers funds are not conveyed to States, counties, municipalities or anyone else without consideration—either payment of fair value as determined by the Forest Service or equal value exchange. We made an offer to the other body to lower the price on this land, 173 acres of land, to approximately $30,000. I want the Members of this body to know that is all we are talking about, paying $30,000 for 173 acres of land.

The language in the conference report requires that the land be used for public purposes with a reverter in the event that it ceases to be used for public purposes.

We were clearly led to understand, and I want the Members to hear this and to understand it, we were clearly led to understand in no uncertain terms in the conference with the other body that, if we did not agree to the conveyance of this 173-acre tract of land to the State of Nebraska without consideration, that there would be no CFTC bill.

Now, I did not think that I ought to make that decision by myself, and we as conferees did not think we ought to make the decision ourselves. So we want to leave it up to you. Are we going to submit to that kind of a threat and agree to the conveyance of this land without consideration or else have our whole CFTC bill held hostage? That is the question. We have attempted to work with the people involved. The Forest Service has attempted to work with the people involved. The Forest Service has offered a very reasonable land exchange to the Nebraska Game and Parks Commission and has taken everything possible into consideration in getting the estimated value of this land down to $30,000.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. WHITLEY. I yield to the gentleman from Minnesota.

Mr. VENTO. I thank the gentleman for yielding.

Mr. Speaker, I think a very important point is being made here, that is that this legislation, a nongermane matter, is being inserted at the insistence of one of the other Members from the other body or other Members from that State. The fact is that the Department of Agriculture, the Forest Service, has the opportunity without legislation to make an exchange for their land.

□ 1130

So it really can be resolved without us getting our fingers in it; is that not correct?

Mr. WHITLEY. That is exactly correct.

Mr. VENTO. And on a fair market value.

The gentleman is making the point that in spite of the fact that the value has been lowered to something like $30,000, the other body insists on making it part of the legislative package before us; is that correct?

Mr. WHITLEY. That is correct.

Mr. VENTO. I think the gentleman is certainly within his rights and responsibilities. If we intend to deal in this body with every land exchange that is supposed to be dealt with administratively, we would be in a quagmire from which we would never emerge.

So I commend the gentleman for making the point, and I hope the House will uphold the point that the gentleman is making. I thank the gentleman.

Mr. WHITLEY. Mr. Speaker, I thank the gentleman for his contribution.

Mr. Speaker, my final point is this. If we agree to this land conveyance I do not know where we will ever draw the line. The argument has been made that it is a special case, that this land will be used as a State park, that it is surrounded on three sides by the property of the State park, that there will be a reverter and all these things. Every single request we ever get to convey Forest Service land to a State, to a county, to a municipality, to a church, to a Boy Scout troop or for some other public purpose, every one of them is argued as a public purpose and the requestors want it to be done without consideration. If we convey this one without consideration, we will no longer have any basis for insisting that fair value as determined by the Forest Service be paid for Forest Service lands.

Mr. Speaker, I reserve the balance of my time.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is the gentlewoman from Nebraska [Mrs. SMITH] opposed to the motion?

Mrs. SMITH of Nebraska. I am opposed to the motion, Mr. Speaker.

The SPEAKER pro tempore. The gentlewoman from Nebraska [Mrs. SMITH] is recognized for 20 minutes.

Mrs. SMITH of Nebraska. Mr. Speaker, I would like to call to the attention of this body that the 173 acres of land under discussion is in my district. It is in a very arid part of the country. The average annual rainfall is 14 inches. The value of this land is small. In fact, $30,000 that the Forest Service now estimates is a higher price than you could get for this land if you were to try to sell it out there.

But I want to point out that this land is surrounded on three sides by Chadron State Park. We need it very much, because we have no camping facilities and no parking facilities in the park, and this is an area that would be extremely helpful.

This land would be turned back to the Federal Government if we should cease to use it for the purposes stated to improve the Chadron State Park area. The Federal Government would retain all mineral rights and all oil rights to the area.

You know, 200,000 people visit this park each year. Many more would visit if there were any camping facilities or more parking facilities. This would greatly enhance the use of this land.

The Nebraska Game and Parks Commission does lease nearly all of the land that it uses. It does not feel that it has any lands that are suitable for exchange. We have tried to work out a compromise, and we do feel that this would not in any way damage the Federal holdings out there to turn this land over to the State of Nebraska to use for a public purpose for the period that it is needed.

Mr. Speaker, I urge the House to agree with this viewpoint.

Mr. Speaker, I yield back the balance of my time.

Mr. WHITLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in summary, I just want to say that I do not think we ought to be held up in this kind of a fashion in the first place; and in the second place, I have been the chairman of the Forest Subcommittee now for 4 years, and every request we get from a State, a county, a city, or a charitable organization to convey Forest Service lands to them is always a special request. I think if we breach precedent in this case and permit this land to be conveyed, or to actually direct the Secretary to convey it, without consideration, I think we are going to find this decision hard to live with in the future.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from North Carolina [Mr. WHITLEY].

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mrs. SMITH of Nebraska. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 274, nays 130, answered "present" 1, not voting 27, as follows:

□ 1150

Mr. PRICE and Mr. KOSTMAYER changed their votes from "yea" to "nay."

Messrs. ROBINSON, KRAMER, ANNUNZIO, PRICE, and DORGAN of North Dakota changed their votes from "nay" to "yea."

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Pursuant to clause 4, rule XXVIII, the conference report is considered as rejected.

The question is on the motion to recede and concur in the Senate amendment with an amendment consisting of the text of the conference report without section 207.

The gentleman from Texas [Mr. DE LA GARZA] is recognized to offer a motion.

MOTION OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. DE LA GARZA moves that the House recede from its disagreement to the Senate amendment to H.R. 4613 and concur therein with an amendment:

In lieu of the matter inserted by the Senate amendment, insert the text of the conference report on H.R. 4613 without section 207 thereof.

The SPEAKER pro tempore. The gentleman from Texas [Mr. DE LA GARZA] will be recognized for 30 minutes, and the gentleman from Illinois [Mr. MADIGAN] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Texas [Mr. DE LA GARZA].

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, I wish to give special attention to the provision relative to meat inspection. This is essentially a bill the gentleman from Texas and I have been working on since 1984. It will save some $20 million in the next 3 years. It was passed out by the House Agriculture Committee. However, this bill has an identical provision added by the Senate.

I am pleased that it is backed by the Secretary of Agriculture. I have worked hard with all parties to reach a consensus here. Let me quote from the Secretary's letter:

The conference report on S. 2045, the Futures Trading Act of 1986 contains language amending the Federal Meat Inspection Act (FMIA). This amendment would allow the Secretary of Agriculture flexibility in determining the intensity of inspection in meat processing plants, coupled with strengthened authority to enforce the act for those plants which have shown a willful disregard of the law. The Department strongly supports this language amending the FMIA and urges your favorable consideration of it. However, I understand that concern has been expressed by some of your colleagues about the effect this amendment would have on inspection personnel and plant employees.

Let me clarify for you that this amendment will not result in any reductions in force of processing inspectors of the Food Safety and Inspection Service (FSIS). In fact, the only appreciable impact this amendment would have on processing inspectors would be the normal attrition rate which is 5.2 percent. This results from employees retiring or changing careers. FSIS does expect to transfer GS-8 and GS-9 processing inspectors to fill slaughter inspection vacancies as needed. However, no inspector will be shifted from processing to slaughter inspection if it results in downgrading the employee. Slaughter activities are not affected, as this amendment is directed towards processing operations only. Anticipated savings from enactment of this amendment will be used to further train employees, in addition to developing new testing methods detecting residues and undertaking

projects to enhance the service FSIS provides to federally inspected plants.

The Department does not believe enactment of this amendment will negatively affect employees of the plants themselves. In fact, it may encourage more processing plants to establish quality control systems which could result in the additional hiring of plant employees.

Mr. Speaker, not only will it better serve the public by modernizing inspection, the legislation also gives the Secretary the power to take prompt and effective action to withdraw inspection from those companies or individuals who pose a clear and present danger to the public health.

Since 1967, the Secretary has had the power to withdraw inspection from those who are unfit to remain in the business because of a criminal conviction. This sanction, withdrawal of inspection, serves to protect the public health by removing the criminal element from the meat industry. Also, it provides a strong deterrent to those who would disregard the law and so jeopardize the public.

The sanction has served its purpose well. Yet, in a few serious cases where an immediate threat to the public health exists, the Secretary currently lacks the ability to respond promptly. Under current law, withdrawal of inspection can only be imposed after an administrative proceeding which may take months or even years to complete. Meanwhile, the convicted company could still distribute meat to the American consumer and the convicted individual could retain control over the company. Such a delay is not in the public interest when the company or individual currently threatens the public health.

We were all horrified when we heard stories a few years ago of a company opening in the dead of night, with no Government inspector present, to slaughter diseased animals. The meat from such animals could then be distributed to the American consumer or to the School Lunch Program.

Such incidents served to convince both the administration and our committee and subcommittee that those few who would so jeopardize the public health must be dealt with quickly and severely. This legislation provides the Secretary with the extraordinary power to deal with such extraordinary situations.

First, the Secretary may now request a court order removing a convicted individual from an inspected establishment before the administrative proceeding to withdraw inspection is even begun. This authority is available when the individual's criminal conduct so strikes at the heart of the Meat Inspection Act that the court concludes the individual poses a direct and substantial threat to the public health.

Second, the Secretary may move to withdraw inspection before a conviction when prompt action is essential to the public health. When a company or individual has repeatedly failed to comply with the Federal Meat Inspection Act and such failure directly and substantially threatens the public health, the Secretary can now seek a Federal court order authorizing the withdrawal of inspection from the company or the suspension of the individual. Clearly, this power should only be invoked in a few grave instances. Whether such a sanction is appropriate in a given case will be a question for the Federal courts. Nevertheless, the power is available when there has been a criminal disregard of the law which poses a real danger of disease or even death.

Finally, the bill allows the Secretary to withdraw inspection when a company has harmed or threatened to harm an inspector. The Secretary currently has regulations authorizing withdrawal in such cases, this legislation would expressly provide such power.

In short, the legislation gives the Secretary the power to act promptly and forcefully to remove those who endanger the public. The legislation also provides the Secretary with other enforcement tools to deal with less serious violations.

Once again, the bill enhances the public health protection by giving the Secretary a tough set of new sanctions to deal with those who ignore the law. I urge my colleagues to support this legislation.

Another issue, Mr. Speaker, that was of particular interest to me in the CFTC reauthorization bill was leverage.

When the issue of leverage was debated in the subcommittee, it was clear that there were two very divergent points of view on how to handle this issue. Let me say that, as far as Vermont is concerned, until such time as we have futures for butter or cheese or nonfat dry milk, my State has absolutely no parochial interest in this. However, when I observed the impasse we seemed to be at on this issue in subcommittee, I offered what I believed to be a reasonable compromise. Apparently, the majority of the members on the Agriculture Committee agreed with me and the amendment passed by a 30-to-12 vote. It prevailed again when challenged on the floor July 16, 1986. I am pleased that the Senate, during the conference, has also accepted this middle ground.

We will now have the ability to protect customers who deal in this market while not perpetuating a business monopoly as we have had since 1984.

Mr. Speaker, it is a fair, reasonable solution to a longstanding problem and I am pleased to see it come to fruition.

Mr. MADIGAN. Mr. Speaker, I yield such time as he may consume to the gentleman from Missouri [Mr. COLEMAN].

Mr. COLEMAN of Missouri. Mr. Speaker, I rise in support of the conference committee report, and especially the grain quality part of it.

The Commodity Futures Trading Commission is an independent Federal agency that regulates futures trading. Futures trading grew out of agricultural origins and it now has expanded into a risk-sharing endeavor used not only by traders and dealers in traditional agricultural commodities, but also by the world's financial management sector as an essential financial management tool.

I would like to commend the Commission for doing an outstanding job of regulating the futures industry. Through the years, the Commission has matured into an effective regulator of the futures industry and watchdog for the public's best interest.

This conference report continues the basic structure of the futures regulatory system and maintains the industry-supported self-regulation program. The report provides for a 3-year reauthorization for the CFTC and adopts a reasonable compromise on the leverage issue.

The conferees also adopted an amendment to help tighten American grain quality standards. I am convinced that this provision will help improve the integrity of American grain and help boost overseas sales.

This provision forbids handlers from adding dockage or foreign material to grain. Grain exported from the United States is dirtier, wetter, and more infested with insects than our competitor's grain. U.S. grain starts out clean when it leaves the farm, but the practice of "blending" has forced foreign buyers to look elsewhere—costing our farmers millions of dollars in lost sales. Cleaning up American grain should help boost U.S. farm exports and put more money in our farmers' pockets.

According to a recent General Accounting Office report, the number of complaints about the quality of U.S. grain tripled between 1984 and 1985 and that still doesn't capture all such incidences of dissatisfaction. Foreign complaints about the quality of American grains have eroded the integrity of American grain exports. Complaints include protein content, infestation, excessive dockage, heat damage, and others.

It is my understanding that we are the only country that adds dockage, which may include broken kernels and nongrain material such as chaff and stems, to grain for export. This trash must be cleaned out at the buyer's expense. If a foreign buyer has a choice between purchasing Canadian grain or American grain which has been known to contain 25 percent more dirt, it's pretty obvious which grain will be bought.

Under the provisions adopted in the conference report, effective May 1, 1987, it will be illegal to recombine dockage or any other foreign materials with the grain from which it has been removed. In addition, no dockage or any foreign material can be added to grain. These provisions apply to both export and domestic shipments. To maintain quality standards, the bill does not prohibit the treatment of grain to kill insects.

I am convinced that the grain quality provisions in this conference report will help re-

store the confidence in American agricultural products so that we can recapture our hold on the world market and increase the sale of American farm products. When American grain arrives at foreign ports it should carry the same label of excellence it carried when it left the farmers' hand for the market. By restoring the standard of excellence, this legislation marks an important step toward reclaiming lost markets abroad.

I urge my colleagues to join with me in adopting this conference report.

Mr. MADIGAN. Mr. Speaker, I yield myself such time as I may consume in support of the conference report.

Mr. Speaker, I yield back the balance of my time.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. STENHOLM].

Mr. STENHOLM. Mr. Speaker, I am very pleased that the entire House will now have the opportunity to consider the Processed Products Inspection Improvement Act. We have an opportunity to truly advance the public interest by modernizing and streamlining our inspection system so that it can do a better job of achieving its mission—protection of the public health.

My colleagues will address some other aspects of this legislation, the product of a number of hearings over the past several years in the Livestock, Dairy, and Poultry Subcommittee, and of a process in which we consulted with representatives of consumer interests, employee groups, the meat industry, and the administration. This legislation represents a good faith attempt to balance all legitimate concerns.

The essence of this amendment centers around the provision which provides the Secretary of Agriculture with greater flexibility in allocating inspection resources in meat processing establishments. Under current law, the Secretary's ability in this area is very limited, and he is locked into providing an outmoded cosmetic type of inspection program in any company which does any degree of meat processing for commerce, regardless of whether such activity is needed to protect the public. This weds the Department to methods of inspection which might have made sense at the turn of the century, but are now outdated. It also inhibits the Secretary's ability to target his resources to true areas of public health concern.

The bill would call for the allocation of these resources based upon three basic criteria—the nature and frequency of processing operations, the adequacy and reliability of processing controls and sanitary procedures, and the establishment's history of compliance with the requirements of the act. Under such a system, a plant with sophisticated controls, excellent sanitation, and a strong compliance record would not require the same investment of Government resources as would a plant which was not as strong in one of these areas.

Common sense alone recommends such an approach. In addition, the industry's increasing reliance upon modern processing control techniques has made a system which so heavily relies upon the five senses of an inspector somewhat outmoded. Therefore, a change is needed.

I want to be quick to point out that this is not a system of self-inspection. USDA will continue to monitor the meat-processing industry, on an ongoing basis, more closely than any other element of the food industry. The basic thing that changes is the Government's ability to sensibly allocate its resources based upon what it learns from the process of continuous monitoring. Any suggestion of decreased responsibility or a threat to the consumer is contradicted by—

The work of the House Agriculture Committee, which has evaluated this issue for several years and reported a bill which enjoys unanimous bipartisan support;

The views of the scientific community. In a 1985 report, the National Academy of Sciences endorsed this very approach to processing inspection;

The administration and the public health professionals at USDA who stand by their history of success in protecting the consumer and who want to enhance this record in the future;

The entire meat industry; from producer to packer to processor, which recognizes the essential need to maintain consumer confidence in its products;

USDA's own Office of Inspector General which, within the past month issued an audit report recommending scientifically based inspection; and

Consumer interests who participated in this process and who have strengthened this bill with a number of their suggestions.

Mr. Speaker, all of these factors demonstrate that we have carefully and conscientiously forged a broad consensus of support for this legislation. I welcome the House's endorsement of these efforts.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, while I have concerns with some aspect of the conference report, I tend to support it.

Mr. Speaker, I rise in support of the conference report on the Commodity Futures Trading Commission reauthorization, but I do have one serious concern about a provision in the report which I fear will come back to haunt us. While the positives of the bill outweigh the negatives the provisions authorizing the continuation of leverage transactions concern me greatly, as these transactions are extraordinarily susceptible to fraud and abuse, particularly with respect to less sophisticated investors. I do not believe that the CFTC has the wherewithall to properly regulate the leverage industry, and I fear that we are going to see, as a result of these provisions, a dramatic growth in off-exchange between transactions, including but not limited to leverage, which threaten the viability and integrity of this Nation's futures markets. Since the reauthorization period is only 3 years, we must continue necessary oversight during that relatively short period of time so that the public is adequately protected. But I want to leave adequate notice that I intend to "bird dog" this issue over the next 3 years, so that this issue will not be left to chance when the reauthorization period has expired.

Mr. DE LA GARZA. Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the subcommittee, the gentleman from Tennessee [Mr. JONES].

Mr. JONES of Tennessee. Mr. Speaker, I rise in support of the conference report on H.R. 4613.

As far as this bill's provisions amending the Commodity Exchange Act are concerned, this has been a relatively calm reauthorization process for the Commodity Futures Trading Commission.

This bill reauthorizes the CFTC for 3 years and gives the agency a number of new enforcement and regulatory tools that will enable it to do a better job of regulating the commodities industry—one of the most dynamic and complex segments of our Nation's economy. I am especially pleased that the conferees have adopted a workable regulatory scheme for off-exchange commodities—known as leverage contracts. H.R. 4613 will finally settle the leverage issue without unfairly putting legitimate businessmen out of business or perpetuating the uncompetitive monopoly that now exists in this industry.

There are several provisions in this conference report that are unrelated to the reauthorization of the CFTC, but were adopted when H.R. 4613 was considered in the other body. I hope these provisions do not divert our attention from the basic purpose of this bill. The conferees have forged a compromise which I believe is worthy of broad support. I urge my colleagues to support the conference report.

Mrs. SMITH of Nebraska. Mr. Speaker, I rise in support of H.R. 4613 conference report, Commodity Futures Trading Act.

This bill contains two provisions that I feel are absolutely essential in providing quality products to our domestic consumers and to our overseas trading partners. The first has to do with meat inspection.

Meat inspection has not been updated since 1978 to any great degree. This provision will allow the USDA to better utilize the funds and personnel available.

It is no longer necessary or practical to have meat inspectors constantly on duty to observe secondary processing of meat products that were inspected at the slaughterhouse. This agreement gives the USDA discretion to determine the degree and frequency of meat inspections at meat-processing facilities. The inspections will be based on the reliability of a plant's monitoring system and its history of compliance with inspection requirements.

The USDA expects to save $62.9 million over the next 5 years. Thereafter it will save $27 million annually. This savings will not be at the expense of Federal meat inspectors and there is no evidence to indicate that plant employees will lose jobs as a result of this arrangement. As of September 1985, 7,256 plants were inspected by 8,122 Federal meat inspectors. Several of the 7,256 plants are processing plants that no longer will be required to have full-time, onsite meat inspectors but will only have periodic inspection of their equipment and techniques.

Another benefit of this measure is the strengthening of the USDA's enforcement powers and the enhancement of USDA's ability to remove violators from the meat industry.

In my district, in Ogallala, NE, Charles Blackstone is trying to open a frozen pizza business. He has not been able to do so because of a lack of available inspectors. With the passage of this provision he will be able to expedite the starting of his business. This is just one example of the benefits that could occur. In this time of depressed economics in rural Nebraska as well as other rural areas, any new business is truly a boon.

The second issue concerns the quality of grain exported by the United States. In 1986, 42 foreign countries stated complaints about the quality of grain that was shipped to them and so far in the 1987 marketing year 4 complaints have been stated.

We recently had a negative agricultural trade balance this summer for the first time in 27 years. Without the benefit of agricultural exports our trade balance would show even more red ink. Even though export sales as of mid-September are beginning to improve with wheat sales up about a fifth over a year ago, soybeans and rice up over 40 percent over a year ago, we need every possible method to help our farmers regain lost export markets. With the provisions in the 1985 farm bill and with improved grain quality our agriculture trade balance should start to improve as the remainder of our commodities become priced closer to world prices.

With this in mind our historical export surplus of agricultural products almost certainly will continue to help offset our overall huge trade deficit. This year the agricultural trade surplus will be the lowest in years; it will be only about $6 or $6.5 billion.

Net farm income in 1986 will be close to $29 billion, down from 1985's $30.4 billion, and way below the record level set in 1984 of $34.5 billion. The decline in net farm income is due primarily from a decline in the value of inventories. The lower value of farm products should help to stimulate the export market which in turn will increase the profitability of farming and ranching. However, lower valued farm products alone will not accomplish the goals of increasing our exports but must go hand in hand with improved quality.

The farm bill has brought the total direct Government payments to a record level of $11.4 billion. This increase in spending can at least be partly blamed on the many accusations and news coverage blasting the quality of grain that leaves our ports. When compared to the statements after visits by members of other countries import boards and grain companies stating how good the quality of our grain is at the farm but how disappointing the final products to reach their shores is, one can only conclude that reforms are needed.

This is just a small step in the right direction but at least it is a step. We must not fail our struggling farmers in their efforts to regain our traditional export markets. Now is the time to act.

Mr. DAUB. Mr. Speaker, I rise in support of this conference report even though I believe it stops short of what could be done for farmers in Nebraska.

This report moves up a portion of deficiency payments for wheat growers. This is sorely needed. These payments will assist wheat growers who have been fighting low prices, low overseas sales and low farm land values.

I am, however, disappointed that corn growers were not also permitted to be paid on the same schedule. Corn growers face similar financial situations and are no less deserving. I understand that there were technical problems in the conference to extending such benefits to corn growers. It is unfortunate that such legalities prevented corn growers from being assisted in this way.

This conference report also contains provisions to reduce the ability of exporters to recombine foreign matter in our grain exports. This has been a constant source of irritation and rightly so for farmers. They are seeing their product maligned and ignored in the world market as a result of this grain shipment contamination. This conference report will curtail such practices.

Finally, this bill contains provisions for a study of the effects of the cattle futures markets on cash prices. This is long overdue. Many cattlemen have come to feel that speculators in the futures markets are manipulating those markets to their detriment. These are questions that must be answered and the study contained in this bill should help us address the issue.

I urge the adoption of this conference report.

Mr. DE LA GARZA. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the motion.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas [Mr. DE LA GARZA].

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MADIGAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report and on the several motions just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 4469

Mr. NEAL. Mr. Speaker, I ask unanimous consent that my name be removed as a cosponsor of H.R. 4469.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

SOLOMON BLATT, SR., POST OFFICE BUILDING

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate bill (S. 2452) to designate the U.S. post office to be constructed in Barnwell, SC, as the "Solomon Blatt, Sr., Post Office Building," and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

□ 1200

Mr. WALKER. Reserving the right to object, Mr. Speaker, I do so for an explanation of what it is doing here and I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I thank the gentleman for yielding to me.

I regret that we have to take even a few minutes of the valuable time of the House today for this purpose, but I am confident that with a few words of explanation the gentleman will understand why we are doing this.

The Senate bill, S. 2452, is a bill passed by the other body on September 29 to name a new post office in Barnwell, SC, after the late Mr. Solomon Blatt, Sr. Mr. Blatt was a distinguished public servant and we agree wholeheartedly that the Barnwell Post Office should be named in his honor.

My committee also agrees and so does the entire House of Representatives, because we passed virtually the same bill on July 28. For some reason, the other body then chose not to take up the House bill, but to pass its own version, the one before us now, S. 2452.

In a moment I will offer an amendment to the Senate bill striking all after the enacting clause and inserting in lieu thereof the text of the House bill introduced by the gentleman from South Carolina [Mr. DERRICK].

Also included in the amendment will be several House-passed bills that have been laying over there for a year or more because of an attitude that we find difficult to understand, that they will only pass these naming bills on the other side if a Member of the Senate takes an interest in them and decides that he wants the bills passed. They do not pass them because they come from the House.

We would like to send them a message that if they persist in living on a one-way street that we are going to back our truck right back down their street for so long as they want to play the game. Now, three of these bills that we passed here were to name buildings for our colleagues who died while serving here in the House; Ben Rosenthal, Gillis Long and Ed Forsythe, all of whom are well-remem-

bered by this House and well-respected.

In addition to that, there are other public servants who are memorialized in various bills introduced by Members of the House, passed by our committee and passed by the House, which so far have been ignored; so we are putting all those in the amendment back on the Senate bill and sending their bill back to them.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, there is nothing else in the bill other than the naming of a series, by the time the amendment is passed, other than a series of about eight post offices, is that correct?

Mr. FORD of Michigan. Seven or eight—eight.

Mr. WALKER. And there will be nothing else covered by the bill?

Mr. FORD of Michigan. That is right.

Mr. CLAY. Mr. Speaker, I rise in support of the amendment in the nature of a substitute to S. 2452 offered by my colleague, Mr. FORD of Michigan, which includes the langauge of seven other House-passed bills to name post offices after seven distinguished Americans.

I hope this action will pave the way in the Senate for a speedier process in the future for that body to consider the merits of House-passed bills which seek to honor distinguished individuals.

I am pleased that the bill, H.R. 284, which I introduced in the House on January 3, 1985 to rename the post office building at 3415 North Kingshighway in St. Louis the "Frederick N. Weathers Station of the U.S. Postal Service", is included in my colleague's amendment. H.R. 284 was approved by the House Committee on Post Office and Civil Service, by voice vote, on May 8, 1985, and by the full House of Representatives, under the suspension of the House rules, on June 3, 1985, by voice vote.

Because the legislation languished in the Senate, the former Postmaster General Paul Carlin, at my request, used his administrative discretion to rename the lobby of the post office in honor of Fred Weathers. With today's vote, Fred Weathers will receive the full honor of having the entire station named for him.

Fred Weathers served as Democratic committeeman for the 18th ward of St. Louis for 28 years, was the owner of St. Louis' oldest taxicab service, and for many years was active in the YMCA and the NAACP. Fred Weathers, known by many as the dean of black politicians in St. Louis, has contributed immeasurably to the improvement and betterment of St. Louis. His judgment, commitment to social justice, energy, and political astuteness are valued and well known to St. Louisians and others.

Today's House action, which hopefully will be agreed to quicky by the other body, will give Fred Weathers as well as the six other individuals the recognition that is long overdue.

Mr. ACKERMAN. Mr. Speaker, I rise in strong support of S. 2452, as amended. This measure would memorialize eight individuals who have made important contributions to their State and Nation.

One such honor is bestowed upon our departed colleague and friend, Benjamin S. Rosenthal. Both the 98th and 99th Congresses passed measures which would have named the Flushing Post Office in Queens County "the Benjamin S. Rosenthal Post Office Building." Unfortunately, for the past two Congresses the other body has chosen not to consider the legislation. This apathy toward noncontroversial House-passed measures warranted today's action. Therefore, I commend my distinguished chairman for his assistance in attempting to name the Queens postal facility after Ben.

The dedication of the Flushing Post Office to the late Representative Benjamin Rosenthal is a small but lasting tribute for a man whose wisdom, intelligence, and stature towered above the commonplace. Ben Rosenthal was my Congressman from the first time I voted. I was privileged to be elected to succeed him in this Chamber. He was honest and compassionate; a hard-hitting intellectual with great integrity, who gave politics a good name. Ben inspired countless young people, including myself, to embark upon public service. He set the standards which we all try to emulate.

Mr. Speaker, Ben Rosenthal was first elected to Congress in a special election in February 1962. A passionate supporter of the State of Israel, he was well known as a dedicated, committed, and effective Congressman. In the midsixties, he was one of the first to take a stand against the war in Indo-China, blazing a position that many others would soon join. By the end of that decade, he had won a reputation as a consumer advocate and a champion of social welfare.

Ben was patient, yet forceful and unswerving in his mission to aid the needy, handicapped, and aged. He was always one of the first to protect their interests. His positions on diverse issues, ranging from his opposition to the war in Vietnam, to his advocacy of civil liberties and consumer-protection reforms, were determined by his earnest desire to see that all of the world's people were treated fairly.

Mr. Speaker, for more than a decade. Ben Rosenthal served the people of central Queens from his district office in the Flushing Post Office, a historic building still used daily by Queens residents. By creating this memorial to him, we can pay a lasting tribute to a man whose memory will long remain entrenched in the hearts and minds of all with whom he came in contact.

Mr. Speaker, I urge my colleagues to support the passage of S. 2452.

Mr. LELAND. Mr. Speaker, I support the amendment offered by my colleague, WILLIAM FORD, chairman of the House Committee on Post Office and Civil Service, to S. 2452.

Over the past several months, members of the Committee on Post Office and Civil Service have made efforts to work with the other body to secure passage of several House-passed post office naming bills. Unfortunately, these efforts have, to date, been unsuccessful. Chairman FORD's amendment to S. 2452, in the nature of a substitute, inserts the language of the House-passed Solomon Blatt bill and includes seven House-passed bills, H.R. 284, H.R. 2558, H.R. 2563, H.R. 3242, H.R. 3331, H.R. 4782, and H.R. 633. This amendment is necessary in order to assure our Members that the other body will offer due consideration of these House-passed bills. It is difficult to comprehend the other body's position regarding these House-passed bills since all of them have merit and deserve proper and timely consideration. I completely concur with Chairman FORD's amendment and applaud his efforts to secure final passage of these bills.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 2452

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Post Office to be constructed on Main Street in Barnwell, South Carolina, shall be known and designated as the "Solomon Blatt, Sr., Post Office Building". Any reference in any law, regulation, document, record, map, or other paper of the United States to such post office is deemed to be a reference to the "Solomon Blatt, Sr., Post Office Building".

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. FORD of Michigan: strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. SOLOMON BLATT, SR., POST OFFICE BUILDING.

The United States Post Office to be constructed on Main Street in Barnwell, South Carolina, shall be known and designated as the "Solomon Blatt, Sr., Post Office Building". Any reference in any law, regulation, document, record, map, or other paper of the United States to such building shall be deemed to be a reference to the Solomon Blatt, Sr., Post Office Building.

SEC. 2. FREDERICK N. WEATHERS STATION OF THE UNITED STATES POSTAL SERVICE.

The building located at 3415 North Kings Highway, St. Louis, Missouri, known as the Charles Nagel Station of the United States Postal Service, shall hereafter be known and designated as the "Frederick N. Weathers Station of the United States Postal Service". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Frederick N. Weathers Station of the United States Postal Service.

SEC. 3. BENJAMIN S. ROSENTHAL POST OFFICE BUILDING.

(a) IN GENERAL.—The United States Post Office Building located at 41-65 Main Street, Flushing, New York, shall hereafter be known and designated as the "Benjamin S. Rosenthal Post Office Building". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to

be a reference to the Benjamin S. Rosenthal Post Office Building.

(b) INSTALLATION OF A PLAQUE.—As soon as practicable after the date of the enactment of this Act, the Postmaster General shall install in such post office, in a place in open view to the public, an appropriate plaque indicating the designation of such post office as the "Benjamin S. Rosenthal Post Office Building".

SEC. 4. LESLIE NELSON SHAW, SR., GENERAL MAIL FACILITY OF THE UNITED STATES POSTAL SERVICE.

The United States Post Office Building to be constructed on the property on the northwest corner of the intersection of Florence avenue and Central Avenue in Los Angeles, California, shall be known and designated as the "Leslie Nelson Shaw, Sr., General Mail Facility of the United States Postal Service". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Leslie Nelson Shaw, Sr., General Mail Facility of the United States Postal Service.

SEC. 5. DEBRA SUE SCHATZ POST OFFICE BUILDING.

The United States Post Office Building located at 2909 Rogerdale, Houston, Texas, shall hereafter be known and designated as the "Debra Sue Schatz Post Office Building". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Debra Sue Schatz Post Office Building.

SEC. 6. EDWIN B. FORSYTHE POST OFFICE BUILDING.

The United States Post Office Building at East Second Street and Chester Avenue in Moorestown, New Jersey, shall hereafter be known and designated as the "Edwin B. Forsythe Post Office Building". Any reference in any law, regulation, map, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Edwin B. Forsythe Post Office Building.

SEC. 7. JUANITA CRAFT POST OFFICE OF SOUTH DALLAS.

The United States Post Office Building located at 2120 South Ervay, Dallas, Texas, shall hereafter be known and designated as the "Juanita Craft Post Office of South Dallas". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Juanita Craft Post Office of South Dallas.

SEC. 8. GILLIS W. LONG POST OFFICE BUILDING.

The United States Post Office Building being constructed at 1300 Belle Terre Boulevard in La Place, Louisiana, shall be known and designated as the "Gillis W. Long Post Office Building". Any reference in any law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the Gillis W. Long Post Office Building.

Mr. FORD of Michigan (during the reading). Mr. Speaker, I ask unanimous consent that the amendment in the nature of a substitute be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. FORD of Michigan. Mr. Speaker, as I have indicated, this is an amendment in the nature of a substitute which merely would strike all after the enacting clause and insert the language of the House-passed Solomon Blatt bill (H.R. 4852) and the following seven House-passed bills:

H.R. 284—to designate a post office in St. Louis, MO, in honor of Frederick N. Weathers, as introduced by our distinguished colleague, Hon. WILLIAM (BILL) CLAY.

H.R. 2558—to designate a post office in Los Angeles. CA, in honor of Leslie Nelson Shaw, Sr., as introduced by our distinguished colleague, Hon. MERVYN DYMALLY.

H.R. 2563—to designate a post office in Houston, TX, in honor of Debra Sue Schatz, as introduced by our distinguished colleague, Hon. MICKEY LELAND.

H.R. 3242—to designate a post office in Moorestown, NJ, in honor of the Honorable Edwin B. Forsythe, as introduced by our distinguished colleague, Hon. JIM SAXTON.

H.R. 3331—to designate a post office in Dallas, TX, in honor of Juanita Craft, as introduced by our distinguished colleague, Hon. JOHN BRYANT.

H.R. 4782—to designate a post office in La Place, LA, in honor of the Honorable Gillis W. Long, as introduced by our distinguished colleague, Hon. JOHN B. BREAUX.

H.R. 633—to designate a post office in Flushing, NY, in honor of the Honorable Benjamin S. Rosenthal, as introduced by our distinguished colleague, Hon. GARY ACKERMAN.

With the exception of H.R. 633 (the Ben Rosenthal bill), all of these measures were ordered reported by the Committee on Post Office and Civil Service. H.R. 633 was ordered reported by the Committee on Public Works, and I want to thank its eminent chairman, my good friend JIM HOWARD, for joining with me in this effort today.

Let me briefly review the records of the eight individuals whom the House believes should be honored.

Of course, we all know and treasure the records of our three late colleagues, Ben Rosenthal, Gillis Long, and Ed Forsythe. Volumes would be needed to summarize their achievements in the House, in their States, and in their communities. Sections 3, 8, and 6, respectively, of my amendment would memorialize their lives of public service.

Section 1 of my amendment would recognize the extraordinary achievements of Solomon Blatt, Sr.

Mr. Blatt, the "Speaker Emeritus" of the South Carolina House of Representatives, died on May 14, 1986, at the age of 91. He was one of South Carolina's greatest leaders and was one of the Nation's longest serving State legislators.

Section 2 of my amendment would honor the life and career of Mr. Frederick N. Weathers.

Known as the dean of black politicians in St. Louis, Mr. Weathers has contributed immeasurably to the improvement and betterment of the quality of life for all of that great city's residents. His judgment, his commitment to social justice, his energy, and his political astuteness are valued and well-known in his community, city, and State.

Section 4 of my amendment would honor the life and career of Mr. Leslie Nelson Shaw, Jr.

In addition to his achievements as a southern California civic and business leader, Mr. Shaw was the first black Postmaster of a large American city, having been appointed Postmaster of Los Angeles in 1963 by President Kennedy and serving in a distinguished manner in that position until 1969.

Section 5 of my amendment would honor Debra Sue Schatz, a 23-year-old Houston letter carrier brutally murdered while carrying out her official duties. This would be a fitting tribute to her in her home community, and would be a fitting reminder of the sacrifices of public servants everywhere.

Finally, section 7 of my amendment would recognize and honor the life and career of Juanita Craft.

A Dallas civic leader, a nationally renowned champion of civil rights, and the first black woman elected to the Dallas City Council the late Juanita Craft served the people of her city, her State, and her Nation for six decades.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from Michigan [Mr. FORD].

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. FORD OF MICHIGAN

Mr. FORD of Michigan. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. FORD of Michigan: Amend the title so as to read: "An Act to provide for the naming or renaming of certain buildings of the United States Postal Service.".

The title amendment was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

CONFERENCE REPORT ON S. 2638, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1987

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 591 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 591

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes, all points of order against the conference report and against its consideration are hereby waived, and the conference report shall be considered as having been read when called up for consideration.

The SPEAKER pro tempore. The gentleman from Ohio [Mr. HALL] is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR] for purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 591 is the rule waiving all points of order against the consideration of the conference report on S. 2638, the National Defense Authorization Act for fiscal 1987.

Under the rules of the House, conference reports are privileged and are considered in the House under the 1-hour rule with no amendments in order. This rule waives all points of order against the conference report and against its consideration. In addition, the rule provides that when the conference report is called up for consideration, it shall be considered as having been read.

It should be emphasized that this is a bipartisan rule intended to ensure expedited consideration of the conference report on the defense authorization bill. The rule was reported by a unanimous voice vote, and I am not aware of any opposition to this rule.

Mr. Speaker, the conference report on S. 2638 resolves over 2,000 different items that were in dispute between both Houses with respect to the defense authorization. Among these were a number of important arms control issues, including a nuclear test ban, SALT adherence, the Asat, and funding for the strategic defense initiative.

In regard to weapons procurement, the conference agreement includes funding for another Trident submarine and full classified funding for the advanced technology bomber.

With respect to acquisition reform, the conference report strengthens "revolving door" legislation and creates new "whistleblower protections."

It also should be noted that the final version of S. 2638 provides for a 3-percent military pay raise, effective January 1, 1987.

Finally, my colleagues should be aware that the overall funding in the conference report tracks closely the budget authority and outlay figures provided in the budget resolution.

Mr. Speaker, while there may be differing views over specific provisions in the conference report on S. 2638, I am not aware of any opposition to this bipartisan rule which waives points of order against it. I urge my colleagues to adopt this rule.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this rule on the conference report on the Defense Authorization Act waives all points of order against the conference report and against its consideration. The House should not use a rule waiving all points of order on a regular basis.

In the Rules Committee, both the Republican and the Democratic members representing the Committee on Armed Services concurred in seeking this rule. The Rules Committee gave them what they requested.

Mr. Speaker, this rule will permit the House to proceed to complete action on what may well be the largest single authorization bill this session.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I thank the gentleman from Missouri for yielding me this time.

Mr. Speaker, I rise, first of all, with a couple questions that maybe somebody from the Rules Committee can answer for me.

First of all, did the Rules Committee have before it the actual defense conference report at the time that this particular rule was approved?

Mr. Speaker, I yield to the gentleman from Ohio.

Mr. HALL of Ohio. No; it did not.

Mr. WALKER. In other words, Mr. Speaker, we are waiving points of order on a conference report that the Rules Committee did not even have before it at the time it was decided to waive the points of order; is that correct?

Mr. HALL of Ohio. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am happy to yield to the gentleman from Ohio.

Mr. HALL of Ohio. Mr. Speaker, it really is a very unusual procedure for the Rules Committee to bring a conference report out like this. We very seldom ever do it. None of us relished the opportunity to present this rule or any of the rules on the conference committee at this late date, but because of it, because of the situation, because of the lateness of the session, it was felt that the conference committee agreement was forthcoming and it was felt that if we did not want to delay the House for more than 24 hours, possibly 48, that we needed to expedite this, so that was the reason for the rule.

I might say to the gentleman from Pennsylvania [Mr. WALKER] that at the time there was no opposition to it. The rule came out in a bipartisan fashion.

I cannot say that members of the Rules Committee are excited about this procedure, but it has been done before.

Mr. WALKER. Well, Mr. Speaker, I certainly understand the gentleman's point. I do understand that it is bipartisan. The fact that it is bipartisan, though, does not, it seems to me, negate that the problem that many of us as Members have is that we have the Rules Committee approving a rule here to waive points of order against a bill that they did not even have before them.

Can somebody explain to me what the points of order are that we are waiving? Do we know what it is?

For example, is the Budget Act being waived as a part of this particular procedure?

It would be helpful before we approve the rule to know whether or not by waiving all points of order what it is we are doing. As pointed out many times by liberal Members on the floor, this is the single largest bit of spending that the Federal Government does. It would be helpful to know just what it is we are doing here.

What points of order is it that we are waiving with this particular rule?

Mr. HALL of Ohio. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I am happy to yield to the gentleman from Ohio to explain what the points of order are that we are waiving here.

Mr. HALL of Ohio. Mr. Speaker, may I say to the gentleman from Pennsylvania [Mr. WALKER], what has been asked for and what has been granted by the Rules Committee is a waiver of clause 7 of rule XVI; clause 5(a) of rule XXI; clauses 2 and 3 of rule XVIII, and pertinent provisions of the Congressional Budget Act of 1974.

Mr. WALKER. So we are, in fact, waiving the Budget Act for this particular rule? We are taking the step of suggesting that as we make the largest expenditure that this Congress will make that we are going to do it in violation of the Budget Act; is that what I understand from the gentleman?

Mr. HALL of Ohio. The conference report ran afoul of the strict requirements of the Budget Act by retaining

the House position on the 3-percent military pay raise. The trouble is that even though the 3-percent pay raise was contemplated in the budget resolution, no new entitlement authority was allocated to the defense budget function; so as a result of that, there is a violation. Therefore, we need a waiver.

Mr. WALKER. So in order to raise pay for the military and so on, which is something which was one of the smoke and mirror gimmicks that was put in the Budget Act to try to bring down the budget, now we run afoul of the smoke and mirrors with this particular conference report?

I happen to think that that is a pretty good thing to be doing in the bill that is coming before us, but the fact is what it shows up is the phoniness of the budget process that we had out here, because that particular provision was put in there by way of smoke and mirrors to try to come up with figures that we knew were phony all along, so now we run afoul of that, so what we do is simply waive all points of order without the conference report even being before the committee and we run afoul of the Budget Act.

It seems to me that it is a lousy procedure. The gentleman has said that the Rules Committee does not like to do this on a regular basis. I would think that the Rules Committee should not do it at all is my concern.

I am extremely concerned about this business of having things come before the Rules Committee that are not even in print. They have no idea what is in these documents and we end up then waiving all points of order, which are the rules of this House for consideration.

Some of the things mentioned by the gentleman with regard to rule XXI are legislation in an appropriation bill or authorization without appropriation. There are all kinds of things that are involved in rule XXI.

I just think it is a lousy procedure and that this House ought not to be asked to consider legislation in this manner.

I know it is late in the session, but the fact is that a lot of damage gets done in this Congress late in the session. We do an awful lot of spending and that is where budgets are busted to an extent that is unbelievable to most Americans. I would suggest that this is a bad way to do business. I would hope that one way of sending a message that it is a bad way to do business would be to vote against this rule.

Mr. TAYLOR. Mr. Speaker, I yield 18 minutes to the gentleman from Alabama [Mr. DICKINSON], the ranking member of the Armed Services Committee.

□ 1215

Mr. DICKINSON. Mr. Speaker, I too share the frustrations of the gentleman who preceded me in the well as to the rule and as to really the entire procedure that we are having to go through here.

I was on the floor the other day when a member of the Committee on Appropriations brought up the fact that they got the authorization bill late, and if the authorizing committee had done their work in a timely manner, then we would not be jamming up the Appropriations Committee late in the session.

I thought at the time that it was an unusual comment, and certainly far off the mark, and I thought I would take a few moments here just to discuss it for the edification of the Members of the House.

I think that the root cause of most of our problems here is the Committee on the Budget. We have a Budget Committee that we hoped would expedite the business of the House and allow us to go about it in a orderly and businesslike manner: that they would set out for the authorizing committee what the budget levels should be. We would then mark to that figure, and then give that mark to the Appropriations Committee, which in turn would appropriate up to an amount not to exceed the authorized amount. That is the usual course of business.

It is not working. It has not worked. And because of the various time limits put on us, I think that it becomes more apparent with every passing day, and certainly with every passing Congress, that we are going to have to go to a 2-year budget cycle. You cannot do it in 1 year under today's circumstances.

The Budget Committee was scheduled to give us the budget resolution on April 15. Do you know when we got it? June 26, 2½ months late.

All of this time we are sitting there with our motors running, ready to take off and go, but we did not know what level to authorize to.

So we marked twice in the authorizing committee. Initially, we had to guess what the budget figure would be. When we finally got the figure from the Budget Committee, we had already met and done the best we could and, then learned that the final budget figure was different. Then, the Budget Conference with the Senate came back with a different figure, and we had to mark again to that new level.

All this time the clock was running, the calendar was turning, and we were getting closer and closer to adjournment. We will all remember, I am sure, that we were given a target adjournment date of the third of this month. We did not make that, so it moved to the 10th of this month. We did not make that, so here we are today on the 15th and we may not get out of here this week. Many of our colleagues have gone home; they have to get reelected.

We are now in a position where we have a conference report from the authorizing committee coming to the floor, we are now considering the rule under which the report will be considered. As a conferee I sat for 3 weeks conferring with our Senate adversaries on one side and our House adversaries on the other, and some Members who were even on the Armed Services Committee. This conference was the most convoluted and confused of any that I have participated in.

In my 22 years in Congress, there has never been a rule granted like ours. It not only provides conferees that are not on the Armed Services Committee, it mandates that these "exclusive" conferees have to agree with the outcome on their assigned area before the full bill can pass. It is certainly strange when conferees not on the Armed Services Committee can in effect dictate whether or not we will even have an authorization bill or a conference report. These extraneous conferees, many of whom are not interested in the defense bill, have no incentive to compromise on their limited areas of interest. They can say, "Take our position or you cannot get a bill." And this happened.

We had special conferees on arms control. We had special conferees on Davis-Bacon. We had one special conferee on the minority set-aside issue.

So now we are asked to approve a rule which waives points of order. At 10 o'clock last night after I had left, I got a call saying that all the issues were resolved and asking permission to submit it. Without even knowing the deficits in the final agreement, but having debated it for 3 weeks and knowing that this was all that we were going to get, I reluctantly signed the conference report on all but one action.

The point that I am trying to make is that we now have a convergence of several disturbing factors. First we have a rule that is waiving points of order on an authorization bill whose details are still a bit vague. We have only a press release put out by the committee staff describing what is in the authorization bill.

Following the authorization bill is the overall continuing resolution, which we have little or no chance to discuss. There will only be an hour debate on the entire continuing resolution, of which defense is just one part. We will not have time to discuss what the Appropriations Committee did in the continuing resolution, and now I, as the ranking member of the Armed Services Committee, do not know what is in the continuing resolution.

However, I have been told and have been shown language in the statement of managers that is absolutely contrary to what we agreed to in our authorization conference with the Senate on the T-46 trainer, which was one of the main sticking points and one of the main areas of discussion in the conference. Although the company cannot perform under the existing contract, I am told that the Appropriations Committee will provide fiscal 1987 funds and direct the Air Force to go foward with the program, even though in our conference with the Senate we agreed that there should be a competition and any plane could compete using last year's money, most disturbingly, the continuing resolution will direct the Air Force to enter into a new contract, because the company cannot meet the terms of the old contract. This is nothing more than a bailout.

□ 1225

The reason I am taking this time to go through this now is that there will not be sufficient time in the debate on the authorization bill conference report, and certainly not later on the continuing resolution.

Mr. COURTER. Mr. Speaker, will the gentleman yield?

Mr. DICKINSON. I am pleased to yield to the gentleman from New Jersey.

Mr. COURTER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I am asking the gentleman a question because it is difficult, as you know, to find out precisely what is happening in these conferences, in the rules and the conference reports because they seem to be patched together behind closed doors. The question I have is whether the continuing resolution will embrace all aspects of the defense authorization conference report? We were told that if we did get a defense authorization bill conference report, then that would be folded into the continuing resolution. I am asking the gentleman as the ranking minority member on the Defense Authorization Committee whether that, in fact, is the case, and whether the gentleman has been assured that that is the case?

Mr. DICKINSON. The short answer is no, that is not the case. But in fairness to the other body and to the Appropriations Committee, let me say that we met with the appropriators last week who told us that if we did not complete action on our bill by that day, they would have to go forward and that all bets were off. The appropriators also said that if we did not give them the complete bill—not just the numbers, but the complete bill, including language, which we did not finish until 10 o'clock last night—then they were not bound by any agreements that we had tried to observe. And so, we have never seen a copy of the proposed continuing resolution language.

The T-46 is just one example of an appropriation that has not been authorized. I understand that the chairman of the Senate Armed Services Committee is going to offer an amendment to the continuing resolution that would take this language out. Then we will be back at it again and it will be sort of a game of ping-pong between us and the other body. They will take it out and we will say it has to be in.

Mr. COURTER. If the gentleman will yield further, you are talking about the trainer, the T-46?

Mr. DICKINSON. I am talking about the T-46 at the present time. There might be other things that we do not know about.

Mr. COURTER. What about the issues of the various arms control proposals which were a part of the defense authorization bill? You had an obligation to live within SALT II, no antisatellite testing, binary weapons, et cetera.

Mr. DICKINSON. All I can tell the gentleman is that we had a panel and a subpanel on arms control.

Mr. COURTER. I know that.

Mr. DICKINSON. And as the ranking member, I asked the gentleman from New Jersey who is presently speaking if he would represent the minority on that subpanel along with the gentleman from California [Mr. BADHAM]. I understand the gentleman was informed that there was a moving meeting like a moving crap game from here to there and that the gentleman was not always advised about that.

Perhaps the gentleman could enlighten the House about that. Were you advised or did you sit in or were you a party to the final conclusion on the arms control limitations?

Mr. COURTER. The answer to the question is no, I was not. There was, as the gentleman knows, what was called a special panel to deal with the arms control issues, as well as strategic defense, which was quite irritating because that particular panel was filled with Members of this body that are not members of the Armed Services Committee, who were in control of dealing with the issue of the proper level of funding for strategic defense.

But the point is that that special panel met once or twice without a great deal of progress. Then there was a subpanel to that panel of which I thank the gentleman from Alabama for appointing me to as well, so it was down to five, and then that did not meet at all. I do not think that subpanel met once, and then negotiations were taking place without myself, without minority representation that I know of at all. The gentleman is the ranking member of the Armed Services Committee, and I do not think the gentleman was apprised of any types of negotiations with respect to the arms control issues. I notice with a great deal of interest that the other body, when they were negotiating with the House, had representation from their majority and their minority. But when they looked on the negotiations with regard to arms control issues in this body, the House of Representatives, the minority was not represented at all.

So I read in the paper what happened. But of course we did not have any input in it at all.

Is the gentleman telling me that even if we pass this rule and pass the conference report on the defense authorization, that the continuing resolution may not reflect at all the work of the Armed Services Committee?

Mr. DICKINSON. That is exactly my understanding.

I now see the chairman of the Armed Services Committee on the floor, the gentleman from Wisconsin [Mr. ASPIN]. He is on the floor and has been here during the course of my remarks. If he would like to rise in reply or a refutation of anything I have said, I would be glad to yield to him.

He declines to rise, so evidently he agrees with me.

I will tell you, trying to keep up with the panels that were meeting and the product that they came up with, as I said, it was sort of like a floating crap game. You did not know exactly where it was going on, and you did not know whether you could get in on that game or not.

Now getting back to the original point that I tried to make, talking about the timing, the House budget resolution was supposed to be reported on May 15. We made our first mark on June 26 to try to anticipate what it would be. The budget conference was April 15 and it did not come out until the same date, June 26. Then we went back and made our second mark on July 25, which passed on August 15.

So I do not think we are going to change anything here on the floor at this moment. But if there is one point that I would like to make in all of this, it is that under the rules and under the procedures we follow here in the House you cannot do what is required of you by waiting for the Budget Committee, which comes out 2 months late with its mark, and then have to hurry and complete our much so the Appropriations Committee will have an opportunity to appropriate according to what we have done. We are being squeezed on both ends.

So we have labored all year to come up with a bill, and we have sat for 3 weeks with the other body to come up with a conference report. Then later today comes a continuing resolution by the Appropriations Committee that ignores what we have been working on

all year, and we will not even have an opportunity, to discuss the changes, to know what is in the bill, to get at them by way of striking or deleting or amending, because the rule is going to preclude those changes. So the whole process winds up to sort of a nullity so far as the House Armed Services Committee is concerned, unless you happen to be on the inside and made some sorts of deals, but unfortunately we cannot all be there.

I thank the gentleman for yielding me this time.

□ 1235

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HALL of Ohio. Mr Speaker, I have no requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device and there were—yeas 250, nays 159, not voting 23, as follows:

□ 1245

Messrs. MICHEL, WORTLEY, and YATES and Mrs. MEYERS of Kansas changed their votes from "yea" to "nay."

Mr. COELHO and Mr. SYNAR changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. ASPIN. Mr. Speaker, pursuant to House Resolution 591, I call up the conference report on the Senate bill (S. 2638) to authorize appropriations for military functions of the Department of Defense and to prescribe military personnel levels for such Department for fiscal year 1987, to revise and improve military compensation programs, to improve defense procurement procedures, to authorize certain construction at military installations for fiscal year 1987, to authorize appropriations for national security programs of the Department of Energy for fiscal year 1987, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Pursuant to House Resolution 591, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of yesterday, October 14, 1986.)

POINT OF ORDER

Mrs. SCHROEDER. Mr. Speaker, I rise to make a point of order.

The SPEAKER pro tempore. The gentlewoman from Colorado will state her point of order.

Mrs. SCHROEDER. Mr. Speaker, under the rule my understanding is that if neither of the gentlemen are opposed to the bill, and as I am opposed to the bill, I am entitled to one-third of the time.

Mr. Speaker, I would like to demand 20 minutes of the time.

The SPEAKER pro tempore. Is the gentleman from Alabama opposed to the bill?

Mr. DICKINSON. Mr. Speaker, I reluctantly oppose it. I do oppose it.

The SPEAKER pro tempore. The gentleman opposes the bill; therefore the gentleman is entitled to the time.

The gentleman from Wisconsin [Mr. ASPIN] will be recognized for 30 minutes, and the gentleman from Alabama [Mr. DICKINSON] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. ASPIN].

Mr. ASPIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, what we are bringing up before us here is the conference report on the Defense Department, DOD authorization bill for fiscal year 1987.

I would at the outset like to compliment a number of the people who have been involved in putting together this conference report. Let me first of all compliment the ranking minority member, the gentleman from Alabama, Mr. DICKINSON. Let me also compliment the majority whip, Mr. TOM FOLEY, who was terribly helpful in putting the bill together, and to compliment Mr. "NICK" MAVROULES, the gentleman from Massachusetts who worked long and hard putting together the procurement reform package, and all of the subcommittee members and the ranking minority members of each of the subcommittees in putting together the negotiations that went into putting this bill before us.

I would like to outline the major issues in this bill and then let the general debate take care of the specifics if anybody has particular questions.

Basically on the issue of the dollars, the dollars in this conference report is a split between the Senate position and the House position. The position of the other body was $295 billion in budget authority, the House position was $286 billion in budget authority. We split the difference and ended up with $291 billion in budget authority, which is under the budget resolution as passed by the House and so is consistent with the budget resolution.

The bill contains some very, very important procurement reforms and some procurement reform issues. The bill contains some very important items for the security of the country that all people, I think, Democrats and Republicans, support; a 3-percent pay raise, funding for Midgetman, and other issues.

Let me talk just a little bit about the arms control provisions because the arms control provisions also apply to the continuing resolution and are an important part of what was agreed to.

The House had in its bill that we passed here a lot of very, very important and far-reaching arms control proposals.

We had an amendment that would have bound the President to stay within the limits of SALT II. We had a testing moratorium that required the Soviets to comply and to go along with and comply with certain verification procedures but would have required no testing above 1 kiloton beginning January 1.

□ 1300

We had a $3.1 billion, a fairly low level of funding, for SDI. We had a ban on chemical weapons testing, and we had a continued ban on the testing of ASAT weapons as long as the Soviet Union continues to abide by the ASAT tests.

We got into the negotiations on those issues, and negotiations were proceeding as normal negotiations ordinarily do. You could see some give on both sides and the process was going along and the negotiations were taking place.

All of a sudden it was announced that the President was going to meet with the Soviet leader in Iceland and the whole tenor of the discussions on the arms control negotiations changed dramatically. Senator WARNER called and said that some of the agreements on ways to resolve these issues, some of the proposals that he would have been willing to entertain before this announcement of the summit, he was no longer willing to entertain. In fact, for about a week the whole discussion on the arms control provisions just kind of ground to a halt.

At the end of last week, it was decided among the House leadership on the Democratic side and a number of people met, and the group decided that what we would do would be to go ahead and make a deal with the Senate on these five issues. It was by no means a 50–50 cut of those issues. I would say it was more like 60–40, maybe 63–35, in favor of the Senate position on those issues. But it was the decision of the leadership that, given the situation that the President was going to an important meeting with the Soviet leader over the weekend, it was important to get these issues behind us and send the President off without these issues unresolved and still waiting his return. So a compromise was reached which did not fill in all the gaps, but in fact structured the outcome in ways that had the broad outline. The broad outline was that we in fact back off on our binding language on SALT II and accepted sense-of-the-Congress language in the resolution. We backed off of our testing moratorium and, in fact, accepted in the interest of going forward with the threshold test ban and the peaceful nuclear exchange treaties and a pledge to begin negotiations toward a CTB.

We did keep the ASAT moratorium. We split the difference on the SDI funding. And we said on the chemical issue we would go ahead with the 155 shell, but we would postpone on the Bigeye. And that was in essence what happened.

The issue was rejoined when we came back after the weekend, and there were several minor issues left to fill in the blanks. One was the issue of the language on the SALT II agreement What we had decided was to back away from the binding prohibition to violate SALT II, and go instead for language. The question was: What language should there be in there? The details were to be worked out on the chemical issue, and the details were to be worked out on issues of MX and Midgetman funding.

We resolved those issues finally yesterday, and we resolved an issue that I think goes toward what most people in favor of those provisions would have liked on the SALT II language. It is unambiguous language that it is the sense of Congress to the President that the United States shall stay within the SALT II sublimits, provided the Soviet Union does likewise.

On the chemical issue we said we will go ahead and produce the 155 shell of binary chemical weapons, but that the production of the Bigeye would be delayed for 1 year. Current law, for example, says no production of Bigeye before October 1, 1986, no final assembly of Bigeye before October 1, 1987. Both of those dates are bumped 1 year. The language in the bill before you says no production of Bigeye before October 1, 1987, and no final assembly before October 1, 1988.

On the final issue we did go ahead and have almost full funding for the Midgetman, and the number of MX missiles was the House position that we would build 12 MX spare missiles instead of the 21 that the Senate had.

In essence, that is the agreement before you. I would say it is a bill that we have before us which is a good bill. Under the circumstances, I would say it is probably a very good bill.

Mr. Speaker, from our markups in committee in the spring, through our consideration in this Chamber in the summer, to our deliberations in conference with the other body in the fall, this bill has required a lot of hard work from a lot of people. I would like to take a moment, however, to single out the team of lawyers from the Office of Legislative Counsel who helped us give clear statutory expression to the will of the Congress. These professional drafters—Bob Cover, Joe Womack, Liz Powell, and Sherry Howman, together with Hugh Evans for the other body—worked 20-hour days on end during each of the seasons through which this bill passed. No one contributed more to its production for our consideration today. I know these legislative counsel have the heartfelt thanks of the Armed Services Committee; I thought they also should receive the recognition of the House.

Mr. BEDELL. Mr. Speaker, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Speaker, I thank the gentleman for yielding to me.

Mr. Speaker, first of all, I would like to commend the gentleman for his effective bargaining in the conference. I was very proud of the way the gentleman bargained.

But I would hope that the House would understand the situation on the Bigeye. Whereas we said we would hold back production, the Senate has put in $90 million to proceed with the facilities in order to produce the bomb. It will take 2 years to build the facilities. So the reality is that, whereas we say we have done something, we have really done nothing in terms of delaying the Bigeye more than it would have been if we had done nothing.

So I hope we will not be fooled by what was done on the Bigeye. In my opinion, it was not according to the agreement that was made.

Mr. ASPIN. Mr. Speaker, I think the important thing about the Bigeye is that it is available to be revisited by the House and the Senate in legislation again next year. I think that when we said what we were trying to do was to go ahead with the 155 and delay the Bigeye, the main thing is that it is again available for the people to review the issue, and the House, I am sure, will revisit that issue.

Mr. BEDELL. Mr. Speaker, if the gentleman will yield, I guess the objection I have is that, at least in my opinion, the Senate did not live up to the agreement as it was written in the letter that they provided us and as it was our understanding of the agreement.

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. ASPIN. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Speaker, I wish to commend the gentleman for his leadership on this bill. It has been a very difficult and arduous task. Having been on the conference committee and sat through the many hours, I understand the many problems, and I think the gentleman did an admirable job in the leadership on behalf of the House.

This is, in my opinion, an excellent bill. In a compromise, we all know there are going to be some very strong pluses and some red lights that cause some concern.

I wish to point out the major step that was made in this bill in restructuring the Special Operations Forces. The thanks goes to the gentleman from Virginia [Mr. DANIEL]. I rode shotgun on this issue in trying to keep it parallel, which we were able to do, with the reorganization bill that we passed earlier. I think that is a step in the right direction which will not be headlines, but which will be a very, very major step toward security.

One question concerning a concern, and this is one I am sure we did the best we could. But if the gentleman would look into the crystal ball and see what he can see in the future regarding the O&M, I am concerned about the fact that the O&M was not what we thought it should have been. I would appreciate the gentleman's comments on that.

Mr. ASPIN. Mr. Speaker, I would like to respond to the gentleman from Missouri. As the gentleman knows, in conference we would have liked to have given more to the O&M account than we did. The reason we ended up cutting it was it became clear that the appropriations conference, which was running parallel to ours, was not going to fund O&M up to our fully authorized level, so we figured we might as well go down to their level and use the money for something else. But it was clearly the concern of all of the conferees, Senate and House, Republican and Democrat, that we were coming up short on the O&M funding in this year's budget.

Mr. SKELTON. I am sure we are going to have to revisit this in the days ahead.

Mr. ASPIN. Mr. Speaker, I reserve the balance of my time.

Mr. DICKINSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in looking at this bill, I have finally come to the conclusion that I prefer not to support it, even though I recognize that after 3 weeks in conference with the Senate, this was the best we could do. I have to conclude that the bill has three parts: the good, the bad, and the ugly.

□ 1310

There is some good in here. The budget authority came out at $291.9 billion. This is essentially the same as my amendment level which failed on the House floor, but that is what we offered in committee and it passed. I think that is a reasonable level.

The defense programs were left essentially intact. Because of higher budget authority we were able to fund most of the weapons systems at a reasonably efficient production and protect vital research and development programs.

On the arms control agreement, we did not get what the committee felt that we needed but there was a give and take. I think we can live with the final product. As has been explained by my chairman, on the chemicals we split the difference. We eliminated the Bigeye bomb but went forward with the 155 howitzer. We eliminated the language in there requiring that before any could be removed from Europe that something had to be put in its place.

As to the Comprehensive Test Ban Treaty and the SALT language, I think the chairman has covered that pretty well. It was a fair exchange and fair deliberation where both sides felt cheated but both sides felt like they had enough to support it.

The procurement reform package, like arms control, was a fair compromise. Some of the major compromises with the Senate were: To establish an Under Secretary of Defense for Acquisition which was recommended by the Packard Commission which I recommended: work measurement, which preserved the concept without imposing burdensome data reporting requirements, the revolving door policy, which puts limitations on employing people from both the Government civilian or the military side that had worked on programs to go to work for defense contractors on the same programs. I think that was fair.

Then there was the minority set-aside provision. The Members of the House will remember that we had a rather heated debate on the floor and in the committee. We offered a 5-percent set-aside as a goal to achieve to give the minorities in this country an opportunity to share in defense contracts, whether it be procurement or research and development or military construction. It was not our intent to limit it to every segment of spending but across-the-board. This was not accepted by the House, which put a 10-percent mandatory level for set-asides when an amendment was offered on the floor.

We have debated this long and hard. Let me say to the Members that I think Mr. DELLUMS did an outstanding job in representing the House position. So did Mr. SAVAGE, whose amendment it was to increase the goal from 5 to 10 percent. They were reasonable; they were willing to work toward a conclusion that all could live with. We did this. Their positions were not set in concrete. As a result, we came out with a very fair and workable conclusion. We have a target of 5 percent to run for 3 years. It cuts across-the-board, and it is something that we can work toward. If it cannot be realized then the Secretary is to come back and tell us why it cannot be realized. But it does not tie his hands and mandate that he absolutely achieve a particular percentage. It says this is a target that is reasonable and fair.

Mr. Speaker, I do want to commend the gentleman from California, the chairman of the Military Construction Subcommittee, Mr. DELLUMS, and Mr. SAVAGE for their work.

Mr. MITCHELL. Mr. Speaker, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding to me.

Mr. Speaker, I appreciate the efforts of the gentleman on behalf of the set-aside. I want to be clear: You are indi-

cating it is a target. It is not a mandated set-aside at 5 percent?

Mr. DICKINSON. That is correct.

Mr. MITCHELL. Then, to follow up on that, under almost any circumstance that target could be not reached or denied; is that correct?

Mr. DICKINSON. No. Well, you say denied. To deny it would be an intentional act on the part of the Secretary of Defense and he does not have the right to do that. He is directed to work toward this goal, but it does not say that he must, under pain of penalty, achieve this goal within a particular time. It says this is desirable; he is directed to work toward it. If he cannot achieve it, then he is to report back to us and tell us why he was unable to achieve it so that we can work to remedy that.

Mr. MITCHELL. I thank the gentleman for his explanation.

Mr. DICKINSON. Mr. Speaker, so much for the good.

As to the bad, we have labored rather extensively here on the House floor to get an amendment in to raise the threshold of Davis-Bacon, which is a requirement dealing with labor contracts on construction. It was made in order and it was ruled in order as germane to military construction on military bases.

Mr. Speaker, this is the bad part. By virtue of the capricious actions of some, we were under time constraints to limit the debates and all amendments had to be approved by the Rules Committee. There were 150 rules made in order. There was one request for a rule that initially was not made in order, and that was mine. As the ranking member I was denied the right to offer an amendment dealing with Davis-Bacon.

As a result of some rather protracted negotiations, this was later remedied. My amendment finally was made in order, but ultimately in conference with the Senate, this entire subject was dropped. There is no language in here, even though we do have an agreement by the chairman of the Education and Labor Committee that there will be hearings and that a bill will be reported out next year. That is one of the bad features.

The T-46 was a bad feature because the Air Force has said that this was a trainer that they did not want. They said they had a contractor that had not complied with terms of the existing contract. The Air Force felt that the contractor could not comply, so we had an extended debate here on the floor. The House voted to put money in, and this was one of the most hotly contested items during the conference. In conference, it was agreed in a spirit of compromise that there would be a competition for any planes: the T-37, a modified T-37, the T-46 and perhaps another candidate which might be the British Hawk trainer that the Navy has bought. This was the agreement that we reached with the Senate. Now, I am told, Mr. Speaker, that in the continuing resolution this will be totally overturned. This agreement to have a competition will be thrown out. The Air Force is to be directed not to have a competition but to buy this particular plane and to renegotiate the contract.

By raising our objections to the T-46, I said that the manufacturer could not perform under the existing contract. He has admitted it. It was to be bought in 2 lots; a first lot of 10 and a second lot of 20. He started building lot one and built two and quit. He also cannot perform under the specified contract of lot two. But the continuing resolution will say nonetheless that the Air Force is directed to cancel the existing contract that the contractor cannot meet, which means that the taxpayers pay the additional costs under a renegotiated contract.

□ 1320

If there ever was flying pork barrel, the T-46 is it.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. DICKINSON. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, first I want to compliment the gentleman for his help in this matter.

Where are we with a defense authorization bill which basically says we are not going to build the T-46, we are going to have a fly-off and an appropriations bill which provides money? What does the Air Force do under those circumstances?

Mr. DICKINSON. We will have to wait and see, will we not? I do not know that that is going to be the final shape of it because I understand there is going to be some additional activity on the other side of the Capitol on this issue. They have more flexibility than do we in offering amendments and correcting the inequities of a continuing resolution.

We are pretty well stuck with it, but we will just have to wait and see.

Mr. GLICKMAN. Mr. Speaker, I just want to compliment the gentleman for his work on the T-46, and I hope that that is what the Air Force looks at in terms of deciding what to do in the future.

Mr. DICKINSON. I thank the gentleman; and there have been currents and cross currents and politics that play here, but let me say they do not build any portion of this in my district. I could not care less as far as the economic impact, but I know that it is the wrong plane at the right time, or perhaps it is the right plane at the wrong time.

The contractor cannot perform, but the Air Force is being ordered to buy them anyway. The same people who make the most noise about efficiency in Government and doing away with waste, fraud, and abuse are going to vote to mandate a $3 billion program that is nothing but waste, fraud, and abuse.

Getting on to the ugly part of our bill. Our conference was set up so that conferees were appointed that are not members of our committee and then they were given the authority to be the sole arbiters on a particular issue. We had one special arms control conference with special conferees. We had Davis-Bacon conferees set up; we had set-aside conferees set up; we had procurement reform conferees set up, and the rule was written so that if each one of those could not reconcile by a majority vote within that special panel, then the special conferees could kill the whole bill.

As I said during the discussion of the rule, that meant that people who are antidefense—and we have some here, who have no interest in passing a defense authorization bill—could just sit down and not care about negotiating to come up with a final product. They would be happy to see the whole thing killed. So it was their way or no way.

This is what we had to contend with; these were the circumstances under which we had to operate. It was most unfair. It is a unique experience, I believe, of this House. You have to wonder where we are going, you have to wonder about the viability of the authorizing process. Will authorizing committees finally be irrelevant to the process so that the Committee on Appropriations will do everything? Will they do the authorization and the appropriation? That is what is happening in this instance with the continuing resolution and with our bill.

As to one of the other ugly things; the bill is brought to us with mismatched budget authority and outlay figures, as the chairman pointed out. Under Gramm-Rudman, our outlays are limited in order to avoid what triggers a Gramm-Rudman sequestration. But the Committee on the Budget came in and said, "There are two sets of figures. Here is budget authority. Here are outlays." But it was a political decision because there is no way that those two can meet without using gimmicks, without using trickery, without using, as we say, smoke and mirrors.

What did they do? They slipped a pay date, 1 day, so that it falls into the next fiscal year. That does not save any money; it is just trickery. They say, "We will take advantage of the unused inflation that had been apportioned." That does not save any money. Again, it is just trickery.

All of these gimmicks are used to arrive at an arbitrary figure that they had to meet because the Committee on the Budget would not give us a realistic outlay figure that would in any

way coincide with the budget authority figure.

So for that reason, plus the fact that the Committee on the Budget was 2 months late giving us a budget figure to mark to, I think many of the ugly things to the bill need to be corrected next year, but I think under today's circumstances, we can only really address and remedy the problem with a 2-year budget cycle. You just cannot do it all in 1 year.

I would hope that we would get to that point.

Mr. Speaker, for that reason, we have done the best we could, but for the fatal flaws that I find in here, I would have to vote against it.

Mr. Speaker, I reserve the balance of my time.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Virginia [Mr. DANIEL].

Mr. DANIEL. Mr. Speaker, I thank the gentleman for yielding.

While I do not like the product, the chairman and the ranking member deserve credit for the hard work which they have put into the development of this report.

Mr. Chairman, I rise in reluctant support of this measure. In doing so, I am applying the 51-percent rule, which I have used since becoming a Member of this body. Since practically all legislation is compromise, it has been my practice to vote for a bill if it is 51 percent good, and to vote against it if it is 51 percent bad. This report falls in the former category.

The message I wish to bring is that no one should be surprised if they read in the press the phrase "hollow army," as it relates to this bill. In 1981, we undertook to develop a better balance between investment and operation and maintenance. We have made considerable progress.

This, and the appropriation conference report, will reverse that trend.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Texas [Mr. GONZALEZ].

Mr. GONZALEZ. Mr. Speaker, I thank the distinguished chairman for his hard work on behalf of this bill.

I rise in order to clarify a matter having to do with the Brook Army General Hospital at Fort Sam Houston, in San Antonio, which is in my district, and to make sure that the language clearly means that the design work for which $13.5 million has already been expended for a replacement hospital is to continue on the basis of a design for a 450-bed replacement hospital.

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, the gentleman from Texas is correct.

Mr. GONZALEZ. Mr. Speaker, I thank the gentleman.

Mr. DICKINSON. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from New Jersey [Mr. COURTER].

Mr. COURTER. Mr. Speaker, I would like to have the chairman of the committee, the gentleman from Wisconsin [Mr. ASPIN], answer an inquiry.

We were talking, during the debate on the rule, as to whether what we are doing here with regard to the passage of the authorization is going to be dovetailed into the continuing resolution. I think it is a legitimate question.

The gentleman from Alabama [Mr. DICKINSON] could not really answer that question, so I would like to have the gentleman from Wisconsin try to answer the question.

If we pass this authorization bill with the T-46, with the arms control provisions, with the provision that the members of the Committee on Armed Services and the conferees, whether they be on that committee or not, worked out, is that going to be included in the continuing resolution or are they going to ignore the work of this conference?

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. COURTER. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, I would respond to the gentleman that certainly the arms control provisions, as we worked out, are to be applied in exactly the same language in both forums. We had, as the gentleman in the well knows, in the appropriation bill coming out of the committee exactly the same arms control provisions as we have applied to the floor to the authorization bill.

When the conferees began work on the arms control provisions, it was understood that whatever would be worked out would be applied to both bills, so we would not have two difference conferences going on, going over the same language.

Mr. COURTER. So on arms control, it is the same. On other things, it may or may not be.

Mr. ASPIN. On the other things, it is just like the difference between an authorizing bill and an appropriating bill.

Mr. COURTER. Mr. Speaker, how about the strategic defense initiative and the levels of funding?

Mr. ASPIN. That was included. Whatever number we came up with in our negotiation would be applied to the appropriations. It will be $3.5 billion in both bills.

Mr. COURTER. I thank the gentleman for his explanation.

A couple of things I would like to comment on before I yield back the balance of my time. I think it is important to keep in mind. I know that, as we get about States, as we get about talking to various constituents and people from the media, print and otherwise, there is a perception that more money and more money is being spent on national security concerns, that we are spending more money today than ever before; that it takes a larger percent of our GNP than ever before; that we are spending more money in 1986 over 1985 in real terms; that we are now going to spend more money in 1987 over 1986 in real terms; that, indeed, we kept the proliferating, and as a lot of people say, we should not attempt to balance the budget on our domestic programs; we should look toward defense.

□ 1330

I think it is important to keep in mind for those people who have that perception the fact that it is a misperception. Today in 1987 we will be spending in terms of a percentage of the wealth of this country significantly less than we did during the time that Eisenhower was President, during the time that John F. Kennedy was President, during the time that Lyndon Baines Johnson was President; in other words, we moved from approximately 10 percent, actually 10½ percent of the GNP, down to 7½ percent today. It is important to keep that in mind.

Second, with regard to the percentage of Federal spending, how big a slice of the Federal pie is national security? A lot of people have the idea that it is much more now than before. The reverse is true. Twenty years ago it was better than 50 percent of all of our Federal dollars going to national security. Now it is about 33⅓ percent, a reduction and not an increase.

When we look at the situation with regard to the amount of real dollars, and I think it is important to keep in mind real dollars toward the important function of national security, keeping our safety, keeping our way of life, keeping our liberty, guaranteeing the survival of our country, NATO and our NATO allies, our allies in the Middle East, such as Israel, and so forth.

In this year, 1986, we are spending in real terms 6 percent less than we spent in 1985. That is 6 percent less in 1986 over 1985. I am not saying it is wrong. I am not saying that we still do not have enough money for some vitally important programs, but it is totally different than the perception you get as you drive about America.

What are we doing now? Are we finally making up that 6 percent cut in real terms in defense from 1986 to 1985? This bill, this compromise language with regard to authorization, represents an approximate reduction of 2 percent in real terms in defense spending in 1987 over 1986. That is 6 plus 2, it is 8 percent less that we will be spending in real terms in 1987 over

1985. I think it is important for people to keep that in mind.

I think the most regrettable part, and I want to congratulate the gentleman from Alabama [Mr. DICKINSON], he labored in the vineyards day after day, week after week, month after month this year, in order to get the best we possibly could for our Nation's security. I would just like to thank the gentleman for the excellent job he did.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The time of the gentleman from Illinois has expired.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. DICKS].

Mr. DICKS. Mr. Speaker, I would like to engage in a colloquy with the chairman of the committee, the gentleman from Wisconsin, to clarify the intent of language included under the section expressing the sense of the Congress on nuclear testing.

Mr. ASPIN. If the gentleman will yield, I would be happy to help clarify this language.

Mr. DICKS. At the end of section 1002 on nuclear testing, language is included relating to compliance on both sides to any bilateral arms control agreement. It is unclear to me whether this is intended to refer simply to the subject of nuclear testing discussed in this section or whether it is intended to have a wider meaning. Could the gentleman provide some clarification on this point?

Mr. ASPIN. This language, which was included in the nonbinding legislation on nuclear testing passed earlier by this House, is simply intended to ensure that any testing agreement we may agree to at some future date would have to have reciprocol compliance, and is not intended to imply anything beyond that.

Mr. DICKS. It applies only to the section on nuclear testing?

Mr. ASPIN. Yes.

Mr. DICKS. I note that the language in this section states that the United States shall have no obligation to comply with agreements the Soviets are violating. While there is no obligation, is it the gentleman's understanding that it is the sense of the Congress that it is in the United States national security interests to continue compliance with the numerical sublimits included in the SALT agreement?

Mr. ASPIN. Absolutely, unequivocally, yes, and that was clearly the intention of the discussion and explicitly discussed with the Senate conferees.

Mr. DICKS. Mr. Speaker, I must admit I am disappointed with the outcome of the conference on the defense authorization bill on the package of provisions approved by the House which were designed to foster progress in the field of arms control.

I recognize the realities that have led to this outcome even though I fervently wish we had been more successful. I think it is clear that the blame cannot be laid on any Member of this House. I especially want to commend the efforts of the chairman of the Armed Services Committee who worked from the outset with real dedication on these provisions. I know he is just as disappointed as anyone in this body.

I have particular concern regarding the amendment I offered to continue compliance with critical numerical sublimits of the SALT II Treaty so long as the Soviets continue to observe these limits as well. My concern is not one of pride of authorship. It is a concern for the future of the arms race and the prospects for world peace.

We all know that SALT II is not a perfect agreement. But we also know that it represents the only limitations presently in place on existing strategic forces. It makes no sense to throw out these limitations, which are being observed by both sides, before we have something better in hand. It makes no sense from a military perspective, where the Soviets are much better poised to break out than the United States. It makes no sense from an economic point of view in light of the potential cost, estimated as high as $100 billion by the Congressional Budget Office.

Most of all it makes no sense in light of the current situation facing United States-Soviet relations as a result of the stalemate in Iceland. This unfortunate outcome has chilled our relations while at the same time indicating some hope for future progress on arms control. The worst step we could take at this point would be to poison the atmosphere further by unilaterally breaking out of the SALT numerical subceilings. It would make any progress on arms control even more difficult.

Such a step would also hand to the Soviets a major propaganda bonanza, which we can be sure they would exploit in Europe, especially in regard to the upcoming elections in Great Britain and the Federal Republic of Germany.

The conference agreement does convey to the President in no uncertain terms, the advice of both bodies of the Congress. That advice is, and I quote from the bill:

It is in the national security interests of the United States to continue voluntary compliance with the central numerical sublimits of the SALT II Treaty as long as the Soviet Union complies with such sublimits.

I fervently hope that the President will heed this advice and avoid what could well be a fatal mistake that would further bury any hope that his Presidency will produce the kind of deep reductions in strategic nuclear forces he says he desires.

Mr. DICKINSON. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois [Mr. PORTER].

Mr. PORTER. Mr. Speaker, the reason I am not going to support the conference report—and I consider myself a very strong supporter of our Nation's security—is the failure of the conferees to come to grips with the budgetary numbers. Someday, Mr. Speaker, we are going to have to understand that a sound economy is just as important to our national security as a strong military. Failure to address the deficit problem, to use gimmicks to push spending over into the next fiscal year, strikes me as the height of fiscal irresponsibility.

I am also very disappointed, Mr. Speaker, in the provisions on chemical weapons. I had thought that just prior to the meeting in Reykjavik there was an agreement that we would go ahead and produce the 155-millimeter chemical shell, that we would not authorize the Bigeye bomb, that we would leave in the language on keeping our stockpile in Europe. That was my understanding of the deal.

Now we find that we are going to go ahead and produce the 155; that the Bigeye is not eliminated, but funded and then delayed for a year, which means that next year there will be production of the Bigeye bomb unless both the Senate and the House each agree not to do so. You know that the Senate will not agree and therefore the Bigeye bomb, which is a weapon totally unfit for production, will be produced. Finally, Mr. Speaker, the language that the House put into the bill saying that we should keep our stockpile of chemical weapons in Western Europe until they are replaced by the binary weapons is deleted.

So it will mean Mr. Speaker, that in the final analysis we will produce a Bigeye bomb that does not work; we will produce binary weapons that may work, but they will be stationed only in the United States, and that our entire chemical deterrent in Western Europe, our first line of defense against a Soviet chemical attack, will be lost. I think that is absolute folly. That is insane.

Mr. Speaker, I would urge Members to oppose this conference report.

Mr. ASPIN. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland [Mr. MITCHELL].

Mr. MITCHELL. Mr. Speaker, I thank the gentleman for yielding me this time. If I could get the gentleman's attention, I would like to engage in a colloquy, when and if I can get the gentleman's attention.

Mr. Speaker, at the gentleman's request, indeed at the gentleman's insistence, we worked together on some changes in procurement for small business procurement activities with the DOD. Am I correct, those five major changes were the issue of a fair share for small business, the issue of a downward adjustment for size standards; the definition of a market or industrial category or specific category; a fair market price under both section 15(a) and 8(a) of the Small Business Act, and a further refinement of the definition of small business where they will be required to do approximately 50 percent of the work?

Am I correct in understanding that all those provisions are included in this conference report?

Mr. ASPIN. Mr. Speaker, if the gentleman will yield, the gentleman is correct.

Mr. MITCHELL. The conference report contains in it a special provision with regard to construction at the Great Lakes Air Station. That has a 30-percent set-aside.

In the gentleman's opinion, does that do violence to any of the other set-aside provisions and size standards that were worked out in the conference?

Mr. ASPIN. No.

Mr. MITCHELL. Because this is a special category, apparently, in the gentleman's district in Wisconsin.

Mr. ASPIN. It is a pilot project, because all the provisions that we had worked out that we had in our bill that would take place immediately, the Senate insisted that there would be a 1-year delay for those provisions to take effect. I tried to negotiate a 6-month delay. The Senate would not accept the 6-month delay. What they would accept was a pilot project during the year's delay and we settled on a pilot project during the year's delay.

Mr. MITCHELL. Mr. Speaker, I thank the gentleman. If I have time, I just want to add one other statement. I think I am about finished with my colloquy.

In terms of two parts of the bill, the same business procurement activity and the minority business set aside, it makes it awfully attractive for me to want to vote for the bill.

On the other hand, as I look at the bill, it looks like a quantum step retreat from the kinds of things we have been seeking for peace, so I may be perforce to vote against it because of the retreat on the peace issues.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentlewoman from Tennessee [Mrs. LLOYD].

Mrs. LLOYD. Mr. Speaker, I would like to engage in a colloquy with the distinguished chairman of the committee, the gentleman from Wisconsin [Mr. ASPIN].

Mr. Speaker, it is my understanding that what is intended by section 3034 of the act is to resolve a Department of Energy problem with land transfers to the communities surrounding the Oak Ridge reservation in Oak Ridge, TN. The agreed-upon language affirms Congress' intent that the purposes of the Atomic Energy Community Act of 1954 remain an agency function falling within the coverage of section 161(g) of the Atomic Energy Act of 1954. However, the purpose of the Community Act to maintain conditions which will not impede personnel recruitment and retention is one of the continuing atomic energy defense functions under the Atomic Energy Act of 1954. Is that the distinguished chairman's understanding of the intent of this provision?

Mr. ASPIN. If the gentlewoman will yield, the gentlewoman is correct. This language affirms that the intent of Congress was not to terminate the Department of Energy's functions under the Atomic Energy Community Act of 1955, and therefore, not to terminate the traditional authorities that the Secretary had exercised pursuant to the Atomic Energy Act of 1954 including the authority under section 161(g) of the Atomic Energy Act.

Mrs. LLOYD. I thank the committee chairman for that explanation.

Mr. Speaker, this bill strikes a middle ground in terms of both policy and funding for our national defense programs. The $292 billion in budget authority provides just $6 billion more than the fiscal year 1986 appropriations level for DOD and DOE nuclear weapons activities and incorporates the Iceland presummit agreements on arms control struck between the House leadership and the administration. I am pleased that the conferees were able to achieve this middle ground and that the House leadership stands behind the retention of the arms control bargains. I do not agree with those who suggest that the Icelandic talks collapsed and who claim there is no plan for a second summit. I look to the U.S.-U.S.S.R. Icelandic dialog as the basis for a very productive summit which we should pursue with the Soviets. But we must send the President well prepared for a range of options that will be based on proposals which were made, hopefully in good faith, by both sides in Reykjavik.

I believe that certain of the programs covered by the $5 billion enhancement over the House bill are critically important to national security. I never supported the deletion of $1.5 billion for the 14th Trident submarine because I believe that the submarine-launched ballistic missile [SLBM] leg of the U.S. strategic triad is the strongest and least susceptible to a Soviet first strike. Thus, I am pleased to see the Trident restored for deterrent's sake. I also believe that the Aegis-type destroyer is one of the most advanced U.S. surface ships for waging warfare, so I am pleased to see that funding is included for two of these high-technology craft.

I have been very interested in the Maverick air-to-surface missile programs, and I am gratified that $335 million in additional funding is to be provided for 3,100 more missiles and that this funding insures second source procurement. As regards critical Air Force programs, the F-15's and F-16's are acknowledged as the world's superior fighter aircraft and it is a great achievement that the conferees were able to achieve additional funding for 18 more F-15's and 30 more F-16's. The fighter and attack aircraft requirements of our conventional deterrent in support of our NATO allies call for these additional aircraft to insure the capability to interdict the Soviets behind the lines. I have also been a strong supporter of the middle ground on the strategic defense initiative. Although I would have preferred a greater increase in funding for R&D in fiscal year 1987, I sensed from the beginning that the administration request was far in excess of what was needed for meaningful program growth. I hope that General Abrahamson and his lieutenants will distribute the $3.5 billion wisely and recognize that the over-15-percent growth in this RDT&E effort is unique given the great deficit reduction pressures on the Congress and the overall $30 billion cut in the administration's request.

I would also remind my colleagues that this bill includes roughly $7.5 billion for DOE defense programs critical to modernization of our nuclear forces. There is also funding for environmental control and security and safeguard upgrading at these facilities, including the Y-12 production plant in Oak Ridge. It also contains major procurement reform provisions which should go a long way toward improving the way DOD does business.

I urge my colleagues to support this bill because it represents a prudent and acceptable middle ground on defense spending while addressing real defense priorities in research and development and weapon systems procurement.

Mr. DICKINSON. Mr. Speaker, I yield 3 minutes to the gentlewoman from Colorado [Mrs. SCHROEDER].

Mrs. SCHROEDER. Mr. Speaker, I thank the gentleman from Alabama for yielding this time, as I join the gentleman in opposition to the bill.

First of all, I want to thank the conferees and the chairman, because people really did work very hard on putting this conference together. There are some very good break throughs here, especially I think in the family provisions that I would like to talk about, because I have cared about military families and what has happened to them, for a long time, and we have made some very good gains there.

We have also made some very good gains in the set-asides, as we have heard and also made some progress in the whole area of procurement reform, although, of course, there is always more to do.

Why am I then rising in opposition to this bill?

Mr. Speaker, I rise in opposition to the defense authorization conference report because the House was hoodwinked on the single most important issue—arms control. The 500 or 600 pages of this conference report contain some good provisions, such as those dealing with military families, and some bad provisions, such as continuing spending for wasteful weapons program. But all these issues pale in importance compared to the basic issue of the future of humanity.

As all my colleagues remember, the House added five key arms control provisions to the defense bill. Adopted by the greatest vote was a provision for a comprehensive ban on nuclear testing above 1 kiloton, provided the Soviets permitted an in-country verification regime to be established. Because the President has announced that he intends to break out of the SALT II limitations in early November, the House prohibited the expendi-

ture of any money to deploy systems which would lead to the violation of the SALT II sublimits. The House also voted to continue the year-old ban on antisatellite testing, to cut star wars funding to $3.1 billion, and to stop the production of binary chemical weapons.

Faced with the specter of the Iceland summit, the decision was made to back down on these provisions. From a political point of view, this decision may have been right or wrong. From the point of view of survival of the species, this decision was immoral. And, after what happened in Iceland, it is obvious that the President's protestations that he wants arms control are hollow. The President went to Iceland, with a cooperative Congress behind him, and he blew the best chance for arms control since the first nuclear explosion. And he kicked over the negotiating table over a fanciful and fantastically expensive system, which is unlikely to ever work. It's clear to me that the President negotiated both with the Congress and with the Soviets with his fingers crossed.

I oppose this conference report and will oppose the conference report on the continuing resolution because I think whatever deal was cut last Friday is now off. The President violated the deal by failing to negotiate in Iceland in good faith. We should reopen these issues and legislate arms control, since the President has made it abundantly clear that he does not intend to negotiate arms control. I know that some Members who believe in arms control will not vote with me on this because they have projects they want in both bills. I do too. I believe, however, that this is the time to make a stand for peace.

As a conferee on the defense bill, I want to report on other features of the conference agreement as well. The bill provides a valuable arsenal of provisions to assist military families. There is a realistic figure for the level of permanent change of station moves (PCS), which should ensure that members of the military are not shortchanged when they are forced to relocate. Additionally, there is specific funding for a pilot program whereby private firms can provide relocation assistance to service members. This relocation assistance can make moves much easier for members of the military.

The defense bill also reaffirms the importance of spouse employment, directs the Secretary of Defense to report on the competing demands of hiring military family members and hiring foreign nationals in Europe, strengthens requirements for dependent care plans, and authorizes space-required transportation for single parents to accompany underage children. The bill strongly encourages the services to avoid moving parents of school age children during the midst of the school year. The bill also allows single parents to enlist in the Reserves, authorizes travel and health care for dependents of military members dishonorably discharged, authorizes the services to reimburse volunteers for expenses, and ensures that temporary storage of household goods can be extended beyond 180 days. The bill ensures that the program of dental care for dependents will go on as passed last year.

There are other provisions worthy of note. The House prevailed over the Senate to ensure that there would be no ceilings of civilian employees at DOD, a wasteful and counterproductive management device. On the other hand, the Senate would not accept the House provision to allow service members to wear conservative, unobtrusive religious apparel. The good House provisions on service of members on State and local juries and on malpractice for military lawyers stayed in, as did the bad House provision limiting Governors authority over the National Guard. The bill also makes some important improvements in the survivor benefit program.

In the area of procurement reform, the House got a bad deal. We lost military whistleblower protections in its entirety and held on to a weakened defense contractor protection provision. Other important reforms in the House bill were weakened or eliminated by Senate conferees who were more interested in protecting contractors than in protecting the taxpayer.

Without the arms control sellout, I would probably vote for this conference report because it is a reasonably good compromise. Yet, as I said at the beginning, all these other issues are microscopic compared to the issues of war and peace, life and death. Because the House lost so badly on the arms control issue, I must oppose this conference report.

One more point. I do not consider any of the arms control issues closed by this agreement. I will be back at every available opportunity to press for a comprehensive testing ban and continued adherence to our treaties.

□ 1345

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, I rise in support of this conference report. Sure, there are some parts of the bill that I would prefer to be different, or even not have in the bill, but it is our bill, and we worked on it.

I want to stress that the basic sections of this bill to run the military are reasonable, and they are good for the military, which include personnel, military construction, O&M, procurement, research and development, and sea power. And certainly, Mr. Chairman, there has been fairness to the National Guard and Reserve. We have been taken care of.

This is a good bill, in my opinion, and I want to thank the chairman and the ranking minority member, and also the conferees, and especially I want to thank the staff for putting up with the Members. We have a bill; let us vote for it.

Mr. ASPIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. DARDEN].

Mr. DARDEN. Mr. Speaker, I thank the gentleman for yielding time to me.

Mr. Speaker, I rise in strong support of the conference agreement on S. 2638, the Department of Defense Authorization Act for 1987.

This conference agreement is proof that the democratic process still works. In my short tenure of service in this body, I cannot recall any legislation with so many points of contention. However, every provision that was supposedly a major point of contention, was ultimately worked out. I cannot count the times I read, or heard, that this bill would never get out of conference. Well, Mr. Chairman, the conferees worked out these differences and have given Congress the opportunity to take an important step toward improving our defensive posture.

These major differences included the disagreement on overall funding levels. I supported the funding level of $292 billion originally passed by the House Committee on Armed Services. I opposed the amendment on the floor of this body to lower that funding. However, the conferees agreed to fund our defenses at a level that I believe will meet our national security needs.

The arms control provisions as passed by the House were to be the issue that could not be solved by any conference. However, when it became critical to support our President in his negotiations with the Soviets, an agreement was reached. I did not support the arms control provisions in the House-passed version of S. 2638 because I believed them to be too restrictive. Although I oppose several of the provisions in the compromise agreement, I, like my colleague from Georgia in the other body, strongly believe our Nation will benefit from the overall arms control policies inherent in this agreement.

Mr. Speaker, we cannot allow a few provisions in this bill that we oppose to bring about its death. I oppose many of the provisions of this bill, however, there is more in this bill to enhance our security than there is to hinder it.

I oppose the reduction in funds for military readiness. Members of the House Armed Services Committee agreed that readiness was the most vital element of our national security. Accordingly, the House Armed Services Committee recommended $82.5 billion for "Operations and maintenance." However, due to the approval of a significantly lower figure by the Committees on Appropriations, the conferees agreed to authorize only $79.5 billion. I oppose this lower figure and believe it will be detrimental to our immediate defense posture.

I also oppose the low funding levels for the Strategic Defense Initiative [SDI], commonly referred to as "Star Wars." I strongly supported the higher funding level for this program that was agreed to by the Armed Services Committee. During debate in the House, I opposed every amendment to decrease the funding of the SDI Program from the committee level of $3.8 billion. However, the House passed a funding level of $3.25. In the arms control agreement worked out by Congress and the President, a $3.5 billion figure was agreed upon. I do not believe this is adequate funding for what appears to be the only viable alternative to the mutual assured destruction doctrine.

Mr. Speaker, I am also opposed to the elimination of the B–1 bomber contingency fund as included in the House-passed version of S. 2638. There is no stronger supporter of the advanced technology bomber [ATB] in Congress. I have visited the production facilities for the ATB, and am convinced this is the bomber to meet the future demands of our Nation. However, I also believe we must ensure a viable bomber force for the immediate future, and the most promising method for accomplishing this is by authorizing funds to ensure that the B–1 production line can remain operational if necessary.

There are provisions in this bill that are obviously a waste of taxpayer money. The most visible is the overfunding of the C–17 airlifter. This is an aircraft that most airlift experts agree is not necessary to meet our airlift demands. However, there is no force on Earth quite like the Air Force when it wants a new plane, and thus the conferees have authorized, what I consider to be, a wasted $728 million for research and development and the initial phase of procuring this aircraft.

But, Mr. Speaker, this bill has many more provisions that I believe are necessary to ensure our continued strength and safety.

This bill establishes a 3-percent pay raise for all members of the Armed Forces. During World War II, Gen. George Marshall was asked about America's secret weapon. His reply was that our only secret weapon was the best young people in the world serving in the American uniform. The men and women serving in the military are the key to our freedom, and we must take every opportunity to reward them for their service to America.

This bill allows for the long overdue reorganization of the Special Operations Forces. The Special Operations Panel of the Subcommittee on Readiness, of which I am a member, has been considering this legislation for many months. The dedication of our chairman, the gentleman from Virginia, has finally paid off. S. 2638 combines the Special Operations Forces under a civilian Secretary of Defense for Special Operation and Low Intensity Conflict with a four-star unified commander for special operations immediately under the Assistant Secretary. There is no question this reorganization will benefit our brave forces serving in this capacity. We cannot allow any more disasters such as the one that occurred several years ago in Iran.

One of the most important provisions in this bill is the funding for the Small ICBM, or Midgetman. This missile was first recommended by the Scowcroft Commission. The Midgetman missile is the major strategic weapon that does not escalate the possibility of a nuclear exchange. We cannot allow the development of this system to be sidetracked.

Finally, S. 2638 provides funding for an additional Trident submarine. Although this was not included in the House-passed version of the Defense Authorization Act, I believe it is a necessary addition to our naval forces. The production of this submarine will ensure another protected element of our nuclear deterrent.

In summary, Mr. Speaker, we cannot allow this opportunity to escape. We must pass this legislation to ensure the defense of this Nation is given proper congressional direction. Failure to pass S. 2638 will set a dangerous precedent for the future security of America. Mr. Chairman, I support this bill and encourage other Members to vote for its passage.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. Mr. Speaker, I would like to say at the outset that I believe that the gentleman from Wisconsin [Mr. ASPIN] in his bipartisan support for the President prior to the Iceland summit made the right decision, and a tough one. I think critical concessions were made.

My question is, where do we go from here? With this bill, has this Reykjavik respite now become a permanent decision by the House to abandon its constitutional prerogative to initiate and sustain arms control?

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. DURBIN. I yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, I think that the gentleman has raised a very important issue, and the answer to the question is "no." It is clear that what has happened is that the issue is quiescent for the next few months, and we will see whether they get back to discussing. The talk in Iceland blew up, but they might get back together and have a summit.

In any case, the issues are not going to go away. In particular the SALT issue is not going to go away, the testing issue is not going to go away, we will revisit these issues for certain next year on the authorization bill, and indeed we are looking for opportunities to revisit them earlier than that on supplementals and other things.

Mr. DURBIN. I thank the gentleman for his assurance.

Mr. DICKINSON. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. DICKINSON. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. Mr. Speaker, I greatly appreciate the gentleman's yielding.

Mr. Speaker, I would initially like to pay a compliment to the chairman of the Procurement Subcommittee, the gentleman from Massachusetts [NICK MAVROULES] who was chairman of this very difficult procurement-reform panel. To be honest with you, when you take a look at the issues that surfaced and the difficulty in resolving them, and you look at what the final agreement was, it is prety clear that NICK MAVROULES bats for a higher batting average than Wade Boggs, and he deserves to be complimented for doing an outstanding job to try to clean up the Department of Defense.

Two items that I would like to mention very briefly are the baselining provisions and the commercial-items provisions, provisions that, No. 1, go to controlling weapons systems, and, second, provisions that allow us to buy off-the-shelf commercial items that will clearly mean that we will save, according to some Pentagon estimates, literally billions of dollars by buying smart, something that we clearly ought to do in buying in a competitive manner.

The other people that need to be complimented are two gentleman, also on the Democrat side, the gentleman from Virginia [DAN DANIEL] and the gentleman from Florida [EARL HUTTO]. Why do I say that? Well, working with Senator BILL COHEN, we were able to put something together that I know IKE SKELTON mentioned briefly before, but it is probably going to be missed in the overall writings about this bill.

I want to point out that what we established by creating a special command for low-intensity operations for special forces is a clear signal to the world and to the American people that we are serious about fighting the war and winning the war against terrrorism.

The services have traditionally neglected the special forces operations that are critical and crucial to doing the kinds of things that we need to do in the world in order to respond to the problems of terrorism. But by guaranteeing that these special forces are going to be carved a budget and going to be given resource management and resource control, we are finally saying to the services, "We want to have the most effective special forces counterterrorist forces that are possible in the world today."

So the credit goes to Senator COHEN and to DAN DANIEL, DAN DANIEL particularly, who had the courage, and EARL HUTTO, who sat through all the hearings.

I think that overall we have a very good bill. The gentleman from California [Mr. HUNTER] and I are deeply disappointed that we were not able to keep the B–1 bomber contingency fund. We think that it is a mistake that we have unshackled the Stealth Program without any competition. We will be back, I am sure, to visit that issue again.

But outside of that, and even in view of what the gentleman from New Jersey [Mr. COURTER] said, in terms of the fact that this is the second fiscal year in a row that the Department of Defense budget has been cut, I think that overall we have a pretty good bill that does some very major things.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, I rise to oppose the bill. We have embarked on a checkbook defense policy, and it is out of control. There is more money in this defense bill for procurement alone than there was in the entire defense program and budget of 1980.

This is ridiculous. This country is literally in danger of being run by a military establishment with an insatiable appetite, and we cannot control it.

I further believe that corporations have too much say in our defense policy.

Make no mistake, for all of the people who talk about deficits in this country, this wild defense buildup is tied to that deficit process. There are some experts who believe that we could cut $50 billion from this defense bill and not really hurt our national security. To compound it, the other body even threw out the meager "Buy American" amendment that we had.

It is a sad day for me, but I will say this: There is no amount of money put into a military establishment that could compensate for a bankrupt America, and our national security is tied to those blue-collar communities that are unemployed.

Mr. Speaker, I rise to oppose this conference report, and I believe that there is too much influence from the big corporations in this country. We cannot please them, but we are sure trying. It is a sad day for me, and I would like to see us whack this bill right out of the box and send a signal across America that I think the American people want to hear.

Mr. ASPIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Georgia [Mr. RAY].

Mr. RAY. Mr. Speaker, I rise in support of this bill, and I would like particularly to thank the chairman and the staff that did such a super job in putting together what I thought was the very best bill that could be put together.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma [Mr. MCCURDY].

Mr. MCCURDY. Mr. Speaker, I rise in strong support of this bill.

Mr. Speaker, I want to commend the chairman and the staff for the jobs that they did on this bill, and particularly the chairman for the job that he did managing this very difficult bill, and for the way in which he handled the many diverse and contentious issues that were presented to him.

□ 1355

I think it is a good bill, it is a good conference report. In the R&D areas that I was a conferee on I think the language on Midgetman and MX is very positive. I think the levels achieved on SDI funding are adequate.

I commend the gentleman from Florida [Mr. BENNETT] and the others who worked with me on the conventional defense initiative. In the areas of procurement I think we have made progress in the airlift areas with the C-17. I am a little disappointed in the outcome on the T-46, but the House and the Senate voiced their will.

The field use provisions that passed I think will save taxpayers literally millions of dollars in the next few years. I commend the efforts of the gentleman from Massachusetts and others on the acquisition reform. I chaired a panel in 1981 on procurement reform, and it is a very good day for me to see that we have passed these provisions.

Mr. ASPIN. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. HERTEL].

Mr. HERTEL. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, we have heard the lists of what people are unhappy about in this bill. But many of us can say it is the best bill that we have seen in this decade.

In 1981 I began working on procurement reform and worked with the gentleman from Florida [Mr. BENNETT], the gentleman from Wisconsin [Mr. ASPIN], the gentleman from Massachusetts [Mr. MAVROULES], and many Members of the House that were not on the committee. This is the first year we can declare major victories and the first year we have gotten the House position or the Senate position on procurement reform, and I commend the chairman for this aim and goal, and I especially commend the gentleman from Massachusetts [Mr. MAVROULES], who has worked so hard on it.

I chaired a Democratic task force for the last 2 years on procurement reform for the entire caucus. They have taken our recommendations and wrapped them up, and the panel of the gentleman from Massachusetts [Mr. MAVROULES], worked in a bipartisan way, and the House position has prevailed to a higher degree than at any other time. So I commend the gentleman from Massachusetts [Mr. MAVROULES], the chairman of that panel, and I thank the gentleman from Wisconsin [Mr. ASPIN], for his commitment in this area.

Mr. ASPIN. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. MAVROULES].

Mr. MAVROULES. Mr. Speaker, I thank the gentleman for yielding me this time. I rise in support of the bill.

I think we ought to take about 2 minutes and just talk about some of the reforms that went through. For those who perhaps are venting some frustrations here today, and I think well justified, by the way, let me assure them that we are going to have hearings beginning next year on those particular problems, and maybe we can address those problems.

One of the more important things, of course, is the defense acquisition section. I think we have most of the language we wanted, especially preserving the integrity of the testing department which, of course, will be alone.

SDI has become a major issue here, and in the reform package in the language that we have we retained the SDI institute language whereby we retained the integrity of the House and also the check and balance which is so very necessary on the very important issues that will be taking place next year. In the area of work measurement, we accepted the language of the gentlewoman from California [Mrs. BOXER], who was very cooperative in getting new language. The revolving door that the gentleman from Florida [Mr. BENNETT] so proudly put forth, we have that legislation now in place.

The contractor whisltle blower, which nobody thought would get off the ground, we have that now in place, and we are going to have military whistle-blower hearings beginning next year.

The establishment of the inflation dividends whereby hopefully the one that you and I were able to cosponsor, beginning next year we will be able to monitor and come back to the House and let the people know exactly where the inflation levels are and where the money is going.

I have an awful lot against the bill. Of course we do individually. But I think in the long term basically we have a pretty good bill, and I am going to vote for it.

Mr. ASPIN. Mr. Speaker, will the gentleman yield?

Mr. MAVROULES. I am happy to yield to the gentleman from Wisconsin.

Mr. ASPIN. Mr. Speaker, I would like to commend for all of the members of the committee and for the Members of the Committee of the Whole House here the gentleman in the well for an absolutely outstanding job that he has done on this issue. He has taken a very, very complicated issue, and issue on which it is politically one of the most difficult issues that I can think of for forging a consensus in the House; then negotiating with some of the most difficult negotiators in the other body and coming back

with what I think the gentleman from Michigan [Mr. HERTEL] correctly characterized as a major victory for the first time in the whole procurement era.

I would like to commend the gentleman in the well as well as the gentleman from Michigan and all of the other people who have worked so hard on this and done a very, very good job.

Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. BENNETT].

Mr. BENNETT. Mr. Speaker, the House conferees on the Defense authorization bill spent long hours negotiating procurement reforms. We arrived at what I believe is a real compromise between the House position for tough, new protections and the other body's position against them.

This is true for the "Revolving Door" provision sponsored by myself and Mrs. BOXER and others. We spent 2 years on this provision and felt we had built a broad House consensus. The House wanted to bar anyone who had personal and substantial responsibility for procurement from going to work for any contractor with whom they dealt. The other body did not want any bar. We have compromised on a basic revolving door provision. I am pleased that we are now implementing a commonsense bar that will prevent anyone who has been supervising a contractor or negotiating with a contractor from "switching sides" and going to work for that contractor. The conferees intent is to prevent both the appearance and actual occurrence of conflicts of interest which occur when a DOD official accepts a job with a contractor with whom they have been dealing.

We also compromised on new testing legislation sponsored by Congressmen HERTEL, SMITH, and myself. Realistic live-fire testing will now be required of all new systems before they can enter into full-scale production. And we are ending the sometimes scandalous involvement of contractor employees in operational tests.

The conflict of interest provision (section 931) covers:

First, all high officials—SES and O-7 and above—who represent the Government in the negotiation or settlement of a contract worth at least $10 million; and

Second, all officials—GS-12 and O-4 and above—who have spent the majority of their last 2 years with the Government working at a contractor's plant or at a site operated by a contractor; and,

Third, all officials—GS-13 and O-4 and above—who spent the majority of their last 2 years with the Government working on procurement functions relating to a major defense system.

These officials may not accept compensation for 2 years from any contractor with whom they dealt during this period. So plant representatives at a Bell helicopter plant could not go to work for Bell helicopter. The program manager for the MX missile, for example, could not go to work for a contractor involved with that missile if the manager had personal contact with that contractor during the 2-year period. So, if the program manager dealt with Boeing and with Northrop he could not go to work for either.

On this last point, just to be absolutely certain, we checked with the legislative counsel who drafted this provision and he agrees that it covers any contractor involved with the system. Legislative counsel explained that the provision on spending a majority of the person's working days during the last 2 years of Government service applies to performing a procurement function, but all contractors the individual dealt with are covered as long as the individual has participated personally and substantially, and in a manner involving decisionmaking responsibilities, through contact with the contractor. That is what we intended.

The House wanted to cover all high officials as well, but, again we had to compromise with the Senate. We agreed to bar any high official who represents the Government in the negotiation or settlement of a contract from going to work for that contractor for 2 years. We are clear that this does not just mean an official who has technical or official responsibility for the negotiations, but any actual decisionmaker involved in these negotiations. We specifically intend that this provision would cover the kinds of situation that arose in the past, such as those involving officials with the Department of Navy who negotiated contract settlements with General Dynamics and then went to work for General Dynamics. This cannot happen again.

Although we do not prohibit officials with responsibility for more than one weapon system from going to work for defense contractors they dealt with, aside from negotiations, I would hope that these officials would cooperate with the spirit of this bill. High officials should be setting an example by avoiding even the appearance of conflict of interest. It would be a shame if, for example, the head of Air Force Systems Command had substantial dealings with Lockheed, then went to work for Lockheed after his retirement; or if the head of the Army Material Command went to work for TRW after dealing with that company. Any negotiations these officials had with those companies would be covered, of course, if they involved a contract of at least $10 million. There are ways to be involved with a company and not actually have discussions which might not be covered and if there are a number of instances like this, Congress may be forced to consider additional prohibitions. I hope not. I hope these general officers and senior officials will set a proper example of objectivity and impartiality.

Likewise, I hope the Department of Defense drafts appropriate regulations to implement these provisions and feels free to expand on them. We would hate to see any loopholes exploited to avoid the intent of this section. That would be inviting further congressional action. Rather, the Department should understand the congressional concern over this issue and go beyond what we have done to truly help end this problem.

Section 913 contains a provision requiring realistic survivability/lethality and operational testing of all new systems. The House compromised on our detailed and rigorous testing language in order to get some basic test principles established. From now on a system cannot proceed beyond low-rate initial production until realistic live-fire testing and initial operational testing of the system has been completed. By this, we mean testing the survivability or lethality of a given system by reproducing as closely as possible actual combat conditions, not relying on computer simulations or component testing and then extrapolating. A new system would be configured for combat, that is, fully loaded with all the dangerous materials that would normally be on board in combat, and undergo test firings of the munitions the system will encounter in combat. We would expect that actual Soviet munitions would be used, but where that is impossible, weapons with similar capabilities would be permitted.

The same is true for example, for a new antitank weapon. The weapon would now have to be fired not only at sheets of steel to test penetration, but at actual tanks—either Soviet tanks or the closest possible surrogates—fully loaded for combat. It seems impossible, but this is rarely, if ever, done now. We have fielded thousands of antitank weapons without ever knowing if they could kill a tank. The same has been true for torpedoes, and other crucial front-line weapons. Now we will have realistic tests before we produce these weapons. We expect that this will end concurrency or the practice of producing a weapon and testing it at the same time. This is in accordance with the Packard Commission recommendations for tougher test:

A high priority should be given to building and testing prototype systems and subsystems before proceeding with full-scale development. . . . This increased emphasis on prototyping should allow us to "fly and know how much it will cost before we buy". . . . The first units that come off the limited-rate production line should be subjected

to intensive operational testing and the systems should not enter high-rate production until the results from these tests are evaluated.

As part of our conference compromise, we have asked the Secretary of Defense to report to Congress on the Department's testing procedures. This will form the basis for congressional hearings next year—hopefully joint hearings between the two bodies—that would go into this issue in depth. There is great congressional concern over the quality of our weapons testing, for example how thorough and realistic our operational tests really are. We expect that this issue will be one of the major issues the Armed Services Committees examines next year.

I submit for the RECORD a recent editorial from the October 8, 1986, edition of the New York Times:

[From the New York Times, Oct. 8, 1986]

A WEAPONS TEST FOR CONGRESS

Of the many defense issues the House and Senate are struggling to reconcile, only one would make a critical difference to American troops in battle. That's a proposal by the House side to insure that all weapons receive realistic combat testing by a genuinely independent Pentagon test office.

In the Defense Department's ornate procurement system, testing often falls victim to other priorities. Contractors want to keep the money flowing. Program managers get rewards for solving old problems, not finding new ones. In a pernicious practice called "concurrent production," assembly lines often start before testing is complete. Despite the promise to fix flaws later, inadequately tested weapons are delivered to the troops.

Surface ships, helicopters and aircraft all depend on the Mark 46 torpedo to attack Soviet submarines. The Dragon antitank missile is the infantryman's sole means of killing tanks. Yet, as Representative Charles Bennett of Florida notes, "we simply do not know if they will work as advertised because they have not been realistically tested."

Bad enough if weapons don't hurt the other side; how much worse when they hurt our side. Tests would have shown tanks to be needlessly flammable; of 800 Israeli tankers who died in the 1973 war, 300 were burned to death, mostly in hydraulic-fluid fires in the U.S.-made tanks. Even now, ships, planes and armored vehicles are not routinely subjected to testing against live Soviet ammunition. When a courageous Air Force colonel insisted the Army subject its Bradley infantry carrier to realistic live-fire tests, the Bradley proved highly flammable and the colonel was induced to retire.

The Pentagon is supposed to report test results to Congress but does so only selectively. Studying the test results for eight major weapons, the General Accounting Office last year found that "in all cases, the Data Sheets omitted or did not accurately portray important test and evaluation results." The Air Force described certain cruise missile tests as "a partial success" even though the missiles crashed. A few partial weapons successes like that could lead to a very partial victory in battle.

An amendment by Representatives Bennett and Denny Smith of Oregon specifies proper combat testing of all kinds before weapons go into production. Equally important is the House's position that those who test new weapons should be independent from those who develop them.

The House wants the Pentagon's chief weapons tester to report only to the Secretary of Defense. But Senate conferees resist on the ground that the authorization bill already creates a new Pentagon weapons development czar. The testing office, they insist, should come under the procurement czar, who needs to control all aspects of weapons acquisition.

That's an error that would repeat the principal failing of the present system: Letting the weapon developer do his own grading. How can the czar test his own weapons independently? The only substitute for testing a weapon fully on the proving ground is to test it in battle, and that is too late.

Mrs. BOXER. Mr. Speaker, will the gentleman yield?

Mr. BENNETT. I yield to the gentlewoman from California.

Mrs. BOXER. Mr. Speaker, I thank the gentleman for yielding and want to congratulate him on his tenacity in terms of the revolving door. I am very pleased that we did come a long way. It is not perfect, but it is the best that we have ever achieved. I just wanted to ask the gentleman if he would work with me next year on a military whistleblower protection bill? We have a situation today where we had to give up military whistleblower protection because the other body had no interest in it, and today we have a situation where there is no clear path for military people who are whistleblowers to take. And these are patriots who speak out about waste, fraud, and abuse. So I would ask the gentleman if he will join with me in that next year?

Mr. BENNETT. I think that is a most important thing that was not done in the reform field, the whistleblower thing with regard to the people actually in the military, and I am sure the gentleman from Wisconsin will also join in working on that effort in the future.

Mr. DICKINSON. Mr. Speaker, I yield 1 minute to the gentlewoman from California [Mrs. BOXER].

Mrs. BOXER. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, as someone who was very proud to serve with NICK MAVROULES on the subconference on military procurement reform, I have to rise reluctantly against the final product. I was proud of those reforms we achieved. And let me tell you, my friends, it was only because of the tenacity of NICK MAVROULES that we did get any procurement reform.

But I cannot understand why the other body is so opposed to these reforms. We had to struggle to get bits and pieces of what we wanted. We had to struggle so hard, and all we want is an honest system. That is all we want.

We will go back, and I know the gentleman from Massachusetts [Mr. MAVROULES] says that he will have some hearings on military whistleblowers and some of those other reforms which are desperately needed. But I must quickly mention a couple of other areas which lead me to cast a no vote on this authorization bill.

We lost, let us face it, the arms control that we fought so hard to achieve in this bill. It is with a deep sadness that I note that. It was good that the two gentlemen who head the world superpowers discussed these issues at Iceland, but nothing came out of it. It is up to Congress, and there is nothing in this bill that addresses the most critical cases facing the nuclear arms race.

In another area, $6 billion is added to this bill. I have to share the feelings of the gentleman from Ohio [Mr. TRAFICANT] who spoke so deeply from his soul about the situation. We are cutting money from farm programs, from education programs, from environment programs, and where do we put it? We put $6 billion more into this bill.

I say no.

□ 1405

Mr. ASPIN. Mr. Speaker, I yield 3 minutes to the gentleman from Massachusetts [Mr. MARKEY].

Mr. MARKEY. Mr. Speaker, I would like to compliment the gentleman from Wisconsin [Mr. ASPIN] and the gentleman from Massachusetts [Mr. MAVROULES], the gentleman from Michigan [Mr. HERTEL], the gentlewoman from California [Mrs. BOXER], people on both sides of the aisle for the work that they have done in this bill.

Mr. Speaker, last week this body agreed to a cease-fire over the five arms control issues that divided us and the Reagan administration: SALT adherence, nuclear testing, star wars funding, chemical weapons funding, and the ASAT moratorium.

What we agreed to was much less than what many of us would have liked to have seen. We ceded to the Senate on two of our most far-reaching proposals, the testing moratorium and binding SALT limits.

We agreed to continue the ASAT test moratorium, split the difference on star wars funding, and fund the production of 155-millimeter chemical artillery shell, but not the Bigeye bomb.

We did this so that the Reagan administration would have no one to blame but themselves if they failed to make progress at Reykjavik, but we never thought that our amendments tied his hands. We believed that they spurred him on; but as we all know, Ronald Reagan is an expert at finding scapegoats for his failure to resolve contradictions, for his failure to compromise.

Frankly, if the administration devoted the same energies and talents to

arms control as it does to public relations, we would be minting the new Reagan dollar coin and renaming National Airport right now. The President did not back away at Reykjavik because he could not conclude such a historic deal in a weekend. No, we know that it was because the administration's intransigence on star wars issue is insurmountable.

Now the administration is launching a public relations offensive to put a smiley face on the whole affair, and to convince us that historic arms control is still in the offing.

Let us not kid ourselves. George Shultz told every talk show in T.V. Guide yesterday that star wars will never be a bargining chip. The well-documented truth is that this President has said "No, no, a thousand times no" to real arms control. Let us believe the President. Star wars is not a bargaining chip.

This Congress cannot let itself be hoodwinked into believing that star wars is necessary for negotiation what is nonnegotiable; that it is necessary for leverage when it is not a bargaining chip.

The militarization of outer space by star wars is a dangerous and expensive, bad idea. Star wars is now nothing more and nothing less than an invulnerable shield against further arms control agreements.

Why did the administration feel it necessary to launch a media offensive? Because they realized if they did nothing, what happened in Iceland would speak for itself. It seems that the further the administration gets from Reykjavik the better it looks, but we supporters of arms control cannot afford to take a wait-and-see attitude here.

The public attitude toward star wars is extremely volatile. But one fact is clear; when the public is asked if they must choose between arms controls and star wars, they choose arms control overwhelmingly. That is our choice. It is a choice of human reason and understanding.

Mr. DICKINSON. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, let me say in closing that I feel between the horns of a dilemma here. I am convinced that this is the best that we can get out of negotiating with the other body.

For 3 weeks we worked on it. We worked until 10 o'clock at night and we came back early in the morning; we broke up into panels and we stayed very busily engaged; and this is the best we could do.

For personal reasons and because it is not good enough, I, on a personal basis, am going to vote against it. I am not going to urge my colleagues to vote against it, because I do not think if we should defeat this thing that we would ever get a bill. We are here in the final days of this Congress, and if it went back to conference with the Senate, I do not think it would ever see the light of day again.

So for that reason I am casting my personal vote and not asking my colleagues to vote as I do; but in closing I would just like to say that I do take the opposite view of the gentleman from Massachusetts [Mr. MARKEY], because I, for one, do not think that this body, and in particular a small group in this body, should be setting foreign policy in treaty negotiations for this great Nation.

Mr. FASCELL. Mr. Speaker, in an effort to forge a bipartisan consensus on arms control issues before the American-Soviet summit in Iceland, the House and Senate leadership and the White House reached an accord last Friday on a number of important provisions, including the SALT agreements, SDI, Asat's, chemical weapons, and nuclear testing. A short overview of the compromise, as reflected in the DOD conference authorization report follows:

SALT: The conference report agrees to adopt a provision containing strong policy language that urges the President to continue observing the SALT II Treaty sublimits, provided that the Soviet Union continues to adhere to these sublimits. The conference language reflects congressional opposition to the U.S. abandonment of the SALT arms control regime and congressional support for continued United States and Soviet adherence to the numerical sublimits of the treaty. Widespread congressional sentiment in favor of continued adherence to the SALT regime is reflected in legislation passed by the House of Representatives on June 19, 1986 that calls upon the President to continue to adhere to SALT's numerical sublimits, as well as in legislation contained in the fiscal year 1987 House version of the DOD authorization bill, which prohibits the expenditures of funds that exceed the sublimits of the SALT II agreements unless the President certifies to Congress that the Soviet Union has exceeded those sublimits. In view of the current arms control impasse, as reflected in the recently concluded United States-Soviet summit in Iceland, it is even more incumbent upon the President to preserve the arms control process as it is now embodied in the SALT framework.

Asat's: The conference report agrees to perserve the ban on the production and deployment of antisatellite weapons. Continuation of the Asat weapons ban reaffirms congressional belief that an agreement between the United States and the Soviet Union on banning Asat's would represent a major step toward averting a costly and destabilizing arms race in space. This continuation of this mutual Asat ban represents the only significant arms control achievement of the past 6 years which can be directly attributed to House insistence.

Nuclear weapons testing: The conference agreement rejects a House provision imposing a 1-year ban on nuclear testing. Under a separate agreement, however, the President has agreed to submit to the Senate two unratified treaties—the 1974 Threshold Test Ban Treaty and the 1976 Peaceful Nuclear Explosions Treaty—recommending their ratification. While the President's decision to submit the two treaties to the Senate for ratification at the beginning of the next Congress represents a significant step in the right direction, a number of potential stumbling blocks remain in the way of Senate ratification of the treaties and the resumption of United States-Soviet discussions that would lead to a comprehensive test ban agreement. It will, therefore, be incumbent upon the next Congress to continue to monitor closely the test ban issue if the ultimate goal of a total cessation in nuclear testing by both sides is to be achieved.

SDI: The conference report agrees to cut the President's funding request to $3.5 billion, approximately half-way between the House and Senate approved versions. While there still remains in Congress a general consensus for maintaining an adequate level of SDI research, the cut in SDI funds from the President's original request of $5.4 billion reflects a belief by many that the level the administration has requested is much too high for an adequate research program alone and also reflects congressional interest in assuring that the SDI Program be conducted within the confines of the longstanding interpretation of the ABM Treaty.

In this regard, I would note that the conference agreement contains a provision which stipulates that action by the Congress in approving SDI funds does not express or imply an intention on the part of the Congress that the United States should abrogate, violate, or otherwise erode the ABM Treaty, and does not express or imply any determination or commitment on the part of the Congress that the United States develop, test, or deploy ballistic missile strategic defense weaponry that would contravene the ABM Treaty.

BINARY CHEMICAL WEAPONS

The binary chemical weapons provisions contained in the DOD conference authorization bill for fiscal year 1987 represents a compromise between proponents and opponents of the binary chemical weapons production program.

It contains the following main elements:

First, prohibits funding for the Bigeye bomb production program, and Bigeye components during fiscal year 1987 and prohibits final assembly of the Bigeye bomb during fiscal year 1987 and fiscal year 1988;

Second, authorizes funding for the production of the 155mm artillery binary shell but prohibits final assembly of the 155mm artillery shell during fiscal year 1987. We understand that the prohibition on final assembly of the 155mm during fiscal year 1987 means that the final stage fill, load, assembly or packaging of the methylphosphoric difluoride [DF] canister of the 155mm binary shell is not allowed before October 1, 1987; and

Third, does not authorize the $15.4 million of fiscal year 1987 funds requested for Bigeye production facilities and limits the fiscal year 1986 funding for Bigeye production facilities to $90 million subject to a certification by the President that the production of the Bigeye is first, in the national interest and second, all design, planning, and environmental requirements for such facilities have been met.

In short, an operational 155mm binary chemical weapon is not possible for at least 1 year—fiscal year 1987—and an operational Bigeye chemical bomb is not possible for at least 2 years—fiscal year 1987 and fiscal year 1988.

In order to understand the significance of this compromise, it is important to recall the history of the Binary Chemical Weapons Production Program.

For three consecutive years, 1982–84, Congress wisely rejected the Pentagon's persistent requests to produce binary nerve gas chemical weapons. When the Pentagon again requested funding for these weapons last year, that proposal again met with considerable opposition. Congress ultimately prohibited all funding for the Binary Chemical Weapons Production Program during fiscal year 1986 and made such funding after fiscal year 1986 dependent upon the satisfaction of four major conditions.

For example, in fiscal year 1986, Congress mandated that U.S. binary production could begin after October 1, 1986, only if environmental, safety, and testing requirements were satisfied. In addition, another key condition, impacting directly on our European allies, specifically stipulates allied acceptance of these new binary chemical weapons as an integral part of our chemical deterrence in Europe.

Based on events this year, two of the four key conditions—testing and allied acceptance—cannot be satisfied this year.

In the testing area, ongoing GAO investigations continue to uncover testing failures, technical deficiencies, structural deficiencies, and structural flaws within the Binary Weapons Program that demonstrate that the Bigeye binary bomb is not even ready for operational tests, let alone production. That was the conclusion of the May 23, 1986, GAO report to Congress entitled "Bigeye Bomb: An Evaluation of DOD's Chemical and Developmental Tests" and the subsequent GAO update to me of August 5, 1986, which now follows:

U.S. GENERAL ACCOUNTING OFFICE,
PROGRAM EVALUATION AND METHODOLOGY DIVISION,
Washington, DC, August 5, 1986.

Hon. DANTE FASCELL,
Chairman, Committee on Foreign Affairs, House of Representatives.

DEAR MR. CHAIRMAN: In your letter of July 18, 1986, you asked us to answer some of the criticisms DOD has been making through the news media about GAO's report entitled "Bigeye Bomb: An Evaluation of DOD's Chemical and Developmental Tests." Before the report was published, we had requested, in the usual manner, that DOD submit formal comments. At your direction, we asked that those comments be provided in 10 days. DOD said they could not submit comments in that time frame, but they did not request an extension. They did, however, keep the report for 46 days, uniquely for security review, something which normally takes about 10 days. Clearly, DOD could have used the 46-day period to prepare their formal, official comments. Instead, the agency chose to attack the report in the press and to put forward some manifestly erroneous charges that have not as yet been publicly refuted. Let me address here five persistent claims made by DOD about our report that you have cited in your letter.

1. DOD charges that findings in the GAO report are based on the results of early tests and that we did not examine available results of subsequent tests that demonstrate Bigeye's feasibility.

We believe that our analysis and reporting of test results is both justified and appropriate given the status of the DOD testing program and given the data which have been released to us by DOD. With respect to the status of the testing program, it is necessary to distinguish between developmental and operational tests. Developmental tests are conducted to determine if a weapon meets its technical specifications (e.g., did the Bigeye meet its minimum purity requirements?). Operational tests, performed by the services, explicitly introduce the human element and are conducted to determine if the weapon will be useful in combat (e.g., were the pilots able to deliver the Bigeye on target?). Developmental tests (including chemical tests) have been completed on the Bigeye but operational tests, which only began in September 1985, are not expected to be completed until early 1987. The GAO report is based on test programs completed prior to April 1985; it thus includes all of developmental tests but none of the operational tests.

Despite the fact that the operational tests by the Navy and the Air Force are not complete, some individual test results have now been released by DOD. It is these operational tests to which DOD refers as the "subsequent tests" and it is on the use of those test results by DOD that we disagree, for two reasons. First, because operational tests address different questions from developmental tests, the more recent data cannot be used to refute or substitute for the earlier data. Most of the issues raised during developmental testing, such as pressure buildup and agent lethality, are still unresolved. Operational testing, even when run to completion, will not settle a number of important questions about the Bigeye.

Second, we did not report on operational test results because the results which DOD labels "available" were not in fact available to us even with regard to those individual tests which have been completed. DOD has still not given us the full results (i.e., including supporting data and analyses) of the most recent operational tests even though the agency was instructed by the Congress to do so. Instead, DOD has selectively released information to the press (including the classified Air Force operational test results) that puts the Bigeye in a favorable light, and has then accused GAO of ignoring the latest data. All of this is a matter of record.

But further, we disagree with the use of selected operational tests as "demonstrating Bigeye's feasibility" because such use is premature. Given that, in the past, preliminary test results released by DOD through the media have often looked quite different when viewed in the context of the full technical reports, GAO obviously cannot make comments on "the latest data" without having had the opportunity to review both the data and the evidence behind the results. Moreover, a small number of tests early in a series is not likely to provide statistically significant results and it would thus be difficult to draw many strong conclusions about any of the major Bigeye issues before the testing program is complete.

2. DOD claims that the first phase of operational testing was successfully completed and the bomb is ready for low-rate initial production.

As noted above, DOD has selectively analyzed, declassified, and reported to the press data that put Bigeye in a favorable light. A DOD official provided test results to the New York Times which quoted that official as saying that "most of the weapons dropped . . . had performed properly, once a key component was fixed." That key component was the air turbine generator that is used to initiate the chemical mixing system. The newspaper states, "In Navy tests of 20 weapons, three failures were attributed to a malfunction of the air turbine generator that is used to mix the chemicals. Two additional tests were discounted after the aircraft's bomb rack failed to work. The rack is being fixed separately. Separate Air Force trials over the same period had to be interrupted after the generator failed in three out of the first four attempts to drop the bomb. But even after the problem was fixed, only 12 of 15 further Air Force drops succeeded. One of the failures again was attributed to the generator, while the other two were attributed to fuses in the nose of the bomb."

So DOD's conclusion about the success of operational testing is apparently based on 15 successes of 20 trials for the Navy, and 12 successes of 15 trials for the Air Force. (This information, incidentally, is classified in the reports, although not in the New York Times.) But is this really a sound basis for determining operational success? We think not, because by definition, these component parts should have been tested and fixed during developmental testing DOD has not reported the outcome of other operational test objectives—such as the determination of delivery accuracy, agent deposition density, and system reliability. GAO cannot report these findings here since the data are classified, and unlike DOD, we cannot selectively declassify information. We can, however, say that after reading the Navy and Air force summary reports (but without as yet the benefit of reviewing support documents), our preliminary position is that we do not regard the first phase of operational testing as successful.

Although we are constrained by classified data from presenting the rationale for our position, there are two unclassified examples in the operational testing report that we can report in this letter. A quote from the Air Force report says, "The USAF nonnuclear munitions safety board (NNMSB) has withheld certification of Bigeye for inventory introduction and operation because of design deficiencies in the CCU-13/B impulse cartridge used to activate the ballonet. Final redesign and testing has not been completed." Also from the report, "The Air Force requires the Bigeye weapon service life to be 1 year. Bigeye is not presently certified to meet this requirement because the service life of the FZU-37 [air turbine generator] and EMU-140 [fuse] is 60 and 90 days respectively." Quite apart from our own findings, we would have to question a recommendation to start producing a bomb whose components do not meet required service life and which has not been certified for inventory introduction and operation because of design deficiencies. These examples, along with all the unresolved issues of developmental testing mentioned in the GAO report, support our position that the bomb is not ready for production.

3. DOD says the GAO report dwells on issues that are "non-problems" such as

(a) the low temperature requirement,

We did not make an issue of the low temperature requirement. Contrary to a quote from a DOD spokesman in a Washington Times article of June 11, 1986, the GAO report did not "attack the Bigeye because it doesn't work at minus 40 degrees Fahrenheit;" in fact, anyone who has read our report knows that low temperature tests were hardly mentioned in it. No minus-40-degree tests were performed during the period we focused on in our analysis, and only one test below zero degrees was included. Our reference to that one test appears only in appendix to the report. We agree with DOD that the probability is quite low that the Bigeye will have to function in the low end of the temperature range in an operational setting, particularly given the low altitude penetration tactic. So this issue seems to be a strawman.

(b) agent lethality,

This issue pertains to DOD's self-set standards for generating VX nerve agent with a minimum purity or equivalent biotoxicity level within the required time after chemical mixing is started. The requirement was developed by DOD and what GAO did in the report was to compare actual test results to the standard. When the minimum requirement was not met, DOD introduced the idea of lethality. According to Science magazine, June 20, 1986, a DOD spokesman "acknowledges that some uncertainties exist about the toxicity of the bomb in operational use, but notes that its lethality is so great that even an agent with low potency will be strong enough to meet the military requirements." The problem with this is that there is no separately stated military requirement for "lethality." Indeed, how is lethality measured? It is normally quantified through biotoxicity measures. This brings us right back to the military requirement that DOD has already set for that measure and about which DOD admits there is uncertainty. The term lethality is being used as a verbal subterfuge to divert attention away from the requirement to meet real purity or biotoxicity standards and toward the nebulous idea of "lethality." (It might be of interest for Congress to ask DOD to provide purity data on the current unitary chemical weapons for comparison purposes.) So we would disagree that it is a non-problem when DOD leans heavily on the importance of lethality but fails to require, define, or measure it.

(c) pressure buildup,

Pressure buildup is a very technical issue and not easily discussed in an unclassified letter. However, we will try to outline the evidence in support of our position that pressure buildup warrants attention. GAO is concerned about the rapid pressure buildup that occurs in the first few seconds (not minutes as characterized by DOD) of high temperature tests. During these tests, conducted in a controlled test environment, the bomb was vented and pressure was released through a relief valve which will not be present on the production model of the bomb. In Science magazine, June 20, 1986, a DOD spokesman is quoted as saying, "we know what the pressure curve looks like at the worst case, and it is . . . out of the realm of interest." He goes on to say that "the bomb would have to remain in free-flight for 5 minutes before an explosion could occur, whereas its expected free-flight time is roughly 30 seconds, a point that GAO disputes." And we certainly do dispute the view that pressure buildup is of no concern. The explosion of the Bigeye in an October 1982 test did occur after 5 minutes. But this is not an accurate analogy for the current system for several reasons. First, that test was intended to proceed for 1 hour or until weapon failure. Five minutes after the mixing process was initiated, the weapon failed when excessive pressure forced the ballonet out of the weapon. Army testers said that they were surprised since they had expected the pressure to stabilize below the pressure attained in the test. In other words, the bomb was expected to last for at least an hour, but blew up after only 5 minutes, to the surprise of the testers. Second, the starting temperature of this test was 68 degrees Fahrenheit, not considered a high starting temperature. GAO expects that the temperature for operational deliveries will be considerably higher than that, and tests have shown that as temperature increases, so does the pressure buildup. Third, there have been design changes in the bomb hardware since the 1982 blow-up to accommodate a shorter mixing time. This means temperature and pressure rise more quickly. These and the additional classified information from the test reports since the blow-up indicate that pressure buildup over a short time interval is still a concern. The risk of a premature explosion is not a threat to the planes or pilots, but rather to the success of the mission because the bomb would be rendered useless. We feel pressure buildup is not a "non-problem."

(d) flashing.

Flashing refers to either burning or instant vaporization of the VX agent/reaction mixture during dissemination from the Bigeye bomb. As we explained in our report, GAO believes the likelihood of flashing is speculative, but a very important issue to address. Operational conditions for the Bigeye, especially high temperatures during mixing, will provide an environment similar to that of laboratory studies in which VX readily flashed. In a 1966 study of unitary VX, flashing occurred in 4 out of 6 cases. DOD claims this study is not relevant since there is no buster (explosive charge) in the Bigeye to produce an ignition source. But laboratory combustion studies performed by a contractor for DOD indicate VX flashes above a certain temperature even without an external ignition source. This auto-ignition temperature was reached in several of the Bigeye high temperature lab tests. And the authors of these studies thought this type of combustion (flashing) might occur "more readily" in the atmosphere than in the test chamber. DOD's own studies raised the issue of flashing, yet no more tests or analyses have been done. We feel it is an important issue to address, because any appreciable degree of flashing renders the weapon ineffective, since agent would burn or evaporate before reaching the target.

In summary, we might add that the Director of DOD's Operational Test and Evaluation (OT&E) Office, agrees with GAO that these last three points are not "non-problems" and says that the next phase of operational testing, OPEVAL, will address all critical issues, including the issues of pressure buildup, biotoxicity, droplet size and agent persistency. Apparently, DOD agrees with GAO regarding these unresolved technical issues and the need to address them carefully and systematically. However, the issues the Director of OT&E cites are issues which should have been addressed and resolved during developmental tests, not during operational tests. Indeed, unless the current scope and design of planned operational tests are changed, it is clear these technical issues will not in fact be addressed during OPEVAL.

4. DOD charges that the GAO report is "tendentious," because it dwelled at length on a single test in which the Bigeye exploded.

Our report does not focus on the (October 1982) test in which Bigeye blew up. On the contrary, that blow-up was actually the point of departure for our analysis of chemical mixing in which we described and analyzed in extraordinary detail approximately 100 chemical and developmental tests conducted between late 1982 and 1985. This focus on the later tests was necessary because the Bigeye blow-up triggered extensive redesign and operational changes in the bomb. Thus, the DOD charge is without substance. However, this is a far cry from saying either that the explosion is unimportant or that there are not profound lessons to be learned with regard to the pressure buildup problem that caused it.

5. DOD claims GAO is trying to "goldplate" the Bigeye program.

On several occasions, GAO has been accused of trying to "goldplate" the Bigeye program. We have difficulty in understanding this idea since we are, of course, merely trying to determine whether the weapon meets the DOD's requirements. GAO did not develop the weapon performance criteria and did not seek to challenge DOD's criteria as such. Indeed, we have fully accepted the DOD requirements. What we have done, however, is to criticize the changing of criteria without justification, the vagueness of some criteria, the shortage of data and analyses, and the inconsistency evident in some analyses and in the reporting of test results. GAO has not suggested that the Bigeye be required to do more than the DOD requirements state; we want only to make sure that the Bigeye can provide the capability which is intended. But as we have stated very clearly in our report, our conclusion is that, despite DOD's wish to proceed with production of the weapon, the results of the agency's own test and evaluation process have not persuaded us that that capability is there.

Mr. Chairman, I hope the above discussion will help to clarify some of the points currently being debated in the press. Please call me (275-1854) or Kwai-Cheung Chan (275-6161) if you should have any questions or comments.

With kind regards,

Sincerely,

ELEANOR CHELIMSKY, *Director.*

Finally and most importantly, the GAO has submitted a report to the Appropriations Committees just last Friday on the Bigeye binary chemical bomb as required by Public Law 99-145. While classified, it is appropriate and accurate to note that the GAO has again demonstrated in its October 10, 1986, report to Congress that the many technical deficiencies of the Bigeye have not been resolved by the Defense Department's operational tests this year. The October 10 report indicates that the Bigeye's "unresolved issues continue to plague the program" and point out that for the first time the military services are raising many of the very concerns about the Bigeye that GAO has raised in its May 23, 1986, report to Congress as well as in its August 5, 1986, letter to me.

As to the condition requiring allied acceptance of binary chemical weapons as a part of the chemical deterrence in Europe necessary to deter the Soviet threat, that condition not

only cannot be satisfied, but was in effect rejected by our allies at the NATO ministerial meeting this past spring in Halifax.

As reflected in the NATO statement at Halifax this past May, the North Atlantic Council [NAC] did not even consider binary chemical weapons production. To the contrary, the NAC's only reference to chemical weapons is a call for their elimination, not their production. The NAC statement reads: "We seek a treaty totally eliminating chemical weapons."

As a result, under the administration's plan, all existing U.S chemical weapons in Europe would be withdrawn. None of the U.S. binary chemical weapons proposed for production in the United States would replace chemical weapons now in Europe. The net effect is a total unilateral withdrawal by the United States of all chemical weapons now in Europe.

In its persistent efforts to have the Congress fund the multibillion-dollar binary production program, the administration's plan contributes to the fulfillment of a longstanding Soviet foreign policy objective: The creation of a chemical weapons free zone in which the West withdraws its chemical deterrent from Europe while the Soviets keep their stockpile of deadly chemical weapons in Europe, only miles from NATO troops.

This short overview of the Pentagon's Binary Chemical Program demonstrates congressional opposition to making it the chemical Divad. That's why the compromise as contained in this fiscal year 1987 Defense authorization says "no" to flawed weapons—that is the Bigeye bomb—and why we should say "no" to the flawed strategy of unilateral chemical disarmament in Europe. In prohibiting the final assembly of the 155 mm. binary shell and production of the Bigeye bomb in fiscal year 1987, we are hoping that the superpowers can agree to an arms control agreement that would obviate the need for the final production of any binary chemical weapons.

This last point takes on added significance in view of the joint pledge originally made at the November 1985 summit by President Reagan and Secretary General Gorbachev to actively seek an agreement on the mutual elimination of chemical weapons. Both leaders discussed this issue again just this past weekend during their meeting in Iceland and identified an arms control agreement on chemical weapons as desirable and possible.

While not as conclusive as many of us would like, the conference position on chemical weapons reaffirms Congress position that we should not be funding a weapons system that does not work, is not proven safe for our troops, needlessly adds billions of dollars to the deficit, unilaterally eliminates the present chemical deterrent in Europe, and undermines efforts of the superpowers to agree to an arms control agreement that bans chemical weapons.

As we address this problem in the next Congress, we should not fund a full and final binary chemical production program unless: First, progress on an arms control agreement with the Soviets proves impossible; second, an independent assessment by GAO concludes that binary weapons are technically ready for production and operationally safe and usable; and third, our European allies agree to replace unitary chemical weapons on their soil with binary chemical weapons.

FOREIGN AID PROVISIONS

In addition to the important arms control provisions of this legislation, the Senate version of the DOD authorization contained a number of provisions which fell within the exclusive legislative jurisdiction of the Committee on Foreign Affairs and required the appointment of committee conferees. While the committee was able to protect its jurisdiction in these matters, with the cooperation of Chairman ASPIN and the House Armed Services Committee, I have become increasingly troubled at the recurring practice in the Senate of attaching foreign policy provisions to the Defense Department legislation.

I intend to ask for House Foreign Affairs Committee conferees each year this practice continues. I will also work with the chairman and ranking minority member of the Senate Foreign Relations Committee to arrest the dissipating jurisdictional structure in the Senate, which has led to the poor legislative process we face regarding authorizations for foreign policy programs. The House and its Foreign Affairs Committee have been dragged into this unfortunate situation through no fault of their own.

Of particular interest to the House Members in the conference report are three foreign policy provisions. First, a freestanding Senate provision allowing open ended Presidential authority to provide cost free transfers of military equipment to NATO southern flank nations was changed in the conference agreement to a 2-year program, under the authority of the Foreign Assistance Act. In addition, tighter controls were placed on the type of equipment which could be transferred. Report language was also inserted stating that transfers under this new authority would be consistent with current United States policy that a balance of military forces between Greece and Turkey in the Eastern Mediterranean be maintained. The executive branch was also instructed to submit to the proper committees of legislative jurisdiction—the House Foreign Affairs and Senate Foreign Relations Committees—a request for permanent legislation for such equipment transfers.

The conference report also contains authority for the Defense Department to provide small-scale humanitarian and civic assistance. At the insistence of the House Foreign Affairs conferees, a $3 million cap in fiscal year 1987 and a 5-year $16.4 million cap was placed on the program to insure that the program would remain small scale and not raise serious foreign policy implications beyond the jurisdictional control of the Committee on Foreign Affairs. The Senate definition of the types of humanitarian and civic assistance which could be provided was also tightened to insure that the program did not escalate in a new form of development and/or military assistance.

Finally, the Senate version of the DOD authorization contained a provision which would have required that the United States apply to the foreign missions to Cuba and East European countries the same terms, limitations, restrictions, and conditions applied to the Soviet Union's foreign mission in the United States. Because of executive branch concerns that the provision would hamper United States operational and intelligence capabilities in Eastern Europe and Cuba and contradict longstanding policy objectives of encouraging differentiation between Eastern European countries and the Soviet Union, the conference agreement provides for a comprehensive report on foreign intelligence activities in the United States. Such a report will enable further consideration of this important problem by the proper legislative committees, the House Foreign Affairs and Senate Foreign Relations Committees, in the context of the State Department authorization legislation next year.

Mr. RAHALL. Mr. Speaker, prior to going to Iceland, the President maintained that the summit would be a planning session for an upcoming summit to be held in Washington. Therefore, in response to the President's loud but inaccurate complaints that the House-passed arms control provisions tied his hands in dealing with the Soviets, House negotiators accepted a compromise that provided the administration with virtually everything it had demanded with regard to the House arms control provisions.

However, with the collapse of the Iceland summit, the possibility for a Washington summit is now remote. While some administration officials maintain that progress can be made on lesser agreements, Mr. Gorbachev has clearly linked all arms control issues to limitations on SDI. During the recent summit, Mr. Gorbachev proposed a sweeping package of arms control measures: the elimination of all nuclear weapons in Europe, a 50-percent cut in the United States and Soviet strategic arsenals, and a phased-in ban on all nuclear tests leading to an eventual comprehensive test ban. The agreement on intermediate-range missiles would have limited both sides to only 100 intermediate-range missiles, none of which would be in Europe. The Soviet Union would base its 100 intermediate-range missiles in Asia and the United States would place its 100 missiles on its own soil. The 50-percent cut in strategic weapons would apply to all weapons, whether based on land, sea, or in the air—carried by bombers—and would cover both warheads and launchers. Mr. Gorbachev stated that the Soviet Union would agree to whatever verification the United States deemed appropriate. In addition, Mr. Gorbachev called for restricting the strategic defense initiative [SDI or star wars] research to the laboratory for 10 years and for negotiating on the deployment of SDI at the end of the 10-year period.

President Reagan made a counteroffer to reduce strategic weapons by 50 percent over the next 5 years and totally eliminate them within 10 years. With respect to SDI, however, the President would place no restrictions on testing and development of the SDI Program but would agree not to deploy the system for the next 10 years. After that time, the United States would deploy star wars in space.

Mr. Gorbachev agreed to the new U.S. proposals on offensive weapons but continued to insist on limiting SDI testing to the laboratory and making deployment of SDI subject to negotiation after 10 years. The negotiations deadlocked over SDI and both sides walked out on the entire agreement.

Both President Reagan and Mr. Gorbachev have reasons for their staunch positions on SDI which are based on their political beliefs. However, the greater cause for concern is the ramifications of the stalemate caused by these failed negotiations. The failure of the Iceland summit and the unlikely prospect for another summit in the near future is a severe setback for arms control. It makes the possibility for any arms agreememt within the next 2 to 3 years highly unlikely, will escalate the arms race, and strain relations between the United States and NATO allies.

First, greater tensions among the two superpowers and the administration's refusal to compromise on Star Wars is likely to cause the Soviets to postpone further negotiations until a new President is elected.

Second, U.S. intentions to proceed with research, development, testing, and eventual deployment of a strategic defense program will force the Soviet Union to counter with its own program, and the two will be locked into a massive spending war in space—costing each side up to $1 trillion. Furthermore, the Soviet Union is likely to resume nuclear testing, thereby allowing them to expand and modernize their strategic forces. The United States will then have to answer the Soviet modernization with new weapons of its own. The utter failure of this arms control summit will lead to an even steeper escalation of the arms race than that which it was intended to counter.

The third effect of this summit will be strained relations between the United States and its NATO allies. In his press conference following the Iceland summit, Mr. Gorbachev stated that negotiations in Geneva on limitations on intermediate-range ballistic missiles in Europe are now stalemated because of the summit. Western Europeans are already highly skeptical of the American commitment to arms control and their security interests. They are likely to be outraged that President Reagan passed up the opportunity to eliminate nuclear weapons in Europe in order to develop SDI, about which they are highly skeptical. Western Europeans vehemently protested the placing of U.S. cruise and Pershing II missiles on European soil. The President's walking away from the most significant arms agreement to date is likely to generate far greater opposition and weaken support for the current European governments and the NATO alliance. The U.S.S.R. will try to exploit the situation in order to weaken the NATO alliance and convince the Western Europeans that their security interests and those of the United States are not the same. The unbending U.S. position propagated during the Iceland summit only serves to foster this propaganda.

In light of the collapse of the summit—leaving a second more substantial summit as a very unlikely possibility—I do not see the necessity to uphold the compromise on the House-passed arms control provisions which has been incorporated into the defense authorization conference report.

The agreement, unlike the House-passed bill, permits the administration to proceed with plans to violate SALT II, permits unlimited nuclear tests, and authorizes funds for nerve gas, breaking a 17-year moratorium. The agreement splits the difference on star wars funding, giving the President a $530 million increase over current levels. On only one issue—antisatellite tests—does the agreement incorporate the House proposal, which continues the ban on such tests, provided the Soviets do likewise. And this provision is a hollow victory for arms control in light of the fact that the Air Force has had technical difficulties with the ASAT System being developed, which would limit the number of tests even without a ban.

With regard to spending levels, the conference report authorizes $291.8 billion for defense programs in fiscal year 1987, $4.9 billion more than the House bill and $5.8 billion more than current appropriations. The report adds a total of $6.4 billion to the procurement funds authorized by the House bill; requires certain changes in procurement procedures that are in general weaker and less comprehensive than the wider ranging reforms contained in the House bill; and contains none of the House language providing new legal protections for whistleblowers in the military or employed by defense contractors.

This conference report is an extremely watered down version of the House-passed bill which contained diligent cost saving measures, responsible spending levels, and reasonable arms control provisions that maintained the status quo. In light of the administration's hollow promises to work toward arms control and our responsibility as a legislative body to represent the interests of the American people in all issues of national importance, I will not support this conference report and urge my colleagues to join me in opposition to this measure.

Mr. GREEN. Mr. Speaker, earlier this year, I was pleased to vote for the defense authorization bill presented to the House, in part because it contained the arms control provisions many of us had worked so hard to include. However, I cannot support the defense conference report before us today because it has so badly compromised away those important arms control provisions.

Essentially, all the House was left with, after passing five historic amendments, was one amendment that maintains an Asat moratorium. Surrendered are four others—on a nuclear test ban, on maintaining SALT II limits, on stopping the production of chemical weapons, and on holding the SDI funding to zero growth plus 3 percent inflation—which would have contributed greatly to slowing down the arms race.

The most disturbing blow, I believe, dealt by this so-called compromise is to allow the administration to break the SALT II limits. We all know the Soviets can add warheads more quickly than we. If we allow this agreement to be eradicated, not only will we not have gained an arms control agreement last weekend, we will have lost an existing one that benefits the United States. And as for a nuclear test ban, by agreeing to a mutual test ban beginning January 1, 1987, we have an opportunity to hold the Soviets to their unilateral test ban which they have been observing since August 1985.

While I know why this lopsided compromise was agreed to by the House conferees—no one wants to be seen as "pulling the rug out from under the President" as he is negotiating with the Soviets—I cannot support the a-deal-is-a-deal philosophy which has followed. I do not condone the Soviet bait and switch game at the Iceland presummit, but the administration's apparent disinterest in working for a compromise has nullified its current contract with the Congress.

As one of the coauthors of the test ban amendment which passed the House on a vote of 234 to 155, and as a supporter of the other four provisions which also passed, I urge my colleagues in this House to open their eyes and see what we got in this trade. I'm afraid we got the beads and the administration got Manhattan, and all mankind could be the real loser.

Mr. FRENZEL. Mr. Speaker, I must oppose the conference report before us today. Like many of its predecessors, it simply is too expensive.

Overall spending in the House-passed defense bill was $282 billion. In the Senate, it was $292 billion. Today we are asked to accept a compromise of $290 billion. In my judgment, that figure represents a failed effort to hold down costs in a time of fiscal crisis.

One example will suffice. Congress has mandated that the Air Force buy a new trainer aircraft whether the contractor can build it or not. That's what this Congress believes is procurement reform.

I have pursued freeze funding levels for all areas of Government this year, and believe that greater austerity is needed in defense as in all other areas. I am pleased that the rate of increase of defense spending has slowed, but believe this year's figure remains excessive.

I regret that the conference increased funding for the strategic defense initiative [SDI] substantially over the freeze-plus-inflation approach adopted in the House. Unnecessarily rapid increases in total spending have unnecessarily caused a weakening of confidence in our defense budget. Unnecessarily rapid increases in funding in SDI are weakening confidence in that progarm, too.

I also regret that more of the arms control provisions adopted in the House version of the bill were not adopted.

Mr. Speaker, this bill is not entirely bad. It will provide for the continued effective defense of our Nation and its interests abroad. However, its cost simply is too great. For that reason, I oppose its passage.

Mr. TRAFICANT. Mr. Speaker, I rise in opposition of this measure for the following reasons. First, the conference agreement rejects the House stand on continued adherence to the limits set forth in the SALT II Treaty. The provision adopted in the conference report would merely urge the President to continue observing SALT II limits. The conference report does not require the President to comply with SALT II—this could open the floodgates for an escalation of the arms race—especially in light of the bitter atmosphere following the failure at the Iceland summit. If we allow this President to violate SALT II—as he said he would—then I fear that it will launch a new, a certainly more destabilizing arms race that could lead us one step closer to a nuclear holocaust.

Second, the conference report rejects the House approved ban on nuclear weapons tests above 1 kiloton. Failure to enact such a ban will probably result in the Soviets resuming such testing after a unilateral 14-month moratorium. In light of the failure at Iceland Soviet resumption of nuclear testing is highly likely—especially in light of the Congress' failure to act in this area.

Third, the conference agreement also rejects the House 1-year ban on nerve gas production—thereby ending a 17-year U.S. moratorium on nerve gas production. Again, given the tense nature of Soviet-United States relations following Iceland, to allow the production of nerve gas artillery shells will only increase tensions and further dim the hopes of any future arms control agreement with the Soviets.

Finally, the conference report does not include the buy American language I successfully attached to the House bill. This modest measure would have given American firms bidding on Defense contracts a 5-percent weighted advantage against foreign firms.

Mr. COOPER. Mr. Speaker, the defense Authorization Act includes several provisions of concern to the small business community, in particular a mandated review of small business size standards and a prohibition on subcontracting more than 50 percent of the cost of a setaside contract. As a member of the House Small Business Committee, I took particular interest in these provisions.

The mandated review of size standards is specifically limited to selected industries. This judgment by the Conference reflects the compromise effected on the floor of the House, which struck the across-the-board review that had been proposed by the Armed Services Committee in favor of a limited review. In particular, I note that the review will not extend to the textile and apparel industries. I strongly concur in this decision. Given the hardships endured by the domestic textile industry in recent years, further disruption of the marketplace by changes in small business size standards would have been a serious mistake.

The bill also includes a prohibition on subcontracting more than 50-percent of the cost of a setaside contract. A similar provision appeared in the House-passed bill. In the case of contracts for supplies, the bill exempts the cost of materials from the calculation of the cost of manufacturing. The fact of the matter is that the cost of materials frequently is the largest component of the overall cost of a contract. This is a particular concern for the textile industry, and it is fair to say that the decision to exclude the cost of supplies from the calculation of manufacturing costs reflects that concern.

The purpose of the small business setaside program is to foster the development of domestic small businesses, and a principal purpose of the 50-percent cap on subcontracting is simply to ensure that small business setaside contracts are performed by small businesses—and not by big businesses or foreign concerns under subcontract to a small business contractor. The decision to exclude the cost of supplies from the calculation of the cost of manufacturing is intended to avoid penalizing small businesses in industries with high materials costs. In like manner, the conference wisely agreed to give authority to the SBA Administrator to adjust the permissible percentage of subcontracting in recognition of prevailing practices among small businesses in a given industry.

It is my firm understanding that the purpose of this provision is to permit the Admininstrator to increase the permissible percentage of subcontracting in industries, such as the apparel industry, where small Government contractors frequently subcontract substantial amounts of work to other small businesses. By giving authority to the SBA Administrator to adjust the permissible level of subcontracting in such cases, we protect conventional industry practices among domestic small businesses. It is important to emphasize, however, that this provision is intended to protect small businesses. It is not intended to permit additional subcontracting to big businesses or foreign concerns. I trust that the SBA Administrator will act quickly to make adjustments in the permissible level of subcontracting in the textile and apparel industries, and in other industries where small contractors frequently subcontract to other small companies on Government contracts.

Mr. BEDELL. Mr. Speaker, complete victories are often most difficult to secure here in Congress. Compromise is our byword and will continue to be our byword. Last week, House conferees on the arms control provisions of the Defense Department authorization bill accepted such a bipartisan compromise on the outstanding arms control issues contained in this bill. We did so in an effort to support the President in his presummit meeting with General Secretary Gorbachev in Iceland in the hopes of furthering the cause of peace. While our agreement to this compromise did fall short of a 50–50 arrangement, I believe we acted responsibly in securing significant concessions from our counterparts in the other body with respect to the overall issue of arms control.

One of these concessions was directly related to an issue that I have committed myself to over the last 4 years—an end to nuclear weapons testing. In essence, what the conferees in both bodies agreed to was the inclusion of the text of House Joint Resolution 3, of which I was the primary sponsor in the House, within the text of the Defense Department authorization bill. This measure—House Joint Resolution 3—represented a straightforward approach to achieving an end to nuclear weapons testing through the ratification of both the Threshold Test Ban [TTBT] and Peaceful Nuclear Explosion [PNET] Treaties, as well as through the resumption of negotiations aimed at the conclusion of a mutual, verifiable Comprehensive Test Ban Treaty. In addition to this agreement, a pledge was secured from the President to propose new negotiations on further limits on nuclear testing, leading to a complete ban on such testing, as soon as the TTBT and PNET were in force.

In all honesty, I can tell you that such a personal victory is especially wonderful to attain before I retire from Congress. Nevertheless, I have decided to oppose final passage of this conference report as a result of a flaw in our compromise packages in relation to the production of binary chemical munitions. In a letter sent to the House majority whip, Mr. FOLEY, our counterparts in the other body specified their agreement to recede to the House to bar funding for the production of the Bigeye binary chemical bomb. This agreement was secured through a House commitment to recede to the Senate to allow full funding for the production of the 155mm binary artillery shell. Thus, this agreement appeared to me to be a straight and fair trade, 155 for Bigeye.

Today it appears that the straight and fair trade has an interesting hook attached to it. The hook is the inclusion of $90 million for production facilities for the Bigeye bomb. Thus, while our counterparts in the other body receded to our demands or the cancellation of Bigeye funding, they have resuscitated Bigeye by providing funding for production facilities of Bigeye. While Congress will have the opportunity to revisit the issue of Bigeye production funding against next year, the bottom line is the expenditure of $90 million to pave the way for Bigeye production next year. The bottom line is the expenditure of $90 more million in a year in which we are all endeavoring to meet Gramm-Rudman budget cuts and eliminate wasteful Federal spending.

In reporting to Congress, the General Accounting Office has stated that persistent technical flaws remain rampant in the Bigeye Program that these flaws are so—unrelenting that it is not even ready for development testing, let alone production." That being the case, I see no reason for the House to allow the other body the opportunity to renege on its commitment to recede to the House on the issue of any funding for Bigeye. I see no reason for the House to approve the wasteful expenditure of $90 million for production facilities for a weapon of dubious and decrepit design.

In closing, I would like to commend the efforts of our colleague from Wisconsin, Mr. ASPIN, for being a tough negotiator and defending the House position on those issues associated with arms control. I can say it was an honor to serve on that panel and that we did everything we could to raise both the institutional and public awareness of the importance that arms control plays to the national security interests of the United States. And while I am pleased to see finally the issue of nuclear testing elevated beyond that of sense of the Senate and to that of the sense of Congress, I do believe we fell short of what I understood our compromise agreement on the issue of binary chemical munitions to be. For that reason, I cannot support final passage of this conference report. Although I shall not have the opportunity to serve in the 100th Congress, I would advise my colleagues that each of the arms control issues approved by the House will be visited again by the House. Arms control remains the legacy of the 99th Congress and must be the first order of business in the 100th Congress.

Mr. STARK. Mr. Speaker, the Defense conference report that the House votes on today represents about one-half of half a loaf for Democrats concerned with arms control and a reasonable, effective defense budget. Despite having a clear mandate from the House on such issues as nuclear testing, SALT II compliance, chemical weapons, procurement reform, and star wars, the conferees bowed to

pressure from the administration and the Senate and gave away the store. I voted for the House bill, despite many reservations, but I cannot support the conference report.

My first complaint with the agreement is in the area of arms control. The House conferees knew that there was strong support in the House for the provisions on nuclear testing and SALT II compliance and they pledged to come back with at least one of them. But then President Reagan announced the presummit conference with Secretary Gorbachev and pleaded with the Congress not to tie his hands. Well, the House gave in to his pleas and untied his hands, and all he did was sit on them at the end of the summit. Considering what we got out of Reykjavik—nothing—was it worth what we gave away on arms control—everything?

My second major disagreement is with the cut in funding for operations and maintenance. The agreement basically splits the difference with the Senate on total authorization, adding nearly $5 billion to the House total. But within that increase is a $6.4 billion increase in procurement, a $2.4 billion increase in testing and development, and a nearly $3 billion cut in O&M.

We all know there are two main reasons for doing this. One is that procurement funds are spent more slowly than O&M funds, so shifting money out of O&M into procurement allows us to increase authorization much more than we increase fiscal year 1987 outlays. This does not mean we will not eventually spend the money. We are just deferring tough decisions on budget cutting until the future. The second is that much stronger constituencies are built up around major weapons systems than around O&M expenditures. It's a lot nicer to get your picture taken on a new battleship or submarine than in a mechanic's shed where weapons are repaired.

But the superficial attractiveness of big-ticket procurement does not make it good policy. Not when it comes at the price of good operations and maintenance. I'm sure that my constituents who work in the Alameda Naval Air Rework Facility recognize the importance of keeping the Navy's planes in good working order. I'm sure they know just how much work needs to be done to keep those planes flying. Without them, the much-celebrated top guns would be grounded. But the conference report cuts over $1.2 billion from the Navy's O&M budget alone. This Congress would rather spend money on shiny new weapons than buy spare parts for the ones we already have. As a result, we will now have the world's first disposable F–14.

Let's look at some of the things we bought for that big cut in O&M. We increased star wars to $3.5 billion, an 18 percent increase over last year. This is a folly. There are two main arguments advanced for supporting star wars. One is that it will provide us with an electronic astrodome, protecting the American people from nuclear attack. The other is that it is a bargaining chip to force arms control concessions out of the Soviet Union. As far as I know, nobody except Edward Teller, Ronald Reagan, and some extremists in the American Security Council really think star wars will work. And in Reykjavik, Reagan had an opportunity to use star wars as a bargaining chip and refused. Bargaining chips are worthless if you never cash them in.

That's not all. The conferees also added $1.75 billion for two additional Aegis destroyers. They increased the authorization for purchase of Bradley fighting vehicles—the ones that have failed just about every test—from 593 to 720. They increased the authorization for purchase of AMRAAM missiles, another program plagued with controversy, from 135 to 180, at a cost of an additional $149 million. And, they authorized an additional $98 million to add Navy homeports in Everett, WA and Staten Island, NY, a transparent pork-barrel move to buy support for this defense buildup.

Mr. Speaker, in addition to all these drawbacks, the conferees gave away some very important procurement policy reforms that had been accepted by the House. The conference report does not include a House section providing new legal protections for whistle blowers employed by either the Defense Department or defense contractors. It weakens House language regarding the revolving door arrangement which is responsible for many of the wasteful, sweetheart deals we see between the Pentagon and various defense contractors. It eliminates entirely House language requiring the chief financial officers of defense contractors to certify that the costs they have charged are indeed allowable—to certify, that is, that they are not cheating the American taxpayer. And, the agreement guts House language requiring that 10 percent of procurement contracts be set aside for minority-owned businesses.

Mr. Speaker, I regret that the House conferees caved in as they did. I regret it because I thought that we had finally turned a corner and that we were going to hold the Defense Department to the same standards of prudence and fiscal restraint that we have established for the rest of the Government. Unfortuately, it didn't happen. We gave the Pentagon another blank check so they could continue to throw away hundreds of billions of dollars without regard for cost or effectiveness and with no requirement that they formulate a strategy—a matching of ends and means—in their weapons purchases. I cannot in good conscience support that.

Mr. MOODY. Mr. Speaker, I rise to oppose this DOD authorization package. I do primarily because of my disappointment on the arms control portion. From the perspective of one who cares deeply about arms control, the stability of the United States-Soviet relationship, and the security of our country, I don't believe this appropriations can be supported. The compromise last week on the House arms control provisions was reached in good faith by the House on the eve of a Reagan-Gorbachev meeting filled with potential. But we now know all to well that that meeting did not reach its potential. No agreement was achieved, even though we had an opportunity to cut Soviet strategic missiles in half. Tensions between the superpowers seem as great as ever. Against this backdrop, I believe the House and the Congress as a whole now have a right and an obligation to wage a battle for stronger arms control provisions for 1987 before we go home.

We should have stronger restrictions in this bill on production of the Bigeye chemical weapon bomb. We should have a lower, more reasonable funding level for SDI, and some limits on U.S. underground nuclear testing. But more than anything, we should have binding language on U.S. adherence to the SALT II Treaty.

Unless Congress acts before the end of this session, the administration plans to abrogate the SALT II Treaty on November 11—while Congress is out of session—by deploying the 131st cruise missile-carrying bomber. Instead of having a DOD appropriations bill with policy conducive to arms control and greater reductions in nuclear weapons, we will have a more arduous path to any new arms agreements. Opening pandora's box by discarding SALT will make closing the box much more difficult in the future, no matter how good the administration's current intentions may be. We must face that fact and act before it is too late.

Given the outcome of the Iceland summit, I believe we should reject this bill and the inadequate position it takes on arms control. This is not the time for mild measures. It is time to have the courage to do what President Reagan would not do—enhance and extend arms control. We owe that to the people of this country, and to mankind.

Mr. ASPIN. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The Speaker. pro tempore The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 283, nays 128, not voting 21, as follows:

□ 1415

The Clerk announced the following pair:

On this vote:

Mr. Nichols for, with Mr. Weiss against.

Messrs. PERKINS, KASICH, BERMAN, WAXMAN, CLINGER, COYNE, and SWINDALL changed their votes from "yea" to "nay."

Messrs. MRAZEK, BATES, COLEMAN of Missouri, and ABERCROMBIE changed their votes from "nay" to "yea."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. BADHAM. Mr. Speaker, during consideration of the conference report on the Department of Defense authorization bill, I was unavoidably detained in my district with the Secretary of Transportation, Elizabeth Dole. Had I been present on rollcall 467, I would have voted "aye."

GENERAL LEAVE

Mr. ASPIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report just agreed to.

The SPEAKER pro tempore. (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

IMPACT OF NATIONAL DEFENSE AUTHORIZATION ACT ON SMALL BUSINESS

(Mr. MITCHELL asked and was given permission to revise and extend his remarks at this point in the RECORD.)

Mr. MITCHELL. Mr. Speaker, section 921 of the report amends the Small Business Act in five important ways dealing with set-aside awards. First, it sets out a national policy that small business should receive a fair share of each product and service purchased by the Government. Present law requires that small business receive a fair share of total Federal purchases. This latter provision has allowed agencies, in effect, to set aside virtually entire industries for exclusive small business competition while ignoring other industrial areas where small business participation rates have been relatively low. Under this bill, small business potential in every category or purchases must be ascertained, and buying agencies must make efforts on an individual industry-by-industry basis to insure that small business receives its fair share of each product and service being purchased. On the other hand, the domination of a market through set-asides is prohibited. Consequently, small business potential in every industry is to be exhausted. If small business participation levels remain very low only then should consideration be given to raising the size standard. Conversely, if set-aside participation levels are very high, SBA should give consideration to lowering the standard.

The second major provision of this measure is the mechanism that would trigger the mandatory downward adjustment to size standards in four enumerated industries. The report provides that, if over a 3-year period, more than 30 percent of any one of these markets has been awarded pursuant to sections 8(a) and 15(a) of the Small Business Act, SBA must reduce the size standard for that market "to a size that will likely reduce the number of contracts which may be set-aside to approximately 30 percent of the value of contracts to be awarded" under these two programs. The four covered industries are construction (including dredging), architectural and engineering services (including surveying and mapping services), shipbuilding and ship repair and refuse system and related services.

By taking this approach, Congress would establish size standards as the "regulator" for the number of small business set-asides in each industry. This is the easiest and most efficient way of achieving the statutory intent for the set-aside programs. Administratively, Federal buying agencies need only concern themselves with such new size standards as may be promulgated by SBA. There would be no automatic curtailment of set-asides by each buying activity or Federal agency because a certain percent of set-asides were obtained over any given time period or because an agency's perception of "fair share" were achieved in any one category of purchases. The new size standards will be conveyed to each buying agency as they are issued by SBA. With respect to the four enumerated industries, the newly adjusted standards, when applied against the "rule of two" test of competition for small business set-asides, should automatically reduce the number of set-asides in such industries. This will happen because under present procurement regulations, a contract cannot be set-aside for exclusive competition among small businesses unless there are two or more responsible small businesses

capable of performing the work at reasonable prices. Succinctly stated, the smaller the universe of small businesses, the fewer requirements meet the "rule of two" test for set-asides.

This is also an efficient way to achieve the statutory purpose for set-asides—that is, increased competition—because it constantly redirects set-asides to smaller firms, encourages new market entrants, prevents market domination by "large" small businesses, and provides incentive to firms to grow and achieve economies of scale since there is a market beyond set-asides. At least 70 percent of each of the enumerated markets under this bill must be made available for award outside of the set-aside programs.

It should be noted that while the bill requires a mandatory cut in size standards for these four industries if the 30-percent threshold is reached, there is no mathematical formula contained in the bill that SBA is required to use to set the new size standard. SBA is to conduct its own analysis to determine how deep to make the "cut". In this regard it should conduct market research to ascertain the size of the Federal market, the number and characteristics of firms in that market, the medium size of a Federal award, the distribution of awards by value, and any correlation between contractor size and ability to perform contracts of varying values. In this regard extensive public participation should be sought before SBA proposes any adjustment and another comment period should be conducted after SBA discloses its intent on what specific adjustment it plans to make final. Of course, it is expected that extensive contact with appropriate senior officials of buying agencies will be had in order to ascertain the perspective of Federal acquisition personnel.

The conference report does not preclude size standard adjustments for the enumerated industries at any time prior to the triennial review in order to achieve a "fair share", provided that the adjustment will not likely result in exceeding the 30-percent limit. While the amendment does not change present statutory language giving SBA the exclusive authority to set size standards, it does place limitations on the agency's exercise of that discretion. For example, SBA has no discretion but to cut the size standard in one of the four industries when more than 30 percent of that market has been set-aside and it appears that the present size standard would exceed that threshold in the future. SBA's failure to act under such circumstances would constitute a violation of this provision. Accordingly, in my opinion, a mandamus action would lie in such a circumstance to force SBA to make a "cut" in the standard although the specific cut—that is the new size standard—could only be overturned if a court found it to be unreasonable under all attending circumstances.

The third issue presented by section 921 of the report is a definition of what constitutes a "market" or "industrial category" to which a specific size standard should be applied.

The report requires that SBA use four-digit standard industrial classification codes to define Federal industrial categories or markets. However, SBA must segment or split the market into more discrete units whenever it receives evidence that further segmentation is warranted due to: First, capital equipment needs; second, special labor; third, geographic requirements; or fourth, the emergence of a new industry.

A segmentation based upon capital equipment needs should take place when SBA receives evidence showing that a submarket of a four digit SIC requires substantially different equipment to produce a product or service dissimilar from others produced or rendered under the general SIC heading. For example SIC 3731, shipbuilding and repairing, covers such diverse areas as repairing a tugboat and building an aircraft carrier. These efforts obviously require greatly varying types of equipment indicating that a segmentation of the market between ships repair and ship building is an obvious first step to measure properly the economic concentration and participation rates of small business in such endeavors. In addition, however, further segmentation is needed, also based upon capital needs, to take into account nuclear and nonnuclear ship repair and construction. It is estimated that as much as $100 million is needed to certify a shipyard as nuclear qualified. Moreover, there are only two yards in the United States that are so qualified and their volume of work approximates 55 percent of the entire volume under SIC 3731, thereby greatly distorting the level of small business participation in the nonnuclear segment of the industry.

Another example where segmentation based upon capital equipment needs is warranted is presented by SIC 1629, heavy construction, not elsewhere classified (NEC). SBA has already segmented SIC 1629 into two categories: heavy construction NEC and dredging, each carrying their own size standard. But, the dredging industry is not as homogenous as SBA believes and the agency should, pursuant to this bill, segment further that market based upon equipment needs. In the dredging industry, work is customarily performed by using either a "dustpan" or "hopper" dredger.

Hopper dredgers are far more expensive and must be used to perform certain requirements that cannot be accomplished through the use of any other type of equipment. To aggregate these statistics with awards calling for dustpan dredging work both understates small business participation in the dustpan segment of the market, and overstates small business participation in the overall dredging industry.

Segmentation based upon special labor skills should take place when SBA receives evidence that shows that a submarket of a four-digit SIC requires substantially different labor skills to produce a product or service different from others produced or rendered under the general SIC heading. For example, SBA has already segmented SIC 8911, engineering, architectural, and surveying services into four different categories: First, engineering, except military and aerospace equipment and weapons; second, engineering services for military aerospace and weapons; third, marine engineering and naval architecture; and fourth, architectural services—except naval—and surveying services. Without such a segmentation, SIC 8911 would have covered such diverse services as engineering on the MX missile system and surveying a road in a national park. This bill would require SBA to make such segmentations in all similar types of situations.

It should also be noted that specialized skills often go hand in hand with the use of specialized equipment. For example, the repair of a nuclear powered ship requires not only special equipment but also the employment of persons with special labor skills. In such a situation, SBA should cite both reasons as justification for its segmentation of the market.

The bill also requires segmentation on the basis of geographic considerations when: (a) the Government typically designates the area where the work is to be performed; (b) Government purchases comprise the major portion of the entire domestic market for the goods or services being procured; and (c) due to the fixed location of facilities, high mobilization costs, or similar economic factors, it is unreasonable to expect competition from business concerns located outside of the general areas where such concerns are located.

The only two examples that I know of that can now satisfy this requirement are nonnuclear ship repair and dredging.

In the ship repair industry the Navy typically directs that the work be performed in specific ports. Moreover, to build a facility suitable for most ship repair work, I am told, requires an investment of between $10 to $20 million. Since the Government is the major domestic purchaser of ship repair work, and competition between ports does not generally take place (due to the Navy's restrictions and the economic impossibility of moving repair facilities from port to port) a geographic segmentation of ship repair work is clearly warranted.

I am told the nonnuclear ship repair is presently performed in 10 major geographic port areas. On the west coast those areas are: (a) Puget Sound area including Portland, OR; (b) San Francisco Bay area; (c) Los Angeles/Long Beach area; and (d) the San Diego area. On the east coast the following port areas have been identified: (a) the New England area (Connecticut, Massachusetts, Rhode Island, New Hampshire, Maine); (b) the New York, Philadelphia and New Jersey area; (c) Norfolk, VA, and the Port of Baltimore, MD; (d) Charleston, SC; (e) Jacksonville, FL; and (f) the gulf coast area.

The dredging industry is in much the same position as the ship repair industry. With dredging the Government, however, always designates the place of performance and, due to very high mobilization costs and similar economic factors, it is unreasonble to expect dredgers to be competing across geographic boundaries. Geography has placed natural limitations on competition in this industry and, I am told, the following markets, among others, are clearly discernible in this industry: (a) the Northeast; (b) Southeast; (c) gulf coast; (d) west coast; and (e) the Great Lakes area.

Shipbuilding and repair and dredging are the two markets that would be most changed under the report although a number of other market areas may undergo some less severe change.

Accordingly, under the terms of the conference report, I fully expect that SIC 3731 would

be segmented as follows: nuclear ship repair and building; shipbuilding; nonnuclear ship repair: Puget Sound/Portland; San Francisco; nonnuclear ship repair: Los Angeles/Long Beach; nonnuclear ship repair: San Diego; nonnuclear ship repair: New England; nonnuclear ship repair: New York, Philadelphia and New Jersey; nonnuclear ship repair: Norfork/Baltimore; nonnuclear ship repair: Charleston; nonnuclear ship repair: Jacksonville, FL; and nonnuclear ship repair: gulf coast.

It is also my expectation that, under the terms of this amendment, SIC 1629, dredging will be segmented as follows: Dustpan: Northeast; Hopper: Northeast; Dustpan: Southeast: Hopper: Southeast; Dustpan: gulf coast; Hopper: gulf coast; Dustpan: west coast; Hopper; west coast; Dustpan: Great Lakes; Hopper: Great Lakes.

It should also be noted that the bill requires market segmentation in order to recognize a new industry. Such segmentation may be appropriate, for example, to give proper recognition to industries such as the manufacturer of microchips, and genetic engineering.

The fourth area addressed by this section of the report requires that agencies pay a fair market price for contracts awarded under sections 15(a) and 8(a) of the Small Business Act. The Federal Acquisition Regulations (FAR) have a definition of "fair market price" which is found in section 19.806. That section requires that a fair market price "be based on reasonable costs under normal competitive conditions and not on lowest possible costs." It is expected, that this definition will be maintained and its scope expanded to include contracts awarded under the small business set-aside program.

Under this standard a contracting officer cannot reject a set-aside bid merely because some large firm may be able to offer a lower price, provided, of course, that the set-aside offer is reasonable. When a particular item or service has an adequate procurement history, the contracting officer should determine "reasonableness" by reviewing past award prices and adjusting them to ensure comparability. Past prices which do not represent typical or normal competitive conditions should not be used in this analysis. Prices under previous set-asides should, of course, be used unless there is some very clear indication that such prices were unreasonable and not typical of normal competitive conditions.

For items or services not having an adequate procurement history the contracting officer would be required to perform an in-house analysis to determine reasonable cost under normal competitive conditions. Once again, a set-aside bid cannot be rejected solely because of some big business alleging that it can supply the product or service at a cheaper price.

Finally, the amendments to the Small Business Act provide that a business cannot be considered a "small business concern" for purposes of a set-aside or 8(a) contract unless it agrees, for a service contract, to perform at least 50 percent of the cost of the contract for direct labor with its own employees, and, for a manufacturing contract, to perform at least 50 percent of the cost of manufacturing the supplies—not including the cost of materials. SBA must promulgate subcontracting percentages for the construction industry and other industries not specifically covered by the report language. In addition, SBA is given the discretion, on an industry-by-industry basis, to change the 50-percent limitation—either up or down—to reflect conventional industry practices.

To compute compliance under this provision with respect to a manufacturing contract, it is necessary to first subtract the cost of raw materials from the face value of the contract or offering price. The resulting number should represent the awardee's—offeror's—direct labor, profit and overhead. Unless SBA specifies a different percentage, the small business must agree to perform at least 50 percent of this amount in-house.

There may be some initial difficulty in distinguishing between raw materials and what might be termed "subassemblies." It will, of course, be the function of SBA to define more precisely this distinction when it promulgates regulations implementing this section. In my opinion raw materials or components are those types of items customarily purchased by manufacturers in that industry to produce the end item called for under the contract. If the contractor has a subcontractor assemble or manufacture those raw materials to a degree not customary in the industry, the entire value of the subcontract should be deemed to be other than a cost of raw materials.

In conclusion, these provisions of section 921 of the report present a reasoned approach to very difficult set-aside problems that have been mounting over recent years. If implemented as intended by its authors, the small business share of Federal procurements should increase. All Americans will benefit from this additional competition that small business can and will bring to the Federal acquisition system.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Hallen, one of its clerks announced that the Senate has passed without amendment bills of the House of the following titles:

H.R. 2826. An act to amend the Wild and Scenic Rivers Act by designating a segment of the Horsepasture River in the State of North Carolina as a component of the National Wild and Scenic Rivers System, and

H.R. 5598. An act to provide for the transfer of the Coast Guard cutter "Taney" to the city of Baltimore MD, for use as a maritime museum and display.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5465. An act to amend the Energy Policy and Conservation Act with respect to energy conservation standards for appliances.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3113) "An act providing for the coordinated operation of the Central Valley project and the State water project in California."

The message also announced that the Senate agrees to the amendment of the House to the bill (S. 2250) "An act to strengthen the prohibition of kickbacks relating to subcontracts under Federal Government contracts."

The message also announced that the Senate agrees to the amendments of the House to the joint resolution (S.J. Res. 367) "Joint resolution to designate September 24, 1986, as "National Kidney Program Day."

The message also announced that the Senate agrees to the amendments of the House to the bill (H.R. 4350) "An act to amend the Wild and Scenic Rivers Act, and for other purposes," with an amendment.

The message also announced that the Senate agrees to the amendments of the House to the bill (S. 991) "An act to provide authorization of appropriations for certain fisheries activities," with amendments.

The message also announced that the Senate had passed a bill, joint resolutions, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 2479. An act to amend chapter 39 of title 31, United States Code, to require the Federal Government to pay interest on overdue payments, and for other purposes;

S.J. Res. 388. Joint resolution designating the week beginning January 4, 1987, as "National Bowling Week";

S.J. Res. 408. Joint resolution designating "American Physiologists Week";

S.J. Res. 426. Joint resolution to designate the week of October 19 through October 25, 1986, as "National CPR Awareness Week"; and

S. Con. Res. 168. Concurrent resolution authorizing a technical correction to be made in the enrollment of the bill S. 2250.

CONFERENCE REPORT ON H.R. 5234, DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1987

Mr. YATES submitted the following conference report and statement on the bill (H.R. 5234) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1987, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-1002

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5234) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1987, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 9, 12, 17, 19, 27, 29, 30, 31, 32, 37, 41, 44, 45, 48, 54, 70, 73, 77, 79, 80, 81, 82, 83, 84, 85, 92, 107, 108, 113, 117, 121, 148, 149, 151, 152, 158, and 167.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 11, 28, 50, 51, 55, 57, 64, 76, 99,

102, 116, 129, 131, 135, 140, 146, 153, 157, 159, 161, 164, 166, 168, 170, and 172, and agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$54,524,000*; and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$9,253,000*; and the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$7,000,000*; and the Senate agree to the same.

Amendment numbered 22:

That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$10,628,000*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment of the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$24,250,000*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$87,220,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$418,665,000*; and the Senate agree to the same.

Amendment numbered 38:

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$160,697,000*; and the Senate agree to the same.

Amendment numbered 39:

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$44,904,000*; and the Senate agree to the same.

Amendment numbered 47:

That the House recede from its disagreement to the amendment of the Senate numbered 47, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$203,720,000*; and the Senate agree to the same.

Amendment numbered 49:

That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended as to read as follows: *: Provided further, That the Secretary of the Interior may deny fifty percent of an Abandoned Mine Reclamation fund grant, available to a State pursuant to title IV of Public Law 95-87, in accordance with the procedures set forth in section 521(b) of the Act, when the Secretary determines that a State is systematically failing to administer adequately the enforcement provisions of the approved State regulatory program. Funds will be denied until such time as the State and the Office of Surface Mining Reclamation and Enforcement have agreed upon an explicit plan of action for correcting the enforcement deficiency. A State may enter into such agreement without admission of culpability. If a State enters into such agreement, the Secretary shall take no action pursuant to section 521(b) of the Act as long as the State is complying with the terms of the agreement*; and the Senate agree to the same.

Amendment numbered 53:

That the House recede from its disagreement to the amendment of the Senate numbered 53, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$55,668,000*; and the Senate agree to the same.

Amendment numbered 61:

That the House recede from its disagreement to the amendment of the Senate numbered 61, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$76,101,000*; and the Senate agree to the same.

Amendment numbered 66:

That the House recede from its disagreement to the amendment of the Senate numbered 66, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$78,224,000*; and the Senate agree to the same.

Amendment numbered 67:

That the House recede from its disagreement to the amendment of the Senate numbered 67, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$75,501,000*; and the Senate agree to the same.

Amendment numbered 75:

That the House recede from its disagreement to the amendment of the Senate numbered 75, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$20,880,000*; and the Senate agree to the same.

Amendment numbered 88:

That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

In lieu of the section number named insert: *115.*; and the Senate agree to the same.

Amendment numbered 89:

That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

In lieu of the section number named insert: *116.*; and the Senate agree to the same.

Amendment numbered 96:

That the House recede from its disagreement to the amendment of the Senate numbered 96, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$128,882,000*; and the Senate agree to the same.

Amendment numbered 97:

That the House recede from its disagreement to the amendment of the Senate numbered 97, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$6,000,000*; and the Senate agree to the same.

Amendment numbered 98:

That the House recede from its disagreement to the amendment of the Senate numbered 98, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$58,946,000*; and the Senate agree to the same.

Amendment numbered 104:

That the House recede from its disagreement to the amendment of the Senate numbered 104, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$261,436,000*; and the Senate agree to the same.

Amendment numbered 105:

That the House recede from its disagreement to the amendment of the Senate numbered 105, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$25,332,000*; and the Senate agree to the same.

Amendment numbered 106:

That the House recede from its disagreement to the amendment of the Senate numbered 106, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$236,104,000*; and the Senate agree to the same.

Amendment numbered 124:

That the House recede from its disagreement to the amendment of the Senate numbered 124, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$26,500,000*; and the Senate agree to the same.

Amendment numbered 126:

That the House recede from its disagreement to the amendment of the Senate numbered 126, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$280,129,000*; and the Senate agree to the same.

Amendment numbered 128:

That the House recede from its disagreement to the amendment of the Senate numbered 128, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided further, That $2,000,000 of the amount provided under this heading shall be available for continuing a research and development initiative with the National Laboratories for new technologies up to proof-of-concept testing to increase significantly the energy efficiency of processes that produce steel: Provided further, That obligation of funds for these activities shall be contingent on an agreement to provide cash*

or in-kind contributions to the initiative or to other collaborative research and development activities related to the purpose of the initiative equal to 30 percent of the amount of Federal Government obligations: Provided further, That existing facilities, equipment, and supplies, or previously expended research or development funds are not acceptable as contributions for the purpose of this appropriation, except as amortized, depreciated, or expensed in normal business practice: Provided further, That the total Federal expenditure under this proviso shall be repaid up to one and one-half times from the proceeds of the commercial sale, lease, manufacture, or use of technologies developed under this proviso, at a rate of one-fourth of all net proceeds; and the Senate agree to the same.

Amendment numbered 130:

That the House recede from its disagreement to the amendment of the Senate numbered 130, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$60,301,000*; and the Senate agree to the same.

Amendment numbered 138:

That the House recede from its disagreement to the amendment of the Senate numbered 138, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$47,200,000*; and the Senate agree to the same.

Amendment numbered 139:

That the House recede from its disagreement to the amendment of the Senate numbered 139, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$14,568,000*; and the Senate agree to the same.

Amendment numbered 145:

That the House recede from its disagreement to the amendment of the Senate numbered 145, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$183,920,000*; and the Senate agree to the same.

Amendment numbered 150:

That the House recede from its disagreement to the amendment of the Senate numbered 150, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,322,000*; and the Senate agree to the same.

Amendment numbered 154:

That the House recede from its disagreement to the amendment of the Senate numbered 154, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$28,420,000*; and the Senate agree to the same.

Amendment numbered 155:

That the House recede from its disagreement to the amendment of the Senate numbered 155, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$20,000,000*; and the Senate agree to the same.

Amendment numbered 156:

That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$109,990,000*; and the Senate agree to the same.

Amendment numbered 162:

That the House recede from its disagreement to the amendment of the Senate numbered 162, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$21,250,000*; and the Senate agree to the same.

Amendment numbered 165:

That the House recede from its disagreement to the amendment of the Senate numbered 165, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$2,397,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 3, 5, 8, 10, 13, 15, 16, 18, 20, 21, 24, 25, 33, 34, 35, 40, 42, 43, 46, 52, 56, 58, 59, 60, 62, 63, 65, 68, 69, 71, 72, 74, 78, 86, 87, 90, 91, 93, 94, 95, 100, 101, 103, 109, 110, 111, 112, 114, 115, 118, 119, 120, 122, 123, 125, 127, 132, 133, 134, 136, 137, 141, 142, 143, 144, 147, 160, 163, 169, 171, 173, 174, 175, 176, 177, and 178.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5234), making appropriations for the Department of the Interior and Related Agencies for the fiscal year ending September 30, 1987, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

Management of lands and resources

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $483,610,000 instead of $380,370,000 as proposed by the House and $474,029,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The increase above the amount proposed by the House consists of increases of $200,000 for Alaska programs in mining law administration; $3,250,000 for the Alaska lands program and the Alaska automated land records system in lands and realty management; $1,000,000 for commercial forest management in Colorado, Montana, Wyoming, and Idaho; $5,000,000 for wild horse and burro management; $500,000 for noxious weed control in Idaho, Montana, Oregon, Utah, Washington, and Wyoming; $5,000,000 for grasshopper control projects in range management; $450,000 for the Challenge Grant program for fish and wildlife activities in wildlife management; $600,000 for the Hagerman Fauna Site National Natural Landmark in cultural resources management; $650,000 for Alaska maintenance, including Tangle Lakes campgrounds, and $400,000 for the San Pedro Riparian Area, both in recreation resources management; $3,990,000 for Alaska cadastral survey; and $83,000,000 for firefighting; and decreases of $500,000 in oil and gas leasing for Alaska programs; and $300,000 for plans in wildlife habitat management.

The managers expect the Bureau to report to the Appropriations Committees by May 1, 1987 on the rate of adoption of excess wild horses and burros in fiscal year 1987 in relation to planned rates.

In soil, water, and air management the managers agree the amount for hazardous waste management is $1,782,000.

The managers expect the Bureau to give proper consideration to the surveying of Alaska Native allotments in the Alaska cadastral survey program and to work with BIA in assuring that the highest Native priorities are met.

For forest management on public domain lands, the managers expect the Bureau to provide a report to the Appropriations Committees by May 1, 1987 of the components of the costs and revenues by State of providing proper management of timber lands both in the case where no "commercial" sales are offered and in the case where such sales would be offered.

The managers agree that, within funds for wildlife habitat management, $200,000 is available for increased management of the desert tortoise as described in the Senate report.

Within funds for recreation management, the managers agree that there is $188,000 for Soda Springs, $42,000 for Calico-Early Man, and $70,000 for the Barstow Way Station in the Mojave Desert.

Of the additional $500,000 provided for noxious weed control, $100,000 shall be available for Idaho.

With regard to Western Oregon management plans, the managers agree that existing management plans may be modified only to the extent that existing allowable cut in any master unit is affected by less than one million board feet, in order to provide for orderly management.

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following: *, of which $83,000,000 for firefighting and repayment to other appropriations from which funds were transferred under the authority of section 102 of the Department of the Interior and Related Agencies Appropriations Act, 1986, as contained in Public Law 99-190, and $5,000,000 for insect and disease control projects, including grasshoppers, shall remain available until expended*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language is included making funds for firefighting and grasshopper control available until expended.

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *; Provided, That regulations pertaining to mining operations on public lands conducted under the Mining Law of 1872 (30 U.S.C. 22, et seq.) and sections 302, 303, and 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1732, 1733, and 1782) shall be modified to include a requirement for the posting of reclamation bonds by operators for all operations which involve significant surface disturbance, (a) at the discretion of the authorized officer for operators who have a record of compliance with pertinent regulations concerning mining on public lands, and (b) on a mandatory basis only for operators with a history of noncompliance with the aforesaid regulations: Provided further, That surety bonds, third party surety bonds, or irrevocable letters of credit shall qualify as bond instruments: Provided further, That evidence of an equivalent bond posted with a State agency shall be accepted in lieu of a separate bond: Provided further, That the amount of such bonds shall be sufficient to cover the costs of reclamation as estimated by the Bureau of Land Management*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language is also included providing for new procedures for bonding hardrock mining operations. Bonds would be required of all operators with a record of non-compliance involving surface disturbances. Bonds would continue to be discretionary for operators with a proven record of compliance with BLM regulations and stipulations. The managers have also included a broader concept of bonding to include acceptance of equivalent State bonds, third party surety bonds or irrevocable letters of credit as recommended by the Department of the Interior bonding task force.

The managers understand that the Bureau of Land Management is establishing a task force to examine activities conducted under the Mining Law of 1872 on public lands with specific emphasis directed toward adequacy and necessity of reclamation bonding for operations involving less than five acres. The managers expect that upon completion of the task force examination, the Bureau of Land Management will inform the appropriate committees in the House and Senate of its findings, and expect a progress report no later than May 1, 1987.

Construction and access

Amendment No. 4: Appropriates $2,800,000 for construction and access as proposed by the Senate instead of $1,200,000 as proposed by the House.

Land acquisition

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $6,220,000 for land acquisition instead of $850,000 as proposed by the House and $800,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree to the following distribution, including allocation by reprogramming of $305,000 in unobligated balances from the Rogue Wild and Scenic River.

Acquisition management	$300,000
El Malpais Natural Area, NM	250,000
Gila Lower Box Area of Critical Concern, NM	250,000
King Range Conservation Area, CA	1,000,000
Owyhee National Wild River, OR	700,000
Red Rock Recreation Area, NV	3,000,000
Steens Mountain Recreation Area, OR	225,000
Upper Missouri Wild and Scenic River, MT	500,000
Inholdings, including designated wilderness areas	300,000
Total	6,525,000

Oregon and California grant lands

Amendment No. 6: Appropriates $54,524,000 instead of $54,260,000 as proposed by the House and $55,642,000 as proposed by the Senate. The $264,000 increase above the House amount is for Forestry Intensive Research (FIR) and the Coastal Oregon Productivity Enhancement program (COPE). The managers agree that the $1,100,000 unobligated balanced adjustment proposed by the House will be applied for timber development, management, and reforestation in renewable resources management. An additional $1,350,000 for mapping assistance for decadal planning for the O&C lands is included in the "Surveys, investigations, and research" account of the Geological Survey.

Range improvements

Amendment No. 7: Appropriates $9,253,000 instead of $8,506,000 as proposed by the House and $10,000,000 as proposed by the Senate.

Amendment No. 8: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

LAND ACQUISITION

Rescission

Of the funds appropriated under this head in Public Law 98-396 to carry out the provisions of Public Law 93-531, as amended, $3,200,000 are rescinded.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree to delete House language on the assignment of grazing permits, but expect the Bureau to prosecute illegal subgrazing vigorously.

The managers agree to a rescission of $3,200,000 which is no longer required for cash equalization payments related to Navajo-Hopi land exchanges.

UNITED STATES FISH AND WILDLIFE SERVICE

Resource management

Amendment No. 9: Provides $1,000,000 for the Youth Conservation Corps as proposed by the House instead of no funds as proposed by the Senate.

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $314,692,000 for resource management instead of $313,352,000 as proposed by the Senate and $306,500,000 as proposed by the House. The managers on the part of the Senate will offer a motion to recede and concur in the amendment of the House to the amendment of the Senate.

The net increase above the amount provided by the Senate includes increases of $300,000 to continue the Des Plaines wetlands study, $1,000,000 for waterfowl mortality factors, $250,000 for non-game research, $115,000 for initial operating expenses of the Northeast Anadromous Fish Research Laboratory, $150,000 for the Gainesville National Fishery Research Laboratory, $135,000 for red wolf recovery, $250,000 for endangered species listing, $260,000 for the Senecaville NFH, OH, $100,000 for fishery mitigation, $300,000 for endangered species law enforcement and $300,000 for consultation; and decreases to the Senate position of $702,000 for refuge maintenance, $340,000 for Alaska refuges operations and maintenance, $250,000 for prelisting, and $125,000 for research on Chinook and Chum Salmon on the Yukon River. There is also a decrease of $153,000 to the amount provided by the Senate for fixed costs and to replace unrealized administrative savings and a reduction of $250,000 in the amount provided the Fish and Wildlife Foundation for matching grants.

The $300,000 provided to continue the Des Plaines wetland study is with the understanding that there is no commitment to involve the Fish and Wildlife Service beyond the research stage. The additional $1,000,000 for waterfowl mortality factors includes $500,000 for research and $500,000 for waterfowl habitat production.

The managers agree to designate the Washington cooperative research unit as a combined fish and wildlife cooperative research unit and establish a unit at the University of Minnesota.

The report requested by the Senate on FTE levels at refuges expanded to include staffing levels at research units and for law enforcement. The report should be provided to the Committees by March 1, 1987.

The managers reiterate the House report language directing the Service to provide management and technical support to North Carolina and the Environmental Protection Agency in designing a comprehensive research plan for the Albemarle/Pamlico estuary.

The managers have reviewed the issuance of special use permits at the Tennessee National Wildlife Refuge. The managers direct the Service to negotiate and reoffer special use permits at the Tennessee National Wildlife Refuge to landowners on the north shore of Swamp Creek that held such permits in 1984. The reissued permits shall provide for land use activities that are consistent with the National Wildlife Refuge System Administration Act. The Service shall enforce the terms and conditions of all special use permits in an evenhanded manner. The managers have agreed to review the progress made by the Service during the fiscal year 1988 appropriations hearings.

The managers have provided a total of $4,500,000 above the budget for the Service's contaminant program. For refuge lands, the managers have recommended an increase of $2,000,000. Of this amount, the managers recommend that $1,500,000 be used to move aggressively to initiate necessary studies, to accelerate the analysis of

refuge samples, and to continue to develop and implement strategies to clean up affected refuges and initiate clean-up actions where appropriate. Further, the Service is urged to develop and implement a plan for long term contaminant monitoring of refuge habitats and wildlife. This activity should be designed to detect the presence of contaminants throughout the National Wildlife Refuge System through repetitive sampling, resulting in early detection and correction of identified problems in the future. The managers have provided $500,000 within the allowance for this activity and the funding may also be used for development sampling and analytical protocols and to train refuge employees to participate in the collection of samples. The Service is to enter into an agreement providing one-half of the funding to the Idaho National Engineering Lab (INEL) for design of the long term monitoring system, development of sampling and analytical protocols, and employee training.

In research and development, the managers recommend five initiatives totaling $2,500,000: (1) $500,000, to be used to assess the effects of new contaminants; (2) $550,000, to begin a long term study on the upper Mississippi River; (3) $450,000 for a long term study of contaminants and diving ducks on the Gulf Coast; (4) $600,000, to be spent pursuant to an agreement between the Service and INEL, for developing a scientifically sound national strategy and plan that reviews and integrates activities and responsibilities of all Federal agencies relative to contaminant monitoring in aquatic and terrestrial ecosystems including surface and groundwater, and for training the non-Federal sector in appropriate quality assurance/quality control procedures for contaminant analysis, to enable them to meet Service analytical lab needs; and (5) $400,000 for a long term study in the San Francisco Bay.

The managers direct the Secretary to enter into a long term Memorandum of Understanding (MOU) with the State of Ohio for the State to operate the Senecaville National Fish Hatchery. Such long term MOU is contingent upon the State of Ohio agreeing to rear or allow the rearing of striped bass for the Department of the Interior's Chesapeake Bay restoration program as needed by the Fish and Wildlife Service, through 1990. Any costs at Senecaville associated with the striped bass program incurred by the State of Ohio shall be reimbursed by the Service to the State. The managers have included a total of $416,000 in fiscal year 1987. Of that amount $166,000 is provided for necessary maintenance and repairs at the facility. The remainder of the funds may be used to reimburse the State of Ohio for rearing the required fish, to contract with private producers for the production of fish, for continued (through 1990) limited operations at Senecaville assciated with the striped bass program, to cover the costs of added production at other Federal hatcheries, or in any combination of the above.

The managers generally endorse the Service's statement of fishery roles and responsibilities and the current production and distribution priorities.

The $300,000 provided for Leetown National Fishery Center is for striped bass.

Amendment No. 11: Provided no limitation on the Office of Legislative Services as proposed by the Senate.

Amendment No. 12: Deletes language proposed by the Senate on the coordination of research efforts.

The managers have agreed to drop language included in the bill by the Senate directing the Southeastern Fish Culture Laboratory to coordinate its research with the Alabama Cooperative Fishery Research Unit, but affirm their support of the intent of the language.

Construction and anadromous fish

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $26,513,000 instead of $21,113,000 as proposed by the House and $23,603,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The net increase above the House includes increases of $1,500,000 for Kenai NWR, AK rehabilitation, $1,200,000 for a Bogue Chitto NWR, LA visitor center, $2,000,000 for Leetown National Fishery Center raceway and pond rehabilitation and $900,000 for a Kilauea Point, HI visitor facility; and a decrease of $200,000 for the National Fishery R&D Laboratory, PA.

Language is included to earmark $2,000,000 for Anadromous Fish grants, including $500,000 to continue striped bass studies.

The managers encourage efforts to reduce overall costs at the Minnesota Valley NWR visitor center and to raise private contributions to help reduce the cost to complete this facility.

Migratory bird conservation account

Amendment No. 14: Appropriates $7,000,000 as an advance to this account instead of $3,000,000 as proposed by the House and $10,561,000 as proposed by the Senate.

The managers encourage the use of these funds for acquiring part of the Little River Wildlife Refuge at a level of $1,100,000 if the study presently being conducted by the U.S. Fish and Wildlife Service and the Corps of Engineers proves the wildlife refuge to be compatible.

The managers also urge the Migratory Bird Conservation Commission to consider additional acquisition activity in the Chickasaw NWR, Tennessee and Arkansas, and additional land acquisition at Cache NWR, LA with willing sellers only.

Land acquisition

Amendment No. 15: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $42,425,000 instead of $33,225,000 as proposed by the House and $41,775,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House of the amendment of the Senate.

The following table shows the allocation agreed to by the managers:

Inholdings	$1,000,000
Acquisition management	1,750,000
Alligator River NWR, NC	650,000
Aransas NWR, TX	3,000,000
Ash Meadows NWR, NV	500,000
Bayou Sauvage NWR, LA (subject to authorization)	3,000,000
Bogue Chitto NWR, LA	1,000,000
Bon Secour NWR, AL	500,000
Connecticut Coastal NWR, CN	600,000
Eastern Shore NWR, VA	375,000
Finnegan Cut, CA	1,100,000
Florida Panther NWR, FL	3,000,000
Great Dismal Swamp NWR, NC	750,000
Hakalau Forest, HI	3,000,000
Kirtlands Warbler, MI	300,000
Lower Rio Grande NWR, TX	6,000,000
Lower Suwanee NWR, FL	1,500,000
Minnesota Valley NWR, MN	1,500,000
National Key Deer NWR, FL	2,000,000
Rachel Carson NWR, ME	900,000
Red Rocks Lake Refuge, MT	2,000,000
Sacramento NWR, CA	2,200,000
San Francisco Bay NWR, CA	1,500,000
Tensas River NWR, LA	1,000,000
Willapa NWR, WA	3,300,000
Total	42,425,000

Within the $1,750,000 for acquisition management the managers have provided $150,000 for the Sacramento River National Wildlife Refuge study with the understanding that the Fish and Wildlife Service will coordinate any plans for a refuge with other Federal, State, and local agencies and landowner groups along the river. The managers anticipate that taking into account multiple views will lead to an overall plan using a variety of tools and policies to achieve multiple objectives. The managers recognize that proper coordination with the State may require the Fish and Wildlife Service to take more time in the preparation of the study than set forth by the House.

The managers have not provided land acquisition funds for the Carrizo Plain NWR, CA in this bill. The Fish and Wildlife Service and the Bureau of Land Management are to continue to work together to plan for the refuge.

Administrative provisions

Amendment No. 16: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides the Fish and Wildlife Service authority to construct buildings necessary for a forensics laboratory on a site leased by the Service.

NATIONAL PARK SERVICE

Operation of the National Park System

Amendment No. 17: Provides $1,000,000 for the Youth Conservation Corps as proposed by the House instead of no funds as proposed by the Senate.

Amendment No. 18: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $649,613,000 for Operation of the National Park System instead of $628,875,000 as proposed by the House and $579,055,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Increases above the House include $470,000 for Glen Canyon NRA, $421,000 for New River Gorge NR0, WV, including $330,000 for operations and $91,000 for development of concept plans, $150,000 for Saguaro NM, AZ, $250,000 for Jean Lafitte NHP, LA, $60,000 for the National Capital Region's July 4 mall celebration, $80,000 for new exhibits and $85,000 for police support at Harpers Ferry NHP, WV, $170,000 for maritime preservation activities, $247,000 for resource evaluation of sensitive habitat at Organ Pipe NM, AZ, $53,000 for the Alaska Land Use Council, $75,000 for Congressional Affairs, $15,000,000 for enhanced park operations as related to the entrance fee proposal, $3,500,000 for additional costs

of fee collection, and $991,000 for fixed costs. There are decreases to the House position of $64,000 for Ford's Theater support, $100,000 for Ellis Island NHS, NY interpretation and visitor services, and $150,000 for Delaware Water Gap NRA, PA and $500,000 for the Volunteers-in-Parks program.

The managers are concerned about Park Service employee housing conditions. To address this concern, the Park Service should complete a housing study and make recommendations to the Committees about methods to improve housing conditions for employees. Innovative leasing and ownership arrangements should be considered.

The managers direct that the $398,000 made available for a cooperative agreement with the Johnstown Flood Museum Association shall be obligated by the National Park Service as soon after November 30, 1986 as possible, by which time the cooperative agreement, required pursuant to Section 2 of Public Law 99-388 (100 Stat. 826), shall have been executed. A match, as required in Public Law 99-388 remains in effect.

The managers agree that hereafter the Service should use its internal reprogramming authority so that there will be no diminution of the amount provided for the Roosevelt Campobello International Park Commission, unless reduced by the House or Senate in a report accompanying the appropriations bill.

The additional amount provided for park operations at Santa Monica may be used to handle land acquisition activities at the park.

The appropriation provides $790,000 for a new Park Police rookie class. The managers agree to continue the practice of staffing the law enforcement needs at Golden Gate NRA and Gateway NRA with Park Police. The Service is directed to meet seasonal fluctuations in law enforcement needs with temporary staff and to discontinue the past practice of detailing Park Police from the National Capital Region to the other units as a method of meeting seasonal workload.

The managers note that the Inspector General of the United States Department of the Interior recently concluded an investigation of allegations of mismanagement, falsification of records, and obstruction of a GAO inquiry at Gateway NRA, NY. The managers are pleased to note that the investigation disclosed no evidence to support the allegations. The managers encourage the Secretary to follow through on this finding, if appropriate.

Amendment No. 19: Provides restrictions on the Office of Legislative and Congressional Affairs as proposed by the House.

Amendment No. 20: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides $85,000 to assist the police force of Harpers Ferry, WV.

Amendment No. 21: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following: *Provided further, That to advance the mission of the National Park Service, for a period of time not to extend beyond fiscal year 1987, the Secretary of the Interior is authorized to charge park entrance fees for all units of the National Park System, except as provided herein, of an amount not to exceed $3 for a single visit permit as defined in 36 CFR 71.7(b)(2) and of an amount not to exceed $5 for a single visit permit as defined in 36 CFR 71.7(b)(1): Provided further, That the cost of a Golden Eagle Passport as defined in 36 CFR 71.5 is increased to a reasonable fee but not to exceed $25 until September 30, 1987: Provided further, That for units of the National Park System where entrance fees are charged the Secretary shall establish an annual admission permit for each individual park unit for a reasonable fee but not to exceed $15, and that purchase of such annual admission permit for a unit of the National Park System shall relieve the requirement for payment of single visit permits as defined in 36 CFR 71.7(b): Provided further, That all funds derived from National Park Service entrance fees during fiscal year 1987 and all funds collected during fiscal year 1987 under subsections (a), (b), and (c) of section 4 of the Land and Water Conservation Fund Act of 1965, as amended (16 U.S.C. 460l-6a), shall be transferred to the General Fund of the Treasury of the United States: Provided further, That notwithstanding any other provision of this Act, no admission fee may be charged at any unit of the National Park System which provides significant outdoor recreation opportunities in an urban environment and to which access is publicly available at multiple locations, nor shall an admission fee be charged at any unit of the National Park System which has a current, specific statutory exemption: Provided further, That where entrance fees are established on a per person basis, children 12 and under shall be exempt from the fees: Provided further, That if permanent statutory language is enacted during fiscal year 1987 establishing National Park System entrance fees, the provisions of that language shall supersede the fee provisions contained in this Act: Provided further, That of the funds provided under this head, $15,000,000 shall be distributed to units of the National Park System, to be available for resource protection, research, interpretation, and maintenance activities related to resource protection, to be distributed in the following manner: 50 percent shall be provided to all units of the System based on each unit's proportion of park operating expenses, and 50 percent shall be provided to units with entrance fees based on each collecting unit's proportion of total entrance fee collections: Provided further, That the following may be cited as the "Steamtown National Historic Site Act of 1986":*

SECTION 1. DESIGNATION AS NATIONAL HISTORIC SITE.

The property known as Steamtown, consisting of the land, historic roundhouse, switchyard, and associated buildings, track and equipment, and located on approximately 40 acres in Scranton, Pennsylvania, is hereby designated as the Steamtown National Historic Site (hereafter in this Act referred to as "the Site"). The Site is generally depicted on the map entitled "Steamtown National Historic Site", numbered STTO-80,000 and dated September 1986. A copy of the map shall be on file and available for inspection in the offices of the National Park Service in Washington, D.C., and in appropriate regional and local offices.

SEC. 2. MANAGEMENT OF SITE.

(a) PREPARATION OF MANAGEMENT PLAN.—The Secretary shall prepare a comprehensive management plan for the Site, which shall include all of the elements required for general management plans under section 12 of the Act entitled "An Act to improve the administration of the National Park System by the Secretary of the Interior, and to clarify the authorities applicable to the system, and for other purposes" approved August 18, 1970 (U.S.C. 1a-7), and shall be submitted to the Congress no later than September 30, 1987.

(b) ADMINISTRATION OF SITE.—(1) The Secretary shall administer the Site through cooperative agreements and grant agreements, as appropriate, with the owner or owners of the property. The Secretary may provide financial and technical assistance in planning interpretation, maintenance, preservation, and appropriate public use of the Site and associated rolling stock in order to further public understanding and appreciation of the development of steam locomotives in the region.

(2) The Secretary of the Interior may acquire the Site, and all or part of the associated rolling stock, by donation or with donated funds and may begin to take such actions as are called for in the management plan. Upon acquisition pursuant to this paragraph, the Site and any acquired associated rolling stock shall thereafter be administered by the Secretary in accordance with the provisions of law generally applicable to units of the National Park System, including the Act entitled "An Act to establish a National Park Service, and for other purposes", approved August 25, 1916 (16 U.S.C. 1 et seq.), and the Act entitled "An Act to provide for the preservation of historic American sites, buildings, objects and antiquities of national significance, and for other purposes" approved August 21, 1935 (16 U.S.C. 461 et seq.).

SEC. 3. ADVISORY COMMITTEE.

The Secretary is authorized to establish a Steamtown Advisory Committee and appoint up to ten members, who shall serve at no cost to the United States.

SEC. 4. AUTHORIZATION OF APPROPRIATIONS.

There is authorized to be appropriated $20,000,000 for the administration of the Steamtown National Historic Site and for assistance to the owner thereof pursuant to the agreements referred to in section 2(b).

SEC. 5. APPROPRIATIONS.

For expenses necessary to carry out the provisions of this Act, $8,000,000, to remain available until expended

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language is included establishing the Steamtown National Historic Site in Scranton, PA. An authorization of $20,000,000 is provided and $8,000,000 is appropriated so that necessary facility maintenance and rolling stock protection may begin immediately.

Bill language has been included providing for a one-year National Park System entrance fee to further park purposes. The provisions included in the bill will be superceded by the provisions of permanent statutory language if such language is enacted during fiscal year 1987.

The language provides for a top fee of $5.00 per vehicle and exempts children 12 and under from entrance fees where the fee is collected on a per person basis. The language amends the Senate proposal to provide that existing entrance fees, new entrance fees, user fees and the additional entrance fees shall go toward park purposes. The managers have provided a direct appropriation of $15,000,000 as the amount available for enhanced park operations due to this park fee provision. A specific list of appropriate uses for this money is included in the bill. This money shall be distributed as

follows: 50 percent to all park units based on total operating budgets and 50 percent to collecting parks based on the estimated share of entrance fee revenue collected. The managers have provided an additional $3,500,000 to cover the increased costs of fee collection. The managers encourage the Director to consider allocating the additional fee collection funding and staffing through the regional offices, in an effort to prevent park managers from having to choose between fee collection staffing and staffing for other park management activities.

To simplify the collecting, accounting, and utilization of fee receipts, the language provides that the fee receipts shall be deposited directly into the General Fund. As a result of the direct appropriation of additional funding for enhanced park operations, the Service shall have the estimated fee receipts available at the beginning of the year, while fees shall be returned to the Treasury as they are collected throughout the year.

There is considerable concern about which park units will actually have an entrance fee program during fiscal year 1987. Bill language has been included establishing an exemption for any unit which provides significant outdoor recreation opportunities in an urban environment and to which access is publicly available at multiple locations. An additional exemption has been provided for any unit which has a current, specific statutory exemption. The managers direct the Secretary to consider existing statutory fee criteria stated in the Land and Water Conservation Fund Act, as amended, when determining which park units will have new fees. Further, the Secretary is encouraged to charge fees only at units where receipts will exceed collection costs and to consider other appropriate factors, including the current charging of user fees.

The managers direct the Secretary to send a list of park units and the existing and new entrance fees proposed, and the existing user fees for all units, to the appropriate Congressional committees by December 15, 1986.

National recreation and preservation

Amendment No. 22: Appropriates $10,628,000 for National Recreation and Preservation instead of $10,904,000 as proposed by the House and $10,277,000 as proposed by the Senate.

The net decrease below the House includes reductions of $294,000 for national register programs and $17,000 for environmental compliance review and an increase of $35,000 for maritime activities to be done by the Historic American Engineering Record.

Historic preservation fund

Amendment No. 23: Appropriates $24,250,000 for the Historic Preservation Fund instead of $24,200,000 as proposed by the House and $24,300,000 as proposed by the Senate. This includes $20,000,000 for grants to the States and $4,250,000 for the National Trust for Historic Preservation.

The allowance for the Trust includes an additional $50,000 to continue maritime preservation efforts.

Construction

Amendment No. 24: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $88,095,000 instead of $75,989,000 as proposed by the House and $76,518,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have agreed to the following changes to the House bill:

Cape Hatteras NS, NC	+4,070,000
C&O Canal Flood Repair, MD	+2,000,000
Cuyahoga Valley NRA, OH	−245,000
Delaware Water Gap NRA, PA	−800,000
Denali NP, AK	+3,550,000
Eugene O'Neill NHS, CA	−724,000
Fort Union NHS, ND	+700,000
Glen Canyon NRA, UT	+30,000
Grand Canyon NP, AZ	+435,000
Guadalupe Mtns. NP, TX	−250,000
Haleakala NP, HI	+500,000
Harpers Ferry NP, WV (completion of water system)	+140,000
Jean Lafitte NHP, LA	+1,080,000
Katmai NPP, AK	+320,000
New River Gorge NR, WV	+2,600,000
Sitka NHP, AK	+700,000
Springfield Armory NHS, MA	−1,000,000
Yellowstone NP, WY	−1,000,000

Within the amount provided for planning, the managers agree to the following projects:

Canyonlands NP, UT—visitor facility	$495,000
Knife River NHS, ND—visitor facility	435,000
Harpers Ferry NHP, WV—bldg. rehabilitation	80,000
Glen Canyon NRA, UT—State line project	400,000
Little Kinnakeet Lifesaving Station, Cape Hatteras NS, NC	55,000
Guadalupe Mtns. NP, TX—visitor facility	250,000
Wolf Trap Farm Park, VA—traffic study and improvements	100,000
Glen Echo Park, MD—rehabilitation	50,000
Johnstown Flood NM, PA	150,000

In addition there is $2,000,000 within available funds for the Buffalo NR, AR, Tyler Bend Facility.

Of the funds provided for Denali NP, AK, the Service is to provide $620,000 for rehabilitation at the Wonder Lake campground, $349,000 for the Polychrome Pass comfort station, and the remainder of $2,581,000 to initiate construction of a visitor facility.

The managers understand that future construction needs at the Glen Canyon NRA (State line project) will be met by the concessioner, without establishing a possessory interest.

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided further, That for payments of obligations incurred for improvements to the George Washington Memorial Parkway, $2,500,000 to be derived from the Highway Trust Fund and to remain available until expended to liquidate contract authority provided under section 104(a)(8) of Public Law 95-599, as amended, subject to the availability of funds for an additional lane on the Theodore Roosevelt Bridge: Provided further, That funds appropriated under this head to carry out the provisions of sections 303 and 304 of Public Law 95-290 shall also be available to carry out the provisions of section 302*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have agreed to the inclusion of $2,500,000 to be derived from the Highway Trust Fund for the construction of an additional inbound lane on the George Washington Memorial Parkway as proposed by the House.

The addition of section 302 provides additional authority to the Secretary relating to the implementation of the Lowell Park Preservation Plan.

Land acquisition and State assistance

Amendment No. 26: Appropriates $87,220,000 instead of $101,100,000 as proposed by the House and $73,400,000 as proposed by the Senate. The following table shows the allocation agreed to by the managers:

Assistance to States:	
Matching grants	$32,700,000
Administrative expenses	2,270,000
Total, Assistance to States	34,970,000
National Park Service:	
Acquisition management	5,000,000
Hardships, inholdings and emergencies	5,000,000
Acadia NP, ME	3,500,000
Apostle Islands NL, WI	300,000
Appalachian Trail	7,000,000
Big Cypress NP, FL	2,000,000
Big Thicket NP, TX	4,000,000
Cuyahoga Valley NRA, OH	4,500,000
Delaware Water Gap NRA, PA	2,000,000
Gates of the Arctic NP, AK (Walker Property)	175,000
Golden Gate NRA, CA	2,000,000
Haleakala NP, HI	1,000,000
Indiana Dunes NL, IN	1,000,000
Lake Clark NPP, AK (including $175,000 for Twin Lakes)	1,675,000
Lowell NHP, MA	800,000
Mound City Group, OH	1,000,000
New River Gorge NR, WV	1,000,000
North Cascades NP, WA	500,000
Olympic NP, WA	2,000,000
San Antonio Mission NHP, TX	500,000
Santa Monica Mountains NRA, CA	6,000,000
Sequoia-Kings Canyon NP, CA	1,100,000
Wind Cave NP, SD	200,000
Subtotal, NPS	52,250,000
Total, National Park Service	87,220,000

The highest priority for Santa Monica Mountains NRA, CA acquisition is hardship cases. The funds provided are not to be used to reimburse California for land purchases.

Amendment No. 27: Provides $2,270,000 for state grant administration as proposed by the House instead of $2,300,000 as proposed by the Senate.

Amendment No. 28: Deletes language proposed by the House providing funds for Apostle Islands National Lakeshore subject to authorization.

Amendment No. 29: Appropriates $250,000 for the Illinois and Michigan Canal National Heritage Corridor Commission as proposed by the House instead of nothing as proposed by the Senate. The managers will carefully review funding for the Commission in fiscal year 1988.

Amendment No. 30: Appropriates $75,000 for the Jefferson National Expansion Memorial Commission as proposed by the House instead of nothing as proposed by the Senate. The managers will carefully review funding for the Commission in fiscal year 1988.

Administrative provisions

Amendment No. 31: Allows the transfer of no-year funds to cover emergencies as proposed by the House instead of allowing the transfer of annual funds only as proposed by the Senate.

Amendment No. 32: Restores language stricken by the Senate allowing the use of any funds available to the Park Service to maintain law and order and for other emergency situations.

The managers have agreed to continue bill language which allows the Park Service to transfer no-year funds to cover costs of emergency search and rescues, law and order emergencies and unforeseen law enforcement situations. The managers are concerned about abuses of this authority as reported by GAO and request monthly reports on its use. Bill language has been included under Amendment No. 34 to make any transfers subject to Committee reprogramming guidelines.

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *consistent with the process employed in the Amerecord, Inc. test case which was settled on August 20, 1983, and other applicable legal principles to determine whether any or all of such claimants ought to be awarded equitable compensation by the Congress, and, if so, in what amount*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment modifies language proposed by the House and stricken by the Senate and retains language added by the Senate regarding settlement of certain claims of the licensees of the American Revolution Bicentennial Administration to state that the process used in settling the test case should be applied to the remaining cases.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: : *Provided further, That any funds available to the National Park Service may be used, with the approval of the House and Senate Committees on Appropriations in compliance with the reprogramming procedures contained in House Report 97-942, to maintain law and order in emergency and other unforeseen law enforcement situations and conduct emergency search and rescue operations in the National Park System*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree to strike House language prohibiting issuance of a request for proposals to lease any or all of Glen Echo Park. The Park Service is encouraged to continue to work out a mutually satisfactory arrangement with the newly formed Glen Echo Park Foundation. The Foundation is willing to raise private funds for the rehabilitation of existing Glen Echo Park facilities in order to maintain the current character of the park. The managers have provided $50,000 in planning funds to help start the process.

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that funds received by the National Park Service as reimbursement for the cost of providing security, law enforcement, interpretive, and other services with respect to the operation of facilities at the Jefferson National Expansion Memorial National Historic Site shall be credited to the appropriation bearing the cost of providing such services.

GEOLOGICAL SURVEY

Surveys, investigations, and research

Amendment No. 36: Appropriates $418,665,000 for surveys, investigations and research instead of $423,220,000 as proposed by the House and $402,933,000 as proposed by the Senate. The decrease below the amount proposed by the House consists of increases of $1,500,000 for continuation of Louisiana coastal erosion studies; $700,000 for administration of water resources research institutes; $370,000 for national water resources research and technical development competitive grant programs; and $524,000 for grants to water resources research institutes on a per capita basis; and decreases of $249,000 for cartographic and geologic information; $500,000 for equipment for Parkfield, CA, in earthquake hazards reduction; $900,000 in landslide hazards reduction; $1,000,000 in energy geologic surveys for coal investigations; $2,000,000 in National water data collection and analysis; and $3,000,000 for the National water quality assessment.

The managers agree that grant funds made available to State water resources research institutes which are not matched by States on the statutory basis of one and a half State dollars for each Federal dollar shall be available for the competitive grant programs.

Amendment No. 37: Provides $52,835,000 for cooperative water resource investigations as proposed by the House instead of $50,195,000 as proposed by the Senate.

MINERALS MANAGEMENT SERVICE

Leasing and royalty management

Amendment No. 38: Appropriates $160,697,000 instead of $162,893,000 as proposed by the House and $155,187,000 as proposed by the Senate.

In outer continental shelf lands, the difference over the amount proposed by the Senate is a result of increases of $1,087,000 in leasing and environmental programs and $1,000,000 in regulatory program. These increases are offset by a reduction of $436,000 in resource evaluation which includes a restoration of a general reduction of $764,000 which is offset by a reduction of $1,200,000 for geological and geophysical data acquisition.

In mineral revenue collections the difference over the amount proposed by the Senate is a reduction of $105,000 for two attorneys with the Solicitor's Office which is offset by an increase of $523,000 which the Senate had proposed as a general reduction. The managers agree that costs associated with the Solicitor's Office should be in the Solicitor's budget. No funds have been included in mineral revenue collections for late interest payments as proposed by the Senate. In mineral revenue compliance the difference over the amount proposed by the Senate is an increase of $2,500,000 for 50 additional auditors and support staff as well as an increase of $369,000 which the Senate had proposed as a general reduction. The managers agree that MMS is to report quarterly to the Committees on the number of FTE's involved in conducting audits, the cost of this effort and any return realized as well as a projection of the assignment of the auditors for the balance of the fiscal year. Bill language is included which specifies that not less than $11,059,000 shall be spent for the mineral revenue compliance audit program.

In general administration the difference over the amount proposed by the Senate is an increase of $624,000 in general support services which is offset by a reduction of $52,000 for office consolidation since shuttle service will not be needed for the entire fiscal year.

The managers agree that the Department is to report back to the Committees by December 31, 1986, on how best to structure cooperative agreements with States for the auditing of revenues from section 9(g) Outer Continential Shelf lands. In addition, the Department must implement, by no later than the end of the fiscal year, an accurate and regular reporting system for payments from the 8(g) settlement in accordance with 30 U.S.C. 1715(a). In every month prior to the implementation of that reporting system, the Department is directed to provide the States with information description of payment, the period covered, the payor and source of payment, including amount, quality and unit value of production by lease and royalty rates as well as unit resources, and the basis for valuation to the extent that information is available.

The managers are concerned that adjustments are being made in the Auditing and Financial System with no restrictions. These adjustments create an increased workload on a monthly basis and a disruption of audit trails. As a result, the government cannot be assured that there is an accurate accounting of the royalties due. Therefore, the Secretary is to request that a study be conducted by the Royalty Management Advisory Committee on the current adjustment procedures with an emphasis on developing ways to simplify this process while maximizing revenues. This study is to be submitted with the fiscal year 1988 budget request for the Minerals Management Services.

The managers agree that product value guidelines need to be deatermined expeditiously so that auditors will have sound criteria within which to work. Therefore, proposed product value guidelines for coal and oil are to be published in the Federal Register within 90 days of enactment and gas guidelines within 120 days of enactment of this Act.

The Minerals Management Service is to continue to notify the Commitees by quarterly reports on progress in meeting its system integration plan for the new royalty management computer system as well as the status of the operation of the system, including any anticipated enhancements and their cost once the reimplementation of the Auditing and Financial System is completed and placed in operation. Any difficulties in reaching these deadlines are to be included in the quarterly report along with the reasons for not achieving them.

Amendment No. 39: Provides $44,904,000 for royalty management instead of

$45,354,000 as proposed by the House and $41,617,000 as proposed by the Senate.

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided further, That not less than $11,059,000 is to be used for the mineral revenue compliance audit program*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate. The amendment earmarks funds for the auditing program and deletes House language on deduction of costs of collection of mineral leasing receipts.

Amendment No. 41: Deletes language proposed by the Senate regarding payments for geological and geophysical data.

BUREAU OF MINES

Mines and minerals

Amendment No. 42: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $138,162,000 instead of $126,429,000 as proposed by the House and $130,965,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

In health and safety technology the difference over the amount proposed by the Senate is a result of increases of $1,000,000 for robotics; $250,000 for fires and explosions; $250,000 for post disaster research; $2,500,000 for respirable dust research to be conducted by Pennsylvania State University, West Virginia University, the University of Minnesota and the Massachusetts Institute of Technology; $1,000,000 for ground control to continue mountain bump research on in-mine evaluation of geological conditions; and $800,000 for methane research. These increases are offset by a decrease of $500,000 for rock burst research.

In advanced mining technology the difference over the amount proposed by the Senate is a result of an increase of $1,500,000 for proof-of-concept validation to complete surface and underground evaluations of previously developed prototype mining equipment. This increase is offset by decreases of $500,000 for predictive research and $500,000 for the in-situ copper mining demonstration at Casa Grande, Arizona. In resource conservation technology the difference from the amount proposed by the Senate is due to increases of $500,000 for acid mine drainage research; $500,000 for subsidence research; $1,900,000 for the transfer of title IV research from the Office of Surface Mining to the Bureau of Mines; and an offsetting decrease of $500,000 for water contamination research. In transferring the title IV research from the Office of Surface Mining, the managers expect that the Bureau will focus on research which can be completed in a short timeframe. If the research originally conducted by the Office of Surface Mining cannot be conducted by the Bureau in-house, it should be competitively bid. The Bureau is to coordinate its activities with the Office of Surface Mining and other Federal agencies to assure a coordinated approach to maximize the benefit derived from these expenditures and avoid duplication. Specifically, the Bureau is to consult with the OSM Assistant Directors for Field Operations to assure the research conducted meets the needs of those in the field.

In minerals and materials the difference over the amount proposed by the Senate is a result of increases of $750,000 to restore research in this area; $100,000 to continue research initiated in fiscal year 1986 on a flame reactor which will recover strategic materials from a wide variety of sources; and an offsetting decrease of $1,000,000 for research to be conducted at the Idaho National Engineering Laboratory.

In mineral institutes the difference over the amount proposed by the Senate is due to increases of $550,000 for allotment grants and $333,000 for the administration of the program. These increases are offset by a decrease of $3,271,000 for research grants. In respect to the competitive research program, it is the managers' expectation that there will be open competition among the mineral institutes for these funds within the generic areas of research with the focus being on the highest priority research problems.

In general administration there is an increase of $1,535,000 over the amount proposed by the Senate.

With the increases provided, the Bureau is directed to hold their FTE level at the fiscal year 1986 post-sequestration level.

The managers understand that the Bureau of Mines has a carryover balance from fiscal year 1986 of approximately $4,000,000 which will serve to complete many of the Bureau's research projects. The managers direct the Bureau to use up to $500,000 for not less than seven months of full operation to continue to fruition the controlled burnout program in Albright, West Virginia.

In addition, the managers agree that within available funds the Bureau is to conduct a study on the status of the chromium industry including an analysis of the chromite extracting and ferrochromium processing technologies in commercial use in the United States in relation to the technologies used by United States competitors.

Amendment No. 43: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which provides $83,130,000 to remain available until expended instead of $77,505,000 as proposed by the House and $74,680,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Administrative provisions

Amendment No. 44: Deletes language proposed by the Senate allowing the sale of excess property or land.

Amendment No. 45: Deletes language proposed by the Senate allowing the proceeds of land sales to be used to purchase other land or property.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

Regulation and technology

Amendment No. 46: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $100,003,000 instead of $99,078,000 as proposed by the House and $96,130,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The difference over the amount proposed by the Senate includes an increase of $3,000,000 in State regulatory program operations. These additional funds have been provided to allow States to administer the inspectable units program. States are to establish an inventory of all sites subject to the Act since 1977, determine a priority system for their inspection, take photographs of site conditions and take enforcement action where necessary. The State files are to be open to OSM inspection at any time.

In regulatory program operations the difference over the amount proposed by the Senate includes an increase of $843,000 for 10 additional two-acre and bond forfeiture inspectors and the use of a helicopter; $700,000 for 10 troubleshooters to be divided equally between the Eastern and Western technical centers with one specifically assigned to Ohio; and $100,000 for 2 additional inspectors for the inspection of both production and non-production sites.

In technical services, training and research the difference from the level of funding proposed by the Senate is a result of a reduction of $500,000 for training.

In general administration the difference from the amount proposed by the Senate consists of reductions of $70,000 for executive direction and $200,000 for general services for decentralization costs.

Abandoned mine reclamation fund

Amendment No. 47: Appropriates $203,720,000 instead of $232,720,000 as proposed by the House and $187,020,000 as proposed by the Senate.

In State reclamation program grants the difference from the amount proposed by the Senate is a result of an increase of $10,000,000.

In reclamation program operations the difference from the amount proposed by the Senate is a reduction of $1,900,000 for title IV research which is being funded in the Bureau of Mines.

In the rural lands reclamation program there is an increase of $8,600,000 over the amount proposed by the Senate.

The managers continue to be concerned about the high unobligated balances from prior year State reclamation grants. OSM is to keep updated obligation records for each State and report quarterly to the Committees on the progress made by the States in obligating prior year unobligated balances as well as the issuance of any administrative and construction grants to the States.

The managers are concerned about the problems with the State of Ohio's surface mining regulatory program. Periodic evaluations by the Office of Surface Mining have highlighted a number of recurring problems in Ohio's implementation and enforcement of the Federal Surface Mining Control and Reclamation Act. The Office of Surface Mining is directed to work with the Ohio Division of Reclamation to address these problems through a public forum. This directive should not be construed as a precursor to Federal takeover of the Ohio program. OSM and the State should work together to develop an explicit plan of action to correct the enforcement deficiencies. The managers strongly support the concept of State primacy and it is their hope that problems will be resolved that will maintain Ohio State primacy.

Bill language has been added under General Provisions, Department of the Interior, which amends the Surface Mining Control and Reclamation Act of 1977 to allow quali-

fied registered professional land surveyors to prepare and certify maps and plans where they are so authorized.

Amendment No. 48: Restores language proposed by the House and stricken by the Senate requiring State participation in a nationwide Applicant Violator System (AVS).

The Office of Surface Mining is presently studying a range of options with respect to the design of the Applicant Violator System (AVS). Definitions under examination for "ownership" and "control" vary from ten percent to fifty percent. At this time the managers take no position with respect to the final design of the AVS but have included bill language to permit the Office of Surface Mining to delay the pending rulemaking until March 31, 1987. This three month extention will permit the Committees on Appropriations to review this matter during the fiscal year 1988 hearings.

Amendment No. 49: Restores and clarifies language proposed by the House and stricken by the Senate.

Bill language has been included allowing the Secretary to deny up to 50 percent of a State reclamation grant, in accordance with the procedures set forth in section 521(b) of the Act, when the Secretary determines a State is inadequately enforcing its State program.

Amendment No. 50: Deletes language proposed by the House regarding the cost sharing matching fund.

The managers are concerned over internal discussions involving an AML cost sharing initiative and understands the Department will take no action in fiscal year 1987. Additionally, the managers expect the Office of Surface Mining to discuss any future initiatives affecting the AML State Grant Program with the appropriate legislative and Appropriations Committees.

Amendment No. 51: Deletes language proposed by the House regarding apportionment of the Secretary's discretionary fund.

BUREAU OF INDIAN AFFAIRS

Operation of Indian programs

Amendment No. 52: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment insert the following: *$911,182,000, of which $25,000,000 for firefighting and repayment to other appropriations from which funds were transferred under the authority of section 102 of the Department of the Interior and Related Agencies Appropriations Act, 1986, as contained in Public Law 99-190 shall remain available until expended, and*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Appropriates $911,182,000 for the operation of Indian programs instead of $892,328,000 as proposed by the House and $887,708,000 as proposed by the Senate. The net increase over the amount proposed by the Senate consists of increases of $1,200,000 for the Indian school equalization formula, $1,428,000 for the institutionalized handicapped program, $200,000 for declining enrollment adjustments, $1,000,000 for education contract support, $750,000 for Johnson-O'Malley educational assistance, $250,000 for special higher education grants, $750,000 for tribally-controlled community colleges, $2,000,000 for residential care for handicapped children, $200,000 for the Winnebago tribe retrocession costs, $550,000 for retrocession costs of the Colville tribe, $556,000 for self-determination grants and training and technical assistance for Alaska, $4,182,000 for contract support, $208,000 for the Inchelium ferry, $750,000 for reforestation, $9,000,000 for water resources, $980,000 for the United States-Canada Pacific Salmon Treaty, $120,000 for grizzly bear surveys, $166,000 for the Klamath conservation program, $347,000 for fish hatchery operations, $200,000 for fire suppression equipment, $5,000,000 for fire suppression costs, $800,000 for mineral inventories, $800,000 for litigation support, and $200,000 for program management; and decreases of $18,000 for school operations, $50,000 for central office operations for tribal government services, $100,000 for the social services quality control program, $85,000 for the special investigative unit, $100,000 for tribal accounting services, $50,000 for wildlife and parks central office operations, $7,500,000 for water resources under Indian rights protection, $160,000 for the consolidated training program, and $100,000 for ADP services.

The managers direct that $900,000 of the funds received from the Department of Education for education of handicapped children be directed toward the institutionalized handicapped program. The Bureau is requested to seek outside evaluation of their educational program for exceptional children. A Bureau-wide policy for determining which handicapped children are supported by the Bureau and which by the public schools shall be developed and provided to the Committees on Appropriations. The Bureau shall also ensure that all schools use the same criteria in classifying the exceptional children.

Of the amounts provided for the Indian Child Welfare Act (ICWA), $1,200,000 shall be used to provide fourth quarter funding to extend through the fiscal year those grants approved late in fiscal year 1986. The remainder of the funds are available for the regular competitive grant program. For fiscal year 1988 it is the intent of the managers to put the entire program back on the full fiscal year schedule. As in the past, the managers intend the ICWA grants to be made available for the highest priority projects, whether or or off reservation. Alaskan tribes and organizations are eligible to apply for ICWA grants and small tribe core management grants on the same basis as every other tribe. General assistance grants have been reduced $3,000,000 below the budget estimate. Should there be a shortfall, the Bureau should notify the Committees on Appropriations in a timely manner.

The $818,000 reduction in contrast support is the amount requested for pre-1985 contracts. The Bureau is directed to correct any errors and omissions in these contracts from within the amounts that were transferred to the programs in fiscal year 1985. The managers expect the Bureau to improve contract management and contract support payments by ensuring that fringe benefits are controlled and that direct program costs are not charged to indirect costs. Contract support should not be "grandfathered" on an individual contract basis and only additional costs which can be shown to be a direct result of contracting should be allowed.

The managers note that as part of the effort to control contrast support costs, the Bureau has decided that only one-third of the support costs for pre-1985 contracts will be released at the beginning of fiscal year 1987. In order to provide for a transition period in the payment rates for contract support, the released funds should be budgeted for only one-third of the fiscal year. If current regulations are amended, changes in contract support payments should be phased in over the remainder of the fiscal year with full implementation delayed until the beginning of fiscal year 1988. If the regulations are not amended, the Bureau should release the full year's funding as early in the year as possible.

The managers agree that no Bureau funds shall be used to meet the matching requirement for the economic development grant program. The allowance for employment development includes $1,633,000 for the United Tribes Educational Technical Center.

Within the amount provided for wildlife and parks, $80,000 is available for the Creston, MT fisheries program. A total of $433,000 is provided for operation of the Inchelium ferry, $225,000 of which is derived by transfer from road maintenance.

The allowance for the United States-Canada Pacific Salmon Treaty is the total amount available for all direct and indirect costs of the program. The managers agree that funds provided for water investigations are available for tribal contracting and that within the allowance for water investigations are funds to continue the work at Flathead ($390,000), Zuni, and Yakima ($545,000). The manages intend that the funds provided for minerals investigations not be limited solely to efforts oriented toward precious metals exploration or to programs with expected immediate financial returns. Mining and minerals funds shall be available for tribal contracting.

The managers agree that attorney fees for the Navajo and Hopi tribes shall be reviewed on the same basis as all other requests and that such costs shall not be subject to any arbitrary ceiling.

Within the allowance for facilities management, an additional $189,000 is provided for the Hopi High School. The Bureau shall begin implementation of the program recommended by the Office of Construction Management to provide operation and maintenance funding to schools based on enrollment. The Department should continue to monitor the facilities program and report quarterly to the Committees on Appropriations. The Department and the Bureau are reminded that the Committees will decide when the facilities program is ready to be returned to Bureau control from the Office of Construction Management, based on consideration of the progress or accomplishment of the following:

significant improvement in the rate of FI&R obligations and procurements, indicating improved management capabilities and procedures;

acceleration of the reduction of total plant size;

completion of the comprehensive education plan, to be submitted to and approved by the Appropriations Committees;

a final plan for reorganization of facilities management, approved by the Appropriations Committees and under active implementation; and

a plan for an O&M allocation formula based on BIA student space planning requirements, approved by the Committees and implemented.

The additional reduction below the Senate allowance for the consolidated management training program represents the amount requested for salary costs for Bureau participants in the Departmental manager development program. The manag-

ers agree that $113,000 shall be used to train contracting officers and that the program should be managed by the Central office.

The managers have deferred action on requests to establish additional offices in Lafayette, LA and San Juan, NM. The Bureau is requested to submit to the Committees on Appropriations a detailed report of the costs of operating agency and field offices along with recommendations for consolidating existing operations and/or adding additional offices.

Amendment No. 53: Provides $55,668,000 for scholarships and Johnson-O'Malley educational assistance instead of $56,418,000 as proposed by the House and $54,918,000 as proposed by the Senate.

Amendment No. 54: Deletes earmarking of firefighting funds as proposed by the Senate.

Amendment No. 55: Provides $2,431,000 for the Navajo and Hopi program as proposed by the Senate instead of $2,931,000 as proposed by the House.

Amendment No. 56: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment insert the following: *: Provided further, That notwithstanding any provision of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act, the amounts appropriated for fiscal year 1987 for the Bureau of Indian Affairs for the Institute of American Indian Arts shall be available for use under part A of that Act and—*

(1) that Act shall be implemented in a reasonable period of time and shall be fully implemented by no later than October 1, 1987,

(2) until the earlier of—

(A) October 1, 1987, or

(B) the appointment and confirmation of a majority of the members of the Board of Trustees of the Institute of American Indian and Alaska Native Culture and Arts Development under section 1505(a)(1)(A) of that Act,

the Secretary of the Interior shall have the authority conferred upon such members under that Act, and

(3) until the earlier of—

(A) October 1, 1987, or

(B) the appointment of a President of such Institute under section 1508 of that Act, the Secretary of the Interior shall have the authority conferred upon the President of such Institute under this Act.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language has been included to allow the use of funds provided for the Institute of American Indian Arts to be used to implement Part A of the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act. The language also gives the Secretary continued authority to operate the Institute until the governing body of the Institute is appointed.

Amendment No. 57: Deletes langauge proposed by the House regarding relocation of the Northern California agency office.

Amendment No. 58: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which prohibits payments which might otherwise be made pursuant to section 1128(b) of Public Law 95-561.

The managers have included bill language placing a one year moratorium on any payments that would otherwise be required under section 1128(b) of Public Law 95-561. The Bureau shall provide a report on this matter as outlined in the Senate report.

Amendment No. 59: Reported in technical disagreement. The managers of the part of the House will offer a motion to recede and concur in the amendment of the Senate which continues through fiscal year 1987 the formula used in fiscal year 1986 to distribute Johnson-O'Malley funds.

Bill language is included maintaining the current formula for payments under the Johnson-O'Malley Educational Assistance Act (JOM). If the JOM formula is to be changed, the managers direct that votes occur on a regular schedule and that provisions be made to phase in new formulas. The managers agree to review this matter for fiscal year 1988.

Amendment No. 60: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that certain requirements be met prior to initiation of action to close the Phoenix Indian School.

Construction

Amendment No. 61: Appropriates $76,101,000 for construction instead of $86,066,000 as proposed by the House and $67,951,000 as proposed by the Senate. The net increase over the amount proposed by the Senate consists of increases of $4,150,000 for facility improvement and repair and $5,000,000 for the Navajo Indian Irrigation Project; and a decreased of $1,000,000 for the Flathead irrigation project. No additional funds are provided for the Ft. Belknap irrigation project pending further review.

The managers agree that of the unobligated balances from irrigation funds made available in Public Law 98-8, $900,000 shall be reprogrammed to complete the Fort McDowell rehabilitation project and $390,000 shall be reprogrammed for the Papago, AZ high school. Together with the amount reprogrammed, unobligated balances from the Papago project may be used to construct six units of quarters and to improve the playing fields to the extent funds are available.

Within the allowance for buildings and utilities, $90,000 shall be available for planning the Taholah, WA high school. As the work at the Marty school is not of the highest priority, no additional funds are provided. The managers agree that there is no requirement for new construction at the Oglala Sioux school as the needs of the facility can be met through the facility improvement and repair program. Improvements to the Santa Rosa dormitory which are required to make space available for students from the Papago high school shall be made within available funds for facility improvement and repair. The Bureau shall review the need for emergency repairs at the Standing Rock, ND high school and make any required life/safety repairs.

The managers agree that the Bureau should ensure that tribal personnel costs are brought in line with the amount of funds available for housing construction and repairs. Of available prior year balances, $1,500,000 shall be reprogrammed to meet the Bureau's share of the Alaska 500 housing settlement. No fiscal year 1987 funds are made available for this purpose.

Amendment No. 62: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided, That $1,225,000 of the funds appropriated for use by the Secretary to construct homes and related facilities for the Navajo and Hopi Indian Relocation Commission in lieu of construction by the Commission under section 15(d)(3) of the Act of December 22, 1974 (88 Stat. 1719: 25 U.S.C. 640d-14(d)(3)), may be used for counseling, water production and administration related to the relocation of Navajo families.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language has been included by the managers which revises language in the fiscal year 1986 continuing resolution to permit funds for Navajo and Hopi relocations to be used for counseling ($500,000); water production ($600,000); and administration ($125,000).

Under existing law, the Commission is authorized to call upon any department or agency of the United States to assist in implementing the relocation plan. The managers have approved the involvement of the Bureau of Indian Affairs and the Indian Health Service. Although the managers are aware of and have not changed 25 USC 640d-11(i), authority has been given to the Bureau of Indian Affairs to utilize their funds to provide social service counseling and water production. The determination of eligibility for relocation benefits and the execution of contracts for relocation still remain the responsibility of the Commission. In addition, the Commission will continue with other aspects of new land development such as range improvements and electricity. The managers will hold each party accountable for their respective tasks and will expect each to report on the progress of their actions during their testimony on their fiscal year 1988 budget requests before the Committees. In addition, the managers expect quarterly reports on the meetings held between the Commission, Bureau of Indian Affairs and Indian Health Service which are to include the timelines in which they expect to achieve their objectives.

Road construction

Amendment No. 63: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

Of the funds otherwise available to the State of Oklahoma from the Federal Highway Trust Fund, $10,000,000 shall be available for construction of the Honobia Indian Road: Provided, That the matching requirement is hereby waived with respect to funds spent on the Honobia Road: Provided further, That not

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Appropriates no funds for road construction instead of $2,500,000 as proposed by the House. Bill language has been included to earmark $10,000,000 of Federal Highway Trust Funds available to the State of Oklahoma for the construction of the Honobia Indian Road, and waiving the requirement for a 25% match with local funds.

White Earth trust fund

Amendment No. 64: Appropriates $6,600,000 for the White Earth Trust Fund, as proposed by the Senate.

Indian loan guaranty and insurance fund

Amendment No. 65: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $2,452,000 instead of $2,652,000 as proposed by the House and $2,485,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amount reflects an increase of $167,000 over the budget level of $2,485,000, to allow an additional amount of $10,000,000 in loans to be guaranteed; and an offsetting decrease of $200,000 for management and technical assistance, leaving a balance of $500,000. The managers do not intend for any additional funds to be obligated for contracts for model business development centers.

TERRITORIAL AND INTERNATIONAL AFFAIRS

Administration of territories

Amendment No. 66: Appropriates $78,224,000 instead of $78,874,000 as proposed by the House and $76,016,000 as proposed by the Senate. Included is $75,501,000 for grants and technical assistance and $2,723,000 for the Office of Territorial and International Affairs. The net decrease below the House consists of a decrease of $900,000 for the Guam mental health facility, and an increase of $250,000 for four FTE's in the Office of Territorial and International Affairs, for supervision of Compact programs in the Freely Associated States, one each in Palau, the Marshall Islands, the Federated States of Micronesia, and in Washington. The managers intend to add four additional FTE's in the future, for a total of eight. The $2,000,000 provided for construction of the Guam mental health facility is the total of Federal funding that will be provided.

Amendment No. 67: Provides $75,501,000 to remain available until expended instead of $76,401,000 as proposed by the House and $73,543,000 as proposed by the Senate.

Amendment No. 68: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *and (3) an additional $250,000 for salaries and expenses of the Office of Territorial and International Affairs: Provided further, That Northern Mariana Islands Covenant grant funding shall be provided according to those terms of the Agreement of the Special Representatives on Future United States Financial Assistance for the Northern Mariana Islands approved by Public Law 99-396, except that should the Secretary of the Interior believe that the performance standards of such agreement are not being met, operations funds may be withheld, but only by Act of Congress as required by Public Law 99-396*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language is included which amends the language proposed by the Senate, to clarify that covenant grant funding to the Northern Mariana Islands shall be subject to the terms of the Agreement of the Special Representatives of Future United States Financial Assistance, but only as approved by and provided in Public Law 99-396.

Trust Territory of the Pacific Islands

Amendment No. 69: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $67,387,000 instead of $14,340,000 as proposed by the House and $66,987,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The net decrease from the amount proposed by the Senate consists of increases of $900,000 for the Enewetak support program, $500,000 for the Bikini food program, and $1,000,000 for the Bikini Atoll Rehabilitation Committee program; and a decrease of $2,000,000 for construction of the Palau hospital. The managers agree that Palau should complete plans and initiate construction of the hospital with the funds provided in fiscal year 1986, and that the balance of the $10,000,000 total cost will be provided in a future appropriations act.

The managers have agreed to provide the regular grant funding to the Trust Territory governments, until the Compacts of Free Association become effective.

The managers direct the Department of the Interior and the Department of Energy to develop a plan for providing Federal funding for the necessary continuing activities related to the activities of the Lawrence Livermore Laboratory and the Bikini Atoll Rehabilitation Committee on Atoll after fiscal year 1987, in order that those activities may be completed as required, in order that those activities may be completed as required, and a final report and recommendation as to the preferred method for rehabilitation of the atoll be provided to the Congress. A report on the DOI-DOE plan for funding and completing these activities shall be submitted to the Committees on Appropriations by February 1, 1987. In addition, the Departments of Energy and the Interior are directed to provide the Committees with a report by December 1 of each year detailing how funds were spent during the previous fiscal year for the radiological health care program, and the agricultural and food programs for Enewetak and Bikini, as referenced in section 103(h) of Public Law 99-239. The report shall also specify the anticipated needs during the current fiscal year and the following fiscal year in order to provide for the radiological health care, and the planting, agricultural maintenance, and food programs for Enewetak and Bikini at a level not less than that which existed prior to the implementation of Public Law 99-239, and as anticipated in section 103(h) of Public Law 99-239. The managers believe that the United States has a moral obligation to fund these programs and intend to do so in the absence of compelling considerations to the contrary.

Amendment No. 70. Restores language proposed by the House and stricken by the Senate allowing funds from the Bikini Trust Fund to be used for settlement outside of the Marshall Islands. The managers expect the expenditure of any funds from the Trust Fund to continue to be subject to the same controls as now exist. The managers also intend that the costs of future relocations outside the Marshall Islands, or back to the Marshall Islands, chosen by the Bikinians will be paid from funds available in the Trust Fund.

Compact of free association

Amendment No. 71: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *no additional funds are provided, and*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 72: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *for the Enjebi Community Trust Fund, as authorized by Public Law 99-239, $2,250,000: Provided, That notwithstanding any other provision of law, the funds made available under this head in Public Law 99-349 shall remain available for obligation until expended: Provided further, That notwithstanding any other provision of law, for purposes of economic assistance as provided pursuant to the Compacts of Free association, the effective date of the Compact shall be October 1, 1986, except that the effective date for commencing the Kwajalein use and impact payments pursuant to sections 211(a)(1) and (213(a) of Public Law 99-239 shall be October 1, 1985: Provided further, That the $60,719,000 made available in fiscal year 1986 for the Compacts pursuant to Public Law 99-349 from the "Trust Territory of the Pacific Islands" appropriation shall remain available until expended for the Trust Territory of the Pacific Islands: Provided further, That upon the effective date determined by the President for implementing the Compacts, $60,719,000 of the amount made available for fiscal year 1987 under the "Trust Territory of the Pacific Islands" appropriation pursuant to this act shall be considered to have been made available and expended for the "Compact of Free Association" appropriation as of October 1, 1986.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

In accordance with the provisions of Public Law 99-239, the Compact of Free Association Act, Federal programs in the Federated States of Micronesia and the Republic of the Marshall Islands shall continue to be provided until the effective date of the Compact, which has not yet been determined. Even after the effective date, Federal funds will continue to be provided for those Federal programs and activities to be continued under the Compact, pursuant to Public Law 99-239.

Appropriates $2,250,000 instead of $36,170,000 as proposed by the House and $27,920,000 as proposed by the Senate. The amount provided is for the second installment of the Enjebi Community Trust Fund, making a total of $5,000,000. The managers remain committed to providing the balance of funding necessary to provide the full $10,000,000 authorized for the Fund in future appropriations acts.

Bill language has been included changing the effective date of the Compact of Free Association for the Federated States of Micronesia and the Republic of the Marshall Islands to October 1, 1986, and establishing

that date as the effective date for the Compact for the Republic of Palau. This change does not affect the Kwajalein use and impact payments, for which the effective date remains October 1, 1985. The managers have very reluctantly agreed to this change, given the current uncertainty as to when the Compacts will become effective, and when the Compact funding will be released. The managers are committed to providing the second year of funding for the Compacts at the earliest possible opportunity once this uncertainty has been resolved.

Bill language has also been included providing that both the funds made available for the Compacts, and the funds to be offset against them as provided in Public Law 99-349, shall remain available until expended. Language is also included that will offset $60,719,000 of the Trust Territory funds provided in this Act against the Compact funds in fiscal year 1987 when the Compacts become effective.

With regard to the funding for Federal education progams included in section 105(i)(2) of the Compact, the managers believe this language is sufficient to allow the freely associated states to continue to apply to the Department of Education, and to continue to be funded, up to the levels specified in section 105(i)(2), without any further action by the Congress.

Amendment No. 73: Deletes language proposed by the Senate extending the availability of funds.

DEPARTMENTAL OFFICES

Office of the Secretary

Amendment No. 74: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted by said amendment, insert the following: *including $1,586,000 for the Immediate Office of the Secretary, $42,816,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Appropriates $24,816,000 instead of $42,482,000 as proposed by the House and $42,822,000 as proposed by the Senate.

The mangers have agreed to the following distribution of funds:

Secretary's Office	$1,586,000
Executive Secretary	374,000
Congressional and Legislative Affairs	1,046,000
Equal Opportunity	1,274,000
Public Affairs	784,000
Small and Disadvantaged Business Utilization	381,000
A/S Water and Science	625,000
A/S Lands and Minerals	840,000
A/S Fish and Wildlife and Parks	600,000
A/S Indian Affairs	600,000
A/S Territorial and International Affairs	508,000
A/S Policy, Budget and Administration	825,000
Environmental Project Review	1,404,000
Acquisition and property management	1,264,000
Office of Personnel	1,617,000
Administrative Services	1,032,000
Information resources management	4,450,000
Policy analysis	1,950,000
Office of Budget	1,404,000
Financial Management	954,000
Hearings and Appeals	5,200,000
Aircraft Services	1,658,000
Central Services	12,440,000
Total	42,816,000

Bill language is included earmarking $1,586,000 for the Immediate Office of the Secretary.

No funds are recommended for a cooperative agreement with the Benjamin Franklin Institute.

Office of the Solicitor

Amendment No. 75: Appropriates $20,880,000 for salaries and expenses instead of $21,255,000 as proposed by the House and $19,385,000 as proposed by the Senate. The net decrease below the House position includes reductions of $225,000 for travel, $50,000 for subscriptions and legal books, $100,000 for overtime/promotions; $50,000 as a general reduction and an increase of $50,000 for Statue of Liberty support.

Amendment No. 76: Deletes language proposed by the House earmarking funds for Office of Surface Mining Reclamation and Enforcement activities.

The managers are in agreement that work associated with the Office of Surface Mining is of highest priority.

Office of Inspector General

Amendment No. 77: Appropriates $16,300,000 as proposed by the House instead of $15,424,000 as proposed by the Senate.

DEPARTMENTWIDE PROVISIONS

Amendment No. 78: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds a requirement that funds used pursuant to this authority must be replenished by supplemental appropriations.

Amendment No. 79: Restores the provision proposed by the House and stricken by the Senate prohibiting leasing activities on certain Outer Continental Shelf areas in the North Atlantic.

Amendment No. 80: Restores section number 108 as proposed by the House instead of 107 as proposed by the Senate.

Amendment No. 81: Restores section number 109 as proposed by the House instead of 108 as proposed by the Senate.

Amendment No. 82: Restores section number 110 as proposed by the House instead of 109 as proposed by the Senate.

Amendment No. 83: Restores the provision proposed by the House and stricken by the Senate which provides the Secretary of the Interior the authority to adopt recommendations proposed by the negotiating team on California offshore leasing as authorized in section 111 of Public Law 99-190, as well as delaying the publication of a call for information and nomination for Sale 95 until March 1, 1987 and delaying the final notice of sale for Sale 91 until January 1, 1989.

Amendment No. 84: Restores section number 112 as proposed by the House instead of 110 as proposed by the Senate.

Amendment No. 85: Restores the provision proposed by the House and stricken by the Senate designating the Laurel Highlands National Recreational Trail as part of the Potomac Heritage Trail.

Amendment No. 86: Reported in disagreement.

The House bill contained a provision for purchasing oil rigs for the Outer Continental Shelf containing specific percentages of American materials and labor. The Senate passed bill contained no such provision. This provision is in disagreement.

Amendment No. 87: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SEC. 114. (a) In order to provide for needed facilities for visitors to Fort Sumter National Monument, including a tour boat dock and associated facilities, and an interpretive and museum facility in cooperation with the State of South Carolina and the city of Charleston, the Secretary of the Interior (in this section referred to as the "Secretary"), is authorized to acquire by purchase with donated or appropriated funds, donation, or exchange, not to exceed 8.91 acres of lands, including submerged lands, and interests in lands, within the area generally depicted on the map entitled "Dockside II, Proposed Site, Tourboat Facility", which map shall be on file and available for public inspection in the office of the National Park Service. When acquired, lands, including submerged lands and interests in lands, depicted on such map shall be administered by the Secretary as a part of Fort Sumter National Monument, subject to the laws and regulations applicable to such monument, and subject to the provisions of this section.

(b)(1) With respect to the lands, including submerged lands, and interests in lands acquired pursuant to section (a), the Secretary is authorized—

(A) to convey, notwithstanding the provisions of section 5 of Public Law 90-400 (82 Stat. 356) and subject to the provisions of subsection (2), a leasehold interest in not to exceed one and a half acres to the State of South Carolina or the city of Charleston or either of them for development by either of them or their agents or lessees of a marine museum and associated administrative facilities;

(B) to grant covenants or easements for ingress and egress to the State of South Carolina, the city of Charleston, and to other parties as the Secretary may deem necessary to facilitate public use; and

(C) to enter into cooperative agreements with the State of South Carolina, the city of Charleston, and other parties as the Secretary may deem necessary, pursuant to which construction, maintenance, and use of buildings, utilities, parking facilities, and other improvements may be shared among the parties to the agreement.

(2) Any conveyance made pursuant to subsection (b)(1)(A) and any renewal thereof may be for a period of up to 50 years, and may include the option to purchase the property in fee by the lessee within the first 10 years, upon payment by the lessee of the cost of the property to the United States plus interest based on the average yield of United States Treasury notes with maturities of one year. The Secretary may convey title to the property in fee in the event such option to purchase is exercised, subject to the condition that the property is used for a public marine museum and associated administrative facilities. Notwithstanding any other provision of law, any leasehold interest conveyed pursuant to subsection (b)(1)(A) shall be conveyed without monetary consideration. The proceeds from any conveyance of property in fee pursuant to subsection (b)(1)(A) shall be deposited in the Land and Water Conservation Fund in the Treasury of the United States.

(c) Section 117 of Public Law 96-199 (94 Stat. 71) is hereby repealed.

(d)(1) Notwithstanding any other provision of law, sums heretofore appropriated but not, on the date of enactment of this joint resolution, obligated for construction of a tourboat facility at the Broad Street site, and for the acquisition and construction of the Fleet landing site for Fort Sumter National Monument, which was authorized by section 117 of Public Law 96-199 (94 Stat. 71) are hereby made available for obligation for the acquisition of the lands including submerged lands, and interests in lands identified in section (a) and for construction of necessary facilities thereon, and to the extent that sums heretofore, appropriated for land acquisition of the Fleet landing site are not sufficient to cover the cost of acquisition of the properties identified in section (a), sums heretofore appropriated for construction of facilities at the Broad Street site and the Fleet landing site may be obligated for the purposes of acquisition as authorized in section (a).

(2) In addition to the sums made available under subsection (d)(1), there is authorized to be appropriated such sums as may be necessary to carry out the purposes of this section.

(e) The Secretary of the Interior shall transfer administrative jurisdiction over the Federal property, consisting of approximately 1 acre, known as the Broad Street site, to the Secretary of the Department in which the Coast Guard is operating, who shall transfer to the Secretary of the Interior, subject to such reservations, terms, and conditions as may be necessary for Coast Guard purposes, administrative jurisdiction over the Federal property, consisting of approximately 1 acre located near Fort Moultrie on Sullivan's Island for purposes of a maintenance workshop, storage, and seasonal housing in connection with the administration and protection of the Fort Sumter National Monument.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment deletes House language prohibiting the submission of a settlement to the court in Westlands versus the United States and includes language proposed by the Senate in H.J. Res. 738 authorizing the acquisition and development of a mainland tour boat facility for Fort Sumter National Monument, South Carolina.

Amendment No. 88: Restores House language stricken by the Senate designating the Visitor Center associated with the headquarters of the Illinois and Michigan Canal National Heritage Corridor as the "George M. O'Brien Visitor Center" and changes the section number to 115.

Amendment No. 89: Restores House language stricken by the Senate providing for an exchange of Land and Water Conservation Fund assisted land in Berkeley, Illinois, and changes the section number to 116.

Amendment No. 90: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 117.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Language is included, as proposed by the Senate, which prevents final regulations concerning paleontological research on Federal lands until the Secretary has received a report from the National Academy of Sciences on such regulations and forwarded to Congress a comparison of that report and the Department's proposed regulations.

Amendment No. 91: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 118.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Language proposed by the Senate amending the Act of August 9, 1955, to allow the Tulalip Tribe to enter into long-term leases if the lease is executed under tribal regulations approved by the Secretary, is included.

Amendment No. 92: Deletes language proposed by the Senate applying the exception in Public Law 87-279 to the Flathead Indian Irrigation Project.

Amendment No. 93: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

SEC. 119. (1) The primary term of any geothermal lease in effect as of July 27, 1984, issued pursuant to the Geothermal Act of 1970 (Public Law 91-581, 84 Stat. 1566, 30 U.S.C. 1001-1025) is hereby extended to December 31, 1988, if the Secretary of the Interior finds that—

(a) a bona fide sale of the geothermal resource, from a well capable of production, for delivery to our utilization by a facility or facilities, has been completed (1) due to administrative delays by government entities, beyond the control of the lessee, or (2) such sale would be uneconomic;

(b) substantial investment in the development of or for the benefit of the lease has been made; and

(c) the lease would otherwise expire prior to December 31, 1988.

(2)(a) The Secretary of the Interior (hereinafter in this section referred to as "the Secretary" shall publish for public comment in the Federal Register within 120 days after the date of enactment of this section a proposed list of significant thermal features within the following units of the National Park System:

Mount Rainier National Park;
Lassen Volcanic National Park;
Yellowstone National Park;
Bering Land Bridge National Preserve;
Gates of the Arctic National Park and Preserve;
Yukon-Charley Rivers National Preserve;
Katmai National Park;
Aniakchak National Monument and Preserve;
Wrangell-St. Elias National Park and Preserve;
Glacier Bay National Park and Preserve;
Denali National Park and Preserve;
Lake Clark National Park and Preserve;
Hot Springs National Park;
Sequoia National Park;
Hawaii Volcanoes National Park;
Lake Mead National Recreation Area;
Big Bend National Park;
Olympic National Park;
Grand Teton National Park;
John D. Rockefeller, Jr. Memorial Parkway;
Haleakala National Park; and
Crater Lake National Park.

The Secretary shall include with such list the basis for his determination with respect to each thermal feature on the list. Based on public comment on such list, The Secretary is authorized to make additions to or deletions from the list. Not later than the 60th day from the date on which the proposed list was published in the Federal Register, the Secretary shall transmit the list to the Committee on Energy and Natural Resources of the Senate and the Committee on Interior and Insular Affairs of the House of Representatives together with copies of all public comments which he has received and indicating any additions to or deletions from the list with a statement of the reasons therefor and the basis for inclusion of each thermal feature on the list. The Secretary shall consider the following criteria in determining the significance of thermal features:

(1) size, extent, and uniqueness;

(2) scientific and geologic significance;

(3) the extent to which such features remain in a natural, undisturbed condition; and

(4) significance of thermal features to the authorized purposes for which the National Park System unit was created.

The Secretary shall not issue any geothermal lease pursuant to the Geothermal Steam Act of 1970 (Public Law 91-581, 84 Stat. 1566), as amended, until such time as the Secretary has transmitted the list to the Committees of Congress as provided in this section.

(b) The Secretary shall maintain a monitoring program for those significant thermal features listed pursuant to subsection (a) of this section.

(c) Upon receipt of an application for a geothermal lease the Secretary shall determine on the basis of scientific evidence if exploration, development, or utilization of the lands subject to the geothermal lease application is reasonably likely to result in a significant adverse effect on a significant thermal feature listed pursuant to subsection (a) of this section. Such determination shall be subject to notice and public comment. If the Secretary determines on the basis of scientific evidence that the exploration, development, or utilization of the lands subject to the geothermal lease application is reasonably likely to result in a significant adverse effect on a significant thermal feature listed pursuant to subsection (a) of this section, the Secretary shall not issue such geothermal lease. In addition, the Secretary shall withdraw from leasing under the Geothermal Steam Act of 1970, as amended, those lands, or portion thereof, subject to the application for geothermal lease, the exploration, development, or utilization of which is reasonably likely to result, based on the Secretary's determination, in a significant adverse effect on a significant thermal feature listed pursuant to subsection (a) of this section.

(d) With respect to all geothermal leases issued after the date of enactment of this section the Secretary shall include stipulations in leases necessary to protect significant thermal features listed pursuant to subsection (a) of this section where a determination is made based on scientific evidence that the exploration, development, or utilization of the lands subject to the lease is reasonably likely to adversely affect such significant features. Such stipulations shall include, but are not limited to:

(1) requiring the lessee to reinject geothermal fluids into the rock formations from which they originate;

(2) requiring the lessee to report annually to the Secretary on its activities;

(3) requiring the lessee to continuously monitor geothermal production and injection wells; and

(4) requiring the lessee to suspend activity, temporarily or permanently, on the lease if the Secretary determines that ongoing exploration, development, or utilization activities are having a significant adverse effect on significant thermal features listed pursuant to subsection (a) of this section until such time as the significant adverse effect is eliminated.

(e) The Secretary of Agriculture shall consider the effects on significant thermal features of those units of the National Park System identified in subsection (a) of this section in determining whether to consent to leasing under the Geothermal Steam Act of 1970, as amended, on national forest or other lands administered by the Department of Agriculture available for leasing under the Geothermal Steam Act of 1970, as amended, including public, withdrawn, and acquired lands.

(f) Nothing contained in this section shall affect the ban on leasing under the Geothermal Steam Act of 1970, as amended, with respect to the Island Park Known Geothermal Resources Area, as provided for in Public Law 98-473 (98 Stat. 1837) and Public Law 99-190 (99 Stat. 1267).

(g) Except as provided herein, nothing contained in this section shall affect or modify the authorities or responsibilities of the Secretary under the Geothermal Steam Act of 1970, as amended, or any other provision of law.

(h) The provisions of this section shall remain in effect until Congress determines otherwise.

SEC. 120. (a) Section 1102(a) of the National Parks and Recreation Act of 1978 (Public Law 95-625) is amended by inserting the following after the second sentence: "In addition, the Secretary may acquire by any of the foregoing methods not to exceed ten acres outside the boundaries of the national river for an administrative headquarters site, and funds appropriated for land acquisition shall be available for the acquisition of the administrative headquarters site.".

(b) Section 1112 of Public Law 95-625 is amended by striking "$500,000" and inserting "$3,000,000".

SEC. 121. (1) The Women in Military Service for America Memorial Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor women who have served in the Armed Forces of the United States. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

(2) The organization or organizations approved by the Secretary shall establish the memorial with non-Federal funds.

SEC. 122. (1) The Black Revolutionary War Patriots Foundation is authorized to establish a memorial on Federal land in the District of Columbia and its environs to honor the estimated five thousand courageous slaves and free black persons who served as soldiers and sailors or provided civilian assistance during the American Revolution and to honor the countless black men, women, and children who ran away from slavery or filed petitions with courts and legislatures seeking their freedom. Such memorial shall be established in accordance with the provisions of H.R. 4378, as approved by the House of Representatives on September 29, 1986.

(2) The Black Revolutionary War Patriots Foundation shall establish the memorial with non-Federal funds.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment deletes language proposed by the Senate and included under amendment No. 88 concerning naming a visitor center, and includes language proposed by the Senate in H.J. Res. 738 as follows:

1. Section 119. (1) extends the term of geothermal leases in existence as of July 27, 1984 through December 31, 1988.

2. Section 119. (2) directs the Secretary of the Interior to establish a list of significant thermal features in several National Parks and establishes a program for determining and protecting those features.

3. Section 120 authorizes acquisition of certain lands outside the boundaries of the New River Gorge National River and increases the authorization limit from $500,000 to $3,000,000.

4. Section 121 authorizes the establishment of a memorial to Women in Military Service in accordance with the provisions of H.R. 4378 as passed the Senate on September 10, 1986 (Senate Report 99-421).

5. Section 122 authorizes the establishment of a memorial to Black Revolutionary War Patriots in accordance with the provisions of H.R. 4378 as passed the House on September 29, 1986.

Amendment No. 94: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 123.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment will allow land surveyors to prepare and certify maps for surface mining permit applications.

Amendment No. 95: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 124.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides for a 180 day delay in implementing an out-of-court settlement with regard to various oil shale claims in Colorado provided that all parties to the case, including the courts involved, agree and directs the Secretary of the Interior to seek such agreement.

TITLE II—RELATED AGENCIES

DEPARTMENT OF AGRICULTURE

Forest Service

Forest research

Amendment No. 96: Appropriates $128,882,000 for forest research instead of $129,183,000 as proposed by the House and $123,282,000 as proposed by the Senate. The managers agree that the changes from the budget request of $111,481,000, by program are as follows:

Fire and atmospheric sciences:

+$200,000—atmospheric deposition research at Fort Collins, CO.

+$300,000—fire research at Riverside, CA and Missoula, MT.

Forest insect and disease research:

+$325,000—eastern hardwoods research cooperative at Broomall, PA.

+$300,000—western conifers research cooperative at Corvallis, OR (to be managed by the Environmental Protection Agency).

+$697,000—to be distributed to the highest priority insect and disease research projects.

Forest inventory and analysis:

+$1,200,000—atmospheric deposition research at Research Triangle Park, NC.

+$900,000—restore forest inventory cycle to previous level.

+$1,000,000—western ecosystems acid raid monitoring pursuant to an agreement with the Idaho National Engineering Laboratory.

Renewable resources economics research:

−$86,000—maintain at 1986 level.

Trees and timber management:

+$325,000—eastern hardwoods research cooperative at Broomall, PA.

+$300,000—western conifers research cooperative at Corvallis, OR.

+$500,000—Fairbanks, AK.

+$300,000—genetic engineering research at Berkeley, CA.

+$288,000—Parsons, WV: $188,000 for rehabilitation and $100,000 for research. Additionally, the $196,000 proposed for transfer to Morgantown shall be returned to Parsons.

+$200,000—Boise, ID.

+$50,000—Honolulu, HI.

Watershed and minerals management research:

+$600,000—atmospheric deposition research at Oxford, MS, Grand Rapids, MN, Riverside, CA, and Fort Collins, CO.

+$152,000—University Park, PA.

+$125,000—soil stabilization research at Corvallis, OR.

+$375,000—watershed research at Arcata, CA, Durham, NH, and Parsons, WV. Additionally, the $349,000 proposed for transfer to Morgantown shall be returned to Parsons.

Wildlife, range and fish habitat research:

+$1,500,000—spotted owl research at Fresno and Arcata, CA and Olympia, WA, to be matched by $500,000 in private funds.

+$200,000—endangered species research at Missoula, MT.

+$200,000—trout stream productivity research at Blacksburg, VA.

+$100,000—semiarid habitat research at Albuquerque, NM.

+$100,000—moose habitat research at Fairbanks, AK.

+$100,000—tropical wildlife research at Rio Piedras, PR.

Forest recreation research:

+$150,000—wilderness management research at Missoula, MT.

+$150,000—urban/wildland research at Riverside, CA.

Forest products and harvesting research:

+$450,000—Forest Products Laboratory, Madison, WI.

+$100,000—for whitewood shake and shingle preservative treatment research and market development, to be conducted on a fifty-fifty match basis with funds to be provided by private industry.

+$300,000—research on products from low quality logs at Blacksburg, VA.

Competitive grants:

+$6,000,000—to be divided equally between basic improved harvesting, processing and utilization research; and basic forest biology, including biotechnology.

The managers note that within the fire and atmospheric sciences program, $206,000 of research that was formerly conducted at Fairbanks, AK will be conducted at Anchorage, AK in fiscal year 1987. The Forest Service is directed to maintain the fire research work unit in East Lansing in fiscal year 1987.

Included in the appropriation is $1,000,000 to be provided for the Idaho National Engineering Laboratory's intermountain ecological and environmental study, pursuant to an agreement to be developed between INEL and the Forest Service. This agreement will provide that all activities will be compatible with the existing National Acid Precipitation Assessment Program (NAPAP) and the Mountain Cloud Chemistry Program (MCCP), including measurement and monitoring protocols. The increase will enable the Forest Service to accelerate research on effects of atmospheric deposition on alpine/sub-alpine ecosystems.

Amendment No. 97: Earmarks $6,000,000 for competitive grants instead of $3,400,000 as proposed by the House and $6,500,000 as proposed by the Senate.

State and private forestry

Amendment No. 98: Appropriates $58,946,000 instead of $57,671,000 as proposed by the House and $61,771,000 as proposed by the Senate. The net increase over the amount proposed by the House consists of: an increase of $1,600,000 for cooperative lands pest suppression; and decreases of $200,000 for the Boundary Waters Canoe Area grant, $50,000 to pest management special projects, Federal lands, and $75,000 to urban forestry.

The managers agree that within the amount provided for cooperative lands pest suppression, the Forest Service is to provide $1,500,000 for spruce budworm in Yakima, WA and $211,000 for budworm control in New Mexico, if these projects are of high enough priority.

Within the funds provided for wood utilization, $100,000 is to be used for a study on the proposed marketing initiative, for which no funds are provided. The study, which should be submitted to the Appropriations Committees by March 1, 1987, should include at a minimum the following:

a list of projects suggested by the Forest Service;

the criteria to be considered in selecting projects;

the amounts to be provided for technical assistance and financial assistance through the States, and how these amounts are to be determined;

the rationale for providing Federal funding for these activities;

the role of private industry, the States and other non-Federal entities in such a program; and

a proposal on cost-share rates, and the basis therefor.

The managers agree that there is no commitment to Federal funding for this program, but it will be reviewed in conjunction with the 1988 hearings.

Amendment No. 99: Earmarks $2,800,000 for the Boundary Waters Canoe area grant, as proposed by the Senate instead of $3,000,000 as proposed by the House.

National Forest System

Amendment No. 100: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $1,158,294,000 for the National forest system instead of $996,687,000 as proposed by the House and $1,137,894,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The change from the amount proposed by the Senate includes: increases of $1,700,000 for land line location, $24,000,000 for fighting forest fires, $2,635,000 for trail maintenance, $7,152,000 for recreation management, $2,000,000 for wilderness management, $1,000,000 for spotted owl management, $500,000 for threatened and endangered species, $1,900,000 for soil and water improvements and $1,300,000 for soil and water inventories; and decreases of $2,266,000 to fire protection, $340,000 to cooperative law enforcement, $2,500,000 to road maintenance, $8,392,000 to timber sales preparation, $4,050,000 to reforestation, $2,202,000 to timber stand improvement, $900,000 to habitat improvement, and $1,137,000 to grazing.

The managers agree the additional funds for land line location are to be used for multiple resource management purposes.

The managers are concerned about the costs per acre of reforestation and timber stand improvement, and request the Forest Service to provide a report by March 1, 1987, as to specific steps to be taken to better control costs, and a methology to be used to determine the economic feasibility of reforestation and TSI projects before they are undertaken.

Within the increase provided for noxious weed control, $80,000 is for the Boise National Forest.

Within the funds provided for soil and water improvements, $250,000 is for a 50 percent cost shared acid neutralization research and demonstration project in the Cranberry River area of the Monongahela NF, WV. An additional $250,000 is for a project in the Blackwood Creek watershed of the Lake Tahoe Basin Management Unit.

In the wildlife and fish habitat management program, there is included an increase of $425,000 for anadromous fish habitat improvements in the Northeast. Included in the soil, water and air program is $280,000 for Bull Run watershed monitoring.

The managers agree that the funds available for spotted owl inventory activities shall be used in various types of habitat, including old growth and non-old growth areas, and in various land use classification areas, including wild and scenic areas, research natural areas, and designated wilderness areas. The managers are concerned that if the Forest Service focuses its inventory on old growth areas and commercial timber lands only, it might miss spotted owl populations in other land use areas, including those already protected by statute or regulation.

The managers are concerned that the Service has developed plans for reorganizing the national forests in Arizona that will result in disruption and economic hardship in small communities. Therefore, the managers direct the Service not to implement the plans without first satisfying Congressional concerns.

The allowance provides for a 1987 timber sales program of 11.2 billion board feet (BBF). This approximates historic levels and is recommended on the basis of continuing high harvest levels and softwood timber demand. The allowance also includes funds to maintain timber support activities and to begin the advanced sales preparation work necessary to maintain the option of continuing historic sales levels after the supply of reoffer volume has been exhausted. The managers agree that the costs of maintaining this option will need to be examined in detail as part of the consideration of the FY 1988 budget for the Forest Service, and expect the Forest Service to have detailed, supportable bases for their estimates available for review at that time. The managers also expect the Forest Service to be prepared to discuss in detail how future years' timber sales levels will be impacted by the land management plans which are now in the final stages of review. The Forest Service is encouraged to offer up to 7.0 BBF of new green sales in fiscal year 1987, and to maintain the sales level in Region 6 at 5.2 BBF gross, 4.5 BBF net merchantable sawtimber, and in Regions 1 and 4 at about 1.0 BBF and 0.4 BBF, respectively. The sales program is intended to be a balanced one across the country.

The managers have agreed to provide $1,000,000 for 1987 costs related to the Helistat. Additional costs required in the future should be submitted as a budget request.

Amendment No. 101: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which provides $263,323,000 to remain available until expended instead of $144,767,000 as proposed by the House and $245,780,000 as proposed by the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Amendment No. 102: Adds the word "firefighting" as proposed by the Senate.

Amendment No. 103: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

The Forest Service is to continue to complete as expeditiously as possible development of land and resource management plans to meet the requirements of the National Forest Management Act of 1976 (NFMA). Notwithstanding the date in section 6(c) of the NFMA (16 U.S.C. 1600), the Forest Service may continue the management of units of the National Forest System under existing land and resource management plans pending the completion of plans developed in accordance with the Act. Nothing shall limit judicial review of particular activities on management units of the National Forest System: Provided, however, That there shall be no challenges to any existing plan on the sole basis that the plan in its entirety is outdated: Provided further, That any and all particular activities to be carried out under existing plans may nevertheless be challenged.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers understand that the current land management planning process is proceeding on a forest-by-forest basis. The managers have agreed to includce bill language intended to prevent the existing land and resource management plans from being enjoined in their entirety, solely on the basis that they are outdated, pending the completion of the new plans, and have also agreed to restate the direction provided in Section 6(c) of the NFMA that the Forest Service may continue the management of units of the National Forest System under existing plans pending the completion of new plans.

Under the provisions of Section 6(c), the Forest Service is encouraged to begin to incorporate new standards and guidelines into existing plans as soon as practicable. The managers are concerned, however, that in

carrying out this direction, the Forest Service must not contravene the public participation requirements of NFMA. Section 6(d) required full public participation in the development, review, and revision of existing land management plans. The managers therefore direct The Forest Service to provide for public review of new suitability standards, yield tables, minimum management requirements and other standards and guidelines prior to their incorporation into existing plans, in accordance with the provisions of Section 6(d) of NFMA.

Construction

Amendment No. 104: Appropriates $261,436,000 for construction instead of $192,409,000 as proposed by the House and $268,130,000 as proposed by the Senate. The changes from the amounts proposed by the Senate consist of: increases of $9,856,000 for facilities and $570,000 for trail construction; and a decrease of $17,120,000 to road construction.

Within the amount provided for recreation facilities is $587,000 for Clear Creek, AL, $568,000 for Mount St. Helens NM, WA, and $150,000 for Mount Rogers NRA, VA. A slippage adjustment of $300,000 is made against budgeted facility construction projects. The managers have provided $10,000,000 for high priority recreation facility rehabilitation projects, with the first emphasis to be on health and safety-related projects.

The managers agree that a total of $1,617,000 is provided for flood repair in the Monongahela NF, WV, consisting of $1,021,000 for facilities, $431,000 for roads, and $165,000 for trails.

The allowance for road construction also includes $8,473,000 for Mount St. Helens, WA, $5,114,000 for Clear Creek, AL, and $100,000 for design and survey in the Hells Canyon NRA.

The managers agree that within available administrative facilities funds, $100,000 is provided for design of the Bug Sur multiagency work center. There is also $1,570,000 for Mount St. Helens administrative facilities. There is no objection to shifting $538,000 budgeted for the Vernon work center on the Kisatchie NF to other high priority projects on the Desoto NF, MS; the Francis Marion and Sumter NF, SC; the Chattahoochie and Oconee NF, GA; the Holly Springs NF, MS; and the Homochitto NF, MS.

The allowance provides $165,000,000 for engineering, design and construction costs for forest roads needed to support the fiscal year 1987 sales program of 11.2 BBF, and $15,000,000 for advanced engineering and design activities required to enable the Forest Service to be able to maintain the option of continuing historic sales levels and related road construction programs. The managers will review the Forest Service road construction program again next year and determine the progress the Forest Service has made in regaining the option of maintaining sales levels, especially in Region 6, after the supply of reoffer volume has been exhausted, and what impact other factors may have on the sales levels, and resulting need for road construction. It is the intent of the managers that the projects funded be undertaken pursuant to all applicable forest management laws and regulations, and that the Forest Service should not unduly accelerate its access into released roadless areas.

The managers are concerned about allegations that the Forest Service cannot specify where specific road segments will be constructed. The managers are also concerned that funds provided for Forest Service roads be used in a manner consistent with multiple use resource guidelines. Therefore, the managers direct that each Forest Supervisor make available for public review the anticipated location, mileage, cost and use for all local, arterial and collector roads required in an annual timber sales program as determined by a forest management plan. While such forest road data may vary with the dynamics of the timber sales program, such information shall be published annually and be updated every six months.

The managers expect the Forest Service to maintain the funding breakdown of the road construction budget submitted in the budget request, as modified by Congressional action. If funds are to be shifted between categories within the road construction line item, the Forest Service should notify the Appropriations Committees in advance of the proposed changes, and the reasons for them.

Amendment No. 105: Provides $25,332,000 for construction of buildings and other facilities instead of $36,736,000 as proposed by the House and $15,476,000 as proposed by the Senate.

Amendment No. 106: Provides $236,104,000 for roads and trails instead of $155,673,000 as proposed by the House and $252,654,000 as proposed by the Senate.

Amendment No. 107: Deletes language proposed by the Senate earmarking funds for a number of projects.

Amendment No. 108: Deletes language proposed by the Senate limiting obligations for construction of timber purchaser roads.

Amendment No. 109: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *: Provided further, That the Forest Service shall achieve a 5 per centum reduction in the average cost per timber road mile as compared to the adjusted fiscal year 1985 average cost by a combination of the following two actions: (1) the application of road construction standards used to construct or reconstruct Forest Service timber roads, purchaser credit roads, or purchaser elect roads, and (2) reducing the direct personnel cost of designing and constructing timber roads to these standards: Provided further, That the Forest Service shall take administrative cost saving actions, including reductions in indirect personnel, overhead charges, and productivity improvements, in fiscal year 1987 in a manner so as to achieve a 5 per centum reduction in the average cost per timber road mile as compared to the adjusted fiscal year 1985 average cost: Provided further, That such actions shall be taken so as to achieve these 5 per centum reductions in each Forest Service region*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers continue to be concerned about allegations that the Forest Service is building roads to a standard greater than is necessary for timber use or multiple use management. Therefore, bill language is included, as proposed by the Senate, requiring further reductions in the unit costs of timber roads. The managers expect a complete report at the end of the fiscal year on how these reductions were achieved, and also expect the Forest Service to notify the Committees immediately during the year if this effort to reduce costs will result in potential environmental damage.

Amendment No. 110: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates certain receipts for construction at the Mt. Elden Work Center, Flagstaff, AZ.

Bill language has been included appropriating $300,000 for the construction of administrative improvements at the Mount Elden Work Center in Flagstaff, AZ. This is in addition to other projects identified in the statement of the managers and is in addition to the $261,436,000 also appropriated for construction.

Amendment No. 111: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which appropriates Highway Trust Funds for road construction at Mount St. Helens National Volcano Monument, WA.

Bill language is included correcting language carried in the fiscal year 1986 Continuing Resolution regarding Highway Trust Fund money for Mount St. Helens road construction.

Land acquisition

Amendment No. 112: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $49,236,000 instead of $39,936,000 as proposed by the House and $36,906,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The following table shows the allocation agreed to by the managers:

Acquisition management	$3,206,000
Appalachian Trail	1,500,000
AuSable-Manistee Rivers, MI	6,000,000
Columbia River Gorge, OR and WA	4,650,000
Jefferson NF, VA	280,000
Lake Tahoe, CA and NV	7,000,000
Mono Lake/Inyo NF, CA (wilderness)	400,000
Monongahela NF/Shavers Fork, WV	12,800,000
Mount Rogers NRA, VA	1,000,000
Ottawa NF, MI	3,000,000
Pisgah NF, NC	900,000
Wasatch NF/Little Cottonwood Canyon, UT	2,500,000
Wayne NF, OH	2,000,000
Endangered Species Habitat	2,000,000
Inholdings and recreation composites	5,000,000
Total	$52,236,000

Included in the inholding and recreation composite allowance are funds to acquire the Reed Ranch in the Payette NF.

Administrative provisions, Forest Service

Amendment No. 113: Restores language stricken by the Senate requiring compliance with section 313(a) of the Federal Water Pollution Control Act.

Amendment No. 114: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which allows reimbursement for licenses and certification fees.

Amendment No. 115: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede

and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

Notwithstanding any other provision of law, the Secretary of Agriculture is hereafter authorized to use from any receipts from the sale of timber a sum equal to the cost of construction of roads under the purchaser election program as described and authorized in section 14(i) of the National Forest Management Act of 1976.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides that purchaser elect funding will be available for actual rather than estimated road construction costs. This does not change the criteria for award of a contract to the lowest acceptable bidder.

Amendment No. 116: Provides that a minimum of $26,000,000 shall be available from the Timber Salvage Sales Fund as proposed by the Senate instead of $26,781,000 as proposed by the House.

Amendment No. 117: Earmarks $1,000,000 for the Youth Conservation Corps as proposed by the House.

Amendment No. 118: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

The Forest Service is authorized and directed to negotiate, within 90 days after the enactment of this Act, settlement of claims against the United States resulting from a forest fire in the Black Hills National Forest: Provided, That notwithstanding any other provision of law, the Secretary of the Treasury is authorized and directed to pay the amount of the settlement from the Claims, Judgments, and Relief Act Fund (P.L. 95-26).

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language has been included directing the Forest Service to negotiate claims resulting from the Black Hills National Forest forest fire, and providing that the negotiated amounts shall be paid from the Claims, Judgments and Relief Act Fund (P.L. 95-26) in the Department of the Treasury.

Amendment No. 119: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which modifies the boundary of the Gifford Pinchot National Forest.

Amendment No. 120: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum named in said amendment insert: *$500,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Bill language has been included limiting costs for the Resources Planning Act Washington staff to $500,000 for the costs of developing the 1990 RPA Program called for by the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended.

The Congress has only recently received the 1985 Program and the managers are concerned about its timeliness and its content. In addition, the relationship between the range of outputs called for in the recommended program and the current generation of land management plans is not clear.

Therefore, the Committee directs that the Forest Service provide the following information to the appropriate Congressional Committees by March 1, 1987: (1) a detailed breakdown of Forest Service Washington office and field office funding and staffing that are to be spent annually in preparing the 1990 assessment and the 1990 program; (2) a detailed breakdown of Forest Service Washington office and field office funding and staffing that are to be spent annually in preparing the land management plans; (3) a detailed analysis of the factors that have resulted in the national forest plans differing from the RPA goals.

In doing the analysis, the Service is directed to address: (1) the role that the RPA targets played, and should play in the future, in the decision-making process in the development of specific national forest management plans; (2) the role that each RPA alternative program had in the selection of the final RPA recommended program and in the selection of preferred forest plan alternatives; and (3) the actions the Service will take if the national forest planning process is not in agreement with the RPA goals for any resource, and how these relate to the legal and regulatory requirements under which the land management plans were developed.

In developing the 1990 RPA Program, the Congress directs the Forest Service to identify and recommend a single, strategic proposal within the range of alternatives developed, to guide the management, research, protection, and other activities of the Forest Service for the succeeding five years. The plan should respond to the short term and long term National and natural resource needs of the Nation as identified by the Resource Assessment. The Congress fully expects the 1990 RPA Program to be transmitted to the Congress on time, in conjunction with the provisions of the Forest and Rangeland Renewable Resources Act, as amended.

The managers want to stress that the allowance is not intended to slow in any way the development of new forest plans or to reduce funding availability for development of revisions and updates to the assessment.

DEPARTMENT OF ENERGY

Clean coal technology

Amendment No. 121: Provides for submission of statements of interest and informational proposals within 60 days after a Federal Register notice soliciting such statements and proposals, as proposed by the House instead of eighty days as proposed by the Senate.

Amendment No. 122: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment insert the following: *March 6, 1987, submit to Congress a summary report of statements of interest and informational proposals received and no later than one hundred and twenty days after the receipt of such statement and proposals.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

This amendment provides a summary report on March 6, 1987 as proposed by the Senate, and a detailed report within 120 days of receipt of such statements and proposals as proposed by the House.

The managers agree that the solicitation provided for in this Act shall specify, but not be limited to, the following generic emission reduction technologies and processes:

1. coal cleaning;
2. dry sorbent injection;
3. (a) partial stack gas scrubbing or (b) advanced scrubbing techniques;
4. NO_x controls; and
5. repowering of existing equipment.

It is not the managers' intent to consider projects which duplicate previous demonstrations.

The managers agree that proposals are not limited to those connected with electric power generating technologies.

Fossil energy research and development (including transfer of funds)

Amendment No. 123: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted by said amendment insert the following: *$411,000 to be derived by transfer from unobligated balances in the "Permitting and enforcement" account of the Federal Inspector for the Alaska Gas Pipeline, $295,866,000.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree to appropriate $295,866,000 instead of $314,512,000 as proposed by the House and $242,947,000 as proposed by the Senate and transfer $411,000 of unobligated balances from the Office of the Federal Inspector for the Alaska Gas Pipeline to offset new budget authority requirements. The decrease below the amount proposed by the House consists of increases of $71,000 for advanced separation technology and $1,000,000 for acid rain control technologies in flue gas cleanup; $4,931,000 for the Calderon hot gas process and $768,000 for direct coal fired turbines in gas stream cleanup; $500,000 for university coal research and $1,000,000 for biological processing of coal in advanced research and technology development; $1,000,000 for close-coupled catalytic concepts in direct liquefaction; $1,600,000 for advanced pressurized fluidized bed (PFB) systems in combustion; $300,000 for technology base research in molten carbonate fuel cells; $500,000 for high Btu defense fuels in advanced process development and $1,300,000 for high temperature in-situ sulfur capture in systems engineering concepts, both in gasification; and decreases of $500,000 for joint EPRI/DOE advanced physical coal cleaning and $250,000 for chemical and electrochemical coal cleaning in coal preparation and analysis; $500,000 for advanced NO control and $100,000 for enhanced mass transfer in flue gas cleanup; $1,400,000 for on-line zinc ferrite regeneration in gas stream cleanup; $342,000 for field monitoring of wastes and energy recovery in waste management technology; $547,000 for materials and components, $194,000 for instrumentation, and $452,000 for direct utilization in advanced research and technology development; $525,000 for advanced research in liquefaction; $2,000,000 for co-processing research and $1,000,000 for pyrolysis research in direct liquefaction; $1,800,000 for the La-Porte, TX, pilot plant in indirect liquefaction; $700,000 for atmosphere fluidized beds (AFB) in combustion; $200,000 for component evaluation at NYU, $325,000 for Gri-

methorpe, $400,000 for corrosion/erosion testing, and $414,000 for basic research in pressurized fluidized beds (PFB) in combustion; $177,000 in advanced combustion technology; $711,000 for work using highly beneficiated coals in alternate fuel utilization; $1,000,000 for the 7.5 MW system, $1,000,000 for the 11 MW system, $1,000,000 for the 40 KW on-site system, and $500,000 for the 25 KW organic fueled technology in phosphoric acid fuel cells; $300,000 for the competitive stock development procurement in molten carbonate fuel cells; $800,000 for solid oxide modules and $200,000 for advanced research in advanced concepts in fuel cells; $1,600,000 in heat engines; $1,300,000 for support of the Wyoming field test and $400,000 for modeling and data support in underground coal gasification; $3,500,000 in magnetohydrodynamics; $214,000 for advanced research in gasification; $270,000 for hot gas cleanup testing in gasification systems engineering; $119,000 for extraction and process research and $425,000 for environmental mitigation in advanced exploratory research in advanced process technology; $450,000 for heavy oil; $1,000,000 in oil shale; $400,000 for western tight sands; $440,000 for advanced research in unconventional gas recovery; $1,500,000 for equipment not related to construction; $1,750,000 for general plant projects; and $500,000 for use of prior year balances.

The managers agree that:

1. Funding for the Calderon hot gas regenerative system ($4,931,000) is conditioned on (a) access to an existing test site; (b) non-Federal cost-sharing of at least 20 percent; (c) a maximum Federal share of $8 million; and (d) a commitment to commercialize the project with no further Federal funding after completion of this feasibility demonstration.

2. Funds added in advanced combustion technology ($1,000,000) are not limited to slagging combustors.

3. Funding for the water-cooled on-site phosphoric acid program ($2,000,000) is conditioned on an equivalent amount being provided by non-Federal sources.

4. In molten carbonate fuel cells, there is a total of $1,000,000 for contaminant resistant cell research.

5. Work in fuel cell advanced concepts shall include solid polymer electrolyte technology.

6. The $2,000,000 for pollutant recycle and hot particulate removal in systems engineering concepts in gasification is for the existing facility at Schenectady, NY.

7. The $7,000,000 for the Wilsonville liquefaction pilot plant is to continue work with the existing owners and operating contractors.

8. $75,000 in heat engines is for work at UNDERC.

9. $621,000 for tar sands work in enhanced oil recovery is for WRI, not for UNDERC as stated in the House report.

10. The additional $1,000,000 for extraction and processing research in advanced exploratory research is for work in oil and oil shale with national laboratories and universities.

11. The $11,000,000 for oil shale consists of $3,471,000 for WRI, $4,000,000 for direct eastern shales work as detailed in the House report, $1,000,000 for work at INEL, and $2,529,000 for research allocated in a manner similar to the Department's budget submission to OMB.

12. The amounts provided for WRI and UNDERC may be transferred to activities within programs without prior reprogramming notification to Congress.

13. Support Argonne National Laboratory for fossil energy and conservation research in total shall be at levels equivalent to fiscal year 1986.

14. The Department shall transfer $1,613,000 from various direct program activities to program direction in order to provide a uniform method of accounting for costs at Energy Technology Centers (ETC's).

The managers agree that additional funds will be required for continued support for configuration "B" of the 11 megawatt technology, and for extended operation and testing of the IFC phosphoric acid, water cooled, on-site fuel cell verification test article in fiscal year 1988, and intend to provide funds at that time. For the 11 megawatt project, the managers recognize that IFC's private sector cost-sharing investment will exceed $30,000,000 by the end of calendar year 1986 and recommend that the Department of Energy also recognize this as a cost-sharing effort. For the on-site project, the funding provided includes endurance testing of a full area short stack of configuration "B" cells, incorporating results of the ongoing technology program. This funding does not constitute a new start, but rather a continuation of the ongoing program.

The Department projects a $2,724,000 ETC program direction shortfall, even with sums added by Congress. The shortfall is $1,498,000 at METC and $1,226,000 at PETC, and shall be absorbed in those amounts by each ETC. The managers agree that such shortfalls may be absorbed either by reducing allocations to the direct research program, as long as Congressionally added programs are not affected, or by reducing overhead contracting support or other overhead expenses. In either case, government personnel levels shall not be affected.

Amendment No. 124: Provides $26,500,000 for magnetohydrody- namics instead of $30,000,000 as proposed by the House and $23,500,000 as proposed by the Senate.

Naval petroleum and oil shale reserves

Amendment No. 125: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment insert the following:

CLEAN COAL TECHNOLOGY

Notwithstanding guidance provided by the Department in the February 17, 1986 Clean Coal Technology Program Opportunity Notice, funds expended by a private sector participant during the period of Congressional review or approval of the projects selected by the Department for agreements may be eligible for cost-sharing, as appropriate, commencing immediately after a full and comprehensive report on the project in question is submitted to the Congress for a 30-day review pursuant to the Administrative Provisions of the Department of Energy in this Act: Provided, That such cost-sharing may only be reimbursed after the Congress has approved the project or the 30-day review period has elapsed and the agreement executed by the Department: Provided further, That in no case shall funds expended by the private sector during the review period by eligible for cost-sharing reimbursement of any project disapproved by the Congress.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree to delete the Senate provisions for the sale of the reserves but include a general provision in title III of the bill limiting the funds to be expended for such studies and requiring a report based on such studies to the Speaker of the House and the President of the Senate by June 30, 1987. That provision is addressed in Amendment No. 171.

Bill language is also included providing that notwithstanding guidance provided by the Department in the February 17, 1986 Clean Coal Technology Program Opportunity Notice, funds expended by a private sector participant during the period of Congressional approval or review of projects for which agreement has been reached may be eligible for cost-sharing, as appropriate, commencing immediately after the required report on the project in question is submitted to the Congress for 30-day review pursuant to the Administrative Provisions of the Department of Energy in this Act. Such cost-sharing may only be reimbursed after the Congress has approved the project or the 30-day review period has elapsed and the agreement is executed by the Department. In no case shall funds expended by the private sector during the review period be eligible for cost-sharing reimbursement of any project disapproved by the Congress.

Energy conservation

Amendment No. 126: Appropriates $280,129,000 for energy conservation instead of $285,825,000 as proposed by the House and $246,413,000 as proposed by the Senate. The decrease below the amount proposed by the House consists of increases of $1,175,000 for dynomometer testing and analysis of battery and powertrain technologies in electric vehicles; $1,000,000 for capital equipment for advanced materials in transportation; and $2,800,000 for grant monitoring in State and local program direction; and decreases of $100,000 for windows and daylighting and $300,000 for retrofit of multi and single family residences in building systems; $500,000 for advanced refrigeration systems and $250,000 for non-oil based combustion systems in technology and consumer products; $500,000 for research utilization in analysis and technology transfer; $100,000 for the Federal Energy Management Program; $750,000 for capital equipment in the buildings program; $200,000 for industrial wastes and $200,000 for improved combustion efficiency in waste energy reduction; $500,000 for sensors, $679,000 for thin-strip casting steel research and $500,000 for the Steel Technology initiative in industrial process efficiency; $500,000 for adiabatic diesels in vehicle propulsion; $490,000 for methanol work in alternative fuels utilization; $250,000 for the EXT–II propulsion system in electric vehicles; $140,000 for the transportation energy data book in transportation systems utilization; $3,000,000 for grant monitoring as a separate line item; $250,000 for materials and $200,000 for combustion in ECUT; $300,000 for innovation grants in the inventors program; and $962,000 for the use of prior year balances.

The managers agree that:

1. $250,000 added for lighting in technology and consumer products may be used for any lighting research.

2. Battery research in electric vehicles shall include research on lithium-metal sulfide batteries.

3. Funding beyond Phase I of the program for fuel cell/battery hybrid buses will not be

considered without assured private sector cost-sharing in future phases.

4. The total amount of schools and hospitals administrative expense funds shall be allocated to States based on the provisions of part G of title III of the Energy Policy and Conservation Act (42 U.S.C. 6371 et seq.), shall not exceed the statutory limit of 5 percent of grant funds, shall be subject to the matching provisions of 10 CFR 455.83 (a) and (c), and shall remain available to each State for administering Exxon funds in a subsequent year if not fully utilized in fiscal year 1987.

5. $1,200,000 of weatherization funds shall be provided to Indian tribes. The remaining $109,000,000 is available for grants to States. In combination with other funds, such as funds from the Exxon settlement, no more than 10 percent may be used for administrative expenses, as provided by law.

6. Support for Argonne National Laboratory for fossil energy and conservation research in total shall be at levels equivalent to fiscal year 1986.

The managers agree that transfers of personnel and funds among conservation research and development program direction amounts for buildings and community systems, industrial conservation, transportation, and multi-sector are not considered reprogramming actions. Changes to these activities should appear, however, in the periodic update of the Department's "Base Table" submitted to the Committees.

Amendment No. 127: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: , *of which $10,000,000 shall be available for a grant for an energy demonstration and research facility at Tufts University when authorized by an Act of Congress: Provided, That award of such grant may be made only upon approval of an appropriate technical review panel convened by the Department of Energy for the specific purpose of reviewing such grant application and subject to conditions, if any, contained in legislation authorizing such project, and of which $112,450,000 for the Weatherization Assistance Program authorized by Part A of the Energy Conservation in Existing Buildings Act of 1976 (42 U.S.C. 6861 et seq.) and the Institutional Conservation Program authorized by Part G of title III of the Energy Policy and Conservation Act (42 U.S.C. 6371 et seq.) shall be available effective March 1, 1987, only in such sums (up to a total of $112,450,000) as are equal to the difference between $200,000,000 and the excess amount for fiscal year 1987 disbursed by the Secretary of Energy for use in energy conservation programs under the provisions of section 3003(d) of subtitle A of title III of the conference agreement on H.R. 5300, the Omnibus Budget Reconciliation Act of 1986, or equivalent legislation enacted into law by March 1, 1987: Provided further, That if no such legislation is enacted into law by March 1, 1987, effective such date, such sums ($112,450,000) shall be immediately available to be derived from amounts held administratively in escrow by the Secretary of Energy pending restitution for actual or alleged petroleum product violations under the Emergency Petroleum Allocation Act of 1973 or the Economic Stabilization Act of 1970 (and the regulations issued thereunder)*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides that funding for an energy demonstration and research facility at Tufts University is contingent on authorization legislation and upon approval of an appropriate technical review panel convened by the Department.

The amendment also provides that appropriations of $112,450,000 for weatherization and schools and hospitals are contingent on a determination by the Secretary of Energy that "excess" funds derived from oil product escrow funds are less than $200,000,000. The conference agreement on the Budget Reconciliation Act of 1986 provides that up to $200,000,000 from product escrow amounts held by the Department of Energy under procedures established by budget reconciliation legislation shall be made available for State energy conservation programs, including weatherization and schools and hospitals, as long as enough funds remain in escrow for restitution to injured parties. Only amounts that equal the difference between $200,000,000 and the "excess" amount would be appropriated, provided the excess is less than $200,000,000. If "excess" funds are more than $200,000,000, the appropriation does not take effect.

The amendment also states that if such legislation does not pass by March 1, 1987, the full amount of $112,450,000 shall become available from amounts held administratively in escrow by the Secretary of Energy.

Amendment No. 128: Provides that $2,000,000 be available for a cost-shared research program instead of $2,500,000 as proposed by the House and nothing as proposed by the Senate, and deletes a limitation proposed by the House that none of the funds be used to gather industrial energy use data.

Language is included in the bill continuing cost-sharing provisions for the steel research and development program established in fiscal year 1986.

The managers agree that the annual Federal commitment of about $7,500,000 for the steel initiative is a reasonable target but, because of the availability of funds previously deferred, only $2,000,000 is required in fiscal year 1987 to meet that commitment.

The managers agree to delete House language repealing industrial reporting requirements of the Energy Policy and Conservation Act because the repeal is included in budget reconciliation legislation.

SPR petroleum account

Amendment No. 129: Appropriates no funds for purchase of petroleum for the Strategic Petroleum Reserve instead of $220,000,000 and a requirement to fill the Reserve at 75,000 barrels a day as proposed by the House. Approximately $550,000,000 available from unobligated balances for oil purchases would allow for filling the Reserve in fiscal year 1987 at up to 90,000 barrels a day at prices of $16.45 a barrel, including transportation.

The managers have agreed to delete bill language on minimum rates of fill for the Reserve because minimum rates are included in budget reconciliation legislation.

Energy Information Administration

Amendment No. 130: Appropriates $60,301,000 for the Energy Information Administration instead of $60,361,000 as proposed by the House and $59,651,000 as proposed by the Senate. The reduction of $60,000 below the House amount is for the Foreign Energy Supply Assessment.

The managers agree that annual reports of the financial performance of major energy producing companies should be based on available publicly reported information, instead of information independently gathered for that purpose, such as on form EIA-28.

Amendment No. 131: Deletes House language mandating a manufacturing energy survey as proposed by the Senate because it is included in budget reconciliation legislation.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Indian health services

Amendment No. 132: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $841,809,000 for Indian health services instead of $836,336,000 as proposed by the House and $833,106,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The net increase over the amount proposed by the Senate consists of decreases of $305,000 for direct operations and $147,000 for two urban health demonstration projects; and increases of $407,000 for mandatory costs in hospitals and health clinics, $1,000,000 to expand the model diabetes program, $2,500,000 for tribal contracting costs, $93,000 for dental health, $55,000 for mental health, $1,300,000 for alcoholism prevention programs, $2,000,000 for community health representatives, $200,000 for urban health programs, and $1,600,000 for health manpower.

In addition to the alcoholism prevention and fetal alcohol syndrome (FAS) programs proposed by the House, the Indian Health Service should use base resources in the alcoholism program to implement the recommendations contained in the recent review of the alcohol and substance abuse programs. In the FAS program, $100,000 is provided for the University of Washington research program.

Of the amount provided for direct operations, $600,000 is to provide salary costs for personnel transferred to the Indian Health Service and $600,000 is for the management fellowship program.

Prior to implementation of any changes in eligibility, the managers direct that a summary of the major issues raised during the comment period and how IHS has responded to them be provided to the Committees on Appropriations for review.

The Indian Health Service should continue to advise the Committees of any shortfalls in tribal contracting and what steps are being taken to meet these costs.

The new policy covering contract care payments should be implemented on an area-by-area basis and IHS should continue working with the tribes to ensure that needed health services are provided. A report on the costs of the new system, as well as cost savings realized by the program should be presented to the Committees on Appropriations once sufficient data is compiled.

The managers agree that the staffing levels provided for the Kanakanak, AK hospital shall be sufficient to ensure a deficiency rate no greater than 11 percent.

The health manpower program includes $240,000 for the MPH program and $323,000 for INMED.

Amendment No. 133: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which establishes a Catastrophic Health Care Fund.

Indian health facilities

Amendment No. 134: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $65,555,000 for Indian health facilities instead of $54,921,000 as proposed by the House and $60.920,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The net increase over the amount recommended by the Senate includes increases of $807,000 for planning and design of the Harlem, MT health center; $428,000 for planning and design of the Fort Hall, ID health clinic, and $5,000,000 for sanitation facilities; and decreases of $100,000 to new and replacement hospitals, and $1,500,000 for the ventilation project at the Mount Edgecumbe, AK hospital. The managers direct that the Mount Edgecumbe project is to be accomplished with $1,500,000 of available unobligated balances in this account.

With regard to the Parker, AZ outpatient health clinic, the IHS is directed to perform an engineering analysis, within available funds, to determine the condition of the existing Parker health center, including structural, mechanical and electrical systems, and report to the Committee prior to the fiscal year 1988 hearings.

Within funds appropriated for the Rosebud hospital, the IHS is directed to enclose totally the third floor of the facility.

The managers agree that the IHS should provide a new temporary facility of 2,600 square feet at Sisseton, SD, within available funds.

Amendment No. 135: Deletes language proposed by the House regarding allocation of resources.

Although bill language regarding changes in allocation methodology, as proposed by the House, has not been included, the managers agree that any allocation using the new Area Resource Allocation Methodology (ARAM) shall follow the general outline of the report, dated August 11, 1986, as submitted to the House and Senate Appropriations Committees. In no case should the allocation affect more than three percent of the base resources of the IHS for fiscal year 1987, unless the IHS submits a report to the Committees sixty days in advance on the proposed changes in excess of three percent, including the reason for the proposed changes and the likely effects. The report should also include a statement certifying that the IHS has held consultations regarding the proposed allocation of base resources with all Indian tribes or tribal organizations affected by the proposed allocation. The managers recognize the importance of continued tribal participation in development of the new ARAM methodology, both on policy matters and on technical issues, and direct IHS to continue to provide tribes with the most current information on ARAM, consult with tribes, and consider their views carefully. As major developments in ARAM occur, IHS should continue its practice of holding national and area workshops that will both inform tribes and provide a vehicle for consideration.

Amendment No. 136: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which allows for exchange of land in Anchorage and Kotzebue, AK, as proposed by the Senate.

The managers agree that the provisions set forth in Public Law 96-126 restricting authority for initial leasing of permanent structures by the Indian Health Service shall not apply whenever such arrangements are completed in accordance with established General Services Administration procedures (for space to be occupied by Federal employees).

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Indian education

Amendment No. 137: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted, insert the following: *and on the condition that funds appropriated for fiscal year 1987 under this or any other Act to carry out part A of title IV of Public Law 92-318 (Indian Education Act) shall be distributed under the same proof of eligibility requirements as applied in fiscal year 1986, $64,036,000*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Appropriates $64,036,000 instead of $67,236,000 as proposed by the House and $62,000,000 as proposed by the Senate.

Bill language has been included as proposed by the House in H.J. Res. 738 which prohibits the Department of Education from implementing eligibility requirements for the Part A Indian Education program in fiscal year 1987. This language ensures that school districts have adequate time to review any new eligibility requirements before they are forced to include them in their grant requests to the Department of Education.

The allowance includes a reduction of $198,000 from the House level for administration.

Amendment No. 138: Provides $47,200,000 for Part A instead of $50,021,000 as proposed by the House and $46,832,000 as proposed by the Senate. The change over the amount proposed by the Senate includes an increase of $368,000 for Part A for Indian controlled schools.

Amendment No. 139: Provides $14,568,000 for Parts B and C instead of $14,749,000 as proposed by the House and $12,900,000 as proposed by the Senate. The change over the amount proposed by the Senate includes increases of $261,000 for Part B fellowships; $1,845,000 for Part B projects for Indian children; and $62,000 for Part B educational personnel development. The offsetting decrease is $500,000 from Part B planning, pilot and demonstration.

Navajo and Hopi Indian Relocation Commission

Salaries and Expenses

Amendment No. 140: Appropriates $22,335,000 as proposed by the Senate instead of $22,289,000 as proposed by the House.

The managers agree that district six evictees are eligible to relocate to the new lands.

Amendment No. 141: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following: *has already received one new or replacement home, which is the maximum entitlement for a household certified as eligible, or who has not yet received relocation benefits and who*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree that the Commission has not implemented relocation as efficiently as Congress expected. Therefore, relocation has taken longer than envisioned. While the managers remain committed to full implementation of the relocation program and to the return of the Hopi Partitioned Lands to the Hopi tribe, the managers feel that the Congress must deal with the entire problem, rather than attacking it in a piecemeal fashion.

Bill language has been included which states that there will be no eviction of those on the Hopi Partitioned Land who have not been provided a new or replacement home. In addition, language has been included which states that only one new or replacement home will be provided to relocatees. It is not the intent of the managers to allow migration back to the Hopi Partitioned Land. Funds have been provided to the Commission and the Bureau of Indian Affairs to move forward with the development of the new lands so that relocation may proceed. Therefore, if the managers learn of a problem of resettlement back to the Hopi Partitioned Land by those who have already relocated, this problem will be addressed in the supplemental appropriations bill.

Amendment No. 142: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum stricken and inserted by said amendment, insert the following: *such sums as may be necessary*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have not included bill language limiting the amount which may be spent for contracted attorney's fees. Nonetheless, it is the understanding of the managers that these expenditures will be reduced due to the approval of an on-staff legal position and by the Commission's compliance with the recommendations contained in the Inspector General's report.

Amendment No. 143: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided further, That the Commission shall relocate any certified eligible relocatees who have selected and received an approved homesite on the Navajo reservation or selected a replacement residence off the Navajo reservation or on the land acquired pursuant to 25 U.S.C. 640d-10: Provided further, That for certified eligible households for whom a benefit level has not been determined, such level shall hereafter be determined consistent with the interpretation of 25 U.S.C. 640d-14 issued by the Solicitor of the Department of the Interior on August 25, 1986*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have included language stating that the Commission shall relocate any certified eligible relocatees who have selected and received an approved homesite on the Navajo reservation or on the new lands or selected a replacement residence off the Navajo reservation.

Language has also been included which states that for those certified eligible households for whom a benefit level has not been determined such level shall hereafter be determined consistent with the interpretation of 25 U.S.C. 640d-14 issued by the Solicitor of the Department of the Interior on August 25, 1986.

Bill language earmarking funds for post-move counseling and the Office of Policy and Direction has not been included. Sufficient funds for counseling have been provided to the Bureau of Indian Affairs for this purpose.

Amendment No. 144: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter inserted by said amendment, insert the following:

The Commission shall review the eligibility of all households certified as eligible who have not received relocation benefits and shall decertify any household which was certified contrary to law or regulation: Provided, That those who are decertified are to be provided the opportunity to appeal that decision in accordance with 25 CFR 700.305.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Language is included which requires the Commission to review the eligibility of all households certified as eligible and decertify those who have been certified contrary to law or regulation. Those decertified are to be given the opportunity to appeal this decertification before an administrative law judge.

SMITHSONIAN INSTITUTION

Salaries and Expenses

Amendment No. 145: Appropriates $183,920,000 for salaries and expenses instead of $189,318,000 as proposed by the House and $180,550,000 as proposed by the Senate.

The net decrease below the amount proposed by the House consists of increases of $200,000 for equipment for the hospital at the National Zoological Park, $75,000 for the Sackler Gallery, $6,000 for the Museum of African Art, $10,000 for Public Service, $15,000 for the Office of Exhibits Central, $300,000 for the Conservation Analytical Laboratory, $100,000 for International activities, and $500,000 for acquisition and conservation of the Duke Ellington Collection; and decreases of $150,000 for computer equipment for the Smithsonian Astrophysical Observatory, $60,000 for research at the Museum of Natural History, $137,000 for research at the Smithsonian Tropical Research Institute, $1,012,000 related to the closure of the Environmental Research Center's Rockville facility, $25,000 for research at the Cooper-Hewitt Museum, $60,000 for the inventory of sculpture, $772,000 for the National Museum Act, $300,000 for collection management and inventory, $431,000 for moving costs of the Museum Support Center (MSC), $1,500,000 for MSC equipment, $115,000 for postage, $216,000 for telephone services, $116,000 for rent, $710,000 for inflation, and $1,000,000 for Quadrangle support.

The decrease to the Environmental Research Center includes a transfer of $862,000 to the renovation account for the Edgewater, MD facility.

In agreeing to terminate funding for the National Museum Act, the managers have provided an increase of $300,000 to the Conservation Analytical Laboratory to provide increased training in the field of conservation.

The managers agree that future support for moving costs related to the Museum Support Center should come from base resources of the Smithsonian.

The remainder of the $500,000 not required for acquisition of the Duke Ellington collection shall be applied to conservation of the collection.

A reduction of $1,000,000 and 25 positions has been applied to the request for activities associated with the Quadrangle. The Smithsonian may allocate the reduction to lower priority activities.

The managers request reports from the Smithsonian examining ways to increase curatorial and exhibition functions of the Museum of Natural History and on all public programs and outreach activities. These reports should be available prior to hearings on the fiscal year 1988 budget.

The managers agree that within existing resources the Smithsonian should support activities associated with the International Space Year.

Construction and improvements, National Zoological Park

Amendment No. 146: Appropriates $2,500,000 as proposed by the Senate.

Restoration and renovation of buildings

Amendment No. 147: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment which appropriates $12,975,000 instead of $12,113,000 as proposed by the House and $12,028,000 as proposed by the Senate. The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The increase of $862,000 over the amount proposed by the House is for construction at Edgewater, MD. The managers direct the Smithsonian to redirect $1,325,000 from other restoration and renovation projects of lower priority, and not related to health and safety, in order to accomplish the PCB removal project over a two year period. Together with the $475,000 included in the budget request, this will provide a total of $1,800,000 for this project in fiscal year 1987.

The managers agree that major renovation projects, such as that proposed for the Arts and Industries building, estimated to cost $24,000,000, and for the Museum of Natural History, estimated at $55,000,000, should be presented to the authorizing committees for review prior to requests for appropriations.

The funds for the dormitory project at Naos in Panama have been deferred, pending review of the report requested by the House.

Construction

Amendment No. 148: Restores language proposed by the House and deletes language inserted by the Senate describing the Tropical Research Institute.

Amendment No. 149: Appropriates $6,095,000, as proposed by the House instead of $6,130,000 as proposed by the Senate.

The managers agree that the Smithsonian is to maintain the fifty-fifty match of Federal/non-Federal funding in completing construction of the Quadrangle.

WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

Salaries and expenses

Amendment No. 150: Appropriates $3,322,000 for salaries and expenses instead of $3,383,000 as proposed by the House and $3,138,000 as proposed by the Senate. The increase of $184,000 over the amount proposed by the Senate is a result of an increase of $200,000 for conference planning and offsetting decreases of $8,000 for scholar support and $8,000 for general administration.

Endowment challenge fund

Amendment No. 151: Appropriates no funds for the Endowment Challenge Fund as proposed by the House instead of $300,000 as proposed by the Senate.

The purpose of the endowment was to raise general funds for the Center rather than specific funds for planned conferences and events. Therefore, funds raised for individual regional programs do not constitute a match for the Endowment Challenge Fund. Funds raised after October 1, 1985 can be considered as matching funds for the Federal appropriations provided for this purpose in fiscal year 1986.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Grants and administration

Amendment No. 152. Appropriates $136,661,000 as proposed by the House instead of $132,950,000 as proposed by the Senate. This includes $15,900,000 for administrative programs as proposed by the House instead of $16,000,000 as proposed by the Senate.

The managers agree on the following allocation of funds:

Program grants:	
Artists-in-Schools	$5,300,000
Dance	8,847,000
Design Arts	4,276,000
Expansion Arts	6,655,000
Folk Arts	2,982,000
Inter Arts	3,885,000
Literature	5,100,000
Media Arts	12,000,000
Museums	11,400,000
Music	12,236,000
Opera/Musical Theatre	4,200,000
Locals Test	2,180,000
Theatre	10,800,000
Visual Arts	6,200,000
Advancement	200,000
Subtotal, program grants	96,261,000
State Programs	24,500,000
Subtotal, grants	120,761,000
Administration area:	
Policy Planning and Research	1,000,000
Administration	14,900,000
Subtotal, administrative area	15,900,000
Total, grants and administration	136,661,000

The $12,000,000 for the media program continues the 1986 initiative to increase resources for television and radio programming in the arts.

Amendment No. 153: Deletes House bill language restricting reprogrammings.

Matching grants

Amendment No. 154: Appropriates $28,420,000 instead of $29,000,000 as proposed by the House and $27,000,000 as proposed by the Senate. This includes $20,000,000 for challenge grants and $8,420,000 for Treasury funds.

Amendment No. 155: Earmarks $20,000,000 for challenge grants instead of $20,580,000 as proposed by the House and $18,000,000 as proposed by the Senate.

National Endowment for the Humanities

Grants and administration

Amendment No. 156: Appropriates $109,990,000 instead of $110,141,000 as proposed by the House and $107,700,000 as proposed by the Senate. This includes $95,790,000 for program and state grants as proposed by the House instead of $93,500,000 as proposed by the Senate; and $14,200,000 for administrative areas as proposed by the Senate. The managers agree on the following allocation of funds:

Program grants:	
Media Grants	$8,900,000
Museums and Historical Organizations	8,780,000
Humanities programs for adults	2,000,000
Humanities projects in libraries	2,900,000
Education programs	16,350,000
Fellowships and seminars	15,460,000
Research grants	16,400,000
Subtotal, program grants	70,790,000
State programs	21,000,000
Office of Preservation	4,000,000
Subtotal, grants	95,790,000
Administrative area: Administration	14,200,000
Total, grants and administration	109,990,000

Amendment No. 157: Deletes House bill language restricting reprogramming.

Matching grants

Amendment No. 158: Appropriates $28,500,000 as proposed by the House instead of $29,000,000 as proposed by the Senate. This includes $12,000,000 for Treasury funds and $16,500,000 for challenge grants.

National Capital arts and cultural affairs

Amendment No. 159: Appropriates $4,000,000 as proposed by the Senate instead of $3,500,000 as proposed by the House.

Amendment No. 160: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided, That Public Law 99-190 (99 Stat. 1261) is amended under this heading as follows:*

(1) in the first paragraph, strike the words "which are engaged primarily in" and insert in lieu thereof "whose primary purpose is",

(2) in the second paragraph, strike the words "an annual operating budget" and insert in lieu thereof "annual income, exclusive of Federal funds,",

(3) in the fourth paragraph, strike the words "operating budget" and insert in lieu thereof "annual income, exclusive of Federal funds,", and

(4) in the fourth paragraph, strike the words "operating budgets" and insert in lieu thereof "annual income, exclusive of Federal funds,"

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have deleted language proposed by the House limiting grants to certain organizations. New language has been included to clarify the original authorization by setting total non-Federal income of at least $1,000,000 annually for a period of three years as a condition of eligibility.

Amendment No. 161: Deletes language proposed by the House limiting implementation of portions of the authorization.

INSTITUTE OF MUSEUM SERVICES

Amendment No. 162: Appropriates $21,250,000 for grants and administrations instead of $21,394,000 as proposed by the House and $18,888,000 as proposed by the Senate. The managers agree to the following distribution of the funds:

Operating support grants	$16,962,000
Conservation grants	3,400,000
Museum Services Board	58,000
Program administration	830,000
Total	21,250,000

Amendment No. 163: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which restricts the Museum Services Board to no more than three meetings during fiscal year 1987.

COMMISSION OF FINE ARTS

Salaries and expenses

Amendment No. 164: Appropriates $450,000 for salaries and expenses as proposed by the Senate instead of $420,000 as proposed by the House.

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

Salaries and expenses

Amendment No. 165: Appropriates $2,397,000 for salaries and expenses instead of $2,342,000 as proposed by the House and $2,437,000 as proposed by the Senate.

Public development

Amendment No. 166: Appropriates $3,924,000 for public development as proposed by the Senate instead of $3,869,000 as proposed by the House.

UNITED STATES HOLOCAUST MEMORIAL COUNCIL

Holocaust Memorial Council

Amendment No. 167: Appropriates $2,040,000 as proposed by the House instead of $2,057,000 as proposed by the Senate.

The difference from the amount proposed by the Senate consists of reductions of $35,000 for museum development and $1,000 for travel which are offset by increases of $70,000 for the archive project with the National Archives. The managers agree to restore $65,000 of the funds reduced by the House for staff positions which is a reduction of $51,000 from the Senate level. These funds are to be used by the Council to hire a chief financial officer who is to implement the recommendations outlined in the August 25, 1986 Touche Ross report.

Amendment No. 168: Deletes House provision, as proposed by the Senate, which would have made reimbursement for travel subject to approval by the Chairman of the Council.

Amendment No. 169: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows: *: Provided further, That the Chairman of the Council may waive any Council bylaw when the Chairman determines such waiver will be in the best interest of the Council: Provided further, That immediately after taking such action the Chairman shall send written notice to every voting member of the Council and such waiver shall become final if 30 days after the Chairman has sent such notice, a majority of Council members do not disagree in writing with the action taken*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment gives the Chairman of the Council authority to waive any bylaw when the Chairman determines it to be in the best interest of the Council. This waiver may take effect, if after 30 days written notice, a majority of council members do not object to the action of the Chairman.

TITLE III—GENERAL PROVISIONS

Amendment No. 170: Deletes House language, as proposed by the Senate, which required regulations promulgated by the Secretary of the Interior to be consistent with existing regulations promulgated by the Secretary of Agriculture.

Amendment No. 171: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

Sec. 314. Not to exceed $500,000 appropriated or made available under this or any other Act may be used by the executive branch for soliciting proposals, preparing or reviewing studies or drafting proposals designed to aid in or achieve the transfer out of Federal ownership, management or control in whole or in part the facilities and functions of Naval Petroleum Reserve Numbered 1 (Elk Hills), located in Kern County, California, established by Executive order of the President, dated September 2, 1912, and Naval Petroleum Reserve Numbered 3 (Teapot Dome), located in Wyoming, established by Executive order of the President, dated April 30, 1915: Provided, That a report on any such studies shall be submitted to the Speaker of the House of Representatives and the President of the Senate no later than June 30, 1987.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment provides up to $500,000 for studying the sale of the Naval Petroleum Reserves and requires a report to Congress on such studies by June 30, 1987.

Amendment No. 172: Deletes House language, as proposed by the Senate, which would have provided that Section 1013 of the Budget Impoundment Control Act, dealing with deferrals, shall not apply to funds in this appropriation.

Amendment No. 173: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede

and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment insert: *Sec. 315.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment includes language, as proposed by the Senate, stating that funds shall be available to the Trust Territory of the Pacific Islands on the same basis as in fiscal year 1986 until alternative funding is available under the terms of the Compact of Free Association.

Amendment No. 174: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 316.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment includes language as proposed by the Senate stating that any lease within the Gallatin and Flathead National Forests affected by Case CV-82-42-BU in the U.S. District Court for Montana is excepted from the limits on aggregate acreage set out in previous law.

Amendment No. 175: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 317.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment includes language as proposed by the Senate preventing enforcement of regulations of the U.S. Fish and Wildlife Service requiring the use of steel shot in any State unless State regulatory authorities approve implementation.

Amendment No. 176: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 318.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment includes language providing a one-year extension for negotiating biomass energy loan guarantees with projects previously submitted to the Department of Energy as proposed by the Senate.

Amendment No. 177: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the section number named in said amendment, insert: *Sec. 319.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The amendment includes language as proposed by the Senate reducing the amount of townships the Cook Inlet Region, Incorporated in Alaska, may select outside its region from 10 to 7, which entitles the Corporation to receive bidding credits on surplus Federal property.

Amendment No. 178: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

Sec. 320. To assure that National Forest and Bureau of Land Management timber included in sales defaulted by the purchaser, or returned under the Federal Timber Contract Payment Modification Act (Public Law 98-478), is available for resale in a timely manner, such sales shall be subject only to one level of administrative appeal. This limitation shall not abridge the right of judicial review. Actions on such administrative appeals should be completed within 90 days of receipt of the notice of appeal. Sales that are reoffered shall be modified, including minor additions or deletions, as appropriate, to reduce adverse environmental impacts, pursuant to current land management plans and guidelines, and such modifications in themselves should not be construed to require the preparation of new or supplemental environmental assessments. This section shall not apply to any decision on the determination of damages due to the Government for defaulted or canceled contracts.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers have agreed to include modified Senate language which limits administrative appeals to one level of appeal on all returned or defaulted timber sales within the Forest Service and Bureau of Land Management. The modified language retains opportunities for judicial review. The agencies should complete action on such appeals within 90 days whenever possible, but may, at their discretion, extend the deadline for completion of such action. The managers make no attempt to prejudge the nature, cause, basis or standing of an administrative appeal brought before the agencies on returned or defaulted timber sales; however, because of the heavy reliance on such sales in this year's timber sales program, and because of the importance of a timely and stable sales program, administrative appeals shall be limited to one level of appeal within the respective agencies.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1987 recommended by the Committee of Conference, with comparisons to the fiscal year 1986 amount, the 1987 budget estimates, and the House and Senate bills for 1987 follow:

New budget (obligational) authority, fiscal year 1986	$8,210,987,000
Budget estimates of new (obligational) authority, fiscal year 1987	6,617,320,000
House bill, fiscal year 1987	8,151,795,000
Senate bill, fiscal year 1987	7,855,704,000
Conference agreement, fiscal year 1987	8,333,076,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1986	+122,089,000
Budget estimates of new (obligational) authority, fiscal year 1987	+1,715,756,000
House bill, fiscal year 1987	+181,281,000
Senate bill, fiscal year 1987	+477,372,000

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION AUTHORIZATION ACT, 1987

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 5495) to authorize appropriations to the National Aeronautics and Space Administration, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment and the House amendment to the Senate amendment, as follows:

Senate amendment: strike out all after the enacting clause and insert:

That this Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1986".

Sec. 2. There is authorized to be appropriated to the National Aeronautics and Space Administration to become available October 1, 1986:

(a) For "Research and development", for the following programs:

(1) Space station, $410,000,000;

(2) Space transportation capability development, $515,500,000;

(3) Physics and astronomy, $529,400,000;

(4) Life sciences, $74,300,000;

(5) Planetary exploration, $374,300,000;

(6) Space applications, $552,600,000;

(7) Technology utilization, $13,300,000;

(8) Commercial use of space, $27,000,000;

(9) Aeronautical research and technology, $376,000,000;

(10) Transatmospheric research and technology, $40,000,000;

(11) Space research and technology, $183,200,000; and

(12) Tracking and data advanced systems, $17,100,000.

(b) For "Space flight, control and data communications", for the following programs:

(1) Space shuttle production and operational capabilitly, $783,800,000;

(2) Space transportation operations, $1,350,700,000; and

(3) Space and ground network, communications and data systems, $860,900,000.

(c) For "Construction of facilities", including land acquisition, as follows:

(1) Construction of addition to Orbiter Processing Facility Annex, John F. Kennedy Space Center, $3,400,000;

(2) Construction of addition to the Systems Integration and Mockup Laboratory, Johnson Space Center, $5,000,000;

(3) Construction of Central Computing Facility, Johnson Space Center, $9,000,000;

(4) Modifications to Test Stand 300 for Space Station Hydrogen/Oxygen Propulsion Systems Development, George C. Marshall Space Flight Center, $2,100,000;

(5) Construction of Spacecraft Systems Development and Integration Facility, Goddard Space Flight Center, $8,000,000;

(6) Construction of Engineering Support Building, Jet Propulsion Laboratory, $9,800,000;

(7) Modification of Uninterruptible Power System in Space Flight Operations Facility, Jet Propulsion Laboratory, $2,600,000;

(8) Construction of Human Performance Research Laboratory, Ames Research Center, $9,400,000;

(9) Construction of Integrated Test Facility, Dryden Flight Research Facility, $17,500,000;

(10) Modifications to 8-Foot High Temperature tunnel, Langley Research Center, $9,700,000;

(11) Construction of addition for Non-Destructive Evaluation Research Laboratory, Langley Research Center, $2,000,000;

(12) Construction of Power Systems Facility, Lewis Research Center, $5,800,000;

(13) Construction of the Second Tracking and Data Relay Satellite System Ground Terminal Facility, New Mexico, $22,000,000;

(14) Repair of facilities at various locations, not in excess of $750,000 per project, $24,000,000;

(15) Rehabilitation and modification of facilities at various locations, not in excess of $750,000 per project, $30,000,000;

(16) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $500,000 per project, $7,000,000; and

(17) Facility planning and design not otherwise provided for, $14,000,000.

Notwithstanding paragraphs (1) through (17) of this subsection, the total amount authorized by this subsection shall not exceed $161,300,000.

(d) For "Research and program management," $1,425,000,000.

(e) Notwithstanding the provisions of subsection (h), appropriations authorized in this Act for "Research and development" and "Space flight, control and data communications" may be used for (1) any items of a capital nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator determines that the national program of aeronattical and space activities will best be served by vesting title in any such grantee institution or organization. Each such grant shall be made under such conditions as the Administrator shall determine to be required to ensure that the United States will receive therefrom benefit adequate to justify the making of that grant. None of the funds appropriated for "Research and development" and "Space flight, control and data communications" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $500,000, unless the Administrator or the Administrator's designee has notified the President of the Senate and the Speaker of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives of the nature, location, and estimated cost of such facility.

(f) When so specified and to the extent provided in an appropriation Act, (1) any amount appropriated for "Research and development," for "Space flight, control and data communications" or for "Construction of facilities" may remain available without fiscal year limitation, and (2) maintenance and operation of facilities and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of 12 months beginning at any time during the fiscal year.

(g) Appropriations made pursuant to subsection (d) may be used, but not to exceed $35,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator, and the Administrator's determination shall be final and conclusive upon the accounting officers of the Government.

(h) Of the funds appropriated pursuant to subsections (a), (b), and (d), not in excess of $100,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities: *Provided*, That, of the funds appropriated pursuant to subsection (a) or (b), not in excess of $500,000 for each project, including collateral equipment, may be used for any of the foregoing for unforeseen programmatic needs.

SEC. 3. Authorization is granted whereby any of the amounts prescribed in paragraphs (1) through (11) of section 2(c) of this Act—

(1) in the discretion of the Administrator or the Administrator's designee, may be varied upward 10 percent, or

(2) following a report by the Administrator or the Administrator's designee to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives on the circumstances of such action, may be varied upward 25 percent.

to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 4. Not to exceed one-half of 1 per cent of the funds appropriated pursuant to section 2 (a) or (b) of this Act may be transferred to and merged with the "Construction of facilities" appropriation, and when so transferred, together with $10,000,000 of funds appropriated pursuant to section 2(c) of this Act (other than funds appropriated pursuant to paragraph (12) of such section) shall be available for expenditure to construct, expand, and modify laboratories and other installations at any location (including locations specified in section 2(c)), if (1) the Administrator determines that such action is necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) the Administrator determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless a period of 30 days has passed after the Administrator or the Administrator's designee has transmitted to the President of the Senate and to the Speaker of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives a written report containing a full and complete statement concerning (a) the nature of such construction, expansion, or modification, (B) the cost thereof including the cost of any real estate action pertaining thereto, and (C) the reason why such construction, expansion, or modification is necessary in the national interest.

SEC. 5. Notwithstanding any other provision of this Act, no amount appropriated pursuant to this Act may be used for any program—

(1) deleted by the Congress from requests as originally made either to the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Science and Technology of the House of Representatives;

(2) in excess of the amount actually authorized for that particular program by section 2(a), (b), and (d); and

(3) which has not been presented to either such committee,

unless a period of 30 days has passed after the receipt by the President of the Senate and the Speaker of the House of Representatives and each such committee of notice given by the Administrator or the Administrator's designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

SEC. 6. The President shall, on the date of the submittal to the Congress of a budget for the National Aeronautics and Space Administration for fiscal year 1988, submit to the Congress budget estimates for the recommended level of program activity and subactivity funding for fiscal years 1989 and 1990 of a permanently manned space station.

SEC. 7. No civil space station authorized under section 2(a)(1) of this Act may be used to carry or place in orbit any nuclear weapon or any other weapon of mass destruction, to install any such weapon on any celestial body, or to station any such weapon in space in any other manner. This civil space station may be used only for peaceful purposes.

SEC. 8. It is the sense of the Congress that it is in the national interest that consideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 9. (a) Section 24 of the Commercial Space Launch Act (49 App. U.S.C. 2623) is amended by adding at the end thereof the following: "There is authorized to be appropriated to the Secretary to carry out this Act $1,120,000 for fiscal year 1987.".

(b) Section 5(a)(1) of the Commercial Space Launch Act (49 App. U.S.C. 2604(a)(1)) is amended to read as follows:

"(1) pursuant to authorization and subject to the availability of appropriations, encourage and facilitate commercial space launches by the private sectors, in consonance with the space policies of the United States as established in public law; and".

(c) Section 15(b) of the Commercial Space Launch Act (49 App. U.S.C. 2614(b)) is amended—

(1) by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(2) by inserting after paragraph (1) the following:

"(2) For purposes of paragraph (1), direct costs shall not include costs associated with meeting the space transportation needs of the United States. Notwithstanding the provisions of this paragraph, charges for the use of government payload processing facilities and associated services for commercial payloads shall continue to be based on the current full cost recovery standard.".

SEC. 10. The Administrator of the National Aeronautics and Space Administration shall review the proposed space agenda submitted by the National Commission on Space pursuant to title II of the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361; 98 Stat. 427) and recommended to the appropriate committees of the Congress a long-range plan to implement such proposed space agenda, including a specific agenda for the five-year period beginning on the date of enactment of this Act. Such recommendations shall be made not later than February 15, 1987.

SEC. 11. (a) The Administrator of the National Aeronautics and Space Administration shall prepare and submit to the Congress, not later than March 31, 1987, a comprehensive acquisition strategy and plan for the continued procurement of space shuttle solid rocket motors. Such strategy and plan shall specifically address (1) the decisions made by the Administrator regarding the motor design or designs, (2) alternatives for establishing and maintaining competition in the future procurements, and (3) costs and benefits of each such alternative.

(b) Upon completion of the solid rocket motor redesign and the upgraded motor evaluation efforts, and the determination of a safe and reasonable flight rate, but before signing or extending any production contract for follow-on solid rocket motors beyond those currently under contract, the Administrator shall (1) issue a request for proposal for a second source for a redesigned motor, or (2) issue a request for proposal for an upgraded motor.

(c) The Administrator shall determine whether a request to the Congress for second source qualification funding is necessary or desirable in order to permit the second source to compete with the incumbent on a fair and effective basis, consistent with the Competition in Contracting Act of 1984 (Public Law 98-369; 98 Stat. 1175).

(d) The Administrator shall consider the competitive advantages of the nozzle and solid rocket motor separately. No determination of the advantages of the second source of either the solid rocket motor or the nozzle shall preclude a judgment on the advantages of the other. In evaluating proposals received in response to the request for proposal issued pursuant to subsection (b) of this section, the Administrator shall consider costs and cost savings in accordance with applicable law.

(e) The comprehensive aquisition strategy and plan prepared under subsection (a) of this section and proposals for a second source for a redesigned motor under subsection (b) of this section shall apply to all modifications of the solid rocket motor that are intended for production.

(f) In addition to the requirements of subsection (b) of this section, the Administrator, before signing or extending any production contract for follow-on solid rocket motors beyond those currently under contract, shall notify the Congress of the number of additional solid rocket motors required in order to allow the space shuttle transportation system to continue to operate if a new contractor, selected pursuant to subsection (b)(1) or (2) of this section, is not able to provide any of such additional solid rocket motors. The Administrator shall not sign or extend any such contract until a period of 30 calendar days during which either House of Congress is in session has passed after the date of such notification.

(g) Nothing in this section shall be construed to direct the Administrator to select and qualify a second source or upgraded source of production for solid rocket motors if the proposals received pursuant to subsection (b)(1) of this section are inconsistent with the requirements of section 2304(b)(1) of title 10, United States Code, or if the proposals received pursuant to subsection (b)(2) of this section are inconsistent with the requirements of section 2304(a)(1) of title 10, United States Code.

SEC. 12. (a) It is the sense of the Congress that the United States must promptly restore its space transportation capabilities and such restoration must be accomplished without deemphasizing other space programs.

(b) The Administrator of the National Aeronautics and Space Administration is directed to take the necessary steps to return safely the space shuttle fleet to flight status.

(c) There are authorized to be appropriated for fiscal year 1987 $100,600,000 to carry out this section.

SEC. 13. (a)(1) The Administrator of the National Aeronautics and Space Administration shall promptly take such steps as may be necessary to construct a fourth space shuttle orbiter as a replacement for the space shuttle orbiter Challenger.

(2) There are authorized to be appropriated for fiscal year 1987 $272,000,000 to begin the construction required by paragraph (1) of this subsection.

(b) The Administrator shall explore the availability of private funding for construction of the replacement orbiter authorized by subsection (a) of this section. The Administrator shall accept private funding for such construction—

(1) if the Administrator finds that such private funding is available; and

(2) if the Administrator finds that such funding—

(A) is in the best interests of the United States; and

(B) results in no additional net costs to the Federal Government.

Private funding accepted under this subsection shall replace appropriated funding obligated or expended for such a replacement orbiter.

SEC. 14. (a) The Administrator of the National Aeronautics and Space Administration, in cooperation with the Secretary of Defense, and before July 1, 1987, shall submit to the Congress a five-year plan, to be updated annually and presented to Congress along with the President's annual budget request, setting forth—

(1) a schedule for planned reimbursements from the Department of Defense for space shuttle services; and

(2) a schedule for the provision of such services.

(b) There is authorized to be appropriated for fiscal year 1987 $531,000,000 as payment to the National Aeronautics and Space Administration for reimbursable services provided to the Department of Defense.

SEC. 15. (a) The space shuttle shall be the primary United States launch system for manned missions and missions needing its unique capabilities. The space shuttle shall also be available for other missions, including the launch of non-shuttle-unique foreign and commercial payloads, pursuant to the priorities specified in subsection (b)(2) of this section.

(b) The Administrator of the National Aeronautics and Space Administration shall make best efforts to develop a space shuttle launch manifest that—

(1) ensures that existing commitments of the National Aeronautics and Space Administration to its customers, including launch service agreements, are met within the priority constraints contained in paragraph (2) of this subsection; and

(2) reflects the following priorities (in descending order):

(A) Payloads deemed critical to the national security.

(B) Significant civil government missions, including those having limited launch opportunities.

(C) Government payloads other than those referred to in subpargraphs (A) and (B) of this paragraph.

(D) Payloads other than those referred to in subparagraphs (A) through (C) of this paragraph, including foreign and commercial payloads.

(c) The Administrator shall submit the current flight manifest to the Congress reflecting the priorities contained in this section not later than November 1, 1986. The Administrator shall keep the Congress fully and currently informed of the status of the flight manifest.

SEC. 16. (a) It is the sense of the Congress that the shuttle pricing policy established in title II of the National Aeronautics and Space Administration Authorization Act of 1986 (Public Law 99-170; 99 Stat. 1017) remains valid and should be implemented so as to assure reliable access to space for all United States space users.

(b) In the report required by title II of such Act submitted with the budget request for fiscal yaer 1988, the Administrator of the National Aeronautics and Space Administration shall include a description of how the Administrator's implementation of the pricing policy will accomplish the objectives of this section.

SEC. 17. (a) It is the sense of the Congress that in order to ensure reliable access to space, in order to meet national security, scientific, and commercial objectives of the United States space program, and in order to ensure that the United States does not conclude the commercial launch vehicle business to foreign competition, the United

States should utilize the capability of expendable launch vehicles as well as the space shuttle for placing government payloads into orbit.

(b) In order to meet the requirements of subsection (a) of this section, the Administrator of the National Aeronautics and Space Administration shall develop a plan for the purchase, through competitive procurement, of expendable launch vehicle services for the purpose of launching government payloads, as aggregated by the Administrator. The services purchased under this subsection shall be provided on a reimbursable basis.

(c) The Administrator shall report to the Congress on how the Administrator will carry out this section not later than February 15, 1987. Such report shall include—

(1) an estimate of expendable launch vehicle requirements for the five years following the date of enactment of this Act;

(2) an explanation of how the National Aeronautics and Space Administration intends to utilize expendable launch vehicle launches for future civil launch requirements, including but not limited to the availability of a commercial expendable launch vehicle capability, a National Aeronautics and Space Administration expendable launch vehicle capability, and a Department of Defense expendable launch vehicle capability;

(3) an explanation of how such utilization of expendable launch vehicles can be carried out in a manner which fosters the development of a competitive expendable launch vehicle industry;

(4) a proposed procurement plan for commercial expendable launch vehicle services for the five years following the date of enactment of this Act; and

(5) an estimate of the authorizations of appropriations that are necessary to procure launch services for United States Government satellites by expendable launch vehicles for fiscal year 1988 and the four succeeding fiscal years.

SEC. 18. (a) Congress finds that the National Aeronautics and Space Administration should take every action available to it to restore, to its previous standards of excellence, its commitment to quality assurance, reliability, and safety.

(b) The Administrator of the National Aeronautics and Space Administration shall identify as a separate item in the budget submitted by the President under section 1105 of title 31, United States Code, for any fiscal year, the number of individuals per facility of the National Aeronautics and Space Administration whose functions relate to quality assurance, reliability, and safety.

SEC. 19. (a) There is hereby established, in the Executive Office of the President, the National Aeronautics and Space Council (hereinafter called the "Council") which shall be composed of—

(1) the Vice President, who shall be Chairman of the Council;

(2) the Secretary of State;

(3) the Secretary of Defense;

(4) the Secretary of Transportation;

(5) the Secretary of Commerce;

(6) the Director of Central Intelligence; and

(7) the Administrator of the National Aeronautics and Space Administration, who shall be the Vice Chairman of the Council.

(b) The President shall from time to time designate one of the members of the Council to preside over meetings of the Council during the absence, disability, or unavailability of the Chairman.

(c) Each member of the Council may designate another officer of their department or agency to serve on the Council as their alternative in their unavoidable absence.

(d) Each alternate member designated under subsection (c) of this section shall be designated to serve as such by and with the advice and consent of the Senate unless at the time of such members' designation the member holds an office in the Federal Government to which the member was appointed by and with the advice and consent of the Senate.

(e) It shall be the function of the Council to advise and assist the President, as the President may request, with respect to the performance of functions in the aeronautics and space field, including the following functions:

(1) survey all significant aeronautical and space activities, including the policies, plans, programs, and accomplishments of the United States, including all departments and agencies of the United States engaged in such activities, and other nations;

(2) develop a comprehensive program of aeronautical and space activities to be conducted by departments and agencies of the United States;

(3) designate and fix responsibility for the direction of major aeronautical and space activities;

(4) provide for effective cooperation among all departments and agencies of the United States engaged in aeronautical and space activities, and specify, in any case in which primary responsibility for any category of aeronautical and space activities has been assigned to any department or agency, which of those activities may be carried on concurrently by other departments or agencies; and

(5) resolve differences arising among departments and agencies of the United States with respect to aeronautical and space activities under this Act, including differences as to whether a particular project is an aeronautical and space activity.

(f) The Council may employ a staff to be headed by a civilian executive secretary who shall be appointed by the President by and with the advice and consent of the Senate. The executive secretary, subject to the direction of the Council, is authorized to appoint and fix the compensation of such personnel, including not more than seven persons, as may be necessary to perform such duties as may be prescribed by the Council in connection with the performance of its functions. Each appointment under this subsection shall be subject to the same security requirements as those established for personnel of the National Aeronautics and Space Administration appointed under section 203(c)(2) of this Act. Other provisions of law or regulations relating to Government employment shall apply to employees of the Council reporting directly to the Chairman to the extent that such provisions are applicable to employees in the Office of the Vice President.

(g)(1) The Council shall establish a Users' Advisory Group composed of nine non-Federal representatives of industries and other persons involved in space activities.

(2) The Vice President shall name a Chairman of the Users' Advisory Group.

(3) The Council shall from time to time, but not less often than once a year, meet with the Users' Advisory Group.

(4) The functions of the Users' Advisory Group is to ensure than the interests of industries and other non-Federal entitites involved in space activities, including in particular commercial entities, are adequately represented in the Council.

(5) The Users' Advisory Group may be assisted by the staff of the Council.

SEC. 20. The Administrator of the National Aeronautics and Space Administration shall submit a report to the Congress by January 30, 1987, detailing the Administrator's actions to comply with Executive Order 12564.

SEC. 21. (a) The Congress finds and declares that—

(1) the implementation of the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4201 et seq.) has begun and some of the major milestones contained in such Act have been met;

(2) the Congress remains strongly committed to the guiding principles set forth in such Act;

(3) notwithstanding the accomplishments thus far, the relationships among the involved Federal agencies and the private sector have not been adequately defined; and

(4) inasmuch as the technical development and commercial applications of future land remote-sensing systems cannot now be predicted with certainty, it is in the national interest of the United States that the involved Federal agencies and the private sector remain flexible in carrying out their respective responsibilities under such Act.

(b) It is therefore the purpose of this section to set forth amendments to the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4201 et seq.) to ensure that—

(1) the original intent of such Act is carried out in the most effective manner consistent with the guiding principles expressed in such Act;

(2) specific mechanisms for carrying out the original intent of such Act are provided in those cases where none have materialized thus far; and

(3) the working relationships among involved Federal agencies and priviate sector parties for the purpose of carrying out such Act are fully developed and mutually understood.

(c) Section 202(a)(4) of the Land remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4212(a)(4)) is amended by inserting before the semi-colon the following: ", except in the case of research and development activities conducted in accordance with section 504".

(d) Title III of the Land Remote-Sensing Commercialization Act of 1984 (15 U.SC. 4221 et seq.) is amended by adding at the end thereof the following:

"DISPOSITION OF GOVERNMENT ASSETS

"SEC. 308. Following the completion of a contract made pursuant to this title, the Secretary may, upon 30 days advance notice to the Committee on Commerce, Science, and Transportation of the Senate and the Committee, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives, dispose of assets (other than real property) under the control of the Secretary in a manner which best ensures the continuation of the contractor's commercial activity.".

(e) Section 502 of the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C 4262) is amended to read as follows:

"RESEARCH AND DEVELOPMENT ACTIVITIES OF FEDERAL AGENCIES

"SEC. 502. Each Federal agency is authorized and encouraged to provide data gathered in experimental remote-sensing space

programs to related research and development programs funded by the Federal Government (including applications programs) and to cooperative research programs if the Federal agency involved determines that the data will not be used—

"(1) for any commercial purpose, or

"(2) in substantial competition with data available from a licensee under this Act,

except pursuant to section 503.".

(f) Title V of the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C 4261 et seq.) is amended by adding at the end thereof the following:

"RESEARCH AND DEVELOPMENT ACTIVITIES OF SYSTEM OPERATORS

"SEC. 504. Notwithstanding section 601, any system operator under title II, III, or IV, or any marketing entity under section 503, may provide data for research and development programs if—

"(1) a complete and timely disclosure of the results of such research and development is made in the open technical literature or is otherwise made publicly available;

"(2) the system operator or marketing entity provides to the Secretary an annual report of all research and development data transactions including the nature of any cooperative agreements and the prices charged for data; and

"(3) the data are not used for commercial purposes or in substantial competition with data available from a licensee under this Act.".

(g) Section 603 of the Land Remote-Sensing Commercialization Act of 1984 (15 U.S.C. 4273) is amended to read as follows:

"NONREPRODUCTION

"SEC. 603. In addition to such other terms and conditions as the system operator may set forth in compliance with section 601, the system operator may require that unenhanced data not be reproduced or disseminated by any foreign or domestic purchaser.".

SEC. 22. (a) There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its public warning and forecast service duties under law, $330,598,000 for fiscal year 1987. Moneys appropriated pursuant to this authorization shall be used to fund those duties relating to public warning and forecast specified by the Act entitled "An Act to increase the efficiency and reduce the expenses of the Signal Corps of the Army, and to transfer the Weather Service to the Department of Agriculture", approved October 1, 1890 (15 U.S.C. 311 et seq.), the Act entitled "An Act to define the functions and duties of the Coast and Geodetic Survey, and for other purposes", approved August 6, 1947 (33 U.S.C. 883a et seq.), and by any other law involving such duties. Such duties include meteorological, hydrological, and oceanographic public warnings and forecasts.

(b) Of the amount authorized to be appropriated by subsection (a) of this section, $45,500,000 is authorized to be appropriated only for activities related to the Next Generation Weather Radar Program. Such activities may include site surveys, preparation for production radars, limited radar production, initial operational test and evaluation of radars, training of personnel, release of long lead items for full production, award of the production contract, and land acquisition for radar sites.

SEC. 23. There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its atmospheric and hydrological research duties under law, $68,044,000 for fiscal year 1987. Moneys appropriated pursuant to this authorization shall be used to fund those duties relating to atmospheric and hydrological research specified by the Act entitled "An Act to increase the efficiency and reduce the expenses of the Signal Corps of the Army, and to transfer the Weather Service to the Department of Agriculture", approved October 1, 1890 (15 U.S.C. 311 et seq.,) and by any other law involving such duties. Such duties include research for developing improved prediction capabilities for atmospheric and hydrological processes.

SEC. 24. There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its satellite services duties under law, $72,606,000 for fiscal year 1987. Moneys appropriated pursuant to this authorization shall be used to fund those duties relating to satellite services specified by the Act entitled "An Act to increase the efficiency and reduce the expenses of the Signal Corps of the Army, and to transfer the Weather Service to the Department of Agriculture", approved October 1, 1890 (15 U.S.C. 311 et seq.), the National Aeronautics and Space Administration Authorization Act, 1985, approved July 16, 1984 (Public Law 98-361; 98 Stat. 422), and by any other law involving such duties. Such duties include satellite maintenance and operations and satellite data analysis.

SEC. 25. There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its satellite systems duties under laws, $168,139,000 for fiscal year 1987. Moneys appropriated pursuant to this authorization shall be used by the National Oceanic and Atmospheric Administration to purchase, launch and operate the most reliable polar-orbiting meteorological satellite system that is feasible, including a full complement of all present instruments in the afternoon orbit and a backup capability for additional reliability in the morning orbit. In addition, such moneys shall be used to fund those duties relating to satellite systems specified by the Act entitled "An Act to increase the efficiency and reduce the expenses of the Signal Corps of the Army, and to transfer the Weather Service to the Department of Agriculture", approved October 1, 1890 (15 U.S.C. 311 et seq.), the National Aeronautics and Space Administration Authorization Act, 1985, approved July 16, 1984 (Public Law 98-361; 98 Stat. 422), and by any other law involving such duties. Such duties include spacecraft procurement, launch, and associated ground station system changes involving polar-orbiting and geostationary environmenal satellites.

SEC. 26. There are authorized to be appropriated to the Department of Commerce to enable the National Oceanic and Atmospheric Administration to carry out its data and information services duties under law, $22,734,000 for fiscal year 1987. Moneys appropriated pursuant to this authorization shall be used to fund those duties relating to data and information services specified by the Act entitled "An Act to increase the efficiency and reduce the expenses of the Signal Corps of the Army, and to transfer the Weather Service to the Department of Agriculture", approved October 1, 1890 (15 U.S.C. 311 et seq.), and by any other law involving such duties. Such include environmental data and information products and services in the atmospheric, marine, solid earth, and solar-terrestrial sciences.

SEC. 27. (a) Section 2(d) of Reorganization Plan No. 4 of 1970 (5 U.S.C. App. I) is amended to read as follows:

"(d) There shall be in the Administration a Chief Scientist of the National Oceanic and Atmospheric Administration who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for Level V of the Executive Schedule Pay Rates (5 U.S.C. 5316). The Chief Scientist shall be the principal scientific adviser to the Administrator, and shall perform such other duties as the Administrator may direct. The Chief Scientist shall be an individual who is, by reason of scientific education and experience, knowledgeable in the principles of oceanic, atmospheric, or other scientific disciplines important to the work of the Administration.".

(b) Section 5315 of title 5, United States Code, is amended by striking "Associate Administrator, National Oceanic and Atmospheric Administration.".

(c) Section 5316 of title 5, United States Code, is amended by inserting at the end thereof the following:

"Chief Scientist, National Oceanic and Atmospheric Administration.".

House amendment to the Senate amendment: In lieu of the matter proposed to be inserted by the amendment of the Senate to the text of the bill, insert the following:

That this Act may be cited as the "National Aeronautics and Space Administration Authorization Act, 1987".

TITLE I—NASA AUTHORIZATION

SEC. 101. There is hereby authorized to be appropriated to the National Aeronautics and Space Administration, to become available October 1, 1986:

(a) For "Research and development", for the following programs:

(1) Permanently manned space station, $410,000,000.

(2) Space transportation capability development, $515,500,000.

(3) Physics and astronomy, $529,400,000.

(4) Life sciences, $74,300,000.

(5) Planetary exploration, $374,300,000.

(6) Solid earth observations, $74,100,000.

(7) Environmental observations, $313,900,000.

(8) Materials processing in space, $43,900,000.

(9) Communications, $99,500,000.

(10) Information systems, $21,200,000.

(11) Technology utilization, $13,300,000.

(12) Commercial use of space, $27,000,000.

(13) Aeronautical research and technology, $376,000,000.

(14) Transatmospheric research and technology, $40,000,000.

(15) Space research and technology, $183,200,000.

(16) Tracking and data advanced systems, $17,100,000.

(b) For "Space flight, control and data communication", for the following programs:

(1) Space shuttle production and operational capability, $783,800,000.

(2) Space transportation operations, $1,350,700,000.

(3) Space and ground networks, communication, and data systems, $860,900,000.

(c) For "Construction of facilities," including land acquisition, as follows:

(1) Construction of Central Computing Facility, Johnson Space Center, $9,000,000.

(2) Facilities for a permanently manned space station as follows:

(A) Construction of addition to the Systems Integration and Mockup Laboratory, Johnson Space Center, $5,000,000.

(B) Construction of Power Systems Facility, Lewis Research Center, $5,800,000.

(C) Modifications to Test Stand 300 for Space Station Hydrogen/Oxygen Propulsion Systems Development, George C. Marshall Space Flight Center, $2,100,000.

(3) Construction of addition to Orbiter Processing Facility Annex, John F. Kennedy Space Center, $3,400,000.

(4) Construction of Spacecraft Systems Development and Integration Facility, Goddard Space Flight Center, $8,000,000.

(5) Construction of Engineering Support Building, Jet Propulsion Laboratory, $9,800,000.

(6) Modification of Uninterruptible Power System in Space Flight Operations Facility, Jet Propulsion Laboratory, $2,600,000.

(7) Construction of Human Performance Research Laboratory, Ames Research Center, $9,400,000.

(8) Construction of Integrated Test Facility, Dryden Flight Research Facility, $17,500,000.

(9) Modifications to 8-Foot High Temperature Tunnel, Langley Research Center, $9,700,000.

(10) Construction of addition for Non-Destructive Evaluation Research Laboratory, Langley Research Center, $2,000,000.

(11) Construction of the Second Tracking and Data Relay Satellite System Ground Terminal Facility, New Mexico, $22,000,000.

(12) Repair of facilities at various locations, not in excess of $750,000 per project, $24,000,000.

(13) Rehabilitation and modification of facilities at various locations, not in excess of $750,000 per project, $30,000,000.

(14) Minor construction of new facilities and additions to existing facilities at various locations, not in excess of $500,000 per project, $7,000,000.

(15) Facility planning and design not otherwise provided for, $14,000,000.

In no case shall the total amount appropriated under paragraphs (1) through (15) exceed $161,300,000.

(d) For "Research and program management", $1,425,000,000.

(e) Notwithstanding the provisions of subsection (h), appropriations hereby authorized for "Research and development" and "Space flight, control and data communications" may be used (1) for any items of a captial nature (other than acquisition of land) which may be required at locations other than installations of the Administration for the performance of research and development contracts, and (2) for grants to nonprofit institutions of higher education, or to nonprofit organizations whose primary purpose is the conduct of scientific research, for purchase or construction of additional research facilities; and title to such facilities shall be vested in the United States unless the Administrator of the National Aeronautics and Space Administration (hereinafter in this Act referred to as the "Administrator") determines that the national program of aeronautical and space activities will best be served by vesting title in any such grantee institution or organization. Each such grant shall be made under such conditions as the Administrator shall determine to be required to ensure that the United States will receive therefrom benefit adequate to justify the making of that grant. None of the funds appropriated for "Research and development" and "Space flight, control and data communications" pursuant to this Act may be used in accordance with this subsection for the construction of any major facility, the estimated cost of which, including collateral equipment, exceeds $500,000, unless the Administrator or the Administrator's designee has notified the President of the Senate and the Speaker of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives of the nature, location, and estimated cost of such facility.

(f) When so specified and to the extent provided in an appropriation Act, (1) any amount appropriated for "Research and development", for "Space flight, control and data communications", or for "Construction of facilities" may remain available without fiscal year limitation, and (2) maintenance and operation of facilities and support services contracts may be entered into under the "Research and program management" appropriation for periods not in excess of twelve months beginning at any time during the fiscal year.

(g) Appropriations made pursuant to subsection (d) may be used, but not to exceed $35,000, for scientific consultations or extraordinary expenses upon the approval or authority of the Administrator, and the Administrator's determination shall be final and conclusive upon the accounting officers of the Government.

(h) Of the funds appropriated pursuant to subsections (a), (b), and (d), not in excess of $100,000 for each project, including collateral equipment, may be used for construction of new facilities and additions to existing facilities, and for repair, rehabilitation, or modification of facilities. Of the funds appropriated pursuant to subsection (a) or (b), not in excess of $500,000 for each project, including collateral equipment, may be used for any of the foregoing for unforseen programmatic needs.

(i)(1) The Administrator shall submit by November 15, 1986, to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on the reassignment of technical work responsibilities for a permanently manned Space Station.

(2) The report referred to in paragraph (1) shall include a full justification in terms of—

(A) anticipated costs and benefits;

(B) management factors; and

(C) impacts on facility and personnel resources;

of any such proposed reassignment.

SEC. 102. Authorization is hereby granted whereby any of the amounts prescribed in paragraphs (1) through (14), inclusive, of section 101(c)—

(1) in the discretion of the Administrator or his designee, may be varied upward 10 percent, or

(2) following a report by the Administrator of his designee to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, on the circumstances of such action, may be varied upward 25 percent,

to meet unusual cost variations, but the total cost of all work authorized under such paragraphs shall not exceed the total of the amounts specified in such paragraphs.

SEC. 103. Not to exceed one-half of 1 percent of the funds appropriated pursuant to section 101(a) or 101(b) may be transferred to and merged with the "Construction of facilities" appropriation, and, when so transferred, together with $10,000,000 of funds appropriated pursuant to subsection (c) of section 101 (other than funds appropriated pursuant to paragraph (15) of such subsection) shall be available for expenditure to construct, expand, and modify laboratories and other installations at any location (including locations specified in section 101(c)), if (1) the Administrator determines such action to be necessary because of changes in the national program of aeronautical and space activities or new scientific or engineering developments, and (2) he determines that deferral of such action until the enactment of the next authorization Act would be inconsistent with the interest of the Nation in aeronautical and space activities. The funds so made available may be expended to acquire, construct, convert, rehabilitate, or install permanent or temporary public works, including land acquisition, site preparation, appurtenances, utilities, and equipment. No portion of such sums may be obligated for expenditure or expended to construct, expand, or modify laboratories and other installations unless a period of 30 days has passed after the Administrator or the Administrator's designee has transmitted to the President of the Senate and to the Speaker of the House of Representatives and to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives a written report containing a full and complete statement concerning (A) the nature of such construction, expansion, or modification, (B) the cost thereof including the cost of any real estate action pertaining thereto, and (C) the reason why such construction, expansion, or modification is necessary in the national interest.

SEC. 104. Notwithstanding any other provision of this Act, no amount appropriated prusuant to this Act may be used for any program—

(1) deleted by the Congress from requests as originally made to either the Committee on Commerce, Science, and Transportation of the Senate or the Committee on Science and Technology of the House of Representatives;

(2) in excess of the amount actually authorized for that particular program by sections 101(a) 101(b), and 101(d); and

(3) which has not been presented to either such committee,

unless a period of 30 days has passed after the receipt by the President or the Senate and the Speaker of the House of Representatives and each such committee of notice given by the Administrator or the Administrator's designee containing a full and complete statement of the action proposed to be taken and the facts and circumstances relied upon in support of such proposed action.

SEC. 105. The President shall, on the date of the submittal to the Congress of a budget for the National Aeronautics and Space Administration for fiscal year 1988, submit to the Congress budget estimates for the recommended level of program activity and subactivity funding for fiscal years 1989 and 1990 of a permanently manned space station.

SEC. 106. It is the sense of the Congress that it is in the national interest that con-

sideration be given to geographical distribution of Federal research funds whenever feasible, and that the National Aeronautics and Space Administration should explore ways and means of distributing its research and development funds whenever feasible.

SEC. 107. No civil space station authorized under section 101(a)(1) of this Act may be used to carry or place in orbit any nuclear weapon or any other weapon of mass destruction, to install any such weapon on any celestial body, or to station any such weapon in space in any other manner. Any civil space station may be used only for peaceful purposes.

SEC. 108. (a) The Administrator of the National Aeronautics and Space Administration shall prepare and submit to the Congress, not later than March 31, 1987, a comprehensive acquisition strategy and plan for the continued procurement of space shuttle solid rocket motors. Such strategy and plan shall specifically address (1) the decisions made by the Administrator regarding the motor design or designs, (2) alternatives for establishing and maintaining competition in future procurements, and (3) costs and benefits of each such alternative.

(b) Upon completion of the solid rocket motor redesign and the upgraded motor evaluation efforts, and the determination of a safe and reasonable flight rate, but before signing or extending any production contract for follow-on solid rocket motors beyond those currently under contract, the Administrator shall either (1) issue a request for proposal for a second source for a redesigned motor, or (2) issue a request for proposal for an upgraded motor.

(c) The Administrator shall determine whether a request to the Congress for second source qualification funding is necessary or desirable in order to permit the second source to compete with the incumbent on a fair and effective basis, consistent with the Competition in Contracting Act of 1984 and the amendments made by that Act (Public Law 98-369; 98 Stat. 1175).

(d) The Administrator shall consider the competitive advantages of the nozzle and solid rocket motor separately. No determination of the advantages of the second source of either the solid rocket motor or the nozzle shall preclude a judgment on the advantages of the other. In evaluating proposals received in response to the request for proposal issued pursuant to subsection (b) of this section, the Administrator shall consider costs and cost savings in accordance with applicable law.

(e) The comprehensive acquisition strategy and plan prepared under subsection (a) of this section and proposals for a second source for a redesigned motor under subsection (b) of this section shall apply to all modifications of the solid rocket motor that are intended for production.

(f) In addition to the requirements of subsection (b) of this section, the Administrator, before signing or extending any production contract for follow-on solid rocket motors beyond those currently under contract, shall notify the Congress of the number of additional solid rocket motors required in order to allow the space shuttle transportation system to continue to operate if a new contractor, selected pursuant to subsection (b)(1) or (2) of this section, is not able to provide any of such additional solid rocket motors. The Administrator shall not sign or extend any such contract until a period of 30 calendar days during which either House of Congress is in session has passed after the date of such notification.

(g) Nothing in this section shall be construed to direct the Administrator to select and qualify a second source of production for solid rocket motors if the proposals received pursuant to subsection (b)(1) of this section are inconsistent with the requirements of section 2304(b)(1) of title 10, United States Code, or if the request for proposals issued pursuant to subsection (b)(2) of this section is consistent with the requirements of section 2304(a)(1) of title 10, United States Code.

SEC. 109. (a) Congress finds that the National Aeronautics and Space Administration should take every action available to it to restore, to its previous standards of excellence, its commitment to safety, reliability, and quality assurance.

(b) The Administrator shall identify as a separate item in the budget submitted by the President under section 1105 of title 31, United States Code, for any fiscal year, the number of individuals per NASA facility whose functions relate to safety, reliability, and quality assurance.

SEC. 110. The Administrator shall—

(1) review the findings and recommendations of the National Commission on Space (established pursuant to the National Aeronautics and Space Administration Authorization Act, 1985 (Public Law 98-361)); and

(2) submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate by February 15, 1987, a long-range plan for implementing the findings and recommendations referred to in paragraph (1), including a specific agenda for the five-year period beginning on the date of enactment of this Act.

SEC. 111. (a) The Administrator is authorized and encouraged to award to a domestic firm a contract that, under the use of competitive procedures, would be awarded to a foreign firm, if—

(1) the final product of the domestic firm will be completely assembled in the United States;

(2) when completely assembled, not less than 50 percent of the final product of the domestic firm will be domestically produced; and

(3) the difference between the bids submitted by the foreign and domestic firms is not more than 5 percent.

(b) This section shall not apply to the extent to which the Administrator determines that—

(1) such applicability will not be in the public interest; or

(2) compelling national security considerations require otherwise.

(c) For purposes of this section—

(1) the term "domestic firm" means a business entity that is incorporated in the United States and that conducts business operations in the United States; and

(2) the term "foreign firm" means a business entity not described in paragraph (1).

(d) This section shall apply only to contracts for which—

(1) amounts are made available by this Act; and

(2) solicitations for bids are issued after the date of the enactment of this Act.

TITLE II—OFFICE OF COMMERCIAL SPACE TRANSPORTATION

SEC. 201. Section 24 of the Commerical Space Launch Act (49 U.S.C. App. 2623) is amended by adding at the end the following: "There s authorized to be appropriated to the Secretary to carry out this Act $1,120,000 for fiscal year 1987."

TITLE III—SPACE TRANSPORTATION RECOVERY

SEC. 301. RETURNING THE SPACE SHUTTLE FLEET TO FLIGHT STATUS.

(a) It is the sense of the Congress that the United States must promptly restore its space transportation capabilities and such restoration must be accomplished without deemphasizing other space programs.

(b) The Administrator is directed to take the necessary steps to safely return the space shuttle fleet to flight status.

(c) There are authorized to be appropriated for fiscal year 1987 $100,600,000 to carry out this section.

SEC. 302. CONSTRUCTION OF A REPLACEMENT ORBITER.

(a)(1) The Administrator shall promptly take such steps as may be necessary to construct a fourth space shuttle orbiter as a replacement for the space shuttle orbiter Challenger.

(2) There are authorized to be appropriated for fiscal year 1987 such sums as may be necessary to begin the construction required by paragraph (1).

(b) The Administrator shall explore the availability of private funding for construction of the replacement orbiter authorized by subsection (a). The Administrator shall accept private funding for such construction—

(1) if the Administrator finds such private funding is available; and

(2) if the Administrator finds that such funding—

(A) is in the best interest of the United States; and

(B) results in no additional net costs to the Federal Government.

Private funding accepted under this subsection shall replace appropriated funding obligated or expended for such a replacement orbiter.

(c) Title I of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451 et seq.) is amended by adding at the end the following:

"DONATIONS FOR SPACE SHUTTLE ORBITER

"SEC. 208. (a) The Administrator may accept gifts and donations of services, money, and real, personal, tangible, and intangible property, and use such gifts and donations for the construction of a space shuttle orbiter.

"(b)(1) The authority of the Administrator to accept gifts or donations pursuant to subsection (a) shall terminate five years after the date of the enactment of this section.

'(2) All gifts and donations accepted by the Administrator pursuant to subsection (a) which are not needed for construction of a space shuttle orbiter shall be used by the Administrator for an appropriate purpose—

"(A) in tribute to the dedicated crew of the space shuttle Challenger, and

"(B) in furtherance of the exploration of space.

"(c) The name of a space shuttle orbiter constructed in whole or in part with gifts or donations whose acceptance and use are authorized by subsection (a) shall be selected by the Administrator of the National Aeronautics and Space Administration from among suggestions submitted by students in elementary and secondary schools.".

SEC. 303. SPACE SHUTTLE LAUNCH PRIORITIES.

(a) The space shuttle shall be the primary United States launch system for manned missions and missions needing its unique capabilities. The space shuttle shall also be

available for other missions, including the launch of non-shuttle-unique foreign and commercial payloads, pursuant to the priorities specified in subsection (b)(2).

(b) The Administrator shall make best efforts to develop a space shuttle launch manifest that—

(1) ensures that commitments of the National Aeronautics and Space Administration to its customers in effect in January 1986, including launch service agreements, are met within the priority constraints contained in subsection (b)(2); and

(2) reflects the following priorities (in descending order):

(A) Payloads deemed critical to the national security.

(B) Significant civil government missions, including those having limited launch opportunities.

(C) Government payloads other than those referred to in subparagraphs (A) and (B).

(D) Payloads other than those referred to in subparagraphs (A) through (C), including foreign and commercial payloads.

(c) The Administrator shall submit the Administrator's current flight manifest to the Congress reflecting the priorities contained in this section no later than December 1, 1986. The Administrator shall keep the Congress fully and currently informed of the status of the flight manifest.

SEC. 304. SHUTTLE PRICING POLICY.

(a) It is the sense of the Congress that the Shuttle pricing policy established in title II of Public Law 99-170 remains valid and should be implemented so as to assure reliable access to space for all United States space users.

(b) In the report required by title II of Public Law 99-170 submitted with his budget request for fiscal year 1988 the Administrator shall include a description of how this implementation of the pricing policy will accomplish the objectives of this title.

SEC. 305. USE OF EXPENDABLE LAUNCH VEHICLES.

(a) It is the sense of the Congress that in order to ensure reliable access to space, in order to meet national security, scientific, and commerical objectives of the United States space program, and in order to ensure that the United States does not concede the commerical launch vehicle business to foreign competition, the United States should utilize the capability of expendable launch vehicles as well as the space shuttle for placing government payloads into orbit.

(b) In order to meet the requirements of subsection (a), the Administrator of the National Aeronautics and Space Administration shall develop a plan for the purchase, through competitive procurement, of expendable launch vehicle services for the purpose of launching government payloads, as aggregated by the Administrator. The services purchased under this subsection shall be provided on a reimbursable basis.

(c) The Administrator shall report to Congress on how he will carry out this section no later than February 15, 1987. Such report shall include—

(1) an estimate of expendable launch vehicle requirements for the five years following the date of enactment of this Act;

(2) an explanation of how the National Aeronautics and Space Administration intends to utilize expendable launch vehicles (ELV) launches for future civil launch requirements, including but not limited to the availability of a commercial ELV capability, a NASA ELV capability, and a Department of Defense ELV capability;

(3) an explanation of how such utilization of ELV's can be carried out in a manner which fosters the development of a competitive expendable launch vehicle industry;

(4) a proposed procurement plan for commercial expendable launch vehicle services for the five years following the date of enactment of this Act; and

(5) an estimate of the authorizations of appropriations that are necessary to procure launch services for United States Government satellites by expendable launch vehicles for fiscal year 1988 and the four succeeding fiscal years.

SEC. 306. REIMBURSEMENT POLICY.

(a) The Administrator, in cooperation with the Secretary of Defense, and before July 1, 1987, shall submit to the Congress a five year plan, to be updated annually and presented to Congress along with the President's annual budget request, setting forth—

(1) a schedule for planned reimbursements from the Department of Defense for space shuttle services; and

(2) a schedule for the provision of such services.

(b) There is authorized to be appropriated for fiscal year 1987 such sums as may be necessary as payment for reimbursable services provided by the National Aeronautics and Space Administration to the Department of Defense.

SEC. 307. USE OF GOVERNMENT LAUNCH FACILITIES.

Section 15(b) of the Commercial Space Launch Act is amended by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively, and by inserting after paragraph (1) the following new paragraph:

"(2) For purposes of paragraph (1), direct costs shall not include costs associated with meeting the space transportation needs of the United States.".

SEC. 308. RESPONSIBILITIES UNDER COMMERCIAL SPACE LAUNCH ACT.

Section 5(a)(1) of the Commercial Space Launch Act is amended to read as follows:

"(1) pursuant to authorization and subject to the availability of appropriations, encourage and facilitate commercial space launches by the private sector, in consonance with the space policies of the United States as established in public law; and".

TITLE IV—DRUG TESTING

SEC. 401. DRUG TESTING.

The Administrator of the National Aeronautics and Space Administration shall submit a report to the Congress by January 30, 1987, detailing the Administrator's actions to comply with Executive Order 12564.

TITLE V—LAND REMOTE-SENSING COMMERCIALIZATION

SECTION 501. SHORT TITLE.

This title may be cited as the "Land Remote-Sensing Commercialization Act Amendments of 1986".

SEC. 502. FINDINGS.

The Congress finds and declares that—

(1) the implementation of the Land Remote-Sensing Commercialization Act of 1984 has begun and some of the major milestones contained in that Act have been met;

(2) Congress remains strongly committed to the guiding principles set forth in that Act;

(3) notwithstanding the accomplishments thus far, the relationships among the involved Federal agencies and the private sector have not yet been adequately defined; and

(4) inasmuch as the technical development and commercial applications of future land remote-sensing systems cannot now be predicted with certainty, it is in the national interest of the United States that the involved Federal agencies and the private sector remain flexible in carrying out their respective responsibilties under this title.

SEC. 503. PURPOSES.

It is therefore the purpose of this title to set forth amendments to the Land Remote-Sensing Commercialization Act of 1984 to ensure that—

(1) the original intent of that Act is carried out in the most effective manner consistent with the guiding principles expressed therein;

(2) specific mechanisms for carrying out the original intent of that Act are provided in those cases where none have materialized thus far; and

(3) the working relationships among involved Federal agencies and private sector parties for the purpose of carrying out this title are fully developed and mutually understood.

SEC. 504. CONTRACTOR EXEMPTION FROM FEDERAL FULL REIMBURSEMENT PROVISION IN THE CASE OF RESEARCH AND DEVELOPMENT AGREEMENTS.

Section 202(a)(4) of the Act is amended by inserting before the semicolon at the end thereof the following: ", except in the case of research and development activities conducted in accordance with section 504".

SEC. 505. DISPOSITION OF ASSETS FOLLOWING THE TERMINATION OF THE SECRETARY'S AUTHORITY.

Title III of the Act is amended by adding at the end thereof the following new section:

"DISPOSITION OF GOVERNMENT ASSETS

"SEC. 308. Following the completion of a contract made pursuant to this title, the Secretary may, upon 30 days advance notice to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science and Transportation of the Senate, dispose of assets (other than real property) under the control of the Secretary in a manner which best ensures the continuation of the contractor's commercial activity.".

SEC. 506. CLARIFICATION OF THE USE OF EXPERIMENTAL DATA FROM FEDERAL RESEARCH AND DEVELOPMENT PROGRAMS.

Section 502 of the Act is amended to read as follows:

"RESEARCH AND DEVELOPMENT ACTIVITIES OF FEDERAL AGENCIES

"SEC. 502. Each Federal agency is authorized and encouraged to provide data gathered in experimental remote-sensing space programs to related research and development programs funded by the Federal Government (including applications programs) and to cooperative research programs if the Federal agency involved determines that the data will not be used—

"(1) for any commercial purpose, or

"(2) in substantial competition with data available from a license under this Act,

except pursuant to section 503.".

SEC. 507. CLARIFICATION OF THE USE OF NON-FEDERAL DATA FOR RESEARCH AND DEVELOPMENT PROGRAMS.

Title V of the Act is amended by adding at the end thereof the following new section:

"RESEARCH AND DEVELOPMENT ACTIVITIES OF SYSTEM OPERATORS

"SEC. 504. Notwithstanding section 601, any system operator under title II, III, or IV of this act, or any marketing entity under

section 503 of this Act, may provide data for any research and development programs if—

"(1) a complete and timely disclosure of the results of such research and development is made in the open technical literature or is otherwise made publicly available;

"(2) the system operator or marketing entity provides to the Secretary an annual report of all research and development data transaction including the nature of any cooperative agreements and the prices charged for data; and

"(3) the data are not used for commercial purposes or in substantial competition with data available from a licensee under this Act.".

SEC. 508. CLARIFICATION OF OPERATOR RIGHTS TO IMPOSE LIMITATION ON REPRODUCTION, DISSEMINATION, AND OTHER ACTIVITIES ON A NONDISCRIMINATORY BASIS.

Section 603 of the Act is amended to read as follows:

"NONPRODUCTION

"SEC. 603. In addition to such other terms and conditions as the system operator may set forth in compliance with section 601 of this Act, the system operator may require that unenhanced data not be reproduced or disseminated by any foreign or domestic purchaser.".

TITLE VI—NOAA AUTHORITY

SEC. 601. ORGANIZATION OF NOAA.

(a) Section 2(d) of Reorganization Plan No. 4 of 1970 (5 U.S.C. App. 1) is amended to read as follows:

"(d) There shall be in the Administration a Chief Scientist of the National Oceanic and Atmospheric Administration who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for Level V of the Executive Schedule (5 U.S.C. 5316). The Chief Scientist shall be the principal scientific adviser to the Administrator, and shall perform such other duties as the Administrator may direct. The Chief Scientist shall be an individual who is, by reason of scientific education and experience, knowledgeable in the principles of oceanic, atmospheric, or other scientific disciplines important to the work of the Administration.".

(b) Section 5315 of title 5, United States Code, is amended by striking "Associate Administrator, National Oceanic and Atmospheric Administration.".

(c) Section 5316 of title 5, United States Code, is amended by inserting at the end thereof the following:

"Chief Scientist, National Oceanic and Atmospheric Administration.".

Mr. FUQUA (during the reading). Mr. Speaker, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Florida?

Mr. LUJAN. Mr. Speaker, reserving the right to object, and I do so to ask the gentleman from Florida to give us some of the particulars of the bill as it is and of some of the amendments that will be in it.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Florida [Mr. FUQUA].

Mr. FUQUA. Mr. Speaker, I rise today to urge my colleagues to support H.R. 5495; the NASA fiscal year 1987 authorization bill. The House overwhelmingly passed the bill on September 25 and the other body has now sent it back with an amendment in the nature of a substitute. We propose a further amendment in the nature of a substitute which represents a compromise which has been hammered out among respresentatives of both Houses of Congress on both sides of the aisle. Although the House substitute does not accomplish everything that would have been accomplished by the original version of H.R. 5495, it does have great merit.

The provisions of the House amendment are very significant and will be valuable in getting our space program back on track. First, the amendment establishes an authorization of appropriations for NASA which provides concrete congressional direction for the recovery of that agency. It continues funding for important scientific research and development efforts in support of this country's aeronautics and space program. It authorizes a replacement for the space shuttle *Challenger*, recognizing the important role of the space shuttle in maintaining the preeminence of America's space activities. And it takes the first step toward the next generation in aerospace transportation—the aerospace plane. Finally, the bill ensures the authorization of reimbursement of NASA by DOD for shuttle programs and services that ultimately support DOD.

The House substitute also contains a majority of the policy directives which had been included in H.R. 5495 as overwhelmingly supported by my colleagues on September 25.

Among these, the bill:

Takes steps to assure this country's access to space, including encouraging the development of a commercial expendable launch vehicle industry. One particular provision needs emphasis. Section 307 of our amendment would facilitate the use of Government launch facilities by private expendable launch vehicle companies. This would be done by making sure that such a private user would only pay the additive costs of using Government launch facilities. That is, the private user would not have to pay part of the costs incurred by the Government for meeting its own space transportation needs. The other body had added language related to payload processing facilities. That language apparently anticipates a situation in which a private operator of payload processing facilities could be undercut by a Government operation if the Government could charge merely additive cost for the processing. We would agree that such a situation is undesirable, but feel that it is already precluded by OMB Circular A-76 which prohibits the Government from competing with private sector activities. Thus, the new language is unnecessary and, therefore, is not included in our amendment which retains the original House-passed language.

Sets priorities for establishment of the shuttle manifest after the shuttle resumes flying. Directs NASA to honor launch commitments existing as of January 1986.

Requires that the Administrator review the recommendations of the National Commission on Space and develop a plan for implementing those recommendations.

Requests out-year budget estimates for the Permanently Manned Space Station Program and reaffirms that the space station will be used for peaceful purposes.

Directs NASA to consider and competitively select a second source for supply of the redesigned space shuttle solid rocket motors if it is economical to do so; however, should NASA decide to go to an upgraded design of solid rocket motor, the new motor must be competitively procured. In the bill "redesigned" refers to motors that are modifications of the preaccident design and which can use some existing motor cases. The term "upgraded design" refers to a totally new design which would mean starting over. NASA will probably begin flying with a redesigned motor, but may later switch to an upgraded design when it is available. We should know fairly soon—by March 1987—whether they plan to go to an upgraded design.

In addition, both Houses of Congress are committed to review the shuttle pricing policy during the next Congress to determine how that policy might be revised to reflect the realities of the situation facing the Nation and its ability to have reliable access to space.

In the original House-passed version of this bill we provided for reestablishment of the National Aeronautics and Space Council. That Council had been first created in the 1958 act establishing NASA and then was disbanded in 1972 by President Nixon by means of a reorganization plan. The other body has sent back a version of the Council having a significantly expanded membership and also greatly diluting the input of non-Federal users of space.

Furthermore, it has now become clear that for various reasons the administration strongly opposes the Council. Several top officials have threatened by letter even to recommend a veto of the bill because of the Council.

We had included the Council in the bill reported out of the Committee on Science and Technology for two main reasons. First, the present mechanism for policymaking on space matters—the Senior Interagency Group for Space—just is not working. This has been made plain through interminable wrangling over even fairly straightforward decisions such as whether or not to replace *Challenger*. Other decisions—such as establishing a shuttle launch pricing policy for commercial users—took months. So, we sought to do something positive in the original House-passed bill.

Second, reestablishment of the Council was highly recommended. In particular, the National Commission on Space, chaired by Thomas A. Paine, strongly recommended its reestablishment. I personally remember that the earlier Council had worked quite well during the Apollo days.

But I remembered something else. I remembered the trouble we had in 1976 reestablishing a Science Adviser in the White House when the White House wasn't quite sure it wanted one. Chairman Olin Teague steered a very careful course in getting the Office of Science and Technology Policy, headed by a Science Adviser, accepted by the President. He had to let a lot of people think that they had the idea first, even though he had exhaustive hearings on it for over a year.

I now believe a much wiser course is to hold thorough hearings in the next Congress and work out a cooperative solution. I am sure that we can reach an agreement on a policymaking mechanism that will be acceptable to all, and even more important, that will be listened to and respected by all.

For that reason, our amendment will strike the Senate version of the Council from the bill. Earlier we had thought that the time was right, but the lack of consensus shows this is not true.

Finally, our amendment provides for the establishment of the position of Chief Scientist in the National Oceanic and Atmospheric Administration. This has been strongly recommended for several years.

At this point in my remarks, I would like to include in the RECORD a table which contains a breakdown of all of the authorized funding levels contained in this bill. However, I would like to highlight the following authorizations:

$410,000,000—the full request—has been authorized for a Permanently Manned Space Station program.

$1,530,600,000 has been authorized to continue NASA's important science and applications programs. We intend that these programs continue fully funded even in this time of budget stress for NASA.

The bill continues the Advanced Communications Technology Satellite Program, authorizing funding of $80,000,000.

$100,600,000 has been authorized to return the space shuttle fleet to flight status. This should cover the extra costs NASA will incur in fiscal year 1987 over and above the savings from not flying.

Funds have been authorized to begin the construction of a fourth space shuttle orbiter as a replacement for the *Challenger*

Finally, this House substitute of H.R. 5495 includes amendments which were adopted by the House. That are:

Technical amendments to the Land Remote-Sensing Commercialization Act of 1984, Public Law 98-365, which affect NASA's role in research and development in the remote-sensing area.

The provisions of H.R. 4316 dealing with inventions in outer space which would extend the applicability of U.S. patent law to activities occurring on U.S. space vehicles.

Language which authorizes and encourages the administrator to provide an advantage for American firms bidding on NASA contracts as long as final assembly of the procured item is in the United States with at least 50 percent domestic context.

A provision which requires the Administrator of NASA to report on implementation of a drug testing program.

This has been a year of turmoil and confusion for America's space program. It is incumbent on Congress to demonstrate its support for NASA and the importance of the space program to America.

H.R. 5495 as amended is good legislation and important space policy. I urge the adoption of the amendment and the bill.

NASA fiscal year 1987 authorization

Total	7,795.0

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I rise today in strong support of H.R. 5495, the Fiscal Year 1987 Authorization Act for the National Aeronautics and Space Administration. The House passed this legislation on September 25 on the Suspension Calendar by a recorded vote of 407 to 8. We bring to the House today a compromise version in response to the other body which has sent us an amendment in the nature of a substitute.

Mr. Speaker, while this version is not as broad as the legislation first passed by the House, it is a compromise which all Members of the House can support.

The first, and most significant point I would make to the House is that we have maintained the budget levels approved by the House with a single exception. This bill went to the other body with a total authorization of $7.69 billion. We bring it back to the House at $7.79 billion. The difference between the versions is $100 million in additional funding for NASA to complete the corrections necessary following the *Challenger* accident before we return to flight status. The overwhelming majority of the American people support NASA, and they want to see us move swiftly, and surely, to correct the deficiencies and return to flying. This bill provides the necessary authorization for NASA to accomplish that goal.

The bill also provides a number of important policy guidelines. Among these are several which should be mentioned in order to establish the appropriate legislative intent of the Committee on Science and Technology, the House of Representatives, and the Congress, in adopting this measure.

Mr. Speaker, this bill does include an important provision which directs the Administrator of NASA to seek private sector financing for a new orbiter to replace the *Challenger*. The only condition placed on the acceptance of such financing is that it be in the best interests of the taxpayers of this Nation. Mr. Speaker, the importance of this provision is that it is the first step in reversing the manner in which the United States has historically financed our space efforts. From the beginning, until today, it was accepted as given, that the space program of this great Nation would always be paid for by the taxpayer. Today, we are entering a grand new era in which the Administrator will have the ability to open the door to the investors of America to take a chance on our space future. For the first time we will have the opportunity to purchase shares in an orbiter. And this is only the first step in building the space infrastructure that will lead to the multibillion dollar space based economy of the next century. Mr. Speaker, I understand that the Appropriations Committee will soon bring to the floor a measure which will provide full public funding for a new orbiter. I want to emphasize that this public funding is an important step in starting the construction on a replacement for *Challenger*, but under the terms of this NASA authorization before the House today, such funding will only be a stopgap measure which would carry construction forward while the Administrator seeks acceptable private financing. Under the

terms of H.R. 5495 the acceptance of private financing would mean that all of the appropriated funds used to commence construction would be recouped by the Treasury Department. Mr. Speaker, I urge all Members to support this provision.

This bill takes important steps in the direction of establishing a viable domestic commercial expendable launch vehicle industry. I would like to point out that section 307 would allow private ELV companies to use Government facilities at additive cost to the Government. We have removed language added in the other body relating to payload processing facilities. It is the position of the House that OMB circular A-76 prohibits the Government from competing with private sector activities. Thus, we believe that new legislative language is not necessary to address payload processing.

This bill also sets critical priorities in establishing the payload manifest for the space shuttle when it resumes flight, and directs the Administrator to honor launch commitments which existed in January 1986.

We have also included language which directs NASA to consider and select a second source for the solid rocket boosters for the space shuttle, if it is economical, and will result in significant savings to the Government. I would point out that both the author of the second source language, the gentleman from New Jersey [Mr. TORRICELLI], and the chairman of the Space Science and Applications Subcommittee, the gentleman from Florida [Mr. NELSON], have assured the House that the purpose of this language is to save money for the taxpayers of this country, if real savings are possible, through second sourcing. I support the attempt to realize significant savings on the procurement of solid rockets, I fully support their announced intent, and I want to congratulate both gentlemen for their efforts on the behalf of the American taxpayers.

We have also reached the decision that the National Aeronautics and Space Council which was included in the original bill does not yet have a sufficient constituency to move forward. I regret to say that we have received indications that the Council would be strongly resisted by the Department of Defense, the Joint Chiefs of Staff, the Central Intelligence Agency, and the Director of the Office of Management and Budget. We have also been told that any version of the Council would invite a Presidential veto of this legislation. Therefore, we have concluded that it would be better to drop the Council at this time, and we will explore the idea in hearings next year.

Finally, Mr. Speaker, we have included compromise language to effect the drug testing program sought in the House by the gentleman from Florida [Mr. SHAW], by directing the Administrator of NASA to report to the Congress on the implementation of a drug testing program.

Mr. Speaker, H.R. 5495, as amended, is a strong bill that is a tangible demonstration of the continuing commitment of the Congress, and the American people, to keeping the dream of manned space flight alive. I strongly urge the adoption of the amendment and the bill.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Florida [Mr. NELSON].

Mr. NELSON of Florida. Mr. Speaker, I rise to support the fiscal year 1987 authorization bill for NASA, H.R. 5495. The bill before us today contains an amendment adopted by the other body. That amendment has some problems, so we will propose an amendment in the nature of a substitute which will cure those problems.

Our amendment will restore some of the provisions which the House overwhelmingly adopted on September 24, and which are not in the amended bill sent back to us.

I want to acknowledge the hard work and cooperation we have received from Mr. WALKER, ranking Republican, and Members on both sides of the aisle. Our negotiations have been made all the easier by virtue of the strong bipartisan support we have achieved.

In view of the severe difficulties that have been encountered in our space program over the past year, this legislation is of the utmost importance in providing leadership and guidance and I urge my colleagues to join me in its support.

Title I of this bill provides the authorization for the regular NASA programs. The total amount authorized is $7.694 billion which was the same as the administration's request and the same as that previously passed by the House. Within this total we are providing full funding for the space station which will allow NASA to proceed into the developmental phase for this important program. We have increased funding for space transportation capability development to meet the Senate's estimate for this budgetary requirement. We have maintained the overall budget for space science and applications at a slightly higher level than the fiscal year 1986 budget and this will meet some inflationary increases. We have provided funding for the Advanced Communications Technology Satellite Program that can lead to a launch readiness date in 1990.

In other areas such as space flight operations, the precise funding requirements are not yet clear but we have provided amounts sufficient to keep these programs on track until space shuttle flights resume.

We have also included key policy provisions in title I that will help NASA deal with the problems raised by the *Challenger* accident. We have retained an important amendment passed on the floor of the House which requires NASA to seek a second source for its solid rocket booster motors. We have included a provision passed by the Senate which requires NASA to clearly identify the resources and staffing associated with the safety reliability and quality assurance function. We have retained a section requiring NASA to review the findings of the National Commission on Space, which will provide the groundwork for our next major steps in the space program. We have also retained a requirement originally passed as a floor amendment that authorizes and encourages NASA to award contracts to domestic firms unless it is not in the public interest to do so.

Title II of this bill authorizes $1.12 million for the Office of Commercial Space Transportation within the Department of Transportation, to carry out its responsibilities of encouraging and facilitating commercial space launches by the private sector.

In the policy area, title III of this bill establishes several important provisions related to the space shuttle. These include:

Directing the NASA Administrator to take the necessary steps to safely return the space shuttle fleet to flight status and authorizing the appropriation of an additional $100.6 million for this purpose in fiscal year 1987.

Authorizing the construction of an orbiter to replace the *Challenger* and the appropriation of such funds as may be necessary to begin that construction.

Directing the Administrator to explore the availability of private funding to construct the replacement orbiter.

Authorizing the NASA Administrator to accept private gifts and donations for the construction of a space shuttle orbiter.

Citing the space shuttle as the primary U.S. launch system for manned missions and missions needing its unique capabilities but indicating that the shuttle should continue to be available to nonshuttle-unique foreign and commercial payloads.

Directing the NASA Administrator to make best efforts to ensure that existing commitments to its customers are met.

Directing that available space shuttle launch capacity be filled in the following priority order:

First, payloads deemed critical to the national priority.

Second, significant civil Government missions, including those having limited launch opportunities.

Third, other Government payloads.

Fourth, all other payloads including foreign and commercial payloads.

Revalidating the space shuttle pricing policy enacted last year as appropriate for assuring reliable access to space for all U.S. space users.

Directing the NASA Administrator and the Secretary of Defense to annually submit a 5-year plan to the Congress which specifies a schedule of the

space shuttle services that will be provided to the Defense Department and a schedule of the planned reimbursements from DOD to NASA for these and related services.

Authorizing to be appropriated in fiscal year 1987 such sums as may be necessary as payment for reimbursable services provided by NASA to the Defense Department.

In addition to its actions on key space shuttle policy issues, title III of this bill also establishes major policies related to expendable launch vehicles. The bill expresses the sense of the Congress that the United States should use expendable launch vehicles as well as the space shuttle for placing Government payloads into orbit. Accordingly, the bill directs the NASA Administrator to develop a plan for the competitive purchase of launch services by expendable launch vehicle and to submit a report to the Congress by January 15, 1987, on how he will implement this policy and conduct it in such a manner that will foster the development of a viable commercial expendable launch vehicle industry.

This bill amends the Commercial Space Launch Act to make it clear that commercial users of U.S. Government launch facilities will not be charged for any costs that are associated with meeting the space transportation needs of the United States. This bill also amends the Commercial Space Launch Act to remove promotion of commercial space launches by the private sector from the responsibilities of the Department of Transportation. Under the act, however, DOT will continue to be responsible for encouraging and facilitating commercial space launch activities by the private sector.

Title IV of this bill recognizes the importance of dealing with drug abuse in this country by directing the Administrator to submit a report to the Congress by January 30, 1987, detailing the Administrator's actions to comply with Executive Order 12564, which deals with testing of employees.

Title V of this bill incorporates some amendments to the Land Remote Sensing Commercialization Act of 1984. It includes provisions that will grant significant relief to NASA and the private sector in carrying out research and developing activities unencumbered by the act's requirements for commercial data sales. This will allow researchers in universities and elsewhere to receive data grants.

Mr. Speaker, after extended discussions with the other body we have decided to defer some policy matters until we can consider them more fully next year. The most important of these is the policymaking body—the Space Council—which we had hoped to establish through this bill. I believe that the decisions we will reach will be stronger in the long run. In particular I hope we can establish a policymaking body which will be acceptable to the administration.

The legislation before you retains the fundamental House position and will be of great value to this Nation's space program. I urge my colleagues to join me in passing this important bill.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Texas [Mr. BARTON].

Mr. BARTON of Texas. Mr. Speaker, I rise in support of the compromise.

Mr. LUJAN. Mr. Speaker, further reserving the right to object, I rise also in support of the bill and urge the Members to approve these amendments.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL OCTOBER 29, 1986, TO FILE ITS INVESTIGATIVE REPORT, "THE INVESTIGATION OF THE CHALLENGER ACCIDENT"

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until October 29, 1986, to file its investigative report, "The Investigation of the Challenger Accident," in the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

RESTRICTING USE OF GOVERNMENT VEHICLES UNDER CERTAIN CONDITIONS

Mr. FUQUA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3614) to restrict the use of government vehicles for transportation of officers and employees of the Federal Government between their residences and places of employment, and for other purposes, with a Senate thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That (a) section 1344 of title 31, United States Code, is amended to read as follows:

"§ 1344. Passenger carrier use

"(a)(1) Funds available to a Federal agency, by appropriation or otherwise may be expended by the Federal agency for the maintenance, operation, or repair of any passenger carrier only to the extent that such carrier is used to provide transportation for official purposes. Notwithstanding any other provision of law, transporting any individual other than the individuals listed in subsections (b) and (c) of this section between such individual's residence and such individual's place of employment is not transportation for an official purpose.

"(2) For purposes of paragraph (1), transportation between the residence of an officer or employee and various locations that is—

"(A) required for the performance of field work, in accordance with regulations perscribed pursuant to subsection (e) of this section, or

"(B) essential for the safe and efficient performance of intelligence, counterintelligence, protective services, or criminal law enforcement duties,

is transportation for an official purpose, when approved in writing by the head of the Federal agency.

"(b) A passenger carrier may be used to transport between residence and place of employment the following officers and employees of Federal agencies:

"(1)(A) the President and the Vice President;

"(B) no more than 6 officers or employees in the Executive Office of the President, as designated by the President; and

"(C) no more than 10 additional officers or employees of Federal agencies, as designated by the President;

"(2) (A) officers compensated at Level I of the Executive Schedule pursuant to section 5312 of title 5; and

"(B) a single principal deputy to an officer described in subparagraph (A) of this paragraph, when a determination is made by such officer that such transportation is appropriate;

"(3) principal diplomatic and consular officials abroad, and the United States Ambassador to the United Nations;

"(4) the Deputy Secretary of Defense and Under Secretaries of Defense, the Secretary of the Air Force, the Secretary of the Army, the Secretary of the Navy, the Joint Chiefs of Staff, and the Commandant of the Coast Guard;

"(5) the Director of the Central Intelligence Agency and the Director of the Federal Bureau of Investigation;

"(6) the Chairman of the Board of Governors of the Federal Reserve System;

"(7) the Comptroller General of the United States and the Postmaster General of the United States; and

"(8) an officer or employee with regard to whom the head of a Federal agency makes a determination, in accordance with subsection (d) of this section and with regulations prescribed pursuant to paragraph (1) of subsection (e), that highly unusual circumstances present a clear and present danger, that an emergency exists, or that other compelling operational considerations make such transportation essential to the conduct of official business.

Except as provided in paragraph (2) of subsection (d), any authorization made pursuant to paragraph (8) of this subsection to permit the use of a passenger carrier to transport an officer or employee between residence and place of employment shall be

effective for not more than 15 calendar days.

"(c) A passenger carrier may be used to transport between residence and place of employment any person for whom protection is specifically authorized pursuant to section 3056(a) of title 18 or for whom transportation is authorized pursuant to section 28 of the State Department Basic Authorities Act of 1956 or section 8(a)(1) of the Central Intelligence Agency Act for 1949.

"(d)(1) Any determination made under paragraph (8) of subsection (b) shall be in writing and shall include the name and title of the officer or employee affected, the reason for such determination, and the duration of the authorization for such officer or employee to use a passenger carrier for transportation between residence and place of employment.

"(2) If a clear and present danger, an emergency, or a compelling operational consideration described in paragraph (8) of subsection (b) extends for a period in excess of 15 calendar days, the head of the Federal agency shall determine whether an authorization under such paragraph shall be extended in excess of 15 calendar days for a period of not more than 90 additional calendar days. Determinations made under this paragraph may be reviewed by the head of such agency at the end of each such period, and, where appropriate, a subsequent determination may be made where such danger, emergency, or consideration continues to exist and whether an additional extension, not to exceed 90 calendar days, may be authorized. Determinations made under this paragraph shall be in accordance with regulations prescribed pursuant to paragraph (1) of subsection (e).

"(3) The authority to make designations under subsection (b)(1) of this section and to make determinations pursuant to subsections (a)(2), (b)(2)(B), and (b)(8) of this section and pursuant to paragraph (2) of this subsection may not be delegated, except that, with respect to the Executive Office of the President, the President may delegate the authority of the President under subsection (b)(8) of this section to an officer in the Executive Office of the President. No designation or determination under this section may be made solely or principally for the comfort or convenience of the officer or employee.

"(4) Notification of each designation or determination made under paragraphs (1), (2)(B), and (8) of subsection (b) and under paragraph (2) of this subsection, including the name and title of the officer or employee affected, the reason for any determination under paragraph (8) of subsection (b), and the expected duration of any authorization under such paragraph, shall be transmitted promptly to the Committee on Government Operations of the House of Representatives and the Committee on Governmental Affairs of the Senate.

"(e)(1) Not later than March 15, 1987, the Administrator of General Services, after consultation with the Comptroller General, the Director of the Office of managment and Budget, and the Director of the Administrative Office of the United States Courts, shall promulgate regulations governing the heads of all Federal agencies in making the determinations authorized by subsections (a)(2)(A), (b)(8), and (d)(2) of this section. Such regulations shall specify that the comfort and convenience of an officer or employee is not sufficient justification for authorizations of transportation under this section.

"(2) In promulgating regulations under paragraph (1) of this subsection, the Administrator of General Services shall provide criteria defining the term 'field work' for purposes of subsection (a)(2)(A) of this section. Such criteria shall ensure that transportation between an employee's residence and the location of the field work will be authorized only to the extent that such transportation will substantially increase the efficiency and economy of the Government.

"(f) Each Federal agency shall maintain logs or other records necessary to establish the official purpose for Government transportation provided between an individual's residence and such individual's place of employment pursuant to this section.

"(g) As used in this section—

"(1) the term 'passenger carrier' means a passenger motor vehicle, aircraft, boat, ship, or other similar means of transportation that is owned or leased by the United States Government; and

"(2) the term 'Federal agency' means—

"(A) a department (as such term is defined in section 18 of the Act of August 2, 1946 (41 U.S.C. 5a));

"(B) an Executive department (as such term is defined in section 101 of title 5);

"(C) a military department (as such term is defined in section 102 of title 5);

"(D) a Government corporation (as such term is defined in section 103(1) of title 5);

"(E) a Government controlled corporation (as such term is defined in section 103(2) of title 5);

"(F) a mixed-ownership Government corporation (as such term is defined in section 9101(2) of this title);

"(G) any establishment in the executive branch of the Government (including the Executive Office of the President);

"(H) any independent regulatory agency (including an independent regulatory agency specified in section 3502(10) of title 44);

"(I) the Smithsonian Insitution; and

"(J) any nonappropriated fund instrumentality of the United States,

except that such term does not include the government of the District of Columbia.

"(h) Notwithstanding section 410(a) of title 39, this section applies to the United States Postal Service.".

(b) The table of sections for chapter 13 of such title is amended by striking out the item relating to section 1344 and inserting in lieu thereof the following:

"1344. Passenger carrier use.".

SEC. 2. (a) Title 10, United States Code, is amended—

(1) by striking out section 2637 thereof; and

(2) in the table of contents of chapter 157 thereof, by striking out the item pertaining to section 2637.

(b) Section 636(a)(5) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396 (a)(5)) is amended by striking out "(without regard to the limitations contained in section 5 of Public Law 63-127, as amended (31 U.S.C. 638a(c)(2)), and section 201 of Public Law 85-468 (31 U.S.C. 638c))".

(c) Section 48 of the Arms Control and Disarmament Act (22 U.S.C. 2588) is amended by striking out "without regard to the limitations contained in section 78(c) of title 5 of the United States Code".

(d) Section 11 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2678) is repealed.

(e) Section 660 of title 14, United States Code, is amended by striking out subsection (e).

SEC. 3. Within one year after the date of enactment of this Act, the Director of the Administrative Office of the United States Courts shall prepare, in consultation with the Marshal of the Supreme Court of the United States, the Clerk of the United States Court of Military Appeals and the Court Administrator of the United States Tax Court, and transmit to the Congress, appropriate recommendations concerning the transportation needs of the judicial branch and of courts established pursuant to Article I of the Constitution.

Mr. FUQUA (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Florida?

Mr. HORTON. Mr. Speaker, reserving the right to object, and I will not object, I yield to the gentleman from Florida [Mr. FUQUA] to explain the bill.

Mr. FUQUA. Mr. Speaker, the bill as passed by the House restricted the use of Government vehicles to official purposes only. It authorized home-to-work transportation only for specified Government employees. It also established appropriate procedures should an agency head find that a clear and present danger, an emergency, or similarly compelling operational considerations make such transportation essential on a temporary basis. All other employees would be responsible for providing their own means of transportation between their residences and places where official duties are performed.

The Senate amendment contains most of the House-passed language and adds additional language to further ensure that the bill addresses the needs of Federal agencies and to provide adequate procedural guidance for its implementation.

Mr. Speaker, in these times of fiscal austerity, it is essential to reduce the costs of the Government and to stop the proliferation of home-to-work transportation in Government vehicles. I should add that the administration supports this measure.

Mr. HORTON. Mr. Speaker, further reserving the right to object, I would say that as my distinguished colleague has explained, this bill is intended to clear the air, once and for all, on the question of which Government officials may be provided home-to-office transportation. The bill will result in a signficant reduction in the number of officials who receive this service.

The legislation now before us contains very slight amendments to the bill which passed the House earlier

this year. I enthusiastically endorse the measure and urge its approval.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

A motion to reconsider was laid on the table.

CORRECTING A TECHNICAL ERROR IN ENROLLMENT OF S. 475, MOTOR VEHICLE INFORMATION AND COST SAVINGS ACT

Mr. DINGELL. Mr. Speaker, I offer a concurrent resolution (H. Con. Res. 411) to correct a technical error in the enrollment of the bill S. 475, and ask unanimous consent for its immediate consideration.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. RINALDO. Mr. Speaker, reserving the right to object, and I will not object, but I want to ask the distinguished chairman if he would explain the concurrent resolution.

Mr. Speaker, I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, this House concurrent resolution is a technical change to correct an error in S. 475, which is the odometer fraud bill in the form reported from our committee.

The words in the bill were included in the committee and, while we believe that if they were correct and could be adequately and properly administered, both the Justice Department and the National Highway Traffic Safety Administration, through the NHTSA General Counsel, have advised us that, in their belief, the words in question would hinder enforcement actions and could have unforeseen regulatory effects. That is not the intention of the committee.

Basically the change would be to substitute the word "making" for "lieu of." The practical effect would be to say that, "For purposes of this section, if the lessor transfers ownership of any leased motor vehicle without obtaining possession of such vehicle, the lessor may in 'making' the disclosure," as opposed to "in lieu of."

We believe that it is desirable.

□ 1440

We believe that it is desirable and we are prepared to go along with the Administration on this matter.

Mr. RINALDO. Mr. Speaker, further reserving the right to object, in other words, this is the same as the version that has been cleared, the change that has been cleared with the minority?

Mr. DINGELL. If the gentleman will yield, as a matter of fact, it has been suggested by the Administration.

Mr. RINALDO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan [Mr. DINGELL]?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 411

Resolved by the the House of Representatives (the Senate concurring), That, in the enrollment of the bill (S. 475) to amend the Motor Vehicle Information and Cost Savings Act to require certain information to be filed in registering the title of motor vehicles, and for other purposes, the Secretary of the Senate shall strike out "lieu of" and insert "making" in section 408(e)(4) of the Motor Vehicle Information and Cost Savings Act, as proposed to be added by section 2 of the bill.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

WAIVING CERTAIN POINTS OF ORDER AGAINST CONFERENCE REPORT ON S. 1200, IMMIGRATION CONTROL AND REFORM ACT OF 1985 AND AGAINST THE CONSIDERATION OF SUCH CONFERENCE REPORT

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 592 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 592

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (S. 1200) to amend the Immigration and Nationality Act to effectively control unauthorized immigration to the United States, and for other purposes, all points of order against the conference report and against its consideration are hereby waived, and the conference report shall be considered as having been read when called up for consideration.

The SPEAKER pro tempore. The gentleman from California [Mr. BEILENSON] is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Missouri [Mr. TAYLOR], pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 592 is a rule providing for the consideration of the conference report on S. 1200, the Immigration Control and Legalization Amendments of 1986. The rule waives all points of order against the conference report and against its consideration

Mr. Speaker, the committee would like to commend the gentleman from New Jersey, Chairman RODINO, the gentleman from New York [Mr. FISH], the gentleman from Kentucky [Mr. MAZZOLI], the gentleman from California [Mr. LUNGREN], the gentleman from New York [Mr. SCHUMER], and the gentleman from Wyoming from the other body, Mr. SIMPSON, for their relentless efforts in bringing this important measure to this phase of the legislative process.

As Members of this body are well aware, a great many long hours have been spent since 1981 working to achieve a compromise on immigration reform, and that conference committee report is now finally before us.

The conference report retains three key facets of H.R. 3810, which the House passed last week. These are sanctions against employers who hire unauthorized aliens, legalization for those aliens who have resided in the United States since January 1, 1982, and an agricultural program which will guarantee growers a sufficient supply of labor while providing those laborers with human dignity and protection against exploitation.

The conference report appropriates $1 billion annually for 4 years with a carryover of unexpended funds through 1994. All parties closely associated with this issue believe the conference report provides the necessary funding to reimburse State and local governments for the costs associated with the Legalization Program.

Mr. Speaker, the conference agreement strikes a reasonable balance and represents a consensus on moving toward enactment of this necessary legislation. The work of the conferees deserves the appreciation of all Members of the House and I urge Members to support the rule and the conference report.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume. a15oc7.251

Mr. Speaker, House Resolution 592 waives points of order against the conference report on S. 1200, and against consideration of the report. The report, which was filed last night, is a landmark reform measure that prohibits the hiring of illegal aliens and offers legal status to several million aliens already in the country.

The rule makes the conference report on S. 1200, the Immigration Control and Reform Act of 1986, in order and waives all points of order that would otherwise lie against the report and against its consideration.

The rule also provides that the conference report shall be considered as ready when called up for consideration.

Mr. Speaker, the conference report made in order by this rule makes major, substantive changes in our Nation's immigration laws. Those who have been attempting to get this bill passed for the last several years say it

makes the biggest changes in the law in at least 20 years.

When the House passed H.R. 3810 last week, I voted against the bill because it extended a form of amnesty to millions of illegal aliens who were in this country on January 1, 1982.

I am sorry to say that the House managers are bringing back a conference report that contains those provisions, the provisions that will allow between 12 and 20 million illegal aliens to apply for—and receive—legal status.

Mr. Speaker, this measure is still as controversial as it was 2 weeks ago, when the House refused to consider it.

The conferees have reached an agreement, and in doing so they were apparently unable to improve upon the bill the House passed in rather short order last week.

The conference report made in order by this rule at least does still contain the civil and criminal provisions which prohibit employers from hiring illegal aliens, as a way to more adequately control our borders.

I submit, however, that the House should not rush to judgment on this report simply because the House managers were able to reach an agreement in near-record time.

The bill appropriates over $1 billion a year for the next 4 years to State agencies for the cost of supplying public assistance or other benefits to illegal aliens.

Mr. Speaker, when the Committee on Rules granted this rule late yesterday afternoon, we did not even have a copy of the conference report available to us.

The distinguished gentleman from Florida, the chairman of the Committee on Rules [Mr. PEPPER] noted that it is not a good practice for the committee to get into—the granting of rules on conference reports when the actual agreement has yet to be concluded.

Mr. Speaker, I do not intend to oppose this rule, but I do believe it is important for the House to realize just exactly how fast this measure is being processed.

To the credit of our chairman, the gentleman from Florida [Mr. PEPPER], the Committee on Rules reserved unto itself the right not to call up this rule if the House managers included provisions that would be objectionable to the committee.

Mr. Speaker, since House Resolution 592 has been called up by the gentleman from California [Mr. BEILENSON], it appears to me that the House managers have kept their word.

Mr. Speaker, I support this rule because it will allow the House managers to adequately explain and justify the conference agreement.

Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. LUNGREN].

Mr. LUNGREN. I thank the gentleman for yielding to me.

Mr. Speaker, I just want to say that I wholeheartedly support this rule. It does contain waivers in it but those waivers are necessary to allow us to bring this bill to the floor at this late date.

Some people would say we have rushed this bill through but those of us who followed it recognize that this has been on the legislative plate for at least 6 years. We dealt with this in the last Congress; we dealt with this in the Congress prior to that. We are in the last days of this Congress. If we do not act on it now we do not known when we will act on it.

I would suggest to those of you who are concerned about having a humane bill, this is probably the most humane bill you are going to get. I would suggest to those of you who are concerned about this being too generous a bill, you might get a more generous bill next time.

When you have to compromise, each side or all sides have to give up something. I think we all have given up something. If you believe we need immigration reform; if you believe this is an immigration problem that confronts the country that must be addressed, as most of your constituents do; if you believe it is a tough issue that is difficult to address at any time, I would ask you to support this rule. If this rule goes down, the bill goes down. The chance for immigration reform goes down.

We will not see it again, obviously, in this Congress. I do not know when we will ever see comprehensive immigration reform again. My colleagues on the Republican side, I would ask you to vote for this rule. It is the only shot we have got.

Mr. BEILENSON. Mr. Speaker, I have no further requests for time.

Mr. TAYLOR. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding me this time.

Mr. Speaker, I hope that the body was listening to the gentleman from Missouri when he made his remarks because he told us very flatly that when the Rules Committee considered this particular rule, it did not have the conference report before it.

This is the second rule that has been brought to this floor today by the Rules Committee where they waived all points of order against the bill without even knowing what was in the resolution that was being brought before them.

I tell you that that is a practice that is a disgrace to the House of Representatives. We ought not allow that kind of process to take place. I understand that we are pressed for time, but the fact is that one of the methodologies being used in this House to rush through bad legislation is to put legislation in a pattern where you have got to consider it in this way. That is precisely what is happening here. We are being asked to rush to judgment and the Rules Committee is bringing up rule after rule after rule that they did not even have the material before them when they made their decision.

In this particular instance, we have waivers of points of order, we have waivers of the Budget Act. The Budget Act waiver in this particular bill is no small waiver; it is a billion-a-year item.

□ 1450

It seems to me that we have a real problem here. I happen to think that the conferees did a pretty good job. They have cleaned up a bill that I could not vote for when it left the House.

I congratulate them for their work, but that does not mean that we ought to be making an end run-around procedure for every bill that comes down the pike. That is precisely what is happening here.

We have bill after bill coming to this floor to take end runs around our procedure, and the fact is that what we are doing is adding more and more costs onto the taxpayers.

This is the second rule today where we have waived the Budget Act and said that this does not seem to matter to us out on the floor. It seems to me that the Committee on Rules has decided, as a matter of course, to just ignore the Budget Act when we get to the end of the session.

That is a travesty, given what the American people feel that the deficit problem in this country is all about.

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. ROYBAL. Mr. Speaker, I would like to again inform the gentleman that that is precisely what we have been objecting to right along, the unfairness of the rule that has been presented with regard to the bill, the so-called immigration reform bill.

We protest, also, the fact that everything was done behind closed doors. When they bring in a bill such as this, and you noticed it just a little while ago, they brought it in, of course, with rules that only benefit their viewpoint.

None of us have been offered 1 minute in opposition. Instead of that, they say we have no more time available or no one has requested any time.

Mr. WALKER. If the gentleman will allow me to reclaim my time, let me say to the gentleman that I understand his concern about this bill. I hope he will join me in showing some concern about the other bills that we have coming out here because this is not just a one-bill problem. This is a pattern of abuse that is being raised

upon this floor and it is a disgrace for our processes.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 6 minutes to the distinguished gentleman from Massachusetts [Mr. MOAKLEY], my colleague from the Committee on Rules.

Mr. MOAKLEY. Mr. Speaker, I thank the gentleman for yielding time to me, and I rise in support of the rule.

I commend by friend from California [Mr. BEILENSON], who is presenting his third rule on the long path to enacting an immigration bill. The gentleman has taken a strong leadership role in moving this measure both in the Committee on Rules and in the conference committee. His leadership and energy have been important factors in producing a generally satisfactory bill.

On the whole, it's a good agreement. I certainly support the rule which allows the House to work its will on the agreement. On balance, I am also prepared to vote for the conference agreement.

However, Mr. Speaker, I declined to sign the conference agreement, because of my disappointment that we were unable to hold the House position with respect to temporary suspension of deportation of refugees from war-torn El Salvador and Nicaragua,

During committee consideration of the bill, the distinguished chairman of the Committee on Rules, the gentleman from Florida [Mr. PEPPER] and I had proposed language which would provide for a detailed GAO investigation of conditions in El Salvador and Nicaragua, particularly with respect to the fate of returnees from the United States. Our amendment provided a temporary stay of deportation for refugees from those countries, pending congressional review of that study.

Our amendment was sustained on the House floor, on a recorded vote, during consideration of the bill.

Mr. Speaker, the amendment offered the same temporary relief we have provided for refugees from other countries where conditions are unsettled. That authority has been used 15 times since 1960, and extended voluntary departure currently applies to individuals from Ethiopia, Uganda, Afganistan, and Poland.

The amendment raised an important question relating to our responsibility, morally and under international law, to those who have sought haven here from the dangers attendant to wars for which we, as a nation, have more than passing responsibility.

The gentleman from Florida and I, for example have come to different conclusions about whether the United States should actively intervene to overthrow the Sandanistas. But we had no trouble reaching agreement that it is lunacy to deport a Nicaraguan youngster who has fled to avoid the draft, and send him home for induction into an army, whose opposing force we are going to pay.

Our amendment was fair, balanced, and bipartisan. It was faithful to our national tradition and our responsibilities under international law. I am deeply disappointed that the Senate conferees held out so firmly against a provision which enjoyed significant support from the House managers.

Those who argued against the amendment primarily cited the Refugee Act of 1980, and argued that the way to handle this issue was through the asylum procedures under the act. However, this is not a satisfactory answer. First asylum is intended to deal with individuals who have an individualized fear of persecution. EVD is the more traditional means to deal with people whose fear is more generalized, based on instability, war, or violence in their homelands.

Also it would appear that the asylum process has become entirely politicized. A preliminary GAO study, released only today, indicates that approval rates for individuals who apply for asylum, based on arrest, imprisonment, threats to life, or torture vary enormously, and reflect a correlation to our relationship to the respective governments. The current approval rates are 4 percent for Salvadorans and 80 percent for Poles.

Although asylum is supposed to be decided in a hearing process which gives appropriate weight to the generalized State Department findings, the fact of the matter is that the State and Justice determination agree in 99 percent of Salvadoran cases but only 80 percent of those with respect to individuals from Iran.

Mr. Speaker, from the beginning of the conference, the principal Senate conferee opposed the provision, and he very clearly had the voting support of all the Senate managers from his side of the aisle. Nevertheless, he bargained in good faith. The able chairman of the Committee on the Judiciary was extraordinarily supportive. The chairman of the subcommittee [Mr. MAZOLLI] was opposed to the provision, but handled it with great fairness, and did the senior minority House managers.

From our discussions in the conference, and between members of the conference committee and the administration, we managed to make important progress on the issues.

The senior managers from the Judiciary Committees of each House have agreed to act on the matter in a separate bill very early in the next Congress, and to raise no procedural obstacles to a straight House and Senate vote on the issue. In addition, the conferees were advised by the Attorney General that he will initiate a case by case study of all pending deportations to El Salvador, and more closely examine subsequent cases.

On these assurances, I will vote for the agreement and urge its adoption.

Mr. BEILENSON. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. GARCIA], for purposes of debate only.

Mr. GARCIA. Mr. Speaker, to the members of the conference committee, those of us who have looked after this legislation over the last 6 years and who have been opposed to it, we have two dilemmas which we have had to face. One dilemma was the question of sanctions; the other dilemma was the question of amnesty. Did amnesty outweight sanctions?

I must say, and I must congratulate the conferees, I believe what they were able to do for amnesty was the best deal that we could have ever hoped for. I believe, by moving up to the 1982 date and allowing many thousands of people to be able to walk the streets of this great country without looking over their shoulders, it is a credit to the conferees. I applaud the conferees for this generous offer to the thousands of people who will come under this umbrella.

However, the other side is the question of sanctions, and what I consider to be that portion of the bill which will have a discriminatory effect on many people in this country who either speak with an accent or look or sound different.

I want to make it clear. I am going to oppose the bill, as I have from day one. I will vote for the rule because I think, as I said in two other debates this year, that we must discuss it. But this bill, as it related to that portion which I have placed into the House side, with the 6½-year sunset of sanctions, was the first item taken out of this bill when the conferees met.

□ 1500

I do not know why they placed that 6½-year sunset in there if their first intent was to remove it; but having said that, I must say that I hope that 3 or 4 years from now the Members on both sides of the aisle can look at me and say to me, "GARCIA, you were wrong," because if I am wrong, based on what my own personal life experiences have been as it relates to discrimination, then I will take to this floor and say that I am wrong; but I think, unfortunately, that history and the future will combine together.

You are placing in the hands of employers all over this country, you are making them judges and juries, and they are going to be faced with hard choices. They are going to turn down people who come in for employment because they are going to be afraid to hire those people because of the sanctions portions of this bill.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 8 minutes to the gentleman from California [Mr. ROYBAL].

Mr. ROYBAL. Mr. Speaker, I do not know whether this is an exercise in futility or not, but I would like to just take this time to try to inform the Members of the House as to just what happened in the conference committee and why we find ourselves in this particular situation where we have a rule before us that waives all points of order.

To begin with, I think if we go back to the very beginning of this effort to bring this bill to the floor before adjournment, we find that secret meetings were held all over the place, that conferences were held with Members of the other body in secret and behind closed doors. Now, no one can dispute the fact that we tried very hard to gain entrance to some of those meetings, to heard, to offer assistance, or whatever, but we were constantly turned down.

Now, we ask why is it then necessary for them to come to the House with a rule that waives all points of order? Well, the reason for that is very obvious. In the conference, they undid many of the items that were passed by the House of Representatives. One, of course, was the sunset on sanctions, already discussed. Many other items most important, not only to the farm workers, but important to every State in the union were taken out of the bill even though passed by the House.

For an example, it is a true fact that in the bill originally the House voted for 100-percent reimbursement to the States. Every Member thought that their State would be reimbursed for whatever costs were involved, that is those costs that came about as the result of this bill. The truth of the matter is that 100-percent reimbursement was knocked out.

What the conference committee did instead of 100-percent reimbursement is put a ceiling of $1 billion to be distributed among all 50 States, but distributed only after all Federal costs were deducted.

We do not know how much those Federal costs are going to be. Some say there are only 4 million in the United States illegally, and the other day we were told there were 12 million.

The truth of the matter is that it is the States that are going to finance the major cost of this bill. Conferees took it upon themselves to change the legislation and bring in a rule that protects it. Los Angeles County opposes this bill and so would other counties if they only knew about it. That is one reason why they have a rule that waives all points of order, to protect all actions which were not the original intent of the House.

Then there are other reasons. For example, they dropped the Moakley amendment that would have protected Salvadorans and Nicaraguans from deportation for 2 years while the GAO prepared their report on conditions in Central America and at that time would give Congress this time to consider legislation to extend or revise the extended voluntary departure protection. That was changed.

I remember the discussion on just that one point. It seemed to me that this House voted affirmatively for the Moakley amendment, but that was taken out, as were other things in the legislation.

Now, we know that sanctions are in this bill and that every employer in the United States, including housewives who may hire a maid, will be effected by sanctions with the exception of course, of the farmers and the growers.

We also know that the bill makes available a steady flow of cheap labor to farmers starting with 350,000 who worked on the farms in the previous years, give them almost instant legalization, and after the first year give them a green card so that they can work anyplace else in the United States with full rights as a legal resident.

They provided two things. First, a magnet for those people to come in to work on the farms because the farmers are exempt from sanctions; and, second, by exempting the farmer, he can continue to hire anyone who may be here illegally, in addition to the original 350,000, and still not be subject to the sanction provisions.

Our biggest protest is the fact that no opportunity was really given to thoroughly debate this issue, that most of the things that were done were done along the same lines that we have now, waiving all points of order, making it impossible for intelligent discussion, doing only those things that the so-called kingmakers want done and only those things that they proposed, with little possibility of this House working its will and when it did work its will, the conferees took it out.

One last thing, and I must repeat this, that those who voted for this bill and will vote today for the conference report will also have the responsibility of voting to finance it, to finance the enforcement of sanctions, for without enforcement they will succeed only in the promotion of discrimination. Don't think that it is going to cost just a few million dollars or $425 million, as you provide for in the bill. It is going to cost a lot more than that.

Your State will also have to pay for all of those things that they took out of the bill. Instead of the 100-percent reimbursement to the States, they must do with a lot less and end up paying most of the cost of a Federal law which you imposed upon them.

If that is what you want to do, fine, go ahead and do it; but I do not think I want to place myself in that position. Gramm-Rudman and other fiscal problems are before us. We should not take upon ourselves the added burden of having to finance this piece of legislation, or pass it on to our States.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 5 minutes to the gentleman from New York [Mr. SCHEUER].

Mr. SCHEUER. Mr. Speaker, I support this rule and I support this bill. Maybe it was the best that we could do under the circumstances. However, this bill will impose an enormous burden on this Congress, on the American people and on the administration to complete the job of preparing for what I believe will be the enormous cost and the enormous challenge of amnesty.

Let me say right off that I believe amnesty is right and amnesty is moral.

Let me also say right off that I believe amnesty will be sought after by the vast preponderance of the illegals in this country. I believe that the January 1, 1982, cutoff date to be eligible for amnesty is an illusory date. It is ephemeral. In a sense, we are deluding ourselves if we try to convince the public that it is real. I believe that is a fraud on the public, because the fact is that forged immigration documents such as birth certificates, marriage certificates, confirmation documents, employment records, rent receipts, and Social Security documents, are all available in a neat package for about $200 or $250 anywhere in the Southwest. Any illegal alien in this country, regardless when he came here, can prove that he came over not only before January 1, 1982, but he can prove he came over on the Mayflower, if that suits his purpose.

So I believe we have to look at the pool of potential applicants for amnesty as being the entire illegal alien population in the United States.

I, for one, think that is good, because I do not think we ought to have two groups in our society: one group of illegal immigrants who can receive all the benefits and privileges and glories of American citizenship; and another group to whom we say, "No, you got here too late. You are here and we are not going to send you home, but you got here too late to be bona fide American citizens." I do not think that is healthy and in a sense I think it is right that they are all going to be eligible, but we should not delude ourselves that the only eligible group is the pre-January 1, 1982 group.

Mr. Speaker, the prospect of U.S. citizenship and legalization, regardless of whether there is a job or not at the end of the line, regardless of the exist-

ence of employer sanctions, is a powerful magnet. The magnet of the American way of life, the magnet of freedom from oppression, freedom of speech, of a decent life in a decent caring society and the chance to get a job, legally or illegally, is going to be such an incentive that if we do not do something to harden and regularize our porous borders, borders that Senator SIMPSON has accurately described as out of control, this country is going to see an inundation and an explosion of illegal immigration far above and beyond the 2 million a year we face now.

One of the reasons that I have some confidence in this bill is that we did agree to a 50-percent increase in authorization for the Immigration and Naturalization Service, but I believe that is just a drop in the bucket. I believe that we are going to have to get to work next year and sit down and put together a plan of border control that really makes sense and that really will stop the overwhelming percentage of illegals from crossing our borders.

We have a great tradition and a noble tradition of welcoming immigrants, but we ought to do it legally. There are millions of people who want to come to our country who have filed, who have followed our laws and who are standing in line. We ought to be in control of that flow. We should not have a vast flow of people who are crashing through our borders, while other people who want just as badly to come and who have been waiting for years are quietly obeying our laws.

□ 1515

So, Mr. Speaker, I support the rule, I support the bill, I believe that the increase in authorization— 50 percent— in the Immigration and Naturalization Service is good, but I believe that that is only one step toward the vast job that we must do.

Now, Mr. Speaker, we recently had a Hispanic Immigration and Naturalization Service Director, Leonel Castillo, who served with great distinction in that role. He testified before the Select Committee on Population about 5 or 6 years ago that we could establish a border control program that would work and would halt perhaps 80 to 85 or 90 percent of the illegal immigration using methods that were not offensive. We would not have to build a Berlin wall with machine gun towers and guards with police dogs. We could do it with normally accepted law enforcement methods, with normal surveillance, and with normal enforcement personnel.

He said at that time that it would cost $800 or $900 million a year. Perhaps it would be 50 or 60 percent more today. It could be the best money that we could possibly spend, because we are totally incapable at the present time of dealing realistically and constructively with the enormous needs of our own minority populations, both legal and illegal, who are in this country now.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 3 minutes to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Speaker, I rise in support of the conference report. And this is a weaker bill than the one that we passed on Thursday. Gone is the sunset provision on sanctions; gone is the provision changing the political status of refugees from El Salvador and Nicaragua; gone is the free-trade zone with Mexico to promote border revitalization; but, thankfully, discrimination protection stays. But the heart of the bill, legalization, stays.

We must act now. This is the final hour for immigration reform. This is the final hour for millions of people who have no lobbyists but who deserve some status in this country. These are men and women who are black, brown, and yellow-skinned. They come from Mexico, from Italy, from Greece, and every corner of this Earth, and they are good citizens now, and they deserve to come out of serfdom.

Mr. Speaker, this bill affects Hispanics more than any other ethnic group in this country, and as a Hispanic it is an extremely difficult vote for me, having opposed similar bills in the past. And I deeply respect my Hispanic colleagues who will be opposing this bill today.

My final decision was reached when I realized that there is no realistic alternative to this bill. It poses a lot of risks, and it poses a lot of problems. Nonetheless, I do not want my legacy to be that as a Hispanic, I obstructed immigration reform. As Americans, it is incumbent upon us to act, as painful as it may be.

Mr. BEILENSON. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the gound that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 274, nays 132, not voting 26, as follows:

□ 1535

Mr. CARR and Mr. RINALDO changed their votes from "yea" to "nay."

Mr. COATS changed his vote from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Hallen, one of the clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5056. An act to permit registered public utility holding companies to own certain interests in qualifying cogeneration facilities.

CONFERENCE REPORT ON S. 1128, WATER QUALITY ACT OF 1986

Mr. ROE submitted the following conference report and statement on the Senate bill (S. 1128) to amend the Clean Water Act, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-1004)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1128) to amend the Clean Water Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS; AMENDMENTS TO FEDERAL WATER POLLUTION CONTROL ACT; DEFINITION OF ADMINISTRATOR.

(a) SHORT TITLE.—This Act may be cited as the "Water Quality Act of 1986".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; table of contents; amendments to Federal Water Pollution Control Act; definition of Administrator.
Sec. 2. Limitation on payments.

TITLE I—AMENDMENTS TO TITLE I

Sec. 101. Authorizations of appropriations.
Sec. 102. Small flows clearinghouse.
Sec. 103. Chesapeake Bay.
Sec. 104. Great Lakes.
Sec. 105. Research on effects of pollutants.

TITLE II—CONSTRUCTION GRANTS AMENDMENTS

Sec. 201. Time limit on resolving certain disputes.
Sec. 202. Federal share.
Sec. 203. Agreement on eligible costs.
Sec. 204. Design/build projects.
Sec. 205. Grant conditions; user charges on low-income residential users.
Sec. 206. Allotment formula.
Sec. 207. Rural set aside.
Sec. 208. Innovative and alternative projects.
Sec. 209. Regional organization funding.
Sec. 210. Marine CSO's and estuaries.
Sec. 211. Authorization for construction grants.
Sec. 212. State water pollution control revolving funds.
Sec. 213. Improvement projects.
Sec. 214. Chicago tunnel and reservoir project.
Sec. 215. Ad valorem tax dedication.

TITLE III—STANDARDS AND ENFORCEMENTS

Sec. 301. Compliance dates.
Sec. 302. Modification for nonconventional pollutants.
Sec. 303. Discharges into marine waters.
Sec. 304. Filing deadline for treatment works modification.
Sec. 305. Innovative technology compliance deadlines for direct dischargers.
Sec. 306. Fundamentally different factors.
Sec. 307. Coal remining operations.
Sec. 308. Individual control strategies for toxic pollutants.
Sec. 309. Pretreatment standards.
Sec. 310. Inspection and entry.
Sec. 311. Marine sanitation devices.
Sec. 312. Criminal penalties.
Sec. 313. Civil penalties.
Sec. 314. Administrative penalties.
Sec. 315. Clean lakes.
Sec. 316. Management of nonpoint sources of pollution.
Sec. 317. National estuary program.
Sec. 318. Unconsolidated quaternary aquifer.

TITLE IV—PERMITS AND LICENSES

Sec. 401. Stormwater runoff from oil, gas, and mining operations.
Sec. 402. Additional pretreatment of conventional pollutants not required.
Sec. 403. Partial NPDES program.
Sec. 404. Anti-backsliding.
Sec. 405. Municipal and industrial stormwater discharges.
Sec. 406. Sewage sludge.
Sec. 407. Log transfer facilities.

TITLE V—MISCELLANEOUS PROVISIONS

Sec. 501. Audits.
Sec. 502. Commonwealth of the Northern Mariana Islands.
Sec. 503. Agricultural stormwater discharges.
Sec. 504. Protection of interests of United States in citizen suits.
Sec. 505. Judicial review and award of fees.
Sec. 506. Indian tribes.
Sec. 507. Definition of point source.
Sec. 508. Special provisions regarding certain dumping sites.
Sec. 509. Ocean discharge research project.
Sec. 510. San Diego, California.
Sec. 511. Limitation on discharge of raw sewage by New York City.
Sec. 512. Oakwood Beach and Red Hook Projects, New York.
Sec. 513. Boston Harbor and adjacent waters.
Sec. 514. Wastewater reclamation demonstration.
Sec. 515. Des Moines, Iowa.
Sec. 516. Study of de minimis discharges.
Sec. 517. Study of effectiveness of innovative and alternative processes and techniques.
Sec. 518. Study of testing procedures.
Sec. 519. Study of pretreatment of toxic pollutants.
Sec. 520. Studies of water pollution problems in aquifers.
Sec. 521. Great Lakes consumptive use study.
Sec. 522. Sulfide corrosion study.
Sec. 523. Study of rainfall induced infiltration into sewer systems.
Sec. 524. Dam water quality study.
Sec. 525. Study of pollution in Lake Pend Oreille, Idaho.

(c) AMENDMENT OF FEDERAL WATER POLLUTION CONTROL ACT.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Water Pollution Control Act.

(d) DEFINITION.—For purposes of this Act, the term "Administrator" means the Administrator of the Environmental Protection Agency.

SEC. 2. LIMITATION ON PAYMENTS.

No payments may be made under this Act except to the extent provided in advance in appropriation Acts.

TITLE I—AMENDMENTS TO TITLE I

SEC. 101. AUTHORIZATIONS OF APPROPRIATIONS.

(a) RESEARCH AND INVESTIGATIONS.—Section 104(u) is amended—

(1) in clause (1) by striking out "and" after "1975,", after "1980,", and after "1981,", and by inserting after "1982," the following: "such sums as may be necessary for fiscal years 1983 through 1985, and not to exceed $22,770,000 per fiscal year for each of the fiscal years 1986 through 1990,";

(2) in clause (2) by striking out "and" after "1981," and by inserting after "1982," the following: "such sums as may be necessary for fiscal years 1983 through 1985, and $3,000,000 per fiscal year for each of the fiscal years 1986 through 1990,"; and

(3) in clause (3) by striking out "and" after "1981," and by inserting after "1982," the following: "such sums as may be necessary for fiscal years 1983 through 1985, and $1,500,000 per fiscal year for each of the fiscal years 1986 through 1990,".

(b) GRANTS FOR PROGRAM ADMINISTRATION.—Section 106(a)(2) is amended by inserting after "1982" the following: ", such sums as may be necessary for fiscal years 1983 through 1985, and $75,000,000 per fiscal year for each of the fiscal years 1986 through 1990".

(c) TRAINING GRANTS AND SCHOLARSHIPS.—Section 112(c) is amended by striking out "and" after "1981," and by inserting after "1982," the following: "such sums as may be necessary for fiscal years 1983 through 1985, and $7,000,000 per fiscal year for each of the fiscal years 1986 through 1990,".

(d) AREAWIDE PLANNING.—Section 208(f)(3) is amended by striking out "and" after "1974," and after "1980," and by inserting after "1982" the following: ", and such sums as may be necessary for fiscal years 1983 through 1990".

(e) RURAL CLEAN WATER.—Section 208(j)(9) is amended by striking out "and" after "1981," and by inserting after "1982," the following: "and such sums as may be necessary for fiscal years 1983 through 1990,".

(f) INTERAGENCY AGREEMENTS.—Section 304(k)(3) is amended by inserting after "1983" the following: "and such sums as may be necessary for fiscal years 1984 through 1990".

(g) CLEAN LAKES.—Section 314(c)(2) is amended by striking out "and" after "1981," and by inserting after "1982" the following: ", such sums as may be necessary for fiscal years 1983 through 1985, and $30,000,000 per fiscal year for each of the fiscal years 1986 through 1990".

(h) GENERAL AUTHORIZATION.—Section 517 is amended by striking out "and" after "1981," and by inserting after "1982" the following: ", such sums as may be necessary for fiscal years 1983 through 1985, and $135,000,000 per fiscal year for each of the fiscal years 1986 through 1990".

SEC. 102. SMALL FLOWS CLEARINGHOUSE.

Section 104(q) is amended by adding at the end thereof the following new paragraph:

"(4) SMALL FLOWS CLEARINGHOUSE.—Notwithstanding section 205(d) of this Act, from amounts that are set aside for a fiscal year under section 205(i) of this Act and are not obligated by the end of the 24-month period of availability for such amounts under section 205(d), the Administrator shall make available $1,000,000 or such unobligated amount, whichever is less, to support a national clearinghouse within the Environmental Protection Agency to collect and disseminate information on small flows of sewage and innovative or alternative wastewater treatment processes and techniques, consistent with paragraph (3). This paragraph shall apply with respect to amounts set aside under section 205(i) for which the 24-month period of availability referred to in the preceding sentence ends on or after September 30, 1986.".

SEC. 103. CHESAPEAKE BAY.

Title I is amended by adding at the end the following new section:

"SEC. 117. CHESAPEAKE BAY.

"(a) OFFICE.—The Administrator shall continue the Chesapeake Bay Program and shall establish and maintain in the Environmental Protection Agency an office, division, or branch of Chesapeake Bay Programs to—

"(1) collect and make available, through publications and other appropriate means, information pertaining to the environmental quality of the Chesapeake Bay (hereinafter in this subsection referred to as the "Bay");

"(2) coordinate Federal and State efforts to improve the water quality of the Bay;

"(3) determine the impact of sediment deposition in the Bay and identify the sources, rates, routes, and distribution patterns of such sediment deposition; and

"(4) determine the impact of natural and man-induced environmental changes on the living resources of the Bay and the relationships among such changes, with particular emphasis placed on the impact of pollutant loadings of nutrients, chlorine, acid precipitation, dissolved oxygen, and toxic pollutants, including organic chemicals and heavy metals, and with special attention given to the impact of such changes on striped bass.

"(b) INTERSTATE DEVELOPMENT PLAN GRANTS.—

"(1) AUTHORITY.—The Administrator shall, at the request of the Governor of a State affected by the interstate management plan developed pursuant to the Chesapeake Bay Program (hereinafter in this section referred to as 'the plan'), make a grant for the purpose of implementing the management mechanisms contained in the plan if such State has, within 1 year after the date of the enactment of this section, approved and committed to implement all or substantially all aspects of the plan. Such grants shall be made subject to such terms and conditions as the Administrator considers appropriate.

"(2) SUBMISSION OF PROPOSAL.—A State or combination of States may elect to avail itself of the benefits of this subsection by submitting to the Administrator a comprehensive proposal to implement management mechanisms contained in the plan which shall include (A) a description of proposed abatement actions which the State or combination of States commits to take within a specified time period to reduce pollution in the Bay and to meet applicable water quality standards, and (B) the estimated cost of the abatement actions proposed to be taken during the next fiscal year. If the Administrator finds that such proposal is consistent with the national policies set forth in section 101(a) of this Act and will contribute to the achievement of the national goals set forth in such section, the Administrator shall approve such proposal and shall finance the costs of implementing segments of such proposal.

"(3) FEDERAL SHARE.—Grants under this subsection shall not exceed 50 percent of the costs of implementing the management mechanisms contained in the plan in any fiscal year and shall be made on condition that non-Federal sources provide the remainder of the cost of implementing the management mechanisms contained in the plan during such fiscal year.

"(4) ADMINISTRATIVE COSTS.—Administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against programs or projects supported by funds made available under this subsection shall not exceed in any one fiscal year 10 percent of the annual Federal grant made to a State under this subsection.

"(c) REPORTS.—Any State or combination of States that receives a grant under subsection (b) shall, within 18 months after the date of receipt of such grant and biennially thereafter, report to the Administrator on the progress made in implementing the interstate management plan developed pursuant to the Chesapeake Bay Program. The Administrator shall transmit each such report along with the comments of the Administrator on such report to Congress.

"(d) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated the following sums, to remain available until expended, to carry out the purposes of this section:

"(1) $3,000,000 per fiscal year for each of the fiscal years 1987, 1988, 1989, and 1990, to carry out subsection (a); and

"(2) $10,000,000 per fiscal year for each of the fiscal years 1987, 1988, 1989, and 1990, for grants to States under subsection (b).".

SEC. 104. GREAT LAKES.

Title I is amended by adding at the end the following new section:

"SEC. 118. GREAT LAKES.

"(a) FINDINGS, PURPOSE, AND DEFINITIONS.—

"(1) FINDINGS.—The Congress finds that—

"(A) the Great Lakes are a valuable national resource, continuously serving the people of the United States and other nations as an important source of food, fresh water, recreation, beauty, and enjoyment;

"(B) the United States should seek to attain the goals embodied in the Great Lakes Water Quality Agreement of 1978 with particular emphasis on goals related to toxic pollutants; and

"(C) the Environmental Protection Agency should take the lead in the effort to meet those goals, working with other Federal agencies and State and local authorities.

"(2) PURPOSE.—It is the purpose of this section to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978 through improved organization and definition of mission on the part of the Agency, funding of State grants for pollution control in the Great Lakes area, and improved accountability for implementation of such agreement.

"(3) DEFINITIONS.—For purposes of this section, the term—

"(A) 'Agency' means the Environmental Protection Agency;

"(B) 'Great Lakes' means Lake Ontario, Lake Erie, Lake Huron (including Lake St. Clair), Lake Michigan, and Lake Superior, and the connecting channels (Saint Mary's River, Saint Clair River, Detroit River, Niagara River, and Saint Lawrence River to the Canadian Border);

"(C) 'Great Lakes System' means all the streams, rivers, lakes, and other bodies of water within the drainage basin of the Great Lakes;

"(D) 'Program Office' means the Great Lakes National Program Office established by this section; and

"(E) 'Research Office' means the Great Lakes Research Office established by subsection (d).

"(b) GREAT LAKES NATIONAL PROGRAM OFFICE.—The Great Lakes National Program Office (previously established by the Administrator) is hereby established within the Agency. The Program Office shall be headed by a Director who, by reason of management experience and technical expertise relating to the Great Lakes, is highly qualified to direct the development of programs and plans on a variety of Great Lakes issues. The Great Lakes National Program Office shall be located in a Great Lakes State.

"(c) GREAT LAKES MANAGEMENT.—

"(1) FUNCTIONS.—The Program Office shall—

"(A) in cooperation with appropriate Federal, State, tribal, and international agencies, and in accordance with section 101(e) of this Act, develop and implement specific action plans to carry out the responsibilities of the United States under the Great Lake Water Quality Agreement of 1978;

"(B) establish a Great Lakes system-wide surveillance network to monitor the water quality of the Great Lakes, with specific emphasis on the monitoring of toxic pollutants;

"(C) serve as the liaison with, and provide information to, the Canadian members of the International Joint Commission and the Canadian counterpart to the Agency;

"(D) coordinate actions of the Agency (including actions by headquarters and regional offices thereof) aimed at improving Great Lakes water quality; and

"(E) coordinate actions of the Agency with the actions of other Federal agencies and State and local authorities, so as to ensure the input of those agencies and authorities in developing water quality strategies and obtain the support of those agencies and authorities in achieving the objectives of such agreement.

"(2) 5-YEAR PLAN AND PROGRAM.—The Program Office shall develop, in consultation with the states, a five-year plan and program for reducing the amount of nutrients introduced into the Great Lakes. Such program shall incorporate any management program for reducing nutrient runoff from nonpoint sources established under section 319 of this Act and shall include a program for monitoring nutrient runoff into, and ambient levels in, the Great Lakes.

"(3) 5-YEAR STUDY AND DEMONSTRATION PROJECTS.—The Program Office shall carry out a five year study and demonstration projects relating to the control and removal of toxic pollutants in the Great Lakes, with emphasis on the removal of toxic pollutants from bottom sediments. In selecting locations for conducting demonstration projects under this paragraph, priority consideration shall be given to projects at the following locations: Saginaw Bay, Michigan; Sheboygan Harbor, Wisconsin; Grand Calumet River, Indiana; Ashtabula River, Ohio; and Buffalo River, New York.

"(4) ADMINISTRATOR'S RESPONSIBILITY.—The Administrator shall ensure that the Program Office enters into agreements with the various organizational elements of the Agency involved in Great Lakes activities and the appropriate State agencies specifically delineating—

"(A) the duties and responsibilities of each such element in the Agency with respect to the Great Lakes;

"(B) the time periods for carrying out such duties and responsibilities; and

"(C) the resources to be committed to such duties and responsibilities.

"(5) BUDGET ITEM.—The Administrator shall, in the Agency's annual budget submission to Congress, include a funding request for the Program Office as a separate budget line item.

"(6) COMPREHENSIVE REPORT.—Within 90 days after the end of each fiscal year, the Administrator shall submit to Congress a comprehensive report which—

"(A) describes the achievements in the preceding fiscal year in implementing the Great Lakes Water Quality Agreement of 1978 and shows by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amounts expended on Great Lakes water quality initiatives in such preceding fiscal year;

"(B) describes the progress made in such preceding fiscal year in implementing the system of surveillance of the water quality in the Great Lakes system, including the monitoring of groundwater and sediment, with particular reference to toxic pollutants;

"(C) describes the long-term prospects for improving the condition of the Great Lakes; and

"(D) provides a comprehensive assessment of the planned efforts to be pursued in the succeeding fiscal year for implementing the Great Lakes Water Quality Agreement of 1978, which assessment shall—

"(i) show by categories (including judicial enforcement, research, State cooperative efforts, and general administration) the amount anticipated to be expended on Great Lakes water quality initiatives in the fiscal year to which the assessment relates; and

"(ii) include a report of current programs administered by other Federal agencies which make available resources to the Great Lakes water quality management efforts.

"(d) GREAT LAKES RESEARCH.—

"(1) ESTABLISHMENT OF RESEARCH OFFICE.—There is established within the National Oceanic and Atmospheric Administration the Great Lakes Research Office.

"(2) IDENTIFICATION OF ISSUES.—The Research Office shall identify issues relating to the Great Lakes resources on which research is needed. The Research Office shall submit a report to Congress on such issues before the end of each fiscal year which shall identify any changes in the Great Lakes system with respect to such issues.

"(3) INVENTORY.—The Research Office shall identify and inventory Federal, State, university, and tribal environmental research programs (and, to the extent feasible, those of private organizations and other nations) relating to the Great Lakes system, and shall update that inventory every four years.

"(4) RESEARCH EXCHANGE.—The Research Office shall establish a Great Lakes research exchange for the purpose of facilitating the rapid identification, acquisition, retrieval, dissemination, and use of information concerning research projects which are on-going or completed and which affect the Great Lakes system.

"(5) RESEARCH PROGRAM.—The Research Office shall develop, in cooperation with the Coordination Office, a comprehensive environmental research program and data base for the Great Lakes system. The data base shall include, but not be limited to, data relating to water quality, fisheries, and biota.

"(6) MONITORING.—The Research Office shall conduct, through the Great Lakes Environmental Research Laboratory, the National Sea Grant College program, other Federal laboratories, and the private sector, appropriate research and monitoring activities which address priority issues and current needs relating to the Great Lakes.

"(7) LOCATION.—The Research Office shall be located in a Great Lakes State.

"(e) RESEARCH AND MANAGEMENT COORDINATION.—

"(1) JOINT PLAN.—Before October 1 of each year, the Program Office and the Research Office shall prepare a joint research plan for the fiscal year which begins in the following calendar year.

"(2) CONTENTS OF PLAN.—Each plan prepared under paragraph (1) shall—

"(A) identify all proposed research dedicated to activities conducted under the Great Lakes Water Quality Agreement of 1978;

"(B) include the Agency's assessment of priorities for research needed to fulfill the terms of such Agreement; and

"(C) identify all proposed research that may be used to develop a comprehensive environmental data base for the Great Lakes system and establish priorities for development of such data base.

"(f) INTERAGENCY COOPERATION.—The head of each department, agency, or other instrumentality of the Federal Government which is engaged in, is concerned with, or has authority over programs relating to research, monitoring, and planning to maintain, enhance, preserve, or rehabilitate the environmental quality and natural resources of the Great Lakes, including the Chief of Engineers of the Army, the Chief of the Soil Conservation Service, the Commandant of the Coast Guard, the Director of the Fish and Wildlife Service, and the Administrator of the National Oceanic and Atmospheric Administration, shall submit an annual report to the Administrator with respect to the activities of that agency or office affecting compliance with the Great Lakes Water Quality Agreement of 1978.

"(g) RELATIONSHIP TO EXISTING FEDERAL AND STATE LAWS AND INTERNATIONAL TREATIES.—Nothing in this section shall be construed to affect the jurisdiction, powers, or prerogatives of any department, agency, or officer of the Federal Government or of any State government, or of any tribe, nor any powers, jurisdiction, or prerogatives of any international body created by treaty with authority relating to the Great Lakes.

"(h) AUTHORIZATIONS OF GREAT LAKES APPROPRIATIONS.—There are authorized to be appropriated to the Administrator to carry out this section not to exceed $11,000,000 per fiscal year for the fiscal years 1987, 1988, 1989, 1990, and 1991. Of the amounts appropriated each fiscal year—

"(1) 40 percent shall be used by the Great Lakes National Program Office on demonstration projects on the feasibility of controlling and removing toxic pollutants;

"(2) 7 percent shall be used by the Great Lakes National Program Office for the program of nutrient monitoring; and

"(3) 30 percent shall be transferred to the National Oceanic and Atmospheric Administration for use by the Great Lakes Research Office.".

SEC. 105. RESEARCH ON EFFECTS OF POLLUTANTS.

In carrying out the provisions of section 104(a) of the Federal Water Pollution Control Act, the Administrator shall conduct research on the harmful effects on the health and welfare of persons caused by pollutants in water, in conjunction with the United

States Fish and Wildlife Service, the National Oceanic and Atmospheric Administration, and other Federal, State, and interstate agencies carrying on such research. Such research shall include, and shall place special emphasis on, the effect that bioaccumulation of these pollutants in aquatic species has upon reducing the value of aquatic commercial and sport industries. Such research shall further study methods to reduce and remove these pollutants from the relevant affected aquatic species so as to restore and enhance these valuable resources.

TITLE II—CONSTRUCTION GRANTS AMENDMENTS

SEC. 201. TIME LIMIT ON RESOLVING CERTAIN DISPUTES.

Section 201 is amended by adding at the end thereof the following new subsection:

"(p) TIME LIMIT ON RESOLVING CERTAIN DISPUTES.—In any case in which a dispute arises with respect to the awarding of a contract for construction of treatment works by a grantee of funds under this title and a party to such dispute files an appeal with the Administrator under this title for resolution of such dispute, the Administrator shall make a final decision on such appeal within 90 days of the filing of such appeal.".

SEC. 202. FEDERAL SHARE.

(a) LIMITATION ON ELIGIBILITY AFTER 1990.—The last sentence of section 202(a)(1) is amended by inserting before the period at the end the following: "for any grant made pursuant to a State obligation which obligation occurred before October 1, 1990,".

(b) PROJECTS UNDER JUDICIAL INJUNCTION.—Section 202(a)(1) is amended by adding at the end thereof the following: "Notwithstanding the first sentence of this paragraph, in the case of a project for which an application for a grant under this title has been made to the Administrator before October 1, 1984, and which project is under judicial injunction on such date prohibiting its construction, such project shall be eligible for grants at 75 percent of the cost of construction thereof.".

(c) PROJECTS UNDER JUDICIAL ORDER AND OTHER PROJECTS.—Section 202(a)(1) is amended by adding at the end thereof the following: "Notwithstanding the first sentence of this paragraph, in the case of the Wyoming Valley Sanitary Authority project mandated by judicial order under a proceeding begun prior to October 1, 1984, and a project for wastewater treatment for Altoona, Pennsylvania, such projects shall be eligible for grants at 75 percent of the cost of construction thereof.".

(d) BIODISC EQUIPMENT.—Section 202(a)(3) is amended by adding at the end thereof the following: "In addition, the Administrator is authorized to make a grant to fund all of the costs of the modification or replacement of biodisc equipment (rotating biological contactors) in any publicly owned treatment works if the Administrator finds that such equipment has failed to meet design performance specifications, unless such failure is attributable to negligence on the part of any person, and if such failure has significantly increased capital or operating and maintenance expenditures.".

(e) INNOVATIVE PROCESS.—The activated bio-filter feature of the project for treatment works of the city of Little Falls, Minnesota, shall be deemed to be an innovative wastewater process and technique for purposes of section 202(a)(2) of the Federal Water Pollution Control Act and the amount of any grant under such Act for such feature shall be 85 percent of the cost thereof.

(f) AVAILABILITY OF CERTAIN FUNDS FOR NON-FEDERAL SHARE.—Notwithstanding any other provision of law, Federal assistance made available by the Farmers Home Administration to any political subdivision of a State may be used to provide the non-Federal share of the cost of any construction project carried out under section 201 of the Federal Water Pollution Control Act.

SEC. 203. AGREEMENT ON ELIGIBLE COSTS.

Section 203(a) is amended by inserting "(1)" after "(a)", by designating the last sentence as paragraph (3) and indenting such sentence as a paragraph, and by inserting before paragraph (3) as so designated the following:

"(2) AGREEMENT ON ELIGIBLE COSTS.—

"(A) LIMITATION ON MODIFICATIONS.—Before taking final action on any plans, specifications, and estimates submitted under this subsection after the 60th day following the date of the enactment of the Water Quality Act of 1986, the Administrator shall enter into a written agreement with the applicant which establishes and specifies which items of the proposed project are eligible for Federal payments under this section. The Administrator may not later modify such eligibility determinations unless they are found to have been made in violation of applicable Federal statutes and regulations.

"(B) LIMITATION ON EFFECT.—Eligibility determinations under this paragraph shall not preclude the Administrator from auditing a project pursuant to section 501 of this Act, or other authority, or from withholding or recovering Federal funds for costs which are found to be unreasonable, unsupported by adequate documentation, or otherwise unallowable under applicable Federal cost principles, or which are incurred on a project which fails to meet the design specifications or effluent limitations contained in the grant agreement and permit pursuant to section 402 of this Act for such project.".

SEC. 204. DESIGN/BUILD PROJECTS.

Section 203 is amended by adding at the end the following new subsection:

"(f) DESIGN/BUILD PROJECTS.—

"(1) AGREEMENT.—Consistent with State law, an applicant who proposes to construct waste water treatment works may enter into an agreement with the Administrator under this subsection providing for the preparation of construction plans and specifications and the erection of such treatment works, in lieu of proceeding under the other provisions of this section.

"(2) LIMITATION ON PROJECTS.—Agreements under this subsection shall be limited to projects under an approved facility plan which projects are—

"(A) treatment works that have an estimated total cost of $8,000,000 or less; and

"(B) any of the following types of waste water treatment systems: aerated lagoons, trickling filters, stabilization ponds, land application systems, sand filters, and subsurface disposal systems.

"(3) REQUIRED TERMS.—An agreement entered into under this subsection shall—

"(A) set forth an amount agreed to as the maximum Federal contribution to the project, based upon a competitively bid document of basic design data and applicable standard construction specifications and a determination of the federally eligible costs of the project at the applicable Federal share under section 202 of this Act;

"(B) set forth dates for the start and completion of construction of the treatment works by the applicant and a schedule of payments of the Federal contribution to the project;

"(C) contain assurances by the applicant that (i) engineering and management assistance will be provided to manage the project; (ii) the proposed treatment works will be an operable unit and will meet all the requirements of this title; and (iii) not later than 1 year after the date specified as the date of completion of construction of the treatment works, the treatment works will be operating so as to meet the requirements of any applicable permit for such treatment works under section 402 of this Act;

"(D) require the applicant to obtain a bond from the contractor in an amount determined necessary by the Administrator to protect the Federal interest in the project; and

"(E) contain such other terms and conditions as are necessary to assure compliance with this title (except as provided in paragraph (4) of this subsection).

"(4) LIMITATION ON APPLICATION.—Subsections (a), (b), and (c) of this section shall not apply to grants made pursuant to this subsection.

"(5) RESERVATION TO ASSURE COMPLIANCE.—The Administrator shall reserve a portion of the grant to assure contract compliance until final project approval as defined by the Administrator. If the amount agreed to under paragraph (3)(A) exceeds the cost of designing and constructing the treatment works, the Administrator shall reallot the amount of the excess to the State in which such treatment works are located for the fiscal year in which such audit is completed.

"(6) LIMITATION ON OBLIGATIONS.—The Administrator shall not obligate more than 20 percent of the amount allotted to a State for a fiscal year under section 205 of this Act for grants pursuant to this subsection.

"(7) ALLOWANCE.—The Administrator shall determine an allowance for facilities planning for projects constructed under this subsection in accordance with section 201(l).

"(8) LIMITATION ON FEDERAL CONTRIBUTIONS.—In no event shall the Federal contribution for the cost of preparing construction plans and specifications and the building and erection of treatment works pursuant to this subsection exceed the amount agreed upon under paragraph (3).

"(9) RECOVERY ACTION.—In any case in which the recipient of a grant made pursuant to this subsection does not comply with the terms of the agreement entered into under paragraph (3), the Administrator is authorized to take such action as may be necessary to recover the amount of the Federal contribution to the project.

"(10) PREVENTION OF DOUBLE BENEFITS.—A recipient of a grant made pursuant to this subsection shall not be eligible for any other grants under this title for the same project.".

SEC. 205. GRANT CONDITIONS; USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.

(a) INCLUSION OF PROJECT IN AREAWIDE PLAN.—Section 204(a)(1) is amended to read as follows:

"(1) that any required areawide waste treatment management plan under section 208 of this Act (A) is being implemented for such area and the proposed treatment works are included in such plan, or (B) is being developed for such area and reasonable progress is being made toward its implementation and the proposed treatment works will be included in such plan;".

(b) CONTINUING PLANNING PROCESS.—Section 204(a)(2) is amended to read as follows:

"(2) that (A) the State in which the project is to be located (i) is implementing any required plan under section 303(e) of this Act

and the proposed treatment works are in conformity with such plan, or (ii) is developing such a plan and the proposed treatment works will be in conformity with such plan, and (B) such State is in compliance with section 305(b) of this Act;".

(c) USER CHARGES ON LOW-INCOME RESIDENTIAL USERS.—Section 204(b)(1) is amended by adding at the end thereof the following: "A system of user charges which imposes a lower charge for low-income residential users (as defined by the Administrator) shall be deemed to be a user charge system meeting the requirements of clause (A) of this paragraph if the Administrator determines that such system was adopted after public notice and hearing.".

(d) EFFECTIVE DATE.—This section shall take effect on the date of the enactment of this Act, except that the amendments made by subsections (a) and (b) shall take effect on the last day of the two-year period beginning on such date of enactment.

SEC. 206. ALLOTMENT FORMULA.

(a) FORMULA.—

(1) EXTENSION OF EXISTING FORMULA FOR 1986.—Section 205(c)(2) is amended by striking out "and September 30, 1985," and inserting in lieu thereof "September 30, 1985, and September 30, 1986,".

(2) FISCAL YEARS 1987–1990.—Section 205(c) is amended by adding at the end the following new paragraph:

"(3) FISCAL YEARS 1987–1990.—Sums authorized to be appropriated pursuant to section 207 for the fiscal years 1987, 1988, 1989, and 1990 shall be allotted for each such year by the Administrator not later than the 10th day which begins after the date of the enactment of this paragraph. Sums authorized for such fiscal years shall be allotted in accordance with the following table:

"States:	
Alabama	.011309
Alaska	.006053
Arizona	.006831
Arkansas	.006616
California	.072333
Colorado	.008090

Northern Marianas	.000422
Puerto Rico	.013191
Pacific Trust Territories	.001295
Virgin Islands	.000527".

(b) EXTENSION OF MINIMUM ALLOTMENTS.—Section 205(e) is amended by striking out "and 1985" each place it appears and inserting in lieu thereof "1985, 1986, 1987, 1988, 1989, and 1990".

(c) COSTS OF ADMINISTRATION.—Section 205(g)(1) is amended by striking out "October 1, 1985" and inserting in lieu thereof "October 1, 1994".

(d) CONTROL OF POLLUTANTS FROM STORM SEWERS.—Section 211(e) is amended by striking out "1985," and inserting in lieu thereof "1990,".

SEC. 207. RURAL SET ASIDE.

(a) INCREASE IN MANDATORY SET ASIDE FOR RURAL STATES.—The first sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "a total (as determined by the Governor of the State) of not less than 4 percent nor more than 7½ percent".

(b) INCREASE IN AUTHORIZED SET ASIDE FOR OTHER STATES.—The second sentence of section 205(h) is amended by striking out "four per centum" and inserting in lieu thereof "7½ percent".

SEC. 208. INNOVATIVE AND ALTERNATIVE PROJECTS.

Section 205(i) is amended to read as follows:

"(i) SET-ASIDE FOR INNOVATIVE AND ALTERNATIVE PROJECTS.—Not less than ½ of 1 percent of funds allotted to a State for each of the fiscal years ending September 30, 1979, through September 30, 1990, under subsection (c) of this section shall be expended only for increasing the Federal share of grants for construction of treatment works utilizing innovative processes and techniques pursuant to section 202(a)(2) of this Act. Including the expenditures authorized by the preceding sentence, a total of 2 percent of the funds allotted to a State for each of the fiscal years ending September 30, 1979, and September 30, 1980, and 3 percent of the funds allotted to a State for the fiscal year ending September 30, 1981, under subsection (c) of this section shall be expended only for increasing grants for construction of treatment works pursuant to section 202(a)(2) of this Act. Including the expenditures authorized by the first sentence of this subsection, a total (as determined by the Governor of the State) of not less than 4 percent nor more than 7½ percent of the funds allotted to such State under subsection (c) of this section for each of the fiscal years ending September 30, 1982, through September 30, 1990, shall be expended only for increasing the Federal share of grants for construction of treatment works pursuant to section 202(a)(2) of this Act.".

SEC. 209. REGIONAL ORGANIZATION FUNDING.

Section 205(j)(3) is amended by adding at the end thereof the following: "In giving such priority, the State shall allocate at least 40 percent of the amount granted to such State for a fiscal year under paragraph (2) of this subsection to regional public comprehensive planning organizations in such State and appropriate interstate organizations for the development and implementation of the plan described in this paragraph. In any fiscal year for which the Governor, in consultation with such organizations and with the approval of the Administrator, determines that allocation of at least 40 percent of such amount to such organizations will not result in significant participation by such organizations in water quality management planning and not significantly assist in development and implementation of the plan described in this paragraph and achieving the goals of this Act, the allocation to such organization may be less than 40 percent of such amount.".

SEC. 210. MARINE CSO'S AND ESTUARIES.

Section 205 is amended by adding at the end thereof the following new subsection:

"(l) MARINE ESTUARY RESERVATION.—

"(1) RESERVATION OF FUNDS.—

"(A) GENERAL RULE.—Prior to making allotments among the States under subsection (c) of this section, the Administrator shall reserve funds from sums appropriated pursuant to section 207 for each fiscal year beginning after September 30, 1986.

"(B) FISCAL YEARS 1987 AND 1988.—For each of fiscal years 1987 and 1988 the reservation shall be 1 percent of the sums appropriated pursuant to section 207 for such fiscal year.

"(C) FISCAL YEARS 1989 AND 1990.—For each of fiscal years 1989 and 1990 the reservation shall be 1½ percent of the funds appropriated pursuant to section 207 for such fiscal year.

"(2) USE OF FUNDS.—Of the sums reserved under this subsection, two-thirds shall be available to address water quality problems of marine bays and estuaries subject to lower levels of water quality due to the impacts of discharges from combined storm water and sanitary sewer overflows from adjacent urban complexes, and one-third shall be available for the implementation of section 320 of this Act, relating to the national estuary program.

"(3) PERIOD OF AVAILABILITY.—Sums reserved under this subsection shall be subject to the period of availability for obligation established by subsection (d) of this section.

"(4) TREATMENT OF CERTAIN BODY OF WATER.—For purposes of this section and section 201(n), Newark Bay, New Jersey, and the portion of the Passaic River up to Little Falls, in the vicinity of Beatties Dam, shall be treated as a marine bay and estuary.".

SEC. 211. AUTHORIZATIONS FOR CONSTRUCTION GRANTS.

Section 207 is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "; and for each of the fiscal years ending September 30, 1986, September 30, 1987, and September 30, 1988, not to exceed $2,400,000,000; and for each of the fiscal years ending September 30, 1989, and September 30, 1990, not to exceed $1,200,000,000.".

SEC. 212. STATE WATER POLLUTION CONTROL REVOLVING FUNDS.

(a) ESTABLISHMENT OF PROGRAM.—The Act is amended by adding at the end thereof the following new title:

"TITLE VI—STATE WATER POLLUTION CONTROL REVOLVING FUNDS

"SEC. 601. GRANTS TO STATES FOR ESTABLISHMENT OF REVOLVING FUNDS.

"(a) GENERAL AUTHORITY.—Subject to the provisions of this title, the Administrator shall make capitalization grants to each State for the purpose of establishing a water pollution control revolving fund for provid-

ing assistance (1) for construction of treatment works (as defined in section 212 of this Act) which are publicly owned, (2) for implementing a management program under section 319, and (3) for developing and implementing a conservation and management plan under section 320.

"(b) SCHEDULE OF GRANT PAYMENTS.—The Administrator and each State shall jointly establish a schedule of payments under which the Administrator will pay to the State the amount of each grant to be made to the State under this title. Such schedule shall be based on the State's intended use plan under section 606(c) of this Act, except that—

"(1) such payments shall be made in quarterly installments, and

"(2) such payments shall be made as expeditiously as possible, but in no event later than the earlier of—

"(A) 8 quarters after the date such funds were obligated by the State, or

"(B) 12 quarters after the date such funds were allotted to the State.

"SEC. 602. CAPITALIZATION GRANT AGREEMENTS.

"(a) GENERAL RULE.—To receive a capitalization grant with funds made available under this title and section 205(m) of this Act, a State shall enter into an agreement with the Administrator which shall include but not be limited to the specifications set forth in subsection (b) of this section.

"(b) SPECIFIC REQUIREMENTS.—The Administrator shall enter into an agreement under this section with a State only after the State has established to the satisfaction of the Administrator that—

"(1) the State will accept grant payments with funds to be made available under this title and section 205(m) of this Act in accordance with a payment schedule established jointly by the Administrator under section 601(b) of this Act and will deposit all such payments in the water pollution control revolving fund established by the State in accordance with this title;

"(2) the State will deposit in the fund from State moneys an amount equal to at least 20 percent of the total amount of all capitalization grants which will be made to the State with funds to be made available under this title and section 205(m) of this Act on or before the date on which each quarterly grant payment will be made to the State under this title;

"(3) the State will enter into binding commitments to provide assistance in accordance with the requirements of this title in an amount equal to 120 percent of the amount of each such grant payment within 1 year after the receipt of such grant payment;

"(4) all funds in the fund will be expended in an expeditious and timely manner;

"(5) all funds in the fund as a result of capitalization grants under this title and section 205(m) of this Act will first be used to assure maintenance of progress, as determined by the Governor of the State, toward compliance with enforceable deadlines, goals, and requirements of this Act, including the municipal compliance deadline;

"(6) treatment works eligible under section 603(c)(1) of this Act which will be constructed in whole or in part before fiscal year 1995 with funds directly made available by capitalization grants under this title and section 205(m) of this Act will meet the requirements of, or otherwise be treated (as determined by the Governor of the State) under sections 201(b), 201(g)(1), 201(g)(2), 201(g)(3), 201(g)(5), 201(g)(6), 201(n)(1), 201(o), 204(a)(1), 204(a)(2), 204(b)(1), 204(d)(2), 211, 218, 511(c)(1), and 513 of this Act in the same manner as treatment works constructed with assistance under title II of this Act;

"(7) in addition to complying with the requirements of this title, the State will commit or expend each quarterly grant payment which it will receive under this title in accordance with laws and procedures applicable to the commitment or expenditure of revenues of the State;

"(8) in carrying out the requirements of section 606 of this Act, the State will use accounting, audit, and fiscal procedures conforming to generally accepted government accounting standards;

"(9) the State will require as a condition of making a loan or providing other assistance, as described in section 603(d) of this Act, from the fund that the recipient of such assistance will maintain project accounts in accordance with generally accepted government accounting standards; and

"(10) the State will make annual reports to the Administrator on the actual use of funds in accordance with section 606(d) of this Act.

"SEC. 603. WATER POLLUTION CONTROL REVOLVING LOAN FUNDS.

"(a) REQUIREMENTS FOR OBLIGATION OF GRANT FUNDS.—Before a State may receive a capitalization grant with funds made available under this title and section 205(m) of this Act, the State shall first establish a water pollution control revolving fund which complies with the requirements of this section.

"(b) ADMINISTRATION.—Each State water pollution control revolving fund shall be administered by an instrumentality of the State with such powers and limitations as may be required to operate such fund in accordance with the requirements and objectives of this Act.

"(c) PROJECTS ELIGIBLE FOR ASSISTANCE.—The amounts of funds available to each State water pollution control revolving fund shall be used only for providing financial assistance (1) to any municipality, intermunicipal, interstate, or State agency for construction of publicly owned treatment works (as defined in section 212 of this Act), (2) for the implementation of a management program established under section 319 of this Act, and (3) for development and implementation of a conservation and management plan under section 320 of this Act. The fund shall be established, maintained, and credited with repayments, and the fund balance shall be available in perpetuity for providing such financial assistance.

"(d) TYPES OF ASSISTANCE.—Except as otherwise limited by State law, a water pollution control revolving fund of a State under this section may be used only—

"(1) to make loans, on the condition that—

"(A) such loans are made at or below market interest rates, including interest free loans, at terms not to exceed 20 years;

"(B) annual principal and interest payments will commence not later than 1 year after completion of any project and all loans will be fully amortized not later than 20 years after project completion;

"(C) the recipient of a loan will establish a dedicated source of revenue for repayment of loans; and

"(D) the fund will be credited with all payments of principal and interest on all loans;

"(2) to buy or refinance the debt obligation of municipalities and intermunicipal and interstate agencies within the State at or below market rates, where such debt obligations were incurred after March 7, 1985;

"(3) to guarantee, or purchase insurance for, local obligations where such action would improve credit market access or reduce interest rates;

"(4) as a source of revenue or security for the payment of principal and interest on revenue or general obligation bonds issued by the State if the proceeds of the sale of such bonds will be deposited in the fund;

"(5) to provide loan guarantees for similar revolving funds established by municipalities or intermunicipal agencies;

"(6) to earn interest on fund accounts; and

"(7) for the reasonable costs of administering the fund and conducting activities under this title, except that such amounts shall not exceed 4 percent of all grant awards to such fund under this title.

"(e) LIMITATION TO PREVENT DOUBLE BENEFITS.—If a State makes, from its water pollution revolving fund, a loan which will finance the cost of facility planning and the preparation of plans, specifications, and estimates for construction of publicly owned treatment works, the State shall ensure that if the recipient of such loan receives a grant under section 201(g) of this Act for construction of such treatment works and an allowance under section 201(l)(1) of this Act for non-Federal funds expended for such planning and preparation, such recipient will promptly repay such loan to the extent of such allowance.

"(f) CONSISTENCY WITH PLANNING REQUIREMENTS.—A State may provide financial assistance from its water pollution control revolving fund only with respect to a project which is consistent with plans, if any, developed under sections 205(j), 208, 303(e), 319, and 320 of this Act.

"(g) PRIORITY LIST REQUIREMENT.—The State may provide financial assistance from its water pollution control revolving fund only with respect to a project for construction of a treatment works described in subsection (c)(1) if such project is on the State's priority list under section 216 of this Act. Such assistance may be provided regardless of the rank of such project on such list.

"(h) ELIGIBILITY OF NON-FEDERAL SHARE OF CONSTRUCTION GRANT PROJECTS.—A State water pollution control revolving fund may provide assistance (other than under subsection (d)(1) of this section) to a municipality or intermunicipal or interstate agency with respect to the non-Federal share of the costs of a treatment works project for which such municipality or agency is receiving assistance from the Administrator under any other authority only if such assistance is necessary to allow such project to proceed.

"SEC. 604. ALLOTMENT OF FUNDS.

"(a) FORMULA.—Sums authorized to be appropriated to carry out this section for each of fiscal years 1989 and 1990 shall be allotted by the Administrator in accordance with section 205(c) of this Act.

"(b) RESERVATION OF FUNDS FOR PLANNING.—Each State shall reserve each fiscal year 1 percent of the sums allotted to such State under this section for such fiscal year, or $100,000, whichever amount is greater, to carry out planning under sections 205(j) and 303(e) of this Act.

"(c) ALLOTMENT PERIOD.—

"(1) PERIOD OF AVAILABILITY FOR GRANT AWARD.—Sums allotted to a State under this section for a fiscal year shall be available for obligation by the State during the fiscal year for which sums are authorized and during the following fiscal year.

"(2) REALLOTMENT OF UNOBLIGATED FUNDS.—The amount of any allotment not obligated

by the State by the last day of the 2-year period of availability established by paragraph (1) shall be immediately reallotted by the Administrator on the basis of the same ratio as is applicable to sums allotted under title II of this Act for the second fiscal year of such 2-year period. None of the funds reallotted by the Administrator shall be reallotted to any State which has not obligated all sums allotted to such State in the first fiscal year of such 2-year period.

"SEC. 605. CORRECTIVE ACTION.

"(a) NOTIFICATION OF NONCOMPLIANCE.—If the Administrator determines that a State has not complied with its agreement with the Administrator under section 602 of this Act or any other requirement of this title, the Administrator shall notify the State of such noncompliance and the necessary corrective action.

"(b) WITHHOLDING OF PAYMENTS.—If a State does not take corrective action within 60 days after the date a State receives notification of such action under subsection (a), the Administrator shall withhold additional payments to the State until the Administrator is satisfied that the State has taken the necessary corrective action.

"(c) REALLOTMENT OF WITHHELD PAYMENTS.—If the Administrator is not satisfied that adequate corrective actions have been taken by the State within 12 months after the State is notified of such actions under subsection (a), the payments withheld from the State by the Administrator under subsection (b) shall be made available for reallotment in accordance with the most recent formula for allotment of funds under this title.

"SEC. 606. AUDITS, REPORTS, AND FISCAL CONTROLS; INTENDED USE PLAN.

"(a) FISCAL CONTROL AND AUDITING PROCEDURES.—Each State electing to establish a water pollution control revolving fund under this title shall establish fiscal controls and accounting procedures sufficient to assure proper accounting during appropriate accounting periods for—

"(1) payments received by the fund;

"(2) disbursements made by the fund; and

"(3) fund balances at the beginning and end of the accounting period.

"(b) ANNUAL FEDERAL AUDITS.—The Administrator shall, at least on an annual basis, conduct or require each State to have independently conducted reviews and audits as may be deemed necessary or appropriate by the Administrator to carry out the objectives of this section. Audits of the use of funds deposited in the water pollution revolving fund established by such State shall be conducted in accordance with the auditing procedures of the General Accounting Office, including chapter 75 of title 31, United States Code.

"(c) INTENDED USE PLAN.—After providing for public comment and review, each State shall annually prepare a plan identifying the intended uses of the amounts available to its water pollution control revolving fund. Such intended use plan shall include, but not be limited to—

"(1) a list of those projects for construction of publicly owned treatment works on the State's priority list developed pursuant to section 216 of this Act and a list of activities eligible for assistance under sections 319 and 320 of this Act;

"(2) a description of the short- and long-term goals and objectives of its water pollution control revolving fund;

"(3) information on the activities to be supported, including a description of project categories, discharge requirements under titles III and IV of this Act, terms of financial assistance, and communities served;

"(4) assurances and specific proposals for meeting the requirements of paragraphs (3), (4), (5), and (6) of section 602(b) of this Act; and

"(5) the criteria and method established for the distribution of funds.

"(d) ANNUAL REPORT.—Beginning the first fiscal year after the receipt of payments under this title, the State shall provide an annual report to the Administrator describing how the State has met the goals and objectives for the previous fiscal year as identified in the plan prepared for the previous fiscal year pursuant to subsection (c), including identification of loan recipients, loan amounts, and loan terms and similar details on other forms of financial assistance provided from the water pollution control revolving fund.

"(e) ANNUAL FEDERAL OVERSIGHT REVIEW.—The Administrator shall conduct an annual oversight review of each State plan prepared under subsection (c), each State report prepared under subsection (d), and other such materials as are considered necessary and appropriate in carrying out the purposes of this title. After reasonable notice by the Administrator to the State or the recipient of a loan from a water pollution control revolving fund, the State or loan recipient shall make available to the Administrator such records as the Administrator reasonably requires to review and determine compliance with this title.

"(f) APPLICABILITY OF TITLE II PROVISIONS.—Except to the extent provided in this title, the provisions of title II shall not apply to grants under this title.

"SEC. 607. AUTHORIZATION OF APPROPRIATIONS.

"There is authorized to be appropriated to carry out the purposes of this title the following sums:

"(1) $1,200,000,000 per fiscal year for each of fiscal years 1989 and 1990;

"(2) $2,400,000,000 for fiscal year 1991;

"(3) $1,800,000,000 for fiscal year 1992;

"(4) $1,200,000,000 for fiscal year 1993; and

"(5) $600,000,000 for fiscal year 1994.".

(b) STATE-OPTION TO USE TITLE II FUNDS.—Section 205 is amended by adding at the end thereof the following new subsection:

"(m) DISCRETIONARY DEPOSITS INTO STATE WATER POLLUTION CONTROL REVOLVING FUNDS.—

"(1) FROM CONSTRUCTION GRANT ALLOTMENTS.—In addition to any amounts deposited in a water pollution control revolving fund established by a State under title VI, upon request of the Governor of such State, the Administrator shall make available to the State for deposit, as capitalization grants, in such fund in any fiscal year beginning after September 30, 1986, such amount of the amounts allotted to such State under this section for such fiscal year as the Governor considers appropriate; except that (A) in fiscal year 1987, such deposit may not exceed 50 percent of the amounts allotted to such State under this section for such fiscal year, and (B) in fiscal year 1988, such deposit may not exceed 75 percent of the amount allotted to such State under this section for this fiscal year.

"(2) NOTICE REQUIREMENT.—The Governor of a State may make a request under paragraph (1) for a deposit into the water pollution control revolving fund of such State—

"(A) in fiscal year 1987 only if no later than 90 days after the date of the enactment of this subsection, and

"(B) in each fiscal year thereafter only if 90 days before the first day of such fiscal year,

the State provides notice of its intent to make such deposit.

"(3) EXCEPTION.—Sums reserved under section 205(j) of this Act shall not be available for obligation under this subsection.".

(c) REPORT TO CONGRESS.—Section 516 is amended by adding at the end thereof the following new subsection:

"(g) STATE REVOLVING FUND REPORT.—

"(1) IN GENERAL.—Not later than February 10, 1990, the Administrator shall submit to Congress a report on the financial status and operations of water pollution control revolving funds established by the States under title VI of this Act. The Administrator shall prepare such report in cooperation with the States, including water pollution control agencies and other water pollution control planning and financing agencies.

"(2) CONTENTS.—The report under this subsection shall also include the following:

"(A) an inventory of the facilities that are in significant noncompliance with the enforceable requirements of this Act;

"(B) an estimate of the cost of construction necessary to bring such facilities into compliance with such requirements;

"(C) an assessment of the availability of sources of funds for financing such needed construction, including an estimate of the amount of funds available for providing assistance for such construction through September 30, 1999, from the water pollution control revolving funds established by the States under title VI of this Act;

"(D) an assessment of the operations, loan portfolio, and loan conditions of such revolving funds;

"(E) an assessment of the effect on user charges of the assistance provided by such revolving funds compared to the assistance provided with funds appropriated pursuant to section 207 of this Act; and

"(F) an assessment of the efficiency of the operation and maintenance of treatment works constructed with assistance provided by such revolving funds compared to the efficiency of the operation and maintenance of treatment works constructed with assistance provided under section 201 of this Act.".

SEC. 213. IMPROVEMENT PROJECTS.

(a) AVALON, CALIFORNIA.—The Administrator shall make a grant of $3,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal year 1987 to the city of Avalon, California, for improvements to the publicly owned treatment works of such city.

(b) WALKER AND SMITHFIELD TOWNSHIPS, PENNSYLVANIA.—Out of funds available for grants in the State of Pennsylvania under the third sentence of section 201(g)(1) of the Federal Water Pollution Control Act in fiscal year 1987, the Administrator shall make grants—

(1) to Walker Township, Pennsylvania, for developing a collector system and connecting its wastewater treatment system into the Huntingdon Borough, Pennsylvania, sewage treatment plant, and

(2) to Smithfield Township, Pennsylvania, for rehabilitating and extending its collector system.

(c) TAYLOR MILL, KENTUCKY.—Notwithstanding section 201(g)(1) of the Federal Water Pollution Control Act or any other provision of law, the Administrator shall make a grant of $250,000 from funds allotted

under section 205 of such Act to the State of Kentucky for fiscal year 1986 to the city of Taylor Mill, Kentucky, for the repair and reconstruction, as necessary, of the publicly owned treatment works of such city.

(d) NEVADA COUNTY, CALIFORNIA.—Out of funds available for grants in the State of California under the third sentence of section 201(g)(1) of the Federal Water Pollution Control Act in fiscal year 1987, the Administrator shall make a grant for the construction of a collection system serving the Glenshire/Devonshire area of Nevada County, California, to deliver waste to the Tahoe-Truckee Sanitary District's regional wastewater treatment facility.

(e) TREATMENT WORKS FOR WANAQUE, NEW JERSEY.—In fiscal year 1987 and succeeding fiscal years, the Administrator shall make grants to the Wanaque Valley Regional Sewerage Authority, New Jersey, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of New Jersey for such fiscal year, for the construction of treatment works with a total treatment capacity of 1,050,000 gallons per day (including a treatment module with a treatment capacity of 350,000 gallons per day). Notwithstanding section 202 of such Act, the Federal share of the cost of construction of such treatment works shall be 75 percent.

(f) TREATMENT WORKS FOR LENA, ILLINOIS.—The Administrator shall make grants to the village of Lena, Illinois, from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Illinois for fiscal years beginning after September 30, 1986, for the construction of a replacement moving bed filter press for the treatment works of such village. Notwithstanding section 202 of the Federal Water Pollution Control Act, the Federal share of the cost of construction of such project shall be 75 percent.

(g) PRIORITY FOR COURT-ORDERED AND OTHER PROJECTS.—The State of Pennsylvania, from funds allotted to it under section 205 of the Federal Water Pollution Control Act, shall give priority for construction of—

(1) the Wyoming Valley Sanitary Authority Secondary Treatment project mandated under Federal court order, regardless of the date of start of construction made pursuant to the court order; and

(2) a project for wastewater treatment for Altoona, Pennsylvania.

SEC. 214. CHICAGO TUNNEL AND RESERVOIR PROJECT.

The Chicago tunnel and reservoir project may receive grants under the last sentence of section 201(g)(1) of the Federal Water Pollution Control Act without regard to the limitation contained in such sentence if the Administrator determines that such project meets the cost-effectiveness requirements of sections 217 and 218 of such Act without any redesign or reconstruction and if the Governor of the affected State demonstrates to the satisfaction of the Administrator the water quality benefits of such project.

SEC. 215. AD VALOREM TAX DEDICATION.

For the purposes of complying with section 204(b)(1) of the Federal Water Pollution Control Act, the ad valorem tax user charge systems of the town of Hampton and the city of Nashua, New Hampshire, shall be deemed to have been dedicated as of December 27, 1977. The Administrator shall review such ad valorem tax user charge systems for compliance with the remaining requirements of such section and related regulations of the Environmental Protection Agency.

TITLE III—STANDARDS AND ENFORCEMENTS

SEC. 301. COMPLIANCE DATES.

(a) PRIORITY TOXIC POLLUTANTS.—Section 301(b)(2)(C) is amended by striking out "not later than July 1, 1984," and inserting after "of this paragraph" the following: "as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than March 31, 1989".

(b) OTHER TOXIC POLLUTANTS.—Section 301(b)(2)(D) is amended by striking out "not later than three years after the date such limitations are established" and inserting in lieu thereof "as expeditiously as practicable, but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than March 31, 1989".

(c) CONVENTIONAL POLLUTANTS.—Section 301(b)(2)(E) is amended by striking "not later than July 1, 1984," and inserting in lieu thereof "as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than March 31, 1989, compliance with".

(d) OTHER POLLUTANTS.—Section 301(b)(2)(F) is amended by striking "not" after "subparagraph (A) of this paragraph" and inserting in lieu thereof "as expeditiously as practicable but in no case", and by striking "or not later than July 1, 1984," and all that follows through the end of the sentence and inserting in lieu thereof "and in no case later than March 31, 1989.".

(e) STRICTER BPT.—Section 301(b) is amended by adding at the end the following new paragraph:

"(3)(A) for effluent limitations under paragraph (1)(A)(i) of this subsection promulgated after January 1, 1982, and requiring a level of control substantially greater or based on fundamentally different control technology than under permits for an industrial category issued before such date, compliance as expeditiously as practicable but in no case later than three years after the date such limitations are promulgated under section 304(b), and in no case later than March 31, 1989; and

"(B) for any effluent limitation in accordance with paragraph (1)(A)(i), (2)(A)(i), or (2)(E) of this subsection established only on the basis of section 402(a)(1) in a permit issued after enactment of the Water Quality Act of 1986, compliance as expeditiously as practicable but in no case later than three years after the date such limitations are established, and in no case later than March 31, 1989.".

(f) DEADLINES FOR REGULATIONS FOR CERTAIN TOXIC POLLUTANTS.—The Administrator shall promulgate final regulations establishing effluent limitations in accordance with sections 301(b)(2)(A) and 307(b)(1) of the Federal Water Pollution Control Act for all toxic pollutants referred to in table 1 of Committee Print Numbered 95-30 of the Committee on Public Works and Transportation of the House of Representatives which are discharged from the categories of point sources in accordance with the following table:

Category	Date by which the final regulation shall be promulgated
Organic chemicals and plastics and synthetic fibers.	December 31, 1986.
Pesticides.....	December 31, 1986.

SEC. 302. MODIFICATION FOR NONCONVENTIONAL POLLUTANTS.

(a) LISTING OF POLLUTANTS.—Section 301(g) is amended by redesignating paragraph (2) (and any references thereto) as paragraph (3) and by striking out all that precedes subparagraph (A) of paragraph (1) and inserting in lieu thereof the following:

"(g) MODIFICATIONS FOR CERTAIN NONCONVENTIONAL POLLUTANTS.—

"(1) GENERAL AUTHORITY.—The Administrator, with the concurrence of the State, may modify the requirements of subsection (b)(2)(A) of this section with respect to the discharge from any point source of ammonia, chlorine, color, iron, and total phenols (4AAP) (when determined by the Administrator to be a pollutant covered by subsection (b)(2)(F)) and any other pollutant which the Administrator lists under paragraph (4) of this subsection.

"(2) REQUIREMENTS FOR GRANTING MODIFICATIONS.—A modification under this subsection shall be granted only upon a showing by the owner or operator of a point source satisfactory to the Administrator that—".

(b) PROCEDURE FOR LISTING ADDITIONAL POLLUTANTS; REMOVAL.—Section 301(g) is further amended by adding at the end thereof the following new paragraphs:

"(4) PROCEDURES FOR LISTING ADDITIONAL POLLUTANTS.—

"(A) GENERAL AUTHORITY.—Upon petition of any person, the Administrator may add any pollutant to the list of pollutants for which modification under this section is authorized (except for pollutants identified pursuant to section 304(a)(4) of this Act, toxic pollutants subject to section 307(a) of this Act, and the thermal component of discharges) in accordance with the provisions of this paragraph.

"(B) REQUIREMENTS FOR LISTING.—

"(i) SUFFICIENT INFORMATION.—The person petitioning for listing of an additional pollutant under this subsection shall submit to the Administrator sufficient information to make the determinations required by this subparagraph.

"(ii) TOXIC CRITERIA DETERMINATION.—The Administrator shall determine whether or not the pollutant meets the criteria for listing as a toxic pollutant under section 307(a) of this Act.

"(iii) LISTING AS TOXIC POLLUTANT.—If the Administrator determines that the pollutant meets the criteria for listing as a toxic pollutant under section 307(a), the Administrator shall list the pollutant as a toxic pollutant under section 307(a).

"(iv) NONCONVENTIONAL CRITERIA DETERMINATION.—If the Administrator determines that the pollutant does not meet the criteria for listing as a toxic pollutant under such section and determines that adequate test methods and sufficient data are available to make the determinations required by paragraph (2) of this subsection with respect to the pollutant, the Administrator shall add the pollutant to the list of pollutants specified in paragraph (1) of this subsection for which modifications are authorized under this subsection.

"(C) REQUIREMENTS FOR FILING OF PETITIONS.—A petition for listing of a pollutant under this paragraph—

"(i) must be filed not later than 270 days after the date of promulgation of an applicable effluent guideline under section 304;

"(ii) may be filed before promulgation of such guideline; and

"(iii) may be filed with an application for a modification under paragraph (1) with respect to the discharge of such pollutant.

"(D) DEADLINE FOR APPROVAL OF PETITION.—A decision to add a pollutant to the list of pollutants for which modifications under this subsection are authorized must be made

within 270 days after the date of promulgation of an applicable effluent guideline under section 304.

"(E) BURDEN OF PROOF.—The burden of proof for making the determinations under subparagraph (B) shall be on the petitioner.

"(5) REMOVAL OF POLLUTANTS.—The Administrator may remove any pollutant from the list of pollutants for which modifications are authorized under this subsection if the Administrator determines that adequate test methods and sufficient data are no longer available for determining whether or not modifications may be granted with respect to such pollutant under paragraph (2) of this subsection.".

(c) DEADLINE FOR APPROVAL OF MODIFICATIONS.—Section 301(j) is amended—

(1) in paragraph (2) by striking out "Any" and inserting in lieu thereof "Subject to paragraph (3) of this section, any"; and

(2) by adding at the end thereof the following new paragraphs:

"(3) COMPLIANCE REQUIREMENTS UNDER SUBSECTION (g).—

"(A) EFFECT OF FILING.—An application for a modification under subsection (g) and a petition for listing of a pollutant as a pollutant for which modifications are authorized under such subsection shall not stay the requirement that the person seeking such modification or listing comply with effluent limitations under this Act for all pollutants not the subject of such application or petition.

"(B) EFFECT OF DISAPPROVAL.—Disapproval of an application for a modification under subsection (g) shall not stay the requirement that the person seeking such modification comply with all applicable effluent limitations under this Act.

"(4) DEADLINE FOR SUBSECTION (g) DECISION.—An application for a modification with respect to a pollutant filed under subsection (g) must be approved or disapproved not later than 365 days after the date of such filing; except that in any case in which a petition for listing such pollutant as a pollutant for which modifications are authorized under such subsection is approved, such application must be approved or disapproved not later than 365 days after the date of approval of such petition.".

(d) CONFORMING AMENDMENTS.—(1) Paragraph (3) of section 301(g), as redesignated by subsection (a) of this section, is amended by inserting "LIMITATION ON AUTHORITY TO APPLY FOR SUBSECTION (c) MODIFICATION.—" before "If an owner" and by aligning such paragraph with paragraph (4) of such section, as added by such subsection (c).

(2) Paragraph (2) of section 301(g) (as designated by subsection (a) of this section) is amended by realigning subparagraphs (A), (B), and (C) with subparagraph (A) of paragraph (4), as added by subsection (b) of this section.

(e) APPLICATION.—

(1) GENERAL RULE.—Except as provided in paragraph (2), the amendments made by this section shall apply to all requests for modifications under section 301(g) of the Federal Water Pollution Control Act pending on the date of the enactment of this Act and shall not have the effect of extending the deadline established in section 301(j)(1)(B) of such Act.

(2) EXCEPTION.—The amendments made by this section shall not affect any application for a modification with respect to the discharge of ammonia, chlorine, color, iron, or total phenols (4AAP) under section 301(g) of the Federal Water Pollution Control Act pending on the date of the enactment of this Act; except that the Administrator must approve or disapprove such application not later than 365 days after the date of such enactment.

SEC. 303. DISCHARGES INTO MARINE WATERS.

(a) CONSIDERATION OF OTHER SOURCES OF POLLUTANTS.—Section 301(h)(2) is amended by striking out "such modified requirements will not interfere" and inserting in lieu thereof the following: "the discharge of pollutants in accordance with such modified requirements will not interfere, alone or in combination with pollutants from other sources,".

(b) LIMITATION ON SCOPE OF MONITORING.—

(1) GENERAL RULE.—Section 301(h)(3) is amended by inserting before the semicolon at the end thereof the following: ", and the scope of such monitoring is limited to include only those scientific investigations which are necessary to study the effects of the proposed discharge".

(2) LIMITATION ON APPLICABILITY.—The amendment made by subsection (b) shall only apply to modifications and renewals of modifications which are tentatively or finally approved after the date of the enactment of this Act.

(c) URBAN AREA PRETREATMENT PROGRAM.—Section 301(h) is amended by redesignating paragraphs (6) and (7), and any references thereto, as paragraphs (7) and (8), respectively, and by inserting after paragraph (5) the following new paragraph:

"(6) in the case of any treatment works serving a population of 50,000 or more, with respect to any toxic pollutant introduced into such works by an industrial discharger for which pollutant there is no applicable pretreatment requirement in effect, sources introducing waste into such works are in compliance with all applicable pretreatment requirements, the applicant will enforce such requirements, and the applicant has in effect a pretreatment program which, in combination with the treatment of discharges from such works, removes the same amount of such pollutant as would be removed if such works were to apply secondary treatment to discharges and if such works had no pretreatment program with respect to such pollutant;".

(d) PRIMARY TREATMENT FOR EFFLUENT.—

(1) GENERAL RULE.—Section 301(h) is amended by striking out the period at the end of paragraph (8) (as redesignated by subsection (c) of this section) and inserting in lieu thereof a semicolon and by inserting after such paragraph (8) the following new paragraph:

"(9) the applicant at the time such modification becomes effective will be discharging effluent which has received at least primary or equivalent treatment and which meets the criteria established under section 304(a)(1) of this Act after initial mixing in the waters surrounding or adjacent to the point at which such effluent is discharged.".

(2) PRIMARY OR EQUIVALENT TREATMENT DEFINED.—Such section is further amended by inserting after the second sentence the following new sentence: "For the purposes of paragraph (9), 'primary or equivalent treatment' means treatment by screening, sedimentation, and skimming adequate to remove at least 30 percent of the biological oxygen demanding material and of the suspended solids in the treatment works influent, and disinfection, where appropriate.".

(e) LIMITATIONS ON ISSUANCE OF PERMITS.—Section 301(h) is further amended by adding at the end thereof the following new sentences: "In order for a permit to be issued under this subsection for the discharge of a pollutant into marine waters, such marine waters must exhibit characteristics assuring that water providing dilution does not contain significant amounts of previously discharged effluent from such treatment works. No permit issued under this subsection shall authorize the discharge of any pollutant into saline estuarine waters which at the time of application do not support a balanced indigenous population of shellfish, fish and wildlife, or allow recreation in and on the waters or which exhibit ambient water quality below applicable water quality standards adopted for the protection of public water supplies, shellfish, fish and wildlife or recreational activities or such other standards necessary to assure support and protection of such uses. The prohibition contained in the preceding sentence shall apply without regard to the presence or absence of a causal relationship between such characteristics and the applicant's current or proposed discharge. Notwithstanding any other provisions of this subsection, no permit may be issued under this subsection for discharge of a pollutant into the New York Bight Apex consisting of the ocean waters of the Atlantic Ocean westward of 73 degrees 30 minutes west longitude and northward of 40 degrees 10 minutes north latitude.".

(f) APPLICATION FOR OCEAN DISCHARGE MODIFICATION.—Section 301(j)(1)(A) is amended by inserting before the semicolon at the end thereof the following: ", except that a publicly owned treatment works which prior to December 31, 1982, had a contractual arrangement to use a portion of the capacity of an ocean outfall operated by another publicly owned treatment works which has applied for or received modification under subsection (h), may apply for a modification of subsection (h) in its own right not later than 30 days after the date of the enactment of the Water Quality Act of 1986".

(g) GRANDFATHER OF CERTAIN APPLICANTS.—The amendments made by subsections (a), (c), (d), and (e) of this section shall not apply to an application for a permit under section 301(h) of the Federal Water Pollution Control Act which has been tentatively or finally approved by the Administrator before the date of the enactment of this Act; except that such amendments shall apply to all renewals of such permits after such date of enactment.

SEC. 304. FILING DEADLINE FOR TREATMENT WORKS MODIFICATION.

(a) EXTENSION.—The second sentence of section 301(i)(1) is amended by striking out "of this subsection." and inserting in lieu thereof "of the Water Quality Act of 1986.".

(b) APPLICABILITY.—The amendment made by subsection (a) shall not apply to those treatment works which are subject to a compliance schedule established before the date of the enactment of this Act by a court order or a final administrative order.

SEC. 305. INNOVATIVE TECHNOLOGY COMPLIANCE DEADLINES FOR DIRECT DISCHARGERS.

(a) EXTENSION OF DEADLINE.—Section 301(k) is amended by striking out "July 1, 1987," and inserting in lieu thereof "two years after the date for compliance with such effluent limitation which would otherwise be applicable under such subsection,".

(b) EXTENSION TO CONVENTIONAL POLLUTANTS.—Section 301(k) is amended by inserting "or (b)(2)(E)" after "(b)(2)(A)" each place it appears.

SEC. 306. FUNDAMENTALLY DIFFERENT FACTORS.

(a) GENERAL RULE.—Section 301 is amended by adding at the end the following new subsections:

"(n) FUNDAMENTALLY DIFFERENT FACTORS.—

"(1) GENERAL RULE.—The Administrator, with the concurrence of the State, may establish an alternative requirement under subsection (b)(2) or section 307(b) for a facility that modifies the requirements of national effluent limitation guidelines or categorical pretreatment standards that would otherwise be applicable to such facility, if the owner or operator of such facility demonstrates to the satisfaction of the Administrator that—

"(A) the facility is fundamentally different with respect to the factors (other than cost) specified in section 304(b) or 304(g) and considered by the Administrator in establishing such national effluent limitation guidelines or categorical pretreatment standards;

"(B) the application—

"(i) is based solely on information and supporting data submitted to the Administrator during the rulemaking for establishment of the applicable national effluent limitation guidelines or categorical pretreatment standard specifically raising the factors that are fundamentally different for such facility; or

"(ii) is based on information and supporting data referred to in clause (i) and information and supporting data the applicant did not have a reasonable opportunity to submit during such rulemaking;

"(C) the alternative requirement is no less stringent than justified by the fundamental difference; and

"(D) the alternative requirement will not result in a non-water quality environmental impact which is markedly more adverse than the impact considered by the Administrator in establishing such national effluent limitation guideline or categorical pretreatment standard.

"(2) TIME LIMIT FOR APPLICATIONS.—An application for an alternative requirement which modifies the requirements of an effluent limitation or pretreatment standard under this subsection must be submitted to the Administrator within 180 days after the date on which such limitation or standard is established or revised, as the case may be.

"(3) TIME LIMIT FOR DECISION.—The Administrator shall approve or deny by final agency action an application submitted under this subsection within 180 days after the date such application is filed with the Administrator.

"(4) SUBMISSION OF INFORMATION.—The Administrator may allow an applicant under this subsection to submit information and supporting data until the earlier of the date the application is approved or denied or the last day that the Administrator has to approve or deny such application.

"(5) TREATMENT OF PENDING APPLICATIONS.—For the purposes of this subsection, an application for an alternative requirement based on fundamentally different factors which is pending on the date of the enactment of this subsection shall be treated as having been submitted to the Administrator on the 180th day following such date of enactment. The applicant may amend the application to take into account the provisions of this subsection.

"(6) EFFECT OF SUBMISSION OF APPLICATION.—An application for an alternative requirement under this subsection shall not stay the applicant's obligation to comply with the effluent limitation guideline or categorical pretreatment standard which is the subject of the application.

"(7) EFFECT OF DENIAL.—If an application for an alternative requirement which modifies the requirements of an effluent limitation or pretreatment standard under this subsection is denied by the Administrator, the applicant must comply with such limitation or standard as established or revised, as the case may be.

"(8) REPORTS.—Every 6 months after the date of the enactment of this subsection, the Administrator shall submit to the Committee on Environment and Public Works of the Senate and the Committee on Public Works and Transportation of the House of Representatives a report on the status of applications for alternative requirements which modify the requirements of effluent limitations under section 301 or 304 of this Act or any national categorical pretreatment standard under section 307(b) of this Act filed before, on, or after such date of enactment.

"(o) APPLICATION FEES.—The Administrator shall prescribe and collect from each applicant fees reflecting the reasonable administrative costs incurred in reviewing and processing applications for modifications submitted to the Administrator pursuant to subsections (c), (g), (i), (k), (m), and (n) of section 301, section 304(d)(4), and section 316(a) of this Act. All amounts collected by the Administrator under this subsection shall be deposited into a special fund of the Treasury entitled 'Water Permits and Related Services' which shall thereafter be available for appropriation to carry out activities of the Environmental Protection Agency for which such fees were collected.".

(b) CONFORMING AMENDMENT.—Section 301(l) is amended by striking out "The" and inserting in lieu thereof "Other than as provided in subsection (n) of this section, the".

(c) PHOSPHATE FERTILIZER EFFLUENT LIMITATION.—

(1) LIMITATION ON APPLICABILITY.—The effluent limitation established by the Administrator pursuant to section 301(b) of the Federal Water Pollution Control Act for the phosphate subcategory of the fertilizer manufacturing point source category shall not apply to facilities which had commenced construction on or before April 8, 1974, and for which the Administrator is proposing to revise the applicability of such limitations to exclude such facilities.

(2) ISSUANCE OF PERMIT.—As soon as possible after the date of the enactment of this Act, but not later than 180 days after such date of enactment, the Administrator shall issue permits under section 402(a)(1)(B) of the Federal Water Pollution Control Act with respect to the facilities described in paragraph (1). Such permits shall remain in effect until, after such date of enactment, issuance of a permit under effluent guidelines applicable to discharges for the phosphate subcategory.

SEC. 307. COAL REMINING OPERATIONS.

Section 301 is amended by adding at the end thereof the following:

"(p) MODIFIED PERMIT FOR COAL REMINING OPERATIONS.—

"(1) IN GENERAL.—Subject to paragraphs (2) through (4) of this subsection, the Administrator, or the State in any case which the State has an approved permit program under section 402(b), may issue a permit under section 402 which modifies the requirements of subsection (b)(2)(A) of this section with respect to the pH level of any pre-existing discharge, and with respect to pre-existing discharges of iron and manganese from the remined area of any coal remining operation or with respect to the pH level or level of iron or manganese in any pre-existing discharge affected by the remining operation. Such modified requirements shall apply the best available technology economically achievable on a case-by-case basis, using best professional judgment, to set specific numerical effluent limitations in each permit.

"(2) LIMITATIONS.—The Administrator or the State may only issue a permit pursuant to paragraph (1) if the applicant demonstrates to the satisfaction of the Administrator or the State, as the case may be, that the coal remining operation will result in the potential for improved water quality from the remining operation but in no event shall such a permit allow the pH level of any discharge, and in no event shall such a permit allow the discharges of iron and manganese, to exceed the levels being discharged from the remined area before the coal remining operation begins. No discharge from, or affected by, the remining operation shall exceed State water quality standards established under section 303 of this Act.

"(3) DEFINITIONS.—For purposes of this subsection—

"(A) COAL REMINING OPERATION.—The term 'coal remining operation' means a coal mining operation which begins after the date of the enactment of this subsection at a site on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977.

"(B) REMINED AREA.—The term 'remined area' means only that area of any coal remining operation on which coal mining was conducted before the effective date of the Surface Mining Control and Reclamation Act of 1977.

"(C) PRE-EXISTING DISCHARGE.—The term 'pre-existing discharge' means any discharge at the time of permit application under this subsection.

"(4) APPLICABILITY OF STRIP MINING LAWS.—Nothing in this subsection shall affect the application of the Surface Mining Control and Reclamation Act of 1977 to any coal remining operation, including the application of such Act to suspended solids.".

SEC. 308. INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.

(a) IN GENERAL.—Section 304 is amended by adding at the end thereof the following new subsection:

"(l) INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS.—

"(1) STATE LIST OF NAVIGABLE WATERS AND DEVELOPMENT OF STRATEGIES.—Not later than 2 years after the date of the enactment of this subsection, each State shall submit to the Administrator for review, approval, and implementation under this subsection—

"(A) a list of those waters within the State which after the application of effluent limitations required under section 301(b)(2) of this Act cannot reasonably be anticipated to attain or maintain (i) water quality standards for such waters reviewed, revised, or adopted in accordance with section 303(c)(2)(B) of this Act, due to toxic pollutants, or (ii) that water quality which shall assure protection of public health, public water supplies, agricultural and industrial uses, and the protection and propagation of a balanced population of shellfish, fish and wildlife, and allow recreational activities in and on the water;

"(B) a list of all navigable waters in such State for which the State does not expect the

applicable standard under section 303 of this Act will be achieved after the requirements of sections 301(b), 306, and 307(b) are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a);

"(C) for each segment of the navigable waters included on such lists, a determination of the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source; and

"(D) for each such segment, an individual control strategy which the State determines will produce a reduction in the discharge of toxic pollutants from point sources identified by the State under this paragraph through the establishment of effluent limitations under section 402 of this Act and water quality standards under section 303(c)(2)(B) of this Act, which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than 3 years after the date of the establishment of such strategy.

"(2) APPROVAL OR DISAPPROVAL.—Not later than 120 days after the last day of the 2-year period referred to in paragraph (1), the Administrator shall approve or disapprove the control strategies submitted under paragraph (1) by any State.

"(3) ADMINISTRATOR'S ACTION.—If a State fails to submit control strategies in accordance with paragraph (1) or the Administrator does not approve the control strategies submitted by such State in accordance with paragraph (1), then, not later than 1 year after the last day of the period referred to in paragraph (2), the Administrator, in co- operation with such State and after notice and opportunity for public comment, shall implement the requirements of paragraph (1) in such State. In the implementation of such requirements, the Administrator shall, at a minimum, consider for listing under this subsection any navigable waters for which any person submits a petition to the Administrator for listing not later than 120 days after such last day."

(b) JUDICIAL REVIEW.—Section 509(b)(1) is amended—

(1) by striking out "and (F)" and inserting in lieu thereof "(F)"; and

(2) by inserting after "any permit under section 402," the following: "and (G) in promulgating any individual control strategy under section 304(l),".

(c) GUIDANCE TO STATES; INFORMATION ON WATER QUALITY CRITERIA FOR TOXICS.—Section 304(a) is amended by adding at the end the following new paragraphs:

"(7) GUIDANCE TO STATES.—The Administrator, after consultation with appropriate State agencies and on the basis of criteria and information published under paragraphs (1) and (2) of this subsection, shall develop and publish, within 9 months after the date of the enactment of the Water Quality Act of 1986, guidance to the States on performing the identification required by section 304(l)(1) of this Act.

"(8) INFORMATION ON WATER QUALITY CRITERIA.—The Administrator, after consultation with appropriate State agencies and within 2 years after the date of the enactment of the Water Quality Act of 1986, shall develop and publish information on methods for establishing and measuring water quality criteria for toxic pollutants on other bases than pollutant-by-pollutant criteria, including biological monitoring and assessment methods.".

(d) WATER QUALITY CRITERIA FOR TOXIC POLLUTANTS.—Section 303(c)(2) is amended by inserting "(A)" after "(2)" and by adding the following new subparagraph:

"(B) Whenever a State reviews water quality standards pursuant to paragraph (1) of this subsection, or revises or adopts new standards pursuant to this paragraph, such State shall adopt criteria for all toxic pollutants listed pursuant to section 307(a)(1) of this Act for which criteria have been published under section 304(a), the discharge or presence of which in the affected waters could reasonably be expected to interfere with those designated uses adopted by the State, as necessary to support such designated uses. Such criteria shall be specific numerical criteria for such toxic pollutants. Where such numerical criteria are not available, whenever a State reviews water quality standards pursuant to paragraph (1), or revises or adopts new standards pursuant to this paragraph, such State shall adopt criteria based on biological monitoring or assessment methods consistent with information published pursuant to section 304(a)(8). Nothing in this section shall be construed to limit or delay the use of effluent limitations or other permit conditions based on or involving biological monitoring or assessment methods or previously adopted numerical criteria.".

(e) MODIFICATIONS OF EFFLUENT LIMITATIONS.—

(1) IN GENERAL.—Section 302(b) is amended to read as follows:

"(b) MODIFICATIONS OF EFFLUENT LIMITATIONS.—

"(1) NOTICE AND HEARING.—Prior to establishment of any effluent limitation pursuant to subsection (a) of this section, the Administrator shall publish such proposed limitation and within 90 days of such publication hold a public hearing.

"(2) PERMITS.—

"(A) NO REASONABLE RELATIONSHIP.—The Administrator, with the concurrence of the State, may issue a permit which modifies the effluent limitations required by subsection (a) of this section for pollutants other than toxic pollutants if the applicant demonstrates at such hearing that (whether or not technology or other alternative control strategies are available) there is no reasonable relationship between the economic and social costs and the benefits to be obtained (including attainment of the objective of this Act) from achieving such limitation.

"(B) REASONABLE PROGRESS.—The Administrator, with the concurrence of the State, may issue a permit which modifies the effluent limitations required by subsection (a) of this section for toxic pollutants for a single period not to exceed 5 years if the applicant demonstrates to the satisfaction of the Administrator that such modified requirements (i) will represent the maximum degree of control within the economic capability of the owner and operator of the source, and (ii) will result in reasonable further progress beyond the requirements of section 301(b)(2) toward the requirements of subsection (a) of this section.".

(2) CONFORMING AMENDMENTS.—Section 302(a) is amended—

(A) by inserting "or as identified under section 304(l)" after "in the judgment of the Administrator"; and

(B) by inserting "public health," after "protection of".

(f) SCHEDULE FOR REVIEW OF GUIDELINES.—Section 304 is amended by adding at the end the following new subsection:

"(m) SCHEDULE FOR REVIEW OF GUIDELINES.—

"(1) PUBLICATION.—Within 12 months after the date of the enactment of the Water Quality Act of 1986, and biennially thereafter, the Administrator shall publish in the Federal Register a plan which shall—

"(A) establish a schedule for the annual review and revision of promulgated effluent guidelines, in accordance with subsection (b) of this section;

"(B) identify categories of sources discharging toxic or nonconventional pollutants for which guidelines under subsection (b)(2) of this section and section 306 have not previously been published; and

"(C) establish a schedule for promulgation of effluent guidelines for categories identified in subparagraph (B), under which promulgation of such guidelines shall be no later than 4 years after such date of enactment for categories identified in the first published plan or 3 years after the publication of the plan for categories identified in later published plans.

"(2) PUBLIC REVIEW.—The Administrator shall provide for public review and comment on the plan prior to final publication.".

(g) WATER QUALITY IMPROVEMENT STUDY.—

(1) STUDY.—The Administrator shall study the water quality improvements which have been achieved by application of best available technology economically achievable pursuant to section 301(b)(2) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the effectiveness of the application of best available technology economically achievable pursuant to such section in attaining applicable water quality standards (including the standard specified in section 302(a) of such Act) and an analysis of the effectiveness of the water quality program under such Act and methods of improving such program, including site specific levels of treatment which will achieve the water quality goals of such Act.

(2) REPORT.—Not later than 2 years after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under subsection (a) together with recommendations for improving the water quality program and its effectiveness to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 309. PRETREATMENT STANDARDS.

(a) EXTENSION OF COMPLIANCE DATE BY POTW.—Section 307 is amended by adding at the end the following:

"(e) COMPLIANCE DATE EXTENSION FOR INNOVATIVE PRETREATMENT SYSTEMS.—In the case of any existing facility that proposes to comply with the pretreatment standards of subsection (b) of this section by applying an innovative system that meets the requirements of section 301(k) of this Act, the owner or operator of the publicly owned treatment works receiving the treated effluent from such facility may extend the date for compliance with the applicable pretreatment standard established under this section for a period not to exceed 2 years—

"(1) if the Administrator determines that the innovative system has the potential for industrywide application, and

"(2) if the Administrator (or the State in consultation with the Administrator, in any case in which the State has a pretreatment program approved by the Administrator)—

"(A) determines that the proposed extension will not cause the publicly owned treatment works to be in violation of its permit under section 402 or of section 405 or to contribute to such a violation, and

"(B) concurs with the proposed extension.".

(b) INCREASE IN EPA EMPLOYEES.—The Administrator shall take such actions as may be necessary to increase the number of employees of the Environmental Protection Agency in order to effectively implement pretreatment requirements under section 307 of the Federal Water Pollution Control Act.

SEC. 310. INSPECTION AND ENTRY.

(a) UNAUTHORIZED DISCLOSURE.—

(1) IN GENERAL.—Section 308(b) is amended by striking out all that follows "Code" and inserting in lieu thereof a period and the following: "Any authorized representative of the Administrator (including an authorized contractor acting as a representative of the Administrator) who knowingly or willfully publishes, divulges, discloses, or makes known in any manner or to any extent not authorized by law any information which is required to be considered confidential under this subsection shall be fined not more than $1,000 or imprisoned not more than 1 year, or both. Nothing in this subsection shall prohibit the Administrator or an authorized representative of the Administrator (including any authorized contractor acting as a representative of the Administrator) from disclosing records, reports, or information to other officers, employees, or authorized representatives of the United States concerned with carrying out this Act or when relevant in any proceeding under this Act.".

(2) CONFORMING AMENDMENT.—Section 308(a)(B) is amended by inserting "(including an authorized contractor acting as a representative of the Administrator)" after "or his authorized representative".

(b) ACCESS BY CONGRESS.—Section 308 is amended by adding at the end the following new subsection:

"(d) ACCESS BY CONGRESS.—Notwithstanding any limitation contained in this section or any other provision of law, all information reported to or otherwise obtained by the Administrator (or any representative of the Administrator) under this Act shall be made available, upon written request of any duly authorized committee of Congress, to such committee.".

SEC. 311. MARINE SANITATION DEVICES.

(a) STATE REGULATION OF HOUSEBOATS.—Section 312(f)(1) is amended by striking out "After" and inserting in lieu thereof "(A) Except as provided in subparagraph (B), after" and by adding at the end thereof the following:

"(B) A State may adopt and enforce a statute or regulation with respect to the design, manufacture, or installation or use of any marine sanitation device on a houseboat, if such statute or regulation is more stringent than the standards and regulations promulgated under this section. For purposes of this paragraph, the term 'houseboat' means a vessel which, for a period of time determined by the State in which the vessel is located, is used primarily as a residence and is not used primarily as a means of transportation.".

(b) STATE ENFORCEMENT.—Section 312(k) is amended by adding at the end the following: "The provisions of this section may also be enforced by a State.".

SEC. 312. CRIMINAL PENALTIES.

Section 309(c) is amended to read as follows:

"(c) CRIMINAL PENALTIES.—

"(1) NEGLIGENT VIOLATIONS.—Any person who—

"(A) negligently violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(a)(3) or 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State; or

"(B) negligently introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage or, other than in compliance with all applicable Federal, State, or local requirements or permits, which causes such treatment works to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than 1 year, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $50,000 per day of violation, or by imprisonment of not more than 2 years, or by both.

"(2) KNOWING VIOLATIONS.—Any person who—

"(A) knowingly violates section 301, 302, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or any requirement imposed in a pretreatment program approved under section 402(a)(3) or 402(b)(8) of this Act or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State; or

"(B) knowingly introduces into a sewer system or into a publicly owned treatment works any pollutant or hazardous substance which such person knew or reasonably should have known could cause personal injury or property damage or, other than in compliance with all applicable Federal, State, or local requirements or permits, which causes such treatment works to violate any effluent limitation or condition in a permit issued to the treatment works under section 402 of this Act by the Administrator or a State;

shall be punished by a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than 3 years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $100,000 per day of violation, or by imprisonment of not more than 6 years, or by both.

"(3) KNOWING ENDANGERMENT.—

"(A) GENERAL RULE.—Any person who knowingly violates section 301, 302, 303, 306, 307, 308, 318, or 405 of this Act, or any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or in a permit issued under section 404 of this Act by the Secretary of the Army or by a State, and who knows at that time that he thereby places another person in imminent danger of death or serious bodily injury, shall, upon conviction, be subject to a fine of not more than $250,000 or imprisonment of not more than 15 years, or both. A person which is an organization shall, upon conviction of violating this subparagraph, be subject to a fine of not more than $1,000,000. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, the maximum punishment shall be doubled with respect to both fine and imprisonment.

"(B) ADDITIONAL PROVISIONS.—For the purpose of subparagraph (A) of this paragraph—

"(i) in determining whether a defendant who is an individual knew that his conduct placed another person in imminent danger of death or serious bodily injury—

"(I) the person is responsible only for actual awareness or actual belief that he possessed; and

"(II) knowledge possessed by a person other than the defendant but not by the defendant himself may not be attributed to the defendant;

except that in proving the defendant's possession of actual knowledge, circumstantial evidence may be used, including evidence that the defendant took affirmative steps to shield himself from relevant information;

"(ii) it is an affirmative defense to prosecution that the conduct charged was consented to by the person endangered and that the danger and conduct charged were reasonably foreseeable hazards of—

"(I) an occupation, a business, or a profession; or

"(II) medical treatment or medical or scientific experimentation conducted by professionally approved methods and such other person had been made aware of the risks involved prior to giving consent;

and such defense may be established under this subparagraph by a preponderance of the evidence;

"(iii) the term 'organization' means a legal entity, other than a government, established or organized for any purpose, and such term includes a corporation, company, association, firm, partnership, joint stock company, foundation, institution, trust, society, union, or any other association of persons; and

"(iv) the term 'serious bodily injury' means bodily injury which involves a substantial risk of death, unconsciousness, extreme physical pain, protracted and obvious disfigurement, or protracted loss or impairment of the function of a bodily member, organ, or mental faculty.

"(4) FALSE STATEMENTS.—Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under this Act or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under this Act, shall upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than 2 years, or by both. If a conviction of a person is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than 4 years, or by both.

"(5) TREATMENT OF SINGLE OPERATIONAL UPSET.—For purposes of this subsection, a single operational upset which leads to simultaneous violations of more than one pol-

lutant parameter shall be treated as a single violation.

"(6) RESPONSIBLE CORPORATE OFFICER AS 'PERSON'.—For the purpose of this subsection, the term 'person' means, in addition to the definition contained in section 502(5) of this Act, any responsible corporate officer.

"(7) HAZARDOUS SUBSTANCE DEFINED.—For the purpose of this subsection, the term 'hazardous substance' means (A) any substance designated pursuant to section 311(b)(2)(A) of this Act, (B) any element, compound, mixture, solution, or substance designated pursuant to section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (but not including any waste the regulation of which under the Solid Waste Disposal Act has been suspended by Act of Congress), (D) any toxic pollutant listed under section 307(a) of this Act, and (E) any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act.".

SEC. 313. CIVIL PENALTIES.

(a) VIOLATIONS OF PRETREATMENT REQUIREMENTS.—

(1) GENERAL RULE.—Section 309(d) is amended by inserting ", or any requirement imposed in a pretreatment program approved under section 402(a)(3) or 402(b)(8) of this Act," after "section 404 of this Act by a State,".

(2) SAVINGS PROVISION.—No State shall be required before July 1, 1988, to modify a permit program approved or submitted under section 402 of the Federal Water Pollution Control Act as a result of the amendment made by paragraph (1).

(b) INCREASED PENALTY.—

(1) GENERAL RULE.—Section 309(d) is amended by striking out "$10,000 per day of such violation" and inserting in lieu thereof "$25,000 per day for each violation".

(2) INCREASED PENALTIES NOT REQUIRED UNDER STATE PROGRAMS.—The Federal Water Pollution Control Act shall not be construed as requiring a State to have a civil penalty for violations described in 309(d) of such Act which has the same monetary amount as the civil penalty established by such section, as amended by paragraph (1). Nothing in this paragraph shall affect the Administrator's authority to establish or adjust by regulation a minimum acceptable State civil penalty.

(c) FACTORS TO CONSIDER IN DETERMINING PENALTY AMOUNT.—Section 309(d) is amended by adding at the end thereof the following: "In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require. For purposes of this subsection, a single operational upset which leads to simultaneous violations of more than one pollutant parameter shall be treated as a single violation.".

(d) VIOLATIONS OF SECTION 404 PERMITS.—Section 404(s) is amended—

(1) by striking out paragraph (4);

(2) by redesignating paragraph (5) as paragraph (4); and

(3) in paragraph (4), as so redesignated—

(A) by striking out "$10,000 per day of such violation" and inserting in lieu thereof "$25,000 per day for each violation";

(B) by adding at the end thereof the following: "In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.".

SEC. 314. ADMINISTRATIVE PENALTIES.

(a) GENERAL RULE.—Section 309 is amended by adding at the end thereof the following:

"(g) ADMINISTRATIVE PENALTIES.—

"(1) VIOLATIONS.—Whenever on the basis of any information available—

"(A) the Administrator finds that any person has violated section 301, 302, 306, 307, 308, 318, or 405 of this Act, or has violated any permit condition or limitation implementing any of such sections in a permit issued under section 402 of this Act by the Administrator or by a State, or in a permit issued under section 404 by a State, or

"(B) the Secretary of the Army (hereinafter in this subsection referred to as the 'Secretary') finds that any person has violated any permit condition or limitation in a permit issued under section 404 of this Act by the Secretary,

the Administrator or Secretary, as the case may be, may, after consultation with the State in which the violation occurs, assess a class I civil penalty or a class II civil penalty under this subsection.

"(2) CLASSES OF PENALTIES.—

"(A) CLASS I.—The amount of a class I civil penalty under paragraph (1) may not exceed $10,000 per violation, except that the maximum amount of any class I civil penalty under this subparagraph shall not exceed $25,000. Before issuing an order assessing a civil penalty under this subparagraph, the Administrator or the Secretary, as the case may be, shall give to the person to be assessed such penalty written notice of the Administrator's or Secretary's proposal to issue such order and the opportunity to request, within 30 days of the date the notice is received by such person, a hearing on the proposed order. Such hearing shall not be subject to section 554 or 556 of title 5, United States Code, but shall provide a reasonable opportunity to be heard and to present evidence.

"(B) CLASS II.—The amount of a class II civil penalty under paragraph (1) may not exceed $10,000 per day for each day during which the violation continues; except that the maximum amount of any class II civil penalty under this subparagraph shall not exceed $125,000. Except as otherwise provided in this subsection, a class II civil penalty shall be assessed and collected in the same manner, and subject to the same provisions, as in the case of civil penalties assessed and collected after notice and opportunity for a hearing on the record in accordance with section 554 of title 5, United States Code. The Administrator and the Secretary may issue rules for discovery procedures for hearings under this subparagraph.

"(3) DETERMINING AMOUNT.—In determining the amount of any penalty assessed under this subsection, the Administrator or the Secretary, as the case may be, shall take into account the nature, circumstances, extent and gravity of the violation, or violations, and, with respect to the violator, ability to pay, any prior history of such violations, the degree of culpability, economic benefit or savings (if any) resulting from the violation, and such other matters as justice may require. For purposes of this subsection, a single operational upset which leads to simultaneous violations of more than one pollutant parameter shall be treated as a single violation.

"(4) RIGHTS OF INTERESTED PERSONS.—

"(A) PUBLIC NOTICE.—Before issuing an order assessing a civil penalty under this subsection the Administrator or Secretary, as the case may be, shall provide public notice of and reasonable opportunity to comment on the proposed issuance of such order.

"(B) PRESENTATION OF EVIDENCE.—Any person who comments on a proposed assessment of a penalty under this subsection shall be given notice of any hearing held under this subsection and of the order assessing such penalty. In any hearing held under this subsection, such person shall have a reasonable opportunity to be heard and to present evidence.

"(C) RIGHTS OF INTERESTED PERSONS TO A HEARING.—If no hearing is held under paragraph (2) before issuance of an order assessing a penalty under this subsection, any person who commented on the proposed assessment may petition, within 30 days after the issuance of such order, the Administrator or Secretary, as the case may be, to set aside such order and to provide a hearing on the penalty. If the evidence presented by the petitioner in support of the petition is material and was not considered in the issuance of the order, the Administrator or Secretary shall immediately set aside such order and provide a hearing in accordance with paragraph (2)(A) in the case of a class I civil penalty and paragraph (2)(B) in the case of a class II civil penalty. If the Administrator or Secretary denies a hearing under this subparagraph, the Administrator or Secretary shall provide to the petitioner, and publish in the Federal Register, notice of and the reasons for such denial.

"(5) FINALITY OF ORDER.—An order issued under this subsection shall become final 30 days after its issuance unless a petition for judicial review is filed under paragraph (8) or a hearing is requested under paragraph (4)(C). If such a hearing is denied, such order shall become final 30 days after such denial.

"(6) EFFECT OF ORDER.—

"(A) LIMITATION ON ACTIONS UNDER OTHER SECTIONS.—Action taken by the Administrator or the Secretary, as the case may be, under this subsection shall not affect or limit the Administrator's or Secretary's authority to enforce any provision of this Act; except that any violation—

"(i) with respect to which the Administrator or the Secretary has commenced and is diligently prosecuting an action under this subsection,

"(ii) with respect to which a State has commenced and is diligently prosecuting an action under a State law comparable to this subsection, or

"(iii) for which the Administrator, the Secretary, or the State has issued a final order not subject to further judicial review and the violator has paid a penalty assessed under this subsection, or such comparable State law, as the case may be,

shall not be the subject of a civil penalty action under subsection (d) of this section or section 311(b) or section 505 of this Act.

"(B) APPLICABILITY OF LIMITATION WITH RESPECT TO CITIZEN SUITS.—The limitations contained in subparagraph (A) on civil penalty actions under section 505 of this Act shall not apply with respect to any violation for which—

"(i) a civil action under section 505(a)(1) of this Act has been filed prior to commencement of an action under this subsection, or

"(ii) notice of an alleged violation of section 505(a)(1) of this Act has been given in accordance with section 505(b)(1)(A) prior to commencement of an action under this subsection and an action under section 505(a)(1) with respect to such alleged violation is filed before the 120th day after the date on which such notice is given.

"(7) EFFECT OF ACTION ON COMPLIANCE.—No action by the Administrator or the Secretary under this subsection shall affect any person's obligation to comply with any section of this Act or with the terms and conditions of any permit issued pursuant to section 402 or 404 of this Act.

"(8) JUDICIAL REVIEW.—Any person against whom a civil penalty is assessed under this subsection or who commented on the proposed assessment of such penalty in accordance with paragraph (4) may obtain review of such assessment—

"(A) in the case of assessment of a class I civil penalty, in the United States district court for the District of Columbia or in the district in which the violation is alleged to have occurred, or

"(B) in the case of assessment of a class II civil penalty, in United States Court of Appeals for the District of Columbia Circuit or for any other circuit in which such person resides or transacts business,

by filing a notice of appeal in such court within the 30-day period beginning on the date the civil penalty order is issued and by simultaneously sending a copy of such notice by certified mail to the Administrator or the Secretary, as the case may be, and the Attorney General. The Administrator or the Secretary shall promptly file in such court a certified copy of the record on which the order was issued. Such court shall not set aside or remand such order unless there is not substantial evidence in the record, taken as a whole, to support the finding of a violation or unless the Administrator's or Secretary's assessment of the penalty constitutes an abuse of discretion and shall not impose additional civil penalties for the same violation unless the Administrator's or Secretary's assessment of the penalty constitutes an abuse of discretion.

"(9) COLLECTION.—If any person fails to pay an assessment of a civil penalty—

"(A) after the order making the assessment has become final, or

"(B) after a court in an action brought under paragraph (8) has entered a final judgment in favor of the Administrator or the Secretary, as the case may be,

the Administrator or the Secretary shall request the Attorney General to bring a civil action in an appropriate district court to recover the amount assessed (plus interest at currently prevailing rates from the date of the final order or the date of the final judgment, as the case may be). In such an action, the validity, amount, and appropriateness of such penalty shall not be subject to review. Any person who fails to pay on a timely basis the amount of an assessment of a civil penalty as described in the first sentence of this paragraph shall be required to pay, in addition to such amount and interest, attorneys fees and costs for collection proceedings and a quarterly nonpayment penalty for each quarter during which such failure to pay persists. Such nonpayment penalty shall be in an amount equal to 20 percent of the aggregate amount of such person's penalties and nonpayment penalties which are unpaid as of the beginning of such quarter.

"(10) SUBPOENAS.—The Administrator or Secretary, as the case may be, may issue subpoenas for the attendance and testimony of witnesses and the production of relevant papers, books, or documents in connection with hearings under this subsection. In case of contumacy or refusal to obey a subpoena issued pursuant to this paragraph and served upon any person, the district court of the United States for any district in which such person is found, resides, or transacts business, upon application by the United States and after notice to such person, shall have jurisdiction to issue an order requiring such person to appear and give testimony before the administrative law judge or to appear and produce documents before the administrative law judge, or both, and any failure to obey such order of the court may be punished by such court as a contempt thereof.

"(11) PROTECTION OF EXISTING PROCEDURES.—Nothing in this subsection shall change the procedures existing on the day before the date of the enactment of the Water Quality Act of 1986 under other subsections of this section for issuance and enforcement of orders by the Administrator.".

(b) REPORTS ON ENFORCEMENT MECHANISMS.—The Secretary of the Army and the Administrator shall each prepare and submit a report to the Congress, not later than December 1, 1988, which shall examine and analyze various enforcement mechanisms for use by the Secretary or Administrator, as the case may be, including an administrative civil penalty mechanism. Each of such reports shall also include an examination, prepared in consultation with the Comptroller General, of the efficacy of the Secretary's or the Administrator's existing enforcement authorities and shall include recommendations for improvements in their operation.

(c) CONFORMING AMENDMENT.—Section 505(a) is amended by inserting "and section 309(g)(6)" after "Except as provided in subsection (b) of this section".

SEC. 315. CLEAN LAKES.

(a) ESTABLISHMENT AND SCOPE OF PROGRAM.—Section 314(a) is amended to read as follows:

"(a) ESTABLISHMENT AND SCOPE OF PROGRAM.—

"(1) STATE PROGRAM REQUIREMENTS.—Each State on a biennial basis shall prepare and submit to the Administrator for his approval—

"(A) an identification and classification according to eutrophic condition of all publicly owned lakes in such State;

"(B) a description of procedures, processes, and methods (including land use requirements), to control sources of pollution of such lakes;

"(C) a description of methods and procedures, in conjunction with appropriate Federal agencies, to restore the quality of such lakes;

"(D) methods and procedures to mitigate the harmful effects of high acidity, including innovative methods of neutralizing and restoring buffering capacity of lakes and methods of removing from lakes toxic metals and other toxic substances mobilized by high acidity;

"(E) a list and description of those publicly owned lakes in such State for which uses are known to be impaired, including those lakes which are known not to meet applicable water quality standards or which require implementation of control programs to maintain compliance with applicable standards and those lakes in which water quality has deteriorated as a result of high acidity that may reasonably be due to acid deposition; and

"(F) an assessment of the status and trends of water quality in lakes in such State, including but not limited to, the nature and extent of pollution loading from point and nonpoint sources and the extent to which the use of lakes is impaired as a result of such pollution, particularly with respect to toxic pollution.

"(2) SUBMISSION AS PART OF 305(B)(1) REPORT.—The information required under paragraph (1) shall be included in the report required under section 305(b)(1) of this Act, beginning with the report required under such section by April 1, 1988.

"(3) REPORT OF ADMINISTRATOR.—Not later than 180 days after receipt from the States of the biennial information required under paragraph (1), the Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the status of water quality in lakes in the United States, including the effectiveness of the methods and procedures described in paragraph (1)(D).

"(4) ELIGIBILITY REQUIREMENT.—Beginning after April 1, 1988, a State must have submitted the information required under paragraph (1) in order to receive grant assistance under this section.".

(b) DEMONSTRATION PROGRAM.—Section 314 is amended by adding at the end thereof the following new subsections:

"(d) DEMONSTRATION PROGRAM.—

"(1) GENERAL REQUIREMENTS.—The Administrator is authorized and directed to establish and conduct at locations throughout the Nation a lake water quality demonstration program. The program shall, at a minimum—

"(A) develop cost effective technologies for the control of pollutants to preserve or enhance lake water quality while optimizing multiple lakes uses;

"(B) control nonpoint sources of pollution which are contributing to the degradation of water quality in lakes;

"(C) evaluate the feasibility of implementing regional consolidated pollution control strategies;

"(D) demonstrate environmentally preferred techniques for the removal and disposal of contaminated lake sediments;

"(E) develop improved methods for the removal of silt, stumps, aquatic growth, and other obstructions which impair the quality of lakes;

"(F) construct and evaluate silt traps and other devices or equipment to prevent or abate the deposit of sediment in lakes; and

"(G) demonstrate the costs and benefits of utilizing dredged material from lakes in the reclamation of despoiled land.

"(2) GEOGRAPHICAL REQUIREMENTS.—Demonstration projects authorized by this subsection shall be undertaken to reflect a variety of geographical and environmental conditions. As a priority, the Administrator shall undertake demonstration projects at Lake Houston, Texas; Beaver Lake, Arkansas; Greenwood Lake and Belcher Creek, New Jersey; Deal Lake, New Jersey; Alcyon Lake, New Jersey; Gorton's Pond, Rhode Island; Lake Washington, Rhode Island;

Lake Bomoseen, Vermont; Sauk Lake, Minnesota; and Lake Worth, Texas.

"(3) REPORTS.—The Administrator shall report annually to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate on work undertaken pursuant to this subsection. Upon completion of the program authorized by this subsection, the Administrator shall submit to such Committees a final report on the results of such program, along with recommendations for further measures to improve the water quality of the Nation's lakes.

"(4) AUTHORIZATION OF APPROPRIATIONS.—

"(A) IN GENERAL.—There is authorized to be appropriated to carry out this subsection not to exceed $40,000,000 for fiscal years beginning after September 30, 1986, to remain available until expended.

"(B) SPECIAL AUTHORIZATIONS.—

"(i) AMOUNT.—There is authorized to be appropriated to carry out subsection (b) with respect to subsection (a)(1)(D) not to exceed $15,000,000 for fiscal years beginning after September 30, 1986, to remain available until expended.

"(ii) DISTRIBUTION OF FUNDS.—The Administrator shall provide for an equitable distribution of sums appropriated pursuant to this subparagraph among States carrying out approved methods and procedures. Such distribution shall be based on the relative needs of each such State for the mitigation of the harmful effects on lakes and other surface waters of high acidity that may reasonably be due to acid deposition or acid mine drainage.

"(iii) GRANTS AS ADDITIONAL ASSISTANCE.—The amount of any grant to a State under this subparagraph shall be in addition to, and not in lieu of, any other Federal financial assistance.".

(c) LAKE RESTORATION GUIDANCE MANUAL.—Section 304(j) is amended to read as follows:

"(j) LAKE RESTORATION GUIDANCE MANUAL.—The Administrator shall, within 1 year after the date of the enactment of the Water Quality Act of 1986 and biennially thereafter, publish and disseminate a lake restoration guidance manual describing methods, procedures, and processes to guide State and local efforts to improve, restore, and enhance water quality in the Nation's publicly owned lakes.".

(d) CONFORMING AMENDMENTS.—Section 314 is further amended—

(1) in subsection (b) by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (a) of this section";

(2) in subsection (c)(1) by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section"; and

(3) in subsection (c)(2), by striking out "this section" the first place it appears and inserting in lieu thereof "subsection (b) of this section" and by striking out "this section" the second place it appears and inserting in lieu thereof "subsection (a) of this section".

SEC. 316. MANAGEMENT OF NONPOINT SOURCES OF POLLUTION.

(a) IN GENERAL.—Title III is amended by adding at the end the following new section:

"SEC. 319. NONPOINT SOURCE MANAGEMENT PROGRAMS.

"(a) STATE ASSESSMENT REPORTS.—

"(1) CONTENTS.—The Governor of each State shall, after notice and opportunity for public comment, prepare and submit to the Administrator for approval, a report which—

"(A) identifies those navigable waters within the State which, without additional action to control nonpoint sources of pollution, cannot reasonably be expected to attain or maintain applicable water quality standards or the goals and requirements of this Act;

"(B) identifies those categories and subcategories of nonpoint sources or, where appropriate, particular nonpoint sources which add significant pollution to each portion of the navigable waters identified under subparagraph (A) in amounts which contribute to such portion not meeting such water quality standards or such goals and requirements;

"(C) describes the process, including intergovernmental coordination and public participation, for identifying best management practices and measures to control each category and subcategory of nonpoint sources and, where appropriate, particular nonpoint sources identified under subparagraph (B) and to reduce, to the maximum extent practicable, the level of pollution resulting from such category, subcategory, or source; and

"(D) identifies and describes State and local programs for controlling pollution added from nonpoint sources to, and improving the quality of, each such portion of the navigable waters, including but not limited to those programs which are receiving Federal assistance under subsections (h) and (i).

"(2) INFORMATION USED IN PREPARATION.—In developing the report required by this section, the State (A) may rely upon information developed pursuant to sections 208, 303(e), 304(f), 305(b), and 314, and other information as appropriate, and (B) may utilize appropriate elements of the waste treatment management plans developed pursuant to sections 208(b) and 303, to the extent such elements are consistent with and fulfill the requirements of this section.

"(b) STATE MANAGEMENT PROGRAMS.—

"(1) IN GENERAL.—The Governor of each State, for that State or in combination with adjacent States, shall, after notice and opportunity for public comment, prepare and submit to the Administrator for approval a management program which such State proposes to implement in the first four fiscal years beginning after the date of submission of such management program for controlling pollution added from nonpoint sources to the navigable waters within the State and improving the quality of such waters.

"(2) SPECIFIC CONTENTS.—Each management program proposed for implementation under this subsection shall include each of the following:

"(A) An identification of the best management practices and measures which will be undertaken to reduce pollutant loadings resulting from each category, subcategory, or particular nonpoint source designated under paragraph (1)(B), taking into account the impact of the practice on ground water quality.

"(B) An identification of programs (including, as appropriate, nonregulatory or regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, and demonstration projects) to achieve implementation of the best management practices by the categories, subcategories, and particular nonpoint sources designated under subparagraph (A).

"(C) A schedule containing annual milestones for (i) utilization of the program implementation methods identified in subparagraph (B), and (ii) implementation of the best management practices identified in subparagraph (A) by the categories, subcategories, or particular nonpoint sources designated under paragraph (1)(B). Such schedule shall provide for utilization of the best management practices at the earliest practicable date.

"(D) A certification of the attorney general of the State or States (or the chief attorney of any State water pollution control agency which has independent legal counsel) that the laws of the State or States, as the case may be, provide adequate authority to implement such management program or, if there is not such adequate authority, a list of such additional authorities as will be necessary to implement such management program. A schedule and commitment by the State or States to seek such additional authorities as expeditiously as practicable.

"(E) Sources of Federal and other assistance and funding (other than assistance provided under subsections (h) and (i)) which will be available in each of such fiscal years for supporting implementation of such practices and measures and the purposes for which such assistance will be used in each of such fiscal years.

"(F) An identification of Federal financial assistance programs and Federal development projects for which the State will review individual assistance applications or development projects for their effect on water quality pursuant to the procedures set forth in Executive Order 12372 as in effect on September 17, 1983, to determine whether such assistance applications or development projects would be consistent with the program prepared under this subsection; for the purposes of this subparagraph, identification shall not be limited to the assistance programs or development projects subject to Executive Order 12372 but may include any programs listed in the most recent Catalog of Federal Domestic Assistance which may have an effect on the purposes and objectives of the State's nonpoint source pollution management program.

"(3) UTILIZATION OF LOCAL AND PRIVATE EXPERTS.—In developing and implementing a management program under this subsection, a State shall, to the maximum extent practicable, involve local public and private agencies and organizations which have expertise in control of nonpoint sources of pollution.

"(4) DEVELOPMENT ON WATERSHED BASIS.—A State shall, to the maximum extent practicable, develop and implement a management program under this subsection on a watershed-by-watershed basis within such State.

"(c) ADMINISTRATIVE PROVISIONS.—

"(1) COOPERATION REQUIREMENT.—Any report required by subsection (a) and any management program and report required by subsection (b) shall be developed in cooperation with local, substate regional, and interstate entities which are actively planning for the implementation of nonpoint source pollution controls and have either been certified by the Administrator in accordance with section 208, have worked jointly with the State on water quality management planning under section 205(j), or have been designated by the State legislative body or Governor as water quality management planning agencies for their geographic areas.

"(2) TIME PERIOD FOR SUBMISSION OF REPORTS AND MANAGEMENT PROGRAMS.—Each report and management program shall be

submitted to the Administrator during the 18-month period beginning on the date of the enactment of this section.

"(d) APPROVAL OR DISAPPROVAL OF REPORTS AND MANAGEMENT PROGRAMS.—

"(1) DEADLINE.—Subject to paragraph (2), not later than 180 days after the date of submission to the Administrator of any report or management program under this section (other than subsections (h), (i), and (k)), the Administrator shall either approve or disapprove such report or management program, as the case may be. The Administrator may approve a portion of a management program under this subsection. If the Administrator does not disapprove a report, management program, or portion of a management program in such 180-day period, such report, management program, or portion shall be deemed approved for purposes of this section.

"(2) PROCEDURE FOR DISAPPROVAL.—If, after notice and opportunity for public comment and consultation with appropriate Federal and State agencies and other interested persons, the Administrator determines that—

"(A) the proposed management program or any portion thereof does not meet the requirements of subsection (b)(2) of this section or is not likely to satisfy, in whole or in part, the goals and requirements of this Act;

"(B) adequate authority does not exist, or adequate resources are not available, to implement such program or portion;

"(C) the schedule for implementing such program or portion is not sufficiently expeditious; or

"(D) the practices and measures proposed in such program or portion are not adequate to reduce the level of pollution in navigable waters in the State resulting from nonpoint sources and to improve the quality of navigable waters in the State;

the Administrator shall within 6 months of the receipt of the proposed program notify the State of any revisions or modifications necessary to obtain approval. The State shall thereupon have an additional 3 months to submit its revised management program and the Administrator shall approve or disapprove such revised program within three months of receipt.

"(3) FAILURE OF STATE TO SUBMIT REPORT.—If a Governor of a State does not submit the report required by subsection (a) within the period specified by subsection (c)(2), the Administrator shall, within 30 months after the date of the enactment of this section, prepare a report for such State which makes the identifications required by paragraphs (1)(A) and (1)(B) of subsection (a). Upon completion of the requirement of the preceding sentence and after notice and opportunity for comment, the Administrator shall report to Congress on his actions pursuant to this section.

"(e) LOCAL MANAGEMENT PROGRAMS; TECHNICAL ASSISTANCE.—If a State fails to submit a management program under subsection (b) or the Administrator does not approve such a management program, a local public agency or organization which has expertise in, and authority to, control water pollution resulting from nonpoint sources in any area of such State which the Administrator determines is of sufficient geographic size may, with approval of such State, request the Administrator to provide, and the Administrator shall provide, technical assistance to such agency or organization in developing for such area a management program which is described in subsection (b) and can be approved pursuant to subsection (d). After development of such management program, such agency or organization shall submit such management program to the Administrator for approval. If the Administrator approves such management program, such agency or organization shall be eligible to receive financial assistance under subsection (h) for implementation of such management program as if such agency or organization were a State for which a report submitted under subsection (a) and a management program submitted under subsection (b) were approved under this section. Such financial assistance shall be subject to the same terms and conditions as assistance provided to a State under subsection (h).

"(f) TECHNICAL ASSISTANCE FOR STATES.—Upon request of a State, the Administrator may provide technical assistance to such State in developing a management program approved under subsection (b) for those portions of the navigable waters requested by such State.

"(g) INTERSTATE MANAGEMENT CONFERENCE.—

"(1) CONVENING OF CONFERENCE; NOTIFICATION; PURPOSE.—If any portion of the navigable waters in any State which is implementing a management program approved under this section is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or in part, of pollution from nonpoint sources in another State, such State may petition the Administrator to convene, and the Administrator shall convene, a management conference of all States which contribute significant pollution resulting from nonpoint sources to such portion. If, on the basis of information available, the Administrator determines that a State is not meeting applicable water quality standards or the goals and requirements of this Act as a result, in whole or in part, of significant pollution from nonpoint sources in another State, the Administrator shall notify such States. The Administrator may convene a management conference under this paragraph not later than 180 days after giving such notification, whether or not the State which is not meeting such standards requests such conference. The purpose of such conference shall be to develop an agreement among such States to reduce the level of pollution in such portion resulting from nonpoint sources and to improve the water quality of such portion. Nothing in such agreement shall supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws. This subsection shall not apply to any pollution which is subject to the Colorado River Basin Salinity Control Act. The requirement that the Administrator convene a management conference shall not be subject to the provisions of section 505 of this Act.

"(2) STATE MANAGEMENT PROGRAM REQUIREMENT.—To the extent that the States reach agreement through such conference, the management programs of the States which are parties to such agreements and which contribute significant pollution to the navigable waters or portions thereof not meeting applicable water quality standards or goals and requirements of this Act will be revised to reflect such agreement. Such management programs shall be consistent with Federal and State law.

"(h) GRANT PROGRAM.—

"(1) GRANTS FOR IMPLEMENTATION OF MANAGEMENT PROGRAMS.—Upon application of a State for which a report submitted under subsection (a) and a management program submitted under subsection (b) is approved under this section, the Administrator shall make grants, subject to such terms and conditions as the Administrator considers appropriate, under this subsection to such State for the purpose of assisting the State in implementing such management program. Funds reserved pursuant to section 205(j)(5) of this Act may be used to develop and implement such management program.

"(2) APPLICATIONS.—An application for a grant under this subsection in any fiscal year shall be in such form and shall contain such other information as the Administrator may require, including an identification and description of the best management practices and measures which the State proposes to assist, encourage, or require in such year with the Federal assistance to be provided under the grant.

"(3) FEDERAL SHARE.—The Federal share of the cost of each management program implemented with Federal assistance under this subsection in any fiscal year shall not exceed 60 percent of the cost incurred by the State in implementing such management program and shall be made on condition that the non-Federal share is provided from non-Federal sources.

"(4) LIMITATION ON GRANT AMOUNTS.—Notwithstanding any other provision of this subsection, not more than 15 percent of the amount appropriated to carry out this subsection may be used to make grants to any one State, including any grants to any local public agency or organization with authority to control pollution from nonpoint sources in any area of such State.

"(5) PRIORITY FOR EFFECTIVE MECHANISMS.—For each fiscal year beginning after September 30, 1987, the Administrator may give priority in making grants under this subsection, and shall give consideration in determining the Federal share of any such grant, to States which have implemented or are proposing to implement management programs which will—

"(A) control particularly difficult or serious nonpoint source pollution problems, including, but not limited to, problems resulting from mining activities;

"(B) implement innovative methods or practices for controlling nonpoint sources of pollution, including regulatory programs where the Administrator deems appropriate;

"(C) control interstate nonpoint source pollution problems; or

"(D) carry out ground water quality protection activities which the Administrator determines are part of a comprehensive nonpoint source pollution control program, including research, planning, ground water assessments, demonstration programs, enforcement, technical assistance, education, and training to protect ground water quality from nonpoint sources of pollution.

"(6) AVAILABILITY FOR OBLIGATION.—The funds granted to each State pursuant to this subsection in a fiscal year shall remain available for obligation by such State for the fiscal year for which appropriated. The amount of any such funds not obligated by the end of such fiscal year shall be available to the Administrator for granting to other States under this subsection in the next fiscal year.

"(7) LIMITATION ON USE OF FUNDS.—States may use funds from grants made pursuant to this section for financial assistance to persons only to the extent that such assistance is related to the costs of demonstration projects.

"(8) SATISFACTORY PROGRESS.—No grant may be made under this subsection in any fiscal year to a State which in the preceding

fiscal year received a grant under this subsection unless the Administrator determines that such State made satisfactory progress in such preceding fiscal year in meeting the schedule specified by such State under subsection (b)(2).

"(9) MAINTENANCE OF EFFORT.—No grant may be made to a State under this subsection in any fiscal year unless such State enters into such agreements with the Administrator as the Administrator may require to ensure that such State will maintain its aggregate expenditures from all other sources for programs for controlling pollution added to the navigable waters in such State from nonpoint sources and improving the quality of such waters at or above the average level of such expenditures in its two fiscal years preceding the date of enactment of this subsection.

"(10) REQUEST FOR INFORMATION.—The Administrator may request such information, data, and reports as he considers necessary to make the determination of continuing eligibility for grants under this section.

"(11) REPORTING AND OTHER REQUIREMENTS.—Each State shall report to the Administrator on an annual basis concerning (A) its progress in meeting the schedule of milestones submitted pursuant to subsection (b)(2)(C) of this section, and (B) to the extent that appropriate information is available, reductions in nonpoint source pollutant loading and improvements in water quality for those navigable waters or watersheds within the State which were identified pursuant to subsection (a)(1)(A) of this section resulting from implementation of the management program.

"(12) LIMITATION ON ADMINISTRATIVE COSTS.—For purposes of this subsection, administrative costs in the form of salaries, overhead, or indirect costs for services provided and charged against activities and programs carried out with a grant under this subsection shall not exceed in any fiscal year 10 percent of the amount of the grant in such year, except that costs of implementing enforcement and regulatory activities, education, training, technical assistance, demonstration projects, and technology transfer programs shall not be subject to this limitation.

"(i) GRANTS FOR PROTECTING GROUNDWATER QUALITY.—

"(1) ELIGIBLE APPLICANTS AND ACTIVITIES.—Upon application of a State for which a report submitted under subsection (a) and a plan submitted under subsection (b) is approved under this section, the Administrator shall make grants under this subsection to such State for the purpose of assisting such State in carrying out groundwater quality protection activities which the Administrator determines will advance the State toward implementation of a comprehensive nonpoint source pollution control program. Such activities shall include, but not be limited to, research, planning, groundwater assessments, demonstration programs, enforcement, technical assistance, education and training to protect the quality of groundwater and to prevent contamination of groundwater from nonpoint sources of pollution.

"(2) APPLICATIONS.—An application for a grant under this subsection shall be in such form and shall contain such information as the Administrator may require.

"(3) FEDERAL SHARE; MAXIMUM AMOUNT.—The Federal share of the cost of assisting a State in carrying out groundwater protection activities in any fiscal year under this subsection shall be 50 percent of the costs incurred by the State in carrying out such activities, except that the maximum amount of Federal assistance which any State may receive under this subsection in any fiscal year shall not exceed $150,000.

"(4) REPORT.—The Administrator shall include in each report transmitted under subsection (m) of the a report on the activities and programs implemented under this subsection during the preceding fiscal year.

"(j) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out subsections (h) and (i) not to exceed $70,000,000 for fiscal year 1988, $100,000,000 per fiscal year for each of fiscal years 1989 and 1990, and $130,000,000 for fiscal year 1991; except that for each of such fiscal years not to exceed $7,500,000 may be made available to carry out subsection (i). Sums appropriated pursuant to this subsection shall remain available until expended.

"(k) CONSISTENCY OF OTHER PROGRAMS AND PROJECTS WITH MANAGEMENT PROGRAMS.—The Administrator shall transmit to the Office of Management and Budget and the appropriate Federal departments and agencies a list of those assistance programs and development projects identified by each State under subsection (b)(2)(F) for which individual assistance applications and projects will be reviewed pursuant to the procedures set forth in Executive Order 12372 as in effect on September 17, 1983. Beginning not later than sixty days after receiving notification by the Administrator, each Federal department and agency shall modify existing regulations to allow States to review individual development projects and assistance applications under the identified Federal assistance programs and shall accommodate, according to the requirements and definitions of Executive Order 12372, as in effect on September 17, 1983, the concerns of the State regarding the consistency of such applications or projects with the State nonpoint source pollution management program.

"(l) COLLECTION OF INFORMATION.—The Administrator shall collect and make available, through publications and other appropriate means, information pertaining to management practices and implementation methods, including, but not limited to, (1) information concerning the costs and relative efficiencies of best management practices for reducing nonpoint source pollution; and (2) available data concerning the relationship between water quality and implementation of various management practices to control nonpoint sources of pollution.

"(m) REPORTS OF ADMINISTRATOR.—

"(1) ANNUAL REPORTS.—Not later than January 1, 1988, and each January 1 thereafter, the Administrator shall transmit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate, a report for the preceding fiscal year on the activities and programs implemented under this section and the progress made in reducing pollution in the navigable waters resulting from nonpoint sources and improving the quality of such waters.

"(2) FINAL REPORT.—Not later than January 1, 1990, the Administrator shall transmit to Congress a final report on the activities carried out under this section. Such report, at a minimum, shall—

"(A) describe the management programs being implemented by the States by types and amount of affected navigable waters, categories and subcategories of nonpoint sources, and types of best management practices being implemented;

"(B) describe the experiences of the States in adhering to schedules and implementing best management practices;

"(C) describe the amount and purpose of grants awarded pursuant to subsections (h) and (i) of this section;

"(D) identify, to the extent that information is available, the progress made in reducing pollutant loads and improving water quality in the navigable waters;

"(E) indicate what further actions need to be taken to attain and maintain in those navigable waters (i) applicable water quality standards, and (ii) the goals and requirements of this Act;

"(F) include recommendations of the Administrator concerning future programs (including enforcement programs) for controlling pollution from nonpoint sources; and

"(G) identify the activities and programs of departments, agencies, and instrumentalities of the United States which are inconsistent with the management programs submitted by the States and recommend modifications so that such activities and programs are consistent with and assist the States in implementation of such management programs.

"(n) SET ASIDE FOR ADMINISTRATIVE PERSONNEL.—Not less than 5 percent of the funds appropriated pursuant to subsection (j) for any fiscal year shall be available to the Administrator to maintain personnel levels at the Environmental Protection Agency at levels which are adequate to carry out this section in such year.".

(b) POLICY FOR CONTROL OF NONPOINT SOURCES OF POLLUTION.—Section 101(a) is amended by striking out "and" at the end of paragraph (5), by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and", and by adding at the end thereof the following:

"(7) it is the national policy that programs for the control of nonpoint sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this Act to be met through the control of both point and nonpoint sources of pollution.".

(c) ELIGIBILITY OF NONPOINT SOURCES.—The last sentence of section 201(g)(1) is amended by—

(1) striking out "sentence," the first place it appears and inserting in lieu thereof "sentences,";

(2) inserting "(A)" after "October 1, 1984, for"; and

(3) inserting before "except that" the following: "and (B) any purpose for which a grant may be made under section 319 (h) and (i) of this Act (including any innovative and alternative approaches for the control of nonpoint sources of pollution),".

(d) RESERVATION OF FUNDS.—Section 205(j) is amended by adding at the end the following new paragraph:

"(5) NONPOINT SOURCE RESERVATION.—In addition to the sums reserved under paragraph (1), the Administrator shall reserve each fiscal year for each State 1 percent of the sums allotted and available for obligation to such State under this section for each fiscal year beginning on or after October 1, 1986, or $100,000, whichever is greater, for the purpose of carrying out section 319 of this Act. Sums so reserved in a State in any fiscal year for which such State does not request the use of such sums, to the extent such sums exceed $100,000, may be used by such State for other purposes under this title.".

(e) CONFORMING AMENDMENT.—Section 304(k)(1) is amended by inserting "and nonpoint source pollution management programs approved under section 319 of this Act" after "208 of this Act".

SEC. 317. NATIONAL ESTUARY PROGRAM.

(a) PURPOSES AND POLICIES.—

(1) FINDINGS.—Congress finds and declares that—

(A) the Nation's estuaries are of great importance for fish and wildlife resources and recreation and economic opportunity;

(B) maintaining the health and ecological integrity of these estuaries is in the national interest;

(C) increasing coastal population, development, and other direct and indirect uses of these estuaries threaten their health and ecological integrity;

(D) long-term planning and management will contribute to the continued productivity of these areas, and will maximize their utility to the Nation; and

(E) better coordination among Federal and State programs affecting estuaries will increase the effectiveness and efficiency of the national effort to protect, preserve, and restore these areas.

(2) PURPOSES.—The purposes of this section are to—

(A) identify nationally significant estuaries that are threatened by pollution, development, or overuse;

(B) promote comprehensive planning for, and conservation and management of, nationally significant estuaries;

(C) encourage the preparation of management plans for estuaries of national significance; and

(D) enhance the coordination of estuarine research.

(b) MANAGEMENT PROGRAM.—Title III is amended by adding at the end thereof the following new section:

"SEC. 320. NATIONAL ESTUARY PROGRAM.

"(a) MANAGEMENT CONFERENCE.—

"(1) NOMINATION OF ESTUARIES.—The Governor of any State may nominate to the Administrator an estuary lying in whole or in part within the State as an estuary of national significance and request a management conference to develop a comprehensive management plan for the estuary. The nomination shall document the need for the conference, the likelihood of success, and information relating to the factors in paragraph (2).

"(2) CONVENING OF CONFERENCE.—

"(A) IN GENERAL.—In any case where the Administrator determines, on his own initiative or upon nomination of a State under paragraph (1), that the attainment or maintenance of that water quality in an estuary which assures protection of public water supplies and the protection and propagation of a balanced, indigenous population of shellfish, fish, and wildlife, and allows recreational activities, in and on the water, requires the control of point and nonpoint sources of pollution to supplement existing controls of pollution in more than one State, the Administrator shall select such estuary and convene a management conference.

"(B) PRIORITY CONSIDERATION.—The Administrator shall give priority consideration under this section to Long Island Sound, New York and Connecticut; Narragansett Bay, Rhode Island; Buzzards Bay, Massachusetts; Puget Sound, Washington; New York-New Jersey Harbor, New York and New Jersey; Delaware Bay, Delaware and New Jersey; Delaware Inland Bays, Delaware; Albemarle Sound, North Carolina; Sarasota Bay, Florida; San Francisco Bay, California; and Galveston Bay, Texas.

"(3) BOUNDARY DISPUTE EXCEPTION.—In any case in which a boundary between two States passes through an estuary and such boundary is disputed and is the subject of an action in any court, the Administrator shall not convene a management conference with respect to such estuary before a final adjudication has been made of such dispute.

"(b) PURPOSES OF CONFERENCE.—The purposes of any management conference convened with respect to an estuary under this subsection shall be to—

"(1) assess trends in water quality, natural resources, and uses of the estuary;

"(2) collect, characterize, and assess data on toxics, nutrients, and natural resources within the estuarine zone to identify the causes of environmental problems;

"(3) develop the relationship between the inplace loads and point and nonpoint loadings of pollutants to the estuarine zone and the potential uses of the zone, water quality, and natural resources;

"(4) develop a comprehensive conservation and management plan that recommends priority corrective actions and compliance schedules addressing point and nonpoint sources of pollution to restore and maintain the chemical, physical, and biological integrity of the estuary, including restoration and maintenance of water quality, a balanced indigenous population of shellfish, fish and wildlife, and recreational activities in the estuary, and assure that the designated uses of the estuary are protected;

"(5) develop plans for the coordinated implementation of the plan by the States as well as Federal and local agencies participating in the conference;

"(6) monitor the effectiveness of actions taken pursuant to the plan; and

"(7) review all Federal financial assistance program and Federal development project in accordance with the requirements of Executive Order 12372, as in effect on September 17, 1983, to determine whether such assistance program or project would be consistent with and further the purposes and objectives of the plan prepared under this section.

For purposes of paragraph (7), such programs and projects shall not be limited to the assistance programs and development projects subject to Executive Order 12372, but may include any programs listed in the most recent Catalog of Federal Domestic Assistance which may have an effect on the purposes and objectives of the plan developed under this section.

"(c) MEMBERS OF CONFERENCE.—The members of a management conference convened under this section shall include, at a minimum, the Administrator and representatives of—

"(1) each State and foreign nation located in whole or in part in the estuarine zone of the estuary for which the conference is convened;

"(2) international, interstate, or regional agencies or entities having jurisdiction over all or a significant part of the estuary;

"(3) each interested Federal agency, as determined appropriate by the Administrator;

"(4) local governments having jurisdiction over any land or water within the estuarine zone, as determined appropriate by the Administrator; and

"(5) affected industries, public and private educational institutions, and the general public, as determined appropriate by the Administrator.

"(d) UTILIZATION OF EXISTING DATA.—In developing a conservation and management plan under this section, the management conference shall survey and utilize existing reports, data, and studies relating to the estuary that have been developed by or made available to Federal, interstate, State, and local agencies.

"(e) PERIOD OF CONFERENCE.—A management conference convened under this section shall be convened for a period not to exceed 5 years. Such conference may be extended by the Administrator, and if terminated after the initial period, may be reconvened by the Administrator at any time thereafter, as may be necessary to meet the requirements of this section.

"(f) APPROVAL AND IMPLEMENTATION OF PLANS.—

"(1) APPROVAL.—Not later than 120 days after the completion of a conservation and management plan and after providing for public review and comment, the Administrator shall approve such plan if the plan meets the requirements of this section and the affected Governor or Governors concur.

"(2) IMPLEMENTATION.—Upon approval of a conservation and management plan under this section, such plan shall be implemented. Funds authorized to be appropriated under titles II and VI and section 319 of this Act may be used in accordance with the applicable requirements of this Act to assist States with the implementation of such plan.

"(g) GRANTS.—

"(1) RECIPIENTS.—The Administrator is authorized to make grants to State, interstate, and regional water pollution control agencies and entities, State coastal zone management agencies, interstate agencies, other public or nonprofit private agencies, institutions, organizations, and individuals.

"(2) PURPOSES.—Grants under this subsection shall be made to pay for assisting research, surveys, studies, and modeling and other technical work necessary for the development of a conservation and management plan under this section.

"(3) FEDERAL SHARE.—The amount of grants to any person (including a State, interstate, or regional agency or entity) under this subsection for a fiscal year shall not exceed 75 percent of the costs of such research, survey, studies, and work and shall be made on condition that the non-Federal share of such costs are provided from non-Federal sources.

"(h) GRANT REPORTING.—Any person (including a State, interstate, or regional agency or entity) that receives a grant under subsection (g) shall report to the Administrator not later than 18 months after receipt of such grant and biennially thereafter on the progress being made under this section.

"(i) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Administrator not to exceed $12,000,000 per fiscal year for each of fiscal years 1987, 1988, 1989, 1990, and 1991 for—

"(1) expenses related to the administration of management conferences under this section, not to exceed 10 percent of the amount appropriated under this subsection;

"(2) making grants under subsection (g); and

"(3) monitoring the implementation of a conservation and management plan by the management conference or by the Administrator, in any case in which the conference has been terminated.

The Administrator shall provide up to $5,000,000 per fiscal year of the sums authorized to be appropriated under this subsection to the Administrator of the National Oceanic and Atmospheric Administration to carry out subsection (j).

"(j) RESEARCH.—

"(1) PROGRAMS.—In order to determine the need to convene a management conference under this section or at the request of such a management conference, the Administrator shall coordinate and implement, through the National Marine Pollution Program Office and the National Marine Fisheries Service of the National Oceanic and Atmospheric Administration, as appropriate, for one or more estuarine zones—

"(A) a long-term program of trend assessment monitoring measuring variations in pollutant concentrations, marine ecology, and other physical or biological environmental parameter which may affect estuarine zones, to provide the Administrator the capacity to determine the potential and actual effects of alternative management strategies and measures;

"(B) a program of ecosystem assessment assisting in the development of (i) baseline studies which determine the state of estuarine zones and the effects of natural and anthropogenic changes, and (ii) predictive models capable of translating information on specific discharges or general pollutant loadings within estuarine zones into a set of probable effects on such zones;

"(C) a comprehensive water quality sampling program for the continuous monitoring of nutrients, chlorine, acid precipitation dissolved oxygen, and potentially toxic pollutants (including organic chemicals and metals) in estuarine zones, after consultation with interested State, local, interstate, or international agencies and review and analysis of all environmental sampling data presently collected from estuarine zones; and

"(D) a program of research to identify the movements of nutrients, sediments and pollutants through estuarine zones and the impact of nutrients, sediments, and pollutants on water quality, the ecosystem, and designated or potential uses of the estuarine zones.

"(2) REPORTS.—The Administrator, in cooperation with the Administrator of the National Oceanic and Atmospheric Administration, shall submit to the Congress no less often than biennially a comprehensive report on the activities authorized under this subsection including—

"(A) a listing of priority monitoring and research needs;

"(B) an assessment of the state and health of the Nation's estuarine zones, to the extent evaluated under this subsection;

"(C) a discussion of pollution problems and trends in pollutant concentrations with a direct or indirect effect on water quality, the ecosystem, and designated or potential uses of each estuarine zone, to the extent evaluated under this subsection; and

"(D) an evaluation of pollution abatement activities and management measures so far implemented to determine the degree of improvement toward the objectives expressed in subsection (b)(4) of this section.

"(k) DEFINITIONS.—For purposes of this section, the terms 'estuary' and 'estuarine zone' have the meanings such terms have in section 104(n)(4) of this Act, except that the term 'estuarine zone' shall also include associated aquatic ecosystems and those portions of tributaries draining into the estuary up to the historic height of migration of anadromous fish or the historic head of tidal influence, whichever is higher.".

SEC. 318. UNCONSOLIDATED QUATERNARY AQUIFER.

Notwithstanding any other provision of law, no person may—

(1) locate or authorize the location of a landfill, surface impoundment, waste pile, injection well, or land treatment facility over the Unconsolidated Quaternary Aquifer, or the recharge zone or streamflow source zone of such aquifer, in the Rockaway River Basin, New Jersey (as such aquifer and zones are described in the Federal Register, January 24, 1984, pages 2946-2948); or

(2) place or authorize the placement of solid waste in a landfill, surface impoundment, waste pile, injection well, or land treatment facility over such aquifer or zone.

This section may be enforced under sections 309 (a) and (b) of the Federal Water Pollution Control Act. For purposes of section 309(c) of such Act, a violation of this section shall be considered a violation of section 301 of the Federal Water Pollution Control Act.

TITLE IV—PERMITS AND LICENSES

SEC. 401. STORMWATER RUNOFF FROM OIL, GAS, AND MINING OPERATIONS.

(a) LIMITATION ON PERMIT REQUIREMENT.—Section 402(l) is amended by inserting "(1) AGRICULTURAL RETURN FLOWS.—" before "The Administrator" and by adding at the end thereof the following:

"(2) STORMWATER RUNOFF FROM OIL, GAS, AND MINING OPERATIONS.—The Administrator shall not require a permit under this section, nor shall the Administrator directly or indirectly require any State to require a permit, for discharges of stormwater runoff from mining operations or oil and gas exploration, production, processing, or treatment operations or transmission facilities, composed entirely of flows which are from conveyances or systems of conveyances (including but not limited to pipes, conduits, ditches, and channels) used for collecting and conveying precipitation runoff and which are not contaminated by contact with, or do not come into contact with, any overburden, raw material, intermediate products, finished product, by-product, or waste products located on the site of such operations.".

(b) CONFORMING AMENDMENTS.—Section 402(l) is further amended—

(1) by inserting "LIMITATION ON PERMIT REQUIREMENT.—" after "(l)"; and

(2) by indenting paragraph (1) of such section, as designated by subsection (a) of this section, and aligning such paragraph with paragraph (2) of such section, as added by such subsection (a).

SEC. 402. ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.

Section 402 is amended by adding at the end thereof the following new subsection:

"(m) ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED.—To the extent a treatment works (as defined in section 212 of this Act) which is publicly owned is not meeting the requirements of a permit issued under this section for such treatment works as a result of inadequate design or operation of such treatment works, the Administrator, in issuing a permit under this section, shall not require pretreatment by a person introducing conventional pollutants identified pursuant to section 304(a)(4) of this Act into such treatment works other than pretreatment required to assure compliance with pretreatment standards under subsection (b)(8) of this section and section 307(b)(1) of this Act. Nothing in this subsection shall affect the Administrator's authority under sections 307 and 309 of this Act, affect State and local authority under sections 307(b)(4) and 510 of this Act, relieve such treatment works of its obligations to meet requirements established under this Act, or otherwise preclude such works from pursuing whatever feasible options are available to meet its responsibility to comply with its permit under this section.".

SEC. 403. PARTIAL NPDES PROGRAM.

(a) PARTIAL PERMIT PROGRAM.—Section 402 is amended by adding at the end the following:

"(n) PARTIAL PERMIT PROGRAM.—

"(1) STATE SUBMISSION.—The Governor of a State may submit under subsection (b) of this section a permit program for a portion of the discharges into the navigable waters in such State.

"(2) MINIMUM COVERAGE.—A partial permit program under this subsection shall cover, at a minimum, administration of a major category of the discharges into the navigable waters of the State or a major component of the permit program required by subsection (b).

"(3) APPROVAL OF MAJOR CATEGORY PARTIAL PERMIT PROGRAMS.—The Administrator may approve a partial permit program covering administration of a major category of discharges under this subsection if—

"(A) such program represents a complete permit program and covers all of the discharges under the jurisdiction of a department or agency of the State; and

"(B) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b).

"(4) APPROVAL OF MAJOR COMPONENT PARTIAL PERMIT PROGRAMS.—The Administrator may approve under this subsection a partial and phased permit program covering administration of a major component (including discharge categories) of a State permit program required by subsection (b) if—

"(A) the Administrator determines that the partial program represents a significant and identifiable part of the State program required by subsection (b); and

"(B) the State submits, and the Administrator approves, a plan for the State to assume administration by phases of the remainder of the State program required by subsection (b) by a specified date not more than 5 years after submission of the partial program under this subsection and agrees to make all reasonable efforts to assume such administration by such date.".

(b) RETURN OF STATE PERMIT PROGRAM TO ADMINISTRATOR.—

(1) IN GENERAL.—Section 402(c) is amended by adding at the end thereof the following new paragraph:

"(4) LIMITATIONS ON PARTIAL PERMIT PROGRAM RETURNS AND WITHDRAWALS.—A State may return to the Administrator administration, and the Administrator may withdraw under paragraph (3) of this subsection approval, of—

"(A) a State partial permit program approved under subsection (n)(3) only if the entire permit program being administered by the State department or agency at the time is returned or withdrawn; and

"(B) a State partial permit program approved under subsection (n)(4) only if an entire phased component of the permit program being administered by the State at the time is returned or withdrawn.".

(2) CONFORMING AMENDMENT.—Section 402(c)(1) is amended by striking out "as to those navigable waters" and inserting in lieu thereof "as to those discharges".

SEC. 404. ANTI-BACKSLIDING.

(a) GENERAL RULE.—Section 402 is amended by adding at the end thereof the following new subsection:

"(o) ANTI-BACKSLIDING.—

"(1) GENERAL PROHIBITION.—In the case of effluent limitations established on the basis of subsection (a)(1)(B) of this section, a permit may not be renewed, reissued, or modified on the basis of effluent guidelines promulgated under section 304(b) subsequent to the original issuance of such permit, to contain effluent limitations which are less stringent than the comparable effluent limitations in the previous permit. In the case of effluent limitations established on the basis of section 301(b)(1)(C) or section 303(d) or (e), a permit may not be renewed, reissued, or modified to contain effluent limitations which are less stringent than the comparable effluent limitations in the previous permit except in compliance with section 303(d)(4).

"(2) EXCEPTIONS.—A permit with respect to which paragraph (1) applies may be renewed, reissued, or modified to contain a less stringent effluent limitation applicable to a pollutant if—

"(A) material and substantial alterations or additions to the permitted facility occurred after permit issuance which justify the application of a less stringent effluent limitation;

"(B)(i) information is available which was not available at the time of permit issuance (other than revised regulations, guidance, or test methods) and which would have justified the application of a less stringent effluent limitation at the time of permit issuance; or

"(ii) the Administrator determines that technical mistakes or mistaken interpretations of law were made in issuing the permit under subsection (a)(1)(B);

"(C) a less stringent effluent limitation is necessary because of events over which the permittee has no control and for which there is no reasonably available remedy;

"(D) the permittee has received a permit modification under section 301(c), 301(g), 301(h), 301(i), 301(k), 301(n), or 316(a); or

"(E) the permittee has installed the treatment facilities required to meet the effluent limitations in the previous permit and has properly operated and maintained the facilities but has nevertheless been unable to achieve the previous effluent limitations, in which case the limitations in the reviewed, reissued, or modified permit may reflect the level of pollutant control actually achieved (but shall not be less stringent than required by effluent guidelines in effect at the time of permit renewal, reissuance, or modification).

Subparagraph (B) shall not apply to any revised waste load allocations or any alternative grounds for translating water quality standards into effluent limitations, except where the cumulative effect of such revised allocations results in a decrease in the amount of pollutants discharged into the concerned waters, and such revised allocations are not the result of a discharger eliminating or substantially reducing its discharge of pollutants due to complying with the requirements of this Act or for reasons otherwise unrelated to water quality.

"(3) LIMITATIONS.—In no event may a permit with respect to which paragraph (1) applies be renewed, reissued, or modified to contain an effluent limitation which is less stringent than required by effluent guidelines in effect at the time the permit is renewed, reissued, or modified. In no event may such a permit to discharge into waters be renewed, reissued, or modified to contain a less stringent effluent limitation if the implementation of such limitation would result in a violation of a water quality standard under section 303 applicable to such waters.".

(b) LIMITATIONS ON REVISION OF CERTAIN EFFLUENT LIMITATIONS.—Section 303(d) of the Act is amended by adding at the end thereof the following new paragraph:

"(4) LIMITATIONS ON REVISION OF CERTAIN EFFLUENT LIMITATIONS.—

"(A) STANDARD NOT ATTAINED.—For waters identified under paragraph (1)(A) where the applicable water quality standard has not yet been attained, any effluent limitation based on a total maximum daily load or other waste load allocation established under this section may be revised only if (i) the cumulative effect of all such revised effluent limitations based on such total maximum daily load or waste load allocation will assure the attainment of such water quality standard, or (ii) the designated use which is not being attained is removed in accordance with regulations established under this section.

"(B) STANDARD ATTAINED.—For waters identified under paragraph (1)(A) where the quality of such waters equals or exceeds levels necessary to protect the designated use for such waters or otherwise required by applicable water quality standards, any effluent limitation based on a total maximum daily load or other waste load allocation established under this section, or any water quality standard established under this section, or any other permitting standard may be revised only if such revision is subject to and consistent with the antidegradation policy established under this section.".

(c) STUDY.—The Administrator shall study—

(1) the extent to which States have reviewed, revised, and adopted water quality standards in accordance with section 24 of the Municipal Wastewater Treatment Construction Grant Amendments of 1981; and

(2) the extent to which modifications of permits issued under section 402(a)(1)(B) of the Federal Water Pollution Control Act for the purpose of reflecting any revisions to water quality standards should be encouraged or discouraged.

The Administrator shall submit a report on such study, together with recommendations, to Congress not later than 2 years after the date of the enactment of this Act.

(d) CONFORMING AMENDMENT.—Section 402(a)(1) is amended by inserting "(A)" after "either" and by inserting "(B)" after "this Act, or".

SEC. 405. MUNICIPAL AND INDUSTRIAL STORMWATER DISCHARGES.

(a) Section 402 is amended by adding at the end thereof the following new subsection:

"(p) MUNICIPAL AND INDUSTRIAL STORMWATER DISCHARGES.—

"(1) GENERAL RULE.—Prior to October 1, 1992, the Administrator or the State (in the case of a permit program approved under section 402 of this Act) shall not require a permit under this section for discharges composed entirely of stormwater.

"(2) EXCEPTIONS.—Paragraph (1) shall not apply with respect to the following stormwater discharges:

"(A) A discharge with respect to which a permit has been issued under this section before the date of the enactment of this subsection.

"(B) A discharge associated with industrial activity.

"(C) A discharge from a municipal separate storm sewer system serving a population of 250,000 or more.

"(D) A discharge from a municipal separate storm sewer system serving a population of 100,000 or more but less than 250,000.

"(E) A discharge for which the Administrator or the State, as the case may be, determines that the stormwater discharge contributes to a violation of a water quality standard or is a significant contributor of pollutants to waters of the United States.

"(3) PERMIT REQUIREMENTS.—

"(A) INDUSTRIAL DISCHARGES.—Permits for discharges associated with industrial activity shall meet all applicable provisions of this section and section 301.

"(B) MUNICIPAL DISCHARGE.—Permits for discharges from municipal storm sewers—

"(i) may be issued on a system- or jurisdiction-wide basis;

"(ii) shall include a requirement to effectively prohibit non-stormwater discharges into the storm sewers; and

"(iii) shall require controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and system, design and engineering methods, and such other provisions as the Administrator or the State determines appropriate for the control of such pollutants.

"(4) PERMIT APPLICATION REQUIREMENTS.—

"(A) INDUSTRIAL AND LARGE MUNICIPAL DISCHARGES.—Not later than 2 years after the date of the enactment of this subsection, the Administrator shall establish regulations setting forth the permit application requirements for stormwater discharges described in paragraphs (2)(B) and (2)(C). Applications for permits for such discharges shall be filed no later than 3 years after such date of enactment. Not later than 4 years after such date of enactment, the Administrator or the State, as the case may be, shall issue or deny each such permit. Any such permit shall provide for compliance as expeditiously as practicable, but in no event later than 3 years after the date of issuance of such permit.

"(B) OTHER MUNICIPAL DISCHARGES.—Not later than 4 years after the date of the enactment of this subsection, the Administrator shall establish regulations setting forth the permit application requirements for stormwater discharges described in paragraph (2)(D). Applications for permits for such discharges shall be filed no later than 5 years after such date of enactment. Not later than 6 years after such date of enactment, the Administrator or the State, as the case may be, shall issue or deny each such permit. Any such permit shall provide for compliance as expeditiously as practicable, but in no event later than 3 years after the date of issuance of such permit.

"(5) STUDIES.—The Administrator, in consultation with the States, shall conduct a study for the purposes of—

"(A) identifying those stormwater discharges or classes of stormwater discharges for which permits are not required pursuant to paragraphs (1) and (2) of this subsection,

"(B) determining, to the maximum extent practicable, the nature and extent of pollutants in such discharges; and

"(C) establishing procedures and methods to control stormwater discharges to the extent necessary to mitigate impacts on water quality.

Not later than October 1, 1988, the Administrator shall submit to Congress a report on the results of the study described in subparagraphs (A) and (B). Not later than October 1, 1989, the Administrator shall submit to Congress a report on the results of the study described in subparagraph (C).

"(6) REGULATIONS.—Not later than October 1, 1992, the Administrator, in consultation

with State and local officials, shall issue regulations (based on the results of the studies conducted under paragraph (5)) which designate stormwater discharges, other than those discharges described in paragraph (2), to be regulated to protect water quality and shall establish a comprehensive program to regulate such designated sources. The program shall, at a minimum, (A) establish priorities, (B) establish requirements for State stormwater management programs, and (C) establish expeditious deadlines. The program may include performance standards, guidelines, guidance, and management practices and treatment requirements, as appropriate.".

SEC. 406. SEWAGE SLUDGE.

(a) IDENTIFICATION AND REGULATION OF TOXIC POLLUTANTS.—Section 405(d) is amended—

(1) by inserting "(1) REGULATIONS.—" before "The Administrator, after";

(2) by striking "(1)", "(2)", and "(3)" and inserting in lieu thereof "(A)", "(B)", and "(C)", respectively; and

(3) by adding at the end the following new paragraphs:

"(2) IDENTIFICATION AND REGULATION OF TOXIC POLLUTANTS.—

"(A) ON BASIS OF AVAILABLE INFORMATION.—

"(i) PROPOSED REGULATIONS.—Not later than November 30, 1986, the Administrator shall identify those toxic pollutants which, on the basis of available information on their toxicity, persistence, concentration, mobility, or potential for exposure, may be present in sewage sludge in concentrations which may adversely affect public health or the environment, and propose regulations specifying acceptable management practices for sewage sludge containing each such toxic pollutant and establishing numerical limitations for each such pollutant for each use identified under paragraph (1)(A).

"(ii) FINAL REGULATIONS.—Not later than August 31, 1987, and after opportunity for public hearing, the Administrator shall promulgate the regulations required by subparagraph (A)(i).

"(B) OTHERS.—

"(i) PROPOSED REGULATIONS.—Not later than July 31, 1987, the Administrator shall identify those toxic pollutants not identified under subparagraph (A)(i) which may be present in sewage sludge in concentrations which may adversely affect public health or the environment, and propose regulations specifying acceptable management practices for sewage sludge containing each such toxic pollutant and establishing numerical limitations for each pollutant for each such use identified under paragraph (1)(A).

"(ii) FINAL REGULATIONS.—Not later than June 15, 1988, the Administrator shall promulgate the regulations required by subparagraph (B)(i).

"(C) REVIEW.—From time to time, but not less often than every 2 years, the Administrator shall review the regulations promulgated under this paragraph for the purpose of identifying additional toxic pollutants and promulgating regulations for such pollutants consistent with the requirements of this paragraph.

"(D) MINIMUM STANDARDS; COMPLIANCE DATE.—The management practices and numerical criteria established under subparagraphs (A), (B), and (C) shall be adequate to protect public health and the environment from any reasonably anticipated adverse effects of each pollutant. Such regulations shall require compliance as expeditiously as practicable but in no case later than 12 months after their publication, unless such regulations require the construction of new pollution control facilities, in which case the regulations shall require compliance as expeditiously as practicable but in no case later than two years from the date of their publication.

"(3) ALTERNATIVE STANDARDS.—For purposes of this subsection, if, in the judgment of the Administrator, it is not feasible to prescribe or enforce a numerical limitation for a pollutant identified under paragraph (2), the Administrator may instead promulgate a design, equipment, management practice, or operational standard, or combination thereof, which in the Administrator's judgment is adequate to protect public health and the environment from any reasonably anticipated adverse effects of such pollutant. In the event the Administrator promulgates a design or equipment standard under this subsection, the Administrator shall include as part of such standard such requirements as will assure the proper operation and maintenance of any such element of design or equipment.

"(4) CONDITIONS ON PERMITS.—Prior to the promulgation of the regulations required by paragraphs (2), the Administrator shall impose conditions in permits issued to publicly owned treatment works under section 402 of this Act or take such other measures as the Administrator deems appropriate to protect public health and the environment from any adverse effects which may occur from toxic pollutants in sewage sludge.

"(5) LIMITATION ON STATUTORY CONSTRUCTION.—Nothing in this section is intended to waive more stringent requirements established by this Act or any other law.".

(b) MANNER OF SLUDGE DISPOSAL.—Section 405(e) is amended to read as follows:

"(e) MANNER OF SLUDGE DISPOSAL.—The determination of the manner of disposal or use of sludge is a local determination, except that it shall be unlawful for any person to dispose of sludge from a publicly owned treatment works or any other treatment works treating domestic sewage for any use for which regulations have been established pursuant to subsection (d) of this section, except in accordance with such regulations.".

(c) IMPLEMENTATION THROUGH PERMITS.—Section 405 is further amended by adding at the end thereof the following:

"(f) IMPLEMENTATION OF REGULATIONS.—

"(1) THROUGH SECTION 402 PERMITS.—Any permit issued under section 402 of this Act to a publicly owned treatment works or any other treatment works treating domestic sewage shall include requirements for the use and disposal of sludge that implement the regulations established pursuant to subsection (d) of this section, unless such requirements have been included in a permit issued under the appropriate provisions of subtitle C of the Solid Waste Disposal Act, part C of the Safe Drinking Water Act, the Marine Protection, Research and Sanctuaries Act of 1972, or the Clean Air Act, or under State permit programs approved by the Administrator, where the Administrator determines that such programs assure compliance with any applicable requirements of this section. Not later than December 15, 1986, the Administrator shall promulgate procedures for approval of State programs pursuant to this paragraph.

"(2) THROUGH OTHER PERMITS.—In the case of a treatment works described in paragraph (1) that is not subject to section 402 of this Act and to which none of the other above listed permit programs nor approved State permit authority apply, the Administrator may issue a permit to such treatment works solely to impose requirements for the use and disposal of sludge that implement the regulations established pursuant to subsection (d) of this section. The Administrator shall include in the permit appropriate requirements to assure compliance with the regulations established pursuant to subsection (d) of this section. The Administrator shall establish procedures for issuing permits pursuant to this paragraph.

"(g) STUDIES AND PROJECTS.—

"(1) GRANT PROGRAM; INFORMATION GATHERING.—The Administrator is authorized to conduct or initiate scientific studies, demonstration projects, and public information and education projects which are designed to promote the safe and beneficial management or use of sewage sludge for such purposes as aiding the restoration of abandoned mine sites, conditioning soil for parks and recreation areas, agricultural and horticultural uses, and other beneficial purposes. For the purposes of carrying out this subsection, the Administrator may make grants to State water pollution control agencies, other public or nonprofit agencies, institutions, organizations, and individuals. In cooperation with other Federal departments and agencies, other public and private agencies, institutions, and organizations, the Administrator is authorized to collect and disseminate information pertaining to the safe and beneficial use of sewage sludge.

"(2) AUTHORIZATION OF APPROPRIATIONS.—For the purposes of carrying out the scientific studies, demonstration projects, and public information and education projects authorized in this section, there is authorized to be appropriated for fiscal years beginning after September 30, 1986, not to exceed $5,000,000.".

(d) ENFORCEMENT.—(1) Section 308(a)(4) is amended by inserting "405," before "and 504".

(2) Section 505(f) is amended by striking out "or" before "(6)", and by inserting before the period ", or (7) a regulation under section 405(d) of this Act,".

(3) Section 509(b)(1)(E) is amended by striking out "or 306" and inserting in lieu thereof "306, or 405".

(e) REMOVAL CREDITS.—The part of the decision of Natural Resources Defense Council, Inc. v. U.S. Environmental Protection Agency, No. 84-3530 (3d. Cir. 1986), which addresses section 405(d) of the Federal Water Pollution Control Act is stayed until August 31, 1987, with respect to—

(1) those publicly owned treatment works the owner or operator of which received authority to revise pretreatment requirements under section 307(b)(1) of such Act before the date of the enactment of this section, and

(2) those publicly owned treatment works the owner or operator of which has submitted an application for authority to revise pretreatment requirements under such section 307(b)(1) which application is pending on such date of enactment and is approved before August 31, 1987.

The Administrator shall not authorize any other removal credits under such Act until the Administrator issues the regulations required by paragraph (2)(A)(ii) of section 405(d) of such Act, as amended by subsection (a) of this section.

(f) CONFORMING AMENDMENTS.—Section 405(d) is further amended—

(1) by inserting "REGULATIONS.—" after "(d)";

(2) by indenting paragraph (1) (as designated by subsection (a)(1) of this section) and aligning such paragraph with paragraph (3), as added by subsection (a)(3); and

(3) in such paragraph (1) by aligning subparagraphs (A), (B), and (C) (as designated by subsection (a)(2) of this section) with subparagraph (C) of paragraph (2), as added by subsection (a)(3) of this section.

SEC. 407. LOG TRANSFER FACILITIES.

(a) AGREEMENT.—The Administrator and Secretary of the Army shall enter into an agreement regarding coordination of permitting for log transfer facilities to designate a lead agency and to process permits required under sections 402 and 404 of the Federal Water Pollution Control Act, where both such sections apply, for discharges associated with the construction and operation of log transfer facilities. The Administrator and Secretary are authorized to act in accordance with the terms of such agreement to assure that, to the maximum extent practicable, duplication, needless paperwork and delay in the issuance of permits, and inequitable enforcement between and among facilities in different States, shall be eliminated.

(b) APPLICATIONS AND PERMITS BEFORE OCTOBER 22, 1985.—Where both of sections 402 and 404 of the Federal Water Pollution Control Act apply, log transfer facilities which have received a permit under section 404 of such Act before October 22, 1985, shall not be required to submit a new application for a permit under section 402 of such Act. If the Administrator determines that the terms of a permit issued on or before October 22, 1985, under section 404 of such Act satisfies the applicable requirements of sections 301, 302, 306, 307, 308, and 403 of such Act, a separate application for a permit under section 402 of such Act shall not thereafter be required. In any case where the Administrator demonstrates, after an opportunity for a hearing, that the terms of a permit issued on or before October 22, 1985, under section 404 of such Act do not satisfy the applicable requirements of sections 301, 302, 306, 307, 308, and 403 of such Act, modifications to the existing permit under section 404 of such Act to incorporate such applicable requirements shall be issued by the Administrator as an alternative to issuance of a separate new permit under section 402 of such Act.

(c) LOG TRANSFER FACILITY DEFINED.—For the purposes of this section, the term "log transfer facility" means a facility which is constructed in whole or in part in waters of the United States and which is utilized for the purpose of transferring commercially harvested logs to or from a vessel or log raft, including the formation of a log raft.

TITLE V—MISCELLANEOUS PROVISIONS

SEC. 501. AUDITS.

Section 501(d) is amended by inserting at the end the following new sentences: "For the purpose of carrying out audits and examinations with respect to recipients of Federal assistance under this Act, the Administrator is authorized to enter into noncompetitive procurement contracts with independent State audit organizations, consistent with chapter 75 of title 31, United States Code. Such contracts may only be entered into to the extent and in such amounts as may be provided in advance in appropriation Acts.".

SEC. 502. COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS.

(a) DEFINED AS A STATE.—Section 502(3) is amended by inserting "the Commonwealth of the Northern Mariana Islands," after "Samoa,".

(b) DEFINED AS PART OF UNITED STATES.—Section 311(a)(5) is amended by striking out "the Canal Zone," and inserting in lieu thereof "the Commonwealth of the Northern Mariana Islands,".

SEC. 503. AGRICULTURAL STORMWATER DISCHARGES.

Section 502(14) (relating to the definition of point source) is amended by inserting after "does not include" the following: "agricultural stormwater discharges and".

SEC. 504. PROTECTION OF INTERESTS OF UNITED STATES IN CITIZEN SUITS.

Section 505(c) is amended by adding at the end thereof the following new paragraph:

"(3) PROTECTION OF INTERESTS OF UNITED STATES.—Whenever any action is brought under this section in a court of the United States, the plaintiff shall serve a copy of the complaint on the Attorney General and the Administrator. No consent judgment shall be entered in an action in which the United States is not a party prior to 45 days following the receipt of a copy of the proposed consent judgment by the Attorney General and the Administrator.".

SEC. 505. JUDICIAL REVIEW AND AWARD OF FEES.

(a) LOCATION; DEADLINE FOR APPEAL.—Section 509(b)(1) is amended—

(1) by striking out "transacts such business" and inserting in lieu thereof, "transacts business which is directly affected by such action"; and

(2) by striking out "ninety" and "ninetieth" and inserting in lieu thereof "120" and "120th", respectively.

(b) VENUE; AWARD OF FEES.—Section 509(b) is amended by adding at the end thereof the following new paragraphs:

"(3) VENUE.—

"(A) SELECTION PROCEDURE.—If applications for review of the same agency action have been filed under paragraph (1) of this subsection in 2 or more Circuit Courts of Appeals of the United States and the Administrator has received written notice of the filing of one or more applications within 30 days or less after receiving written notice of the filing of the first application, then the Administrator shall promptly advise in writing the Administrative Office of the United States Courts that applications have been filed in 2 or more Circuit Courts of Appeals of the United States, and shall identify each court for which he has written notice that such applications have been filed within 30 days or less of receiving written notice of the filing of the first such application. Pursuant to a system of random selection devised for this purpose, the Administrative Office thereupon shall, within 3 business days of receiving such written notice from the Administrator, select the court in which the record shall be filed from among those identified by the Administrator. Upon notification of such selection, the Administrator shall promptly file the record in such court. For the purpose of review of agency action which has previously been remanded to the Administrator, the record shall be filed in the Circuit Court of Appeals of the United States which remanded such action.

"(B) ADMINISTRATIVE PROVISIONS.—Where applications have been filed under paragraph (1) of this subsection in two or more Circuit Courts of Appeals of the United States with respect to the same agency action and the record has been filed in one of such courts pursuant to subparagraph (A), the other courts in which such applications have been filed shall promptly transfer such applications to the Circuit Court of Appeals of the United States in which the record has been filed. Pending selection of a court pursuant to subparagraph (A), any court in which an application has been filed under paragraph (1) of this subsection may postpone the effective date of the agency action until 15 days after the Administrative Office has selected the court in which the record shall be filed.

"(C) TRANSFERS.—Any court in which an application with respect to any agency action has been filed under paragraph (1) of this subsection, including any court selected pursuant to subparagraph (A), may transfer such application to any other Circuit Court of Appeals of the United States for the convenience of the parties or otherwise in the interest of justice.

"(4) AWARD OF FEES.—In any judicial proceeding under this subsection, the court may award costs of litigation (including reasonable attorney and expert witness fees) to any prevailing or substantially prevailing party whenever it determines that such award is appropriate.".

(c) CONFORMING AMENDMENT FOR CITIZEN SUIT ACTIONS.—The first sentence of section 505(d) is amended by inserting "prevailing or substantially prevailing" before "party".

SEC. 506. INDIAN TRIBES.

Title V is amended by redesignating section 518, and any references thereto, as section 519 and by inserting after section 517 the following new section:

"SEC. 518. INDIAN TRIBES.

"(a) POLICY.—Nothing in this section shall be construed to affect the application of section 101(g) of this Act, and all of the provisions of this section shall be carried out in accordance with the provisions of such section 101(g). Indian tribes shall be treated as States for purposes of such section 101(g).

"(b) ASSESSMENT OF SEWAGE TREATMENT NEEDS; REPORT.—The Administrator, in cooperation with the Director of the Indian Health Service, shall assess the need for sewage treatment works to serve Indian tribes, the degree to which such needs will be met through funds allotted to States under section 205 of this Act and priority lists under section 216 of this Act, and any obstacles which prevent such needs from being met. Not later than one year after the date of the enactment of this section, the Administrator shall submit a report to Congress on the assessment under this subsection, along with recommendations specifying (1) how the Administrator intends to provide assistance to Indian tribes to develop waste treatment management plans and to construct treatment works under this Act, and (2) methods by which the participation in and administration of programs under this Act by Indian tribes can be maximized.

"(c) RESERVATION OF FUNDS.—The Administrator shall reserve each fiscal year beginning after September 30, 1986, before allotments to the States under section 205(e), one-half of one percent of the sums appropriated under section 207. Sums reserved under this subsection shall be available only for grants for the development of waste treatment management plans and for the construction of sewage treatment works to serve Indian tribes.

"(d) COOPERATIVE AGREEMENTS.—In order to ensure the consistent implementation of the requirements of this Act, an Indian tribe and the State or States in which the lands of such tribe are located may enter into a cooperative agreement, subject to the review and approval of the Administrator, to jointly plan and administer the requirements of this Act.

"(e) TREATMENT AS STATES.—The Administrator is authorized to treat an Indian tribe as a State for purposes of title II and sections 104, 106, 303, 305, 308, 309, 314, 319, 401, 402, and 404 of this Act to the degree necessary to carry out the objectives of this section, but only if—

"(1) the Indian tribe has a governing body carrying out substantial governmental duties and powers;

"(2) the functions to be exercised by the Indian tribe pertain to the management and protection of water resources which are held by an Indian tribe, held by the United States in trust for Indians, held by a member of an Indian tribe if such property interest is subject to a trust restriction on alienation, or otherwise within the borders of an Indian reservation; and

"(3) the Indian tribe is reasonably expected to be capable, in the Administrator's judgment, of carrying out the functions to be exercised in a manner consistent with the terms and purposes of this Act and of all applicable regulations.

Such treatment as a State may include the direct provision of funds reserved under subsection (c) to the governing bodies of Indian tribes, and the determination of priorities by Indian tribes, where not determined by the Administrator in cooperation with the Director of the Indian Health Service. The Administrator, in cooperation with the Director of the Indian Health Service, is authorized to make grants under title II of this Act in an amount not to exceed 100 percent of the cost of a project. Not later than 18 months after the date of the enactment of this section, the Administrator shall, in consultation with Indian tribes, promulgate final regulations which specify how Indian tribes shall be treated as States for purposes of this Act. The Administrator shall, in promulgating such regulations, consult affected States sharing common water bodies and provide a mechanism for the resolution of any unreasonable consequences that may arise as a result of differing water quality standards that may be set by States and Indian tribes located on common bodies of water. Such mechanism shall provide for explicit consideration of relevant factors including, but not limited to, the effects of differing water quality permit requirements on upstream and downstream dischargers, economic impacts, and present and historical uses and quality of the waters subject to such standards. Such mechanism should provide for the avoidance of such unreasonable consequences in a manner consistent with the objective of the Act.

"(f) GRANTS FOR NONPOINT SOURCE PROGRAMS.—The Administrator shall make grants to an Indian tribe under section 319 of this Act as though such tribe was a State. Not more than one-third of one percent of the amount appropriated for any fiscal year under section 319 may be used to make grants under this subsection. In addition to the requirements of section 319, an Indian tribe shall be required to meet the requirements of paragraphs (1), (2), and (3) of subsection (d) of this section in order to receive such a grant.

"(g) ALASKA NATIVE ORGANIZATIONS.—No provision of this Act shall be construed to—

"(1) grant, enlarge, or diminish, or in any way affect the scope of the governmental authority, if any, of any Alaska Native organization, including any federally-recognized tribe, traditional Alaska Native council, or Native council organized pursuant to the Act of June 18, 1934 (48 Stat. 987), over lands or persons in Alaska;

"(2) create or validate any assertion by such organization or any form of governmental authority over lands or persons in Alaska; or

"(3) in any way affect any assertion that Indian country, as defined in section 1151 of title 18, United States Code, exists or does not exist in Alaska.

"(h) DEFINITIONS.—For purposes of this section, the term—

"(1) 'Federal Indian reservation' means all land within the limits of any Indian reservation under the jurisdiction of the United States Government, notwithstanding the issuance of any patent, and including rights-of-way running through the reservation; and

"(2) 'Indian tribe' means any Indian tribe, band, group, or community recognized by the Secretary of the Interior and exercising governmental authority over a Federal Indian reservation.".

SEC. 507. DEFINITION OF POINT SOURCE.

For purposes of the Federal Water Pollution Control Act, the term "point source" includes a landfill leachate collection system.

SEC. 508. SPECIAL PROVISIONS REGARDING CERTAIN DUMPING SITES.

(a) FINDING.—The Congress finds that the New York Bight Apex is no longer a suitable location for the ocean dumping of municipal sludge.

(b) GENERAL RULE.—Title I of the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.) is further amended by inserting after section 104 the following new section:

"SPECIAL PROVISIONS REGARDING CERTAIN DUMPING SITES

"SEC. 104A. (a) NEW YORK BIGHT APEX.—(1) For purposes of this subsection:

"(A) The term 'Apex' means the New York Bight Apex consisting of the ocean waters of the Atlantic Ocean westward of 73 degrees 30 minutes west longitude and northward of 40 degrees 10 minutes north latitude.

"(B) The term 'Apex site' means that site within the Apex at which the dumping of municipal sludge occurred before October 1, 1983.

"(C) The term 'eligible authority' means any sewerage authority or other unit of State or local government that on November 2, 1983, was authorized under court order to dump municipal sludge at the Apex site.

"(2) No person may apply for a permit under this title in relation to the dumping of, or the transportation for purposes of dumping, municipal sludge within the Apex unless that person is an eligible authority.

"(3) The Administrator may not issue, or renew, any permit under this title that authorizes the dumping of, or the transportation for purposes of dumping, municipal sludge within the Apex after the earlier of—

"(A) December 15, 1987; or

"(B) the day determined by the Administrator to be the first day on which municipal sludge generated by eligible authorities can reasonably be dumped at a site designated under section 102 other than a site within the Apex.

"(b) RESTRICTION ON USE OF THE 106-MILE SITE.—The Administrator may not issue or renew any permit under this title which authorizes any person, other than a person that is an eligible authority within the meaning of subsection (a)(1)(C), to dump, or to transport for the purposes of dumping, municipal sludge within the site designated under section 102(c) by the Administrator and known as the '106-Mile Ocean Waste Dump Site' (as described in 49 F.R. 19005).".

SEC. 509. OCEAN DISCHARGE RESEARCH PROJECTS.

(a) IN GENERAL.—Notwithstanding any other provision of law, the Administrator is authorized to issue a research permit to the Orange County, California, Sanitation Districts for the discharge of preconditioned municipal sewage sludge into the ocean for the purpose of enabling research to be conducted in assessing and analyzing the effects of disposing of sewage sludge by pipeline into ocean waters—

(1) if the Administrator is satisfied that such local governmental agency is actively pursuing long-term land-based options for the handling of its sludge with special emphasis on remote disposal alternatives set forth in the 1980 LA/OMA sludge management project and on reuse of sludge or use of recycled sludge; and

(2) if the Administrator determines that there is no likelihood of an unacceptable adverse effect on the environment as a result of issuance of such permit and that such permit would meet the requirements of paragraph (2) of section 301(h) of the Federal Water Pollution Control Act, as amended by this Act, and of the sentences following the first sentence of such section if such permit were being issued under such section.

(b) PERMIT TERMS.—

(1) PERIOD.—The permit for the discharge of sludge shall be for a period of 5 years commencing on the date of such discharge and shall not be extended or renewed.

(2) MONITORING.—Such permit shall provide for monitoring (including whole effluent monitoring) of permitted discharges and other discharges into the ocean in the same area and the effects of such discharges (including cumulative effects) in conformance with requirements established by the Administrator, after consultation with appropriate Federal and State agencies, and for the reporting of such monitoring to Congress and the Administrator every 6 months.

(3) VOLUME OF DISCHARGE.—Such permit shall provide that the volume of such local agency's sludge disposed of by such experimental pipeline shall be no more than one and one-half times that being disposed of by such remote disposal and alternatives for the reuse of sludge and the use of recycled sludge. In no event shall the agency dispose of more than 50 percent of its sludge by the pipeline.

(4) TERMINATION.—The permit shall provide for termination of the permit if the Administrator determines that the disposal of sewage sludge is resulting in an unacceptable adverse impact on fish, shellfish, and wildlife. The Administrator may terminate a permit issued under this section if the Administrator determines that there has been a decline in ambient water quality of the receiving waters during the period of the permit even if a direct cause and effect relationship cannot be shown. If the effluent from a source with a permit issued under this section is contributing to a decline in ambient water quality of the receiving waters, the Administrator shall terminate such permit.

(c) LIMITATION ON PRECEDENCE.—The facts and circumstances described in subsection (a) present a unique situation which will not establish a precedent for the relaxation of the requirements of the Federal Water Pollution Control Act applicable to similarly situated discharges.

(d) REPORT.—Such districts shall report the results of the program and an analysis of such program to Congress under this section not later than four and one-half years after issuance of the permit.

SEC. 510. SAN DIEGO, CALIFORNIA.

(a) PURPOSE.—The purpose of this section is to protect the economy, public health, environment, surface water and public beaches, and water quality of the city of San Diego, California, and surrounding areas, which are endangered and are being polluted by raw sewage emanating from the city of Tijuana, Mexico.

(b) CONSTRUCTION GRANTS.—Upon approval of the necessary plans and specifications, the Administrator is authorized to make grants to the Secretary of State, acting through the American Section of the International Boundary and Water Commission (hereinafter in this section referred to as the "Commission"), or any other Federal agency or any other appropriate commission or entity designated by the President. Such grants shall be for construction of a project consisting of—

(1) defensive treatment works to protect the residents of the city of San Diego, California, and surrounding areas from pollution resulting from any inadequacies or breakdowns in wastewater treatment works and systems in Mexico; and

(2) treatment works in the city of San Diego, California, to provide primary or more advanced treatment of municipal sewage and industrial waste from Mexico, including the city of Tijuana, Mexico.

(c) LIMITATION ON GRANTS.—Notwithstanding subsection (b), the Administrator may make grants for construction of treatment works described in subsection (b)(2) only if, after public notice and comment, the Administrator determines that treatment works in Mexico, in conjunction with any defensive treatment works constructed under this or any other Act, are not sufficient to protect the residents of the city of San Diego, California, and surrounding areas from water pollution originating in Mexico.

(d) OPERATION AND MAINTENANCE.—The Commission or such other agency, commission, or entity as may be designated under subsection (b) is authorized to operate and maintain any treatment works constructed under subsection (b) in order to accomplish the purposes of this section.

(e) APPROVAL OF PLANS.—Any treatment works for which a grant is made under this section shall be constructed in accordance with plans developed by the Commission or such other agency, commission, or entity as may be designated under subsection (b), in consultation with the city of San Diego, and approved by the Administrator to meet the construction standards which would be applicable if such treatment works were being constructed under title II of the Federal Water Pollution Control Act.

(f) FEDERAL SHARE.—Construction of the treatment works under subsection (b) shall be at full Federal expense less any costs paid by the State of California and less any costs paid by the Government of Mexico as a result of agreements negotiated with the United States.

(g) OCEAN OUTFALL PERMIT.—Notwithstanding section 301(j) of the Federal Water Pollution Control Act, upon application of the city of San Diego, California, the Administrator may issue a permit under section 301(h) of such Act which modifies the requirements of section 301(b)(1)(B) of such Act to permit the discharge of pollutants for any ocean outfall constructed with Federal assistance under this section if the Administrator finds that issuing such permit is in the best interests of achieving the goals and requirements of such Act. The Administrator may waive the requirements of section 301(h)(5) of such Act with respect to the issuance of such permit if the Administrator finds that such waiver is in the best interests of achieving the goals and requirements of such Act.

(h) TREATMENT OF SAN DIEGO SEWAGE.—If any treatment works constructed pursuant to this section becomes no longer necessary to provide protection from pollution originating in Mexico, the city of San Diego, California, may use such treatment works to treat municipal and individual waste originating in the city of San Diego and surrounding areas if the city of San Diego enters into a binding agreement with the Administrator to pay to the United States 45 percent of the costs incurred in the construction of such treatment works.

(i) DEFINITIONS.—For purposes of this section, the terms "construction" and "treatment works" have the meanings such terms have under section 212 of the Federal Water Pollution Control Act.

(j) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1986, such sums as may be necessary to the Administrator to make grants under this section and such sums as may be necessary to the Commission or such other agency, commission, or entity as the President may designate under subsection (b), to carry out this section.

SEC. 511. LIMITATION ON DISCHARGE OF RAW SEWAGE BY NEW YORK CITY.

(a) IN GENERAL.—

(1) NORTH RIVER PLANT.—If the wastewater treatment plant identified in the consent decree as the North River plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1986, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1986 (as determined by the Administrator), except as provided in subsection (b).

(2) RED HOOK PLANT.—If the wastewater treatment plant identified in the consent decree as the Red Hook plant has not achieved advanced preliminary treatment as required under the terms of the consent decree by August 1, 1987, the city of New York shall not discharge raw sewage from the drainage area of such plant (as defined in the consent decree) into navigable waters after such date in an amount which is greater for any 30-day period than an amount equal to 30 times the average daily amount of raw sewage discharged from such drainage area during the 12-month period ending on the earlier of the date on which such plant becomes operational or March 15, 1987 (as determined by the Administrator), except as provided in subsection (b).

(b) WAIVERS.—

(1) INTERRUPTION OF PLANT OPERATION.—In the event of any significant interruption in the operation of the North River plant or the Red Hook plant caused by an event described in subparagraph (A), (B), or (C) of paragraph (5) occurring after the applicable deadline established under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to such plant, but only to such extent and for such limited period of time as may be reasonably necessary for the city of New York to resume operation of such plant.

(2) INCREASED PRECIPITATION.—In the event that the volume of precipitation occurring after the applicable deadline established under subsection (a) causes the discharge of raw sewage to exceed the limitation under subsection (a), the Administrator shall waive the limitation of subsection (a) with respect to either or both such plants, but only to such extent and for such limited period of time as the Administrator determines to be necessary to take into account the increased discharge caused by such volume of precipitation.

(3) VARIATIONS IN CERTAIN NORTH RIVER DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the North River drainage area constituting a violation of subsection (a)(1) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1986, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(1), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(4) VARIATIONS IN CERTAIN RED HOOK DRAINAGE AREA DISCHARGES.—In the event that an increase in discharges from the Red Hook drainage area constituting a violation of subsection (a)(2) is due to a random or seasonal variation, and that any sewer hookup occurring, or permit for a sewer hookup granted, after July 31, 1987, is not responsible for such violation, the Administrator shall waive the limitation of subsection (a)(2), but only to such extent and for such limited period of time as the Administrator determines to be reasonably necessary to take into account such random or seasonal variation.

(5) CIRCUMSTANCES BEYOND CITY'S CONTROL.—The Administrator shall extend either deadline under paragraph (1) or (2) of subsection (a) to such extent and for such limited period of time as may be reasonably required to take into account any—

(A) act of war,

(B) unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight, or

(C) other circumstances beyond the control of the city of New York, except such circumstances shall not include (i) the unavailability of Federal funds under section 201 of the Federal Water Pollution Control Act, (ii) the unavailability of funds from the city of New York or the State of New York, or (iii) a policy decision made by the city of New York or the State of New York to delay the achievement of advanced preliminary treatment at the North River plant or Red Hook plant beyond the applicable deadline set forth in subsection (a).

(c) PENALTIES.—Except as otherwise provided in subsection (b), any violation of subsection (a) shall be considered to be a violation of section 301 of the Federal Water Pollution Control Act, and all provisions of such Act relating to violations of such section 301 shall apply.

(d) CONSENT DECREE DEFINED.—For purposes of this section, the term "consent decree" means the consent decree entered into by the Environmental Protection

Agency, the city of New York, and the State of New York, on December 30, 1982, relating to construction and operation of the North River and Red Hook wastewater treatment plants.

(e) COOPERATION.—The Administrator shall work with the city of New York to eliminate the discharge of raw sewage by such city at the earliest practicable date.

(f) SAVINGS CLAUSE.—Nothing in this section shall be construed as modifying the terms of the consent decree.

(g) SENSE OF CONGRESS.—It is the sense of Congress that the Administrator should not agree to any further modification of the consent decree with respect to the schedule for achieving advanced preliminary treatment.

(h) TERMINATION DATES.—

(1) NORTH RIVER PLANT.—The provisions of this section shall remain in effect with respect to the North River drainage area until such time as the North River plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(2) RED HOOK PLANT.—The provisions of this section shall remain in effect with respect to the Red Hook drainage area until such time as the Red Hook plant has achieved advanced preliminary treatment (as defined in the consent decree) for a period of six consecutive months.

(i) MONITORING ACTIVITIES.—The Administrator shall promptly establish and carry out a program within available funds to implement the monitoring activities which may be required under subsection (a).

(j) ESTABLISHMENT OF METHODOLOGIES.—The Administrator shall establish the methodologies, data base, and any other information required for making determinations under subsection (b)—

(1) for the North River drainage area (as defined in the consent decree) by July 31, 1986, unless the requirements of subsection (h)(1) have been satisfied, and

(2) for the Red Hook drainage area (as defined by the consent decree) by July 31, 1987, unless the requirements of subsection (h)(2) have been satisfied.

(k) VIOLATIONS.—In carrying out this section, if the Administrator finds that a violation of subsection (a) has occurred, the Administrator shall also determine, within 30 days after such finding, whether a provision of subsection (b) applies. If the Administrator requires information from the city of New York in order to determine whether a provision of subsection (b) applies, the Administrator shall request such information. If the city of New York does not supply the information requested by the Administrator, the Administrator shall determine that subsection (b) does not apply. The city of New York shall be responsible only for such expenses as are necessary to provide such requested information. Enforcement action pursuant to subsection (c) shall be commenced at the end of such 30 days unless a provision of subsection (b) applies.

SEC. 512. OAKWOOD BEACH AND RED HOOK PROJECTS, NEW YORK.

(a) RELOCATION OF NATURAL GAS FACILITIES.—Notwithstanding any provision of the Federal Water Pollution Control Act, the Administrator shall pay, to the extent provided in appropriation Acts, in the same proportion as the Federal share of other project costs, all expenses for the relocation of facilities for the distribution of natural gas with respect to the entire wastewater treatment works known as the Oakwood Beach (EPA Grant Numbered 360392) and Red Hook (EPA Grant Numbered 360394) projects, New York.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1986, not to exceed $7,000,000 to carry out this section.

SEC. 513. BOSTON HARBOR AND ADJACENT WATERS.

(a) GRANTS.—The Administrator shall make grants to the Massachusetts Water Resource Authority for purposes of—

(1) assessing the principal factors having an adverse effect on the environmental quality of Boston Harbor and its adjacent waters;

(2) developing and implementing a management program to improve the water quality of such Harbor and waters; and

(3) constructing necessary waste water treatment works for providing secondary treatment for the areas served by such authority.

(b) FEDERAL SHARE.—The Federal shate of projects described in subsection (a) shall not exceed 75 percent of the cost of construction thereof.

(c) EMERGENCY IMPROVEMENTS.—The Administrator is authorized and directed to make grants to the Massachusetts Water Resource Authority for a project to undertake emergency improvements at the Deer Island Waste Water Treatment Plant in Boston, Massachusetts. The Federal share of such project shall not exceed 75 percent of the cost of carrying out such improvements.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $100,000,000 to carry out this section for fiscal years beginning after September 30, 1986, to remain available until expended. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 514. WASTEWATER RECLAMATION DEMONSTRATION.

(a) AUTHORITY TO MAKE GRANTS.—The Administrator is authorized to make a grant to the San Diego Water Reclamation Agency, California, to demonstrate and field test for public use innovative processes which advance the technology of wastewater reclamation and which promote the use of reclaimed wastewater.

(b) FEDERAL SHARE.—The Federal share of grants made under this section shall be 85 percent of the costs of conducting such demonstration and field test.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated not to exceed $2,000,000 to carry out this section for fiscal years beginning after September 30, 1986.

SEC. 515. DES MOINES, IOWA.

(a) GRANT.—The Administrator is authorized to make a grant to the city of Des Moines, Iowa, for construction of the Central Sewage Treatment Plant component of the Des Moines, Iowa, metropolitan area project. The Federal share of such project shall be 75 percent of the cost of construction.

(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section not to exceed $50,000,000 for fiscal years beginning after September 30, 1986. Such sums shall be in addition to and not in lieu of any other amounts authorized to be appropriated under title II of the Federal Water Pollution Control Act.

SEC. 516. STUDY OF DE MINIMIS DISCHARGES.

(a) STUDY.—The Administrator shall conduct a study of discharges of pollutants into the navigable waters and their regulation under the Federal Water Pollution Control Act to determine whether or not there are discharges of pollutants into such waters in amounts which, in terms of volume, concentration, and type of pollutant, are not significant and to determine the most effective and appropriate methods of regulating any such discharges.

(b) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study along with recommendations and findings concerning the most effective and appropriate methods of regulating any discharges of pollutants into the navigable waters in amounts which the Administrator determines under such study to be not significant.

SEC. 517. STUDY OF EFFECTIVENESS OF INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES.

(a) EFFECTIVENESS STUDY.—The Administrator shall study the effectiveness on waste treatment of innovative and alternative wastewater treatment processes and techniques referred to in section 201(g)(5) of the Federal Water Pollution Control Act which have been utilized in treatment works constructed under such Act. In conducting such study, the Administrator shall compile information, by State, on the types of such processes and techniques utilized, on the number of facilities constructed with such processes and techniques, and a description of such processes and techniques which have not performed to design standards. The Administrator shall also determine which States have not obligated the full amount set aside under section 205(i) of such Act for such processes and techniques and the reasons for each such State's failure to make such obligations.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the results of such study, along with recommendations for providing more effective incentives for innovative and alternative wastewater treatment processes and techniques.

SEC. 518. STUDY OF TESTING PROCEDURES.

(a) STUDY.—The Administrator shall study the testing procedures for analysis of pollutants established under section 304(h) of the Federal Water Pollution Control Act. Such study shall include, but not be limited to, an analysis of the adequacy and standardization of such procedures. In conducting the analysis of the standardization of such procedures, the Administrator shall consider the extent to which such procedures are consistent with comparable procedures established under other Federal laws.

(b) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study conducted under this subsection, together with recommendations for modifying the test procedures referred to in subsection (a) to improve their effectiveness, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 519. STUDY OF PRETREATMENT OF TOXIC POLLUTANTS.

(a) STUDY.—The Administrator shall study—

(1) the adequacy of data on environmental impacts of toxic industrial pollutants discharged from publicly owned treatment works;

(2) the extent to which secondary treatment at publicly owned treatment works removes toxic pollutants;

(3) the capability of publicly owned treatment works to revise pretreatment requirements under section 307(b)(1) of the Federal Water Pollution Control Act;

(4) possible alternative regulatory strategies for protecting the operations of publicly owned treatment works from industrial discharges, and shall evaluate the extent to which each such strategy identified may be expected to achieve the goals of this Act;

(5) for each such alternative regulatory strategy, the extent to which removal of toxic pollutants by publicly owned treatment works results in contamination of sewage sludge and the extent to which pretreatment requirements may prevent such contamination or improve the ability of publicly owned treatment works to comply with sewage sludge criteria developed under section 405 of the Federal Water Pollution Control Act; and

(6) the adequacy of Federal, State, and local resources to establish, implement, and enforce multiple pretreatment limits for toxic pollutants for each such alternative strategy.

(b) REPORT.—Not later than 4 years after the date of the enactment of this Act, the Administrator shall submit a report on the results of such study along with recommendations for improving the effectiveness of pretreatment requirements to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

SEC. 520. STUDIES OF WATER POLLUTION PROBLEMS IN AQUIFERS.

(a) STUDIES.—The Administrator, in conjunction with State and local agencies and after providing an opportunity for full public participation, shall conduct studies for the purpose of identifying existing and potential point and nonpoint sources of pollution, and of identifying measures and practices necessary to control such sources of pollution, in the following groundwater systems and aquifers:

(1) the groundwater system of the Upper Santa Cruz Basin and the Avra-Altar Basin of Pima, Pinal, and Santa Cruz Counties, Arizona;

(2) the Spokane-Rathdrum Valley Aquifer, Washington and Idaho;

(3) the Nassau and Suffolk Counties Aquifer, New York;

(4) the Whidbey Island Aquifer, Washington;

(5) the Unconsolidated Quaternary Aquifer, Rockaway River area, New Jersey;

(6) contaminated ground water under Litchfield, Hartford, Fairfield, Tolland, and New Haven counties, Connecticut; and

(7) the Sparta Aquifer, Arkansas.

(b) REPORTS.—Not later than 2 years after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the studies conducted under this section.

(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $7,000,000 for fiscal years beginning after September 30, 1986, to carry out this section.

SEC. 521. GREAT LAKES CONSUMPTIVE USE STUDY.

(a) STUDY OF CONSUMPTIVE USES.—In recognition of the serious impacts on the Great Lakes environment that may occur as a result of increased consumption of Great Lakes water, including loss of wetlands and reduction of fish spawning and habitat areas, as well as serious economic losses to vital Great Lakes industries, and in recognition of the national goal to provide environmental protection and preservation of our natural resources while allowing for continued economic growth, the Secretary of the Army in cooperation with the Administrator, other interested departments, agencies, and instrumentalities of the United States, and the 8 Great Lakes States, is authorized to conduct a study of the effects of Great Lakes water consumption on economic growth and environmental quality in the Great Lakes region and of control measures that can be implemented to reduce the quantity of water consumed.

(b) MATTERS INCLUDED.—The study authorized by this section shall at a minimum include the following:

(1) a review of the methodologies used to forecast Great Lakes consumptive uses, including an analysis of the sensitivity of key variables affecting such uses;

(2) an analysis of the effect that enforcement of provisions of the Federal Water Pollution Control Act relating to thermal discharges has had on consumption of Great Lakes water;

(3) an analysis of the effect of laws, regulations, and national policy objectives on consumptive uses of Great Lakes water used in manufacturing;

(4) an analysis of the associated environmental impacts and of the economic effects on industry and other interests in the Great Lakes region associated with individual consumptive use control strategies; and

(5) a summary discussion containing recommendations for methods of controlling consumptive uses which methods maximize benefits to the Great Lakes ecosystem and also provide for continued full economic growth for consuming industries as well as other industries which depend on the use of Great Lakes water.

(c) GREAT LAKES STATES DEFINED.—For purposes of this section, the term "Great Lakes States" means Minnesota, Wisconsin, Illinois, Ohio, Michigan, Indiana, Pennsylvania, and New York.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated for fiscal years beginning after September 30, 1986, $750,000 to carry out this section. Sums appropriated under this section shall remain available until expended.

SEC. 522. SULFIDE CORROSION STUDY.

(a) STUDY.—The Administrator shall conduct a study of the corrosive effects of sulfides in collection and treatment systems, the extent to which the uniform imposition of categorical pretreatment standards will exacerbate such effects, and the range of available options to deal with such effects.

(b) CONSULTATION.—The study required by this section shall be conducted in consultation with the Los Angeles City and County sanitation agencies.

(c) REPORT.—Not later than 1 year after the date of the enactment of this Act, the Administrator shall submit a report on the results of the study, together with recommendations for measures to reduce the corrosion of treatment works, to the Committee on Public Works and Transportation of the House of Representatives and the Committee on Environment and Public Works of the Senate.

(d) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $1,000,000 to carry out this section for fiscal years beginning after September 30, 1986.

SEC. 523. STUDY OF RAINFALL INDUCED INFILTRATION INTO SEWER SYSTEMS.

(a) STUDY.—The Administrator shall study problems associated with rainfall induced infiltration into wastewater treatment sewer systems. As part of such study, the Administrator shall study appropriate methods of regulating rainfall induced infiltration into the sewer system of the East Bay Municipal Utility District, California.

(b) REPORT.—Not later than one year after the date of the enactment of this Act, the Administrator shall submit to Congress a report on the results of such study, along with recommendations on reasonable methods to reduce such infiltration.

SEC. 524. DAM WATER QUALITY STUDY.

The Administrator, in cooperation with interested States and Federal agencies, shall study and monitor the effects on the quality of navigable waters attributable to the impoundment of water by dams. The results of such study shall be submitted to Congress not later than December 31, 1987.

SEC. 525. STUDY OF POLLUTION IN LAKE PEND OREILLE, IDAHO.

The Administrator shall conduct a comprehensive study of the sources of pollution in Lake Pend Oreille, Idaho, and the Clark Fork River and its tributaries, Idaho, Montana, and Washington, for the purpose of identifying the sources of such pollution. In conducting such study, the Administrator shall consider existing studies, surveys, and test results concerning such pollution. The Administrator shall report to Congress the findings and recommendations concerning the study conducted under this section.

And the House agree to the same.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1128) to amend the Clean Water Act, and for other purposes, submit the following joint statement to the House and the

Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment to the text of the bill struck out all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SHORT TITLE

Senate bill

The Senate bill may be cited as the Clean Water Act Amendments of 1985.

House amendments

The House amendment provides that it may be cited as the Water Quality Renewal Act of 1985.

Conference substitute

The Conference substitute may be cited as the Water Quality Act of 1986.

AMENDMENTS OF FEDERAL WATER POLLUTION CONTROL ACT, DEFINITION

Senate bill

No comparable provision.

House amendments

The House bill provides that unless provided otherwise, all amendments to, or repeal of, a section or provision will be considered to be amendments to, or repeal of, a section or other provisions of the Federal Water Pollution Control Act. The amendment also defines "Administrator" for purposes of the bill to mean the Administrator of the Environmental Protection Agency.

Conference substitute

The conference substitute adopts the House provisions.

LIMITATION ON PAYMENTS

Senate bill

No comparable provision.

House amendment

The House amendment provides that no payments may be made under this Act except to the extent provided in advance in appropriation Acts.

Conference substitute

The conference substitute adopts the House provision.

AUTHORIZATION OF APPROPRIATIONS

Senate bill

The Senate bill continues authorizations for a number of programs, most of which have existed since the Federal Water Pollution Control Act (now referred to as the Clean Water Act) was enacted in 1972. These include research, manpower training, forecasting, grants to State and interstate water pollution control agencies, training grants and scholarships to institutions of higher education, grants for the Clean Lakes program, and authorizations for all other sections of the Act for which funds are not specifically authorized elsewhere. Authorizations contained in this section continue these programs as fiscal year 1982 levels for fiscal years 1986 through 1989.

Section 104(u)(1) is amended to authorize $22,770,000 annually for such activities as research technical services, investigations, monitoring and coordination.

Section 104(u) is amended to provide $3 million annually for the manpower development training program provided for by section 104(g)(1). This program provides assistance to States and other entities to develop trained personnel to operate and maintain sewage treatment works. $1.5 million is authorized annually for the employment needs and forecasting program provided for by section 104(g)(2).

Section 106(a)(2) is amended to provide $75 million annually for grants to States and interstate agencies to assist them in administering programs for the prevention, reduction, and elimination of pollution, including enforcement directly through appropriate State enforcement officers or agencies

Section 112(c) authorizes $7 million per year for the program of training grants and scholarships to institutions of higher education to assist them in carrying out programs for the preparation of undergraduate students to enter water quality control-related occupations. This program is provided for by sections 109, 110, 111, and 112 of the Clean Water Act.

Section 314(c)(2) is amended to authorize $30 million annually for grants to States for assistance in determining the eutrophic conditions of publicly-owned freshwater lakes, ways of controlling pollution in those lakes, and methods of working with Federal agencies to restore lake water quality.

Finally, $160 million per year is authorized for section 517 for carrying out provisions of the Clean Water Act for whch funds have not otherwise been authorized.

House amendment

The amendment continues through Fiscal Year 1990 authorizations for a number of programs in the Water Pollution Control Act as follows:

—$22,770,000 per fiscal year for research activities and investigations on the causes and effects of water pollution;

—$3 million per fiscal year for the training of personnel who operate and maintain treatment plants.

—$1,500,000 per fiscal year for forecasting the supply of and demand for occupational categories needed in the water pollution control field.

—$75 million per fiscal year for grants to state and interstate agencies to assist in administering programs for water pollution control;

—$7 million per fiscal year for grants to educational institutions for programs to train personnel in the operation of water pollution control facilities and to provide scholarships for students entering the field of operation and maintenance of publicly owned treatment works;

—$50 million per fiscal year for grants under section 208 for developing and implementing areawide waste treatment management planning processes;

—$50 million per fiscal year for the rural clean water program.

—$50 million per fiscal year to implement interagency agreements for the utilization of other Federal laws to assist in controlling water pollution;

—$30 million per fiscal year for the Clean Lakes Program, which provides for the restoration of the quality of water in lakes; and

—$110 million per fiscal year for general administration of the Federal Water Pollution Control Act by the Environmental Protection Agency.

Conference substitute

The conference substitute contains a modified version of the authorization levels contained in both the House and Senate bills.

In order to not break continuity in the Act, the substitute authorizes appropriation of such sums as may be necessary for fiscal years 1983 through 1985 for: research and investigation under section 104(u); grants for program administration under section 106; training grants and scholarships under section 112(c); areawide planning under section 208(f); rural clean water under section 208(j); the Clean Lakes Program under section 314, and the general program authorization under section 517. For fiscal years 1986 through 1990, the substitute authorizes appropriations in the following amounts for the following programs:

—$22.77 million per fiscal year for research activities and investigations on the cause and effects of water pollution (section 104(u)(1));

—$3 million per fiscal year for the training of personnel who operate and maintain treatment plants (section 104(u)(2));

—$1.5 million per fiscal year for forecasting the supply of, and demand for, occupational categories needed in the water pollution field (section 104(u)(3));

—$75 million per fiscal year for grants to State and interstate agencies to assist in administering programs for water pollution control (section 106(a)(2));

—$7 million per fiscal year for grants to educational institutions for programs to train personnel in the operation of water pollution control facilities and to provide scholarships for students entering the field of operation and maintenance of publicly owned treatment works (section 112(c));

—such sums as may be necessary per fiscal year for grants under section 208 for developing and implementing areawide waste treatment management planning processes (section 208(f));

—such sums as may be necessary per fiscal year for the rural clean water program (section 208(i));

—such sums as may be necessary per fiscal year for the Clean Lakes Program (section 314) which provides for the restoration of the quality of water in lakes; and

—$135 million per fiscal year for general administration of the Federal Water Pollution Control Act by the Environmental Protection Agency.

In addition, the substitute authorizes such sums as may be necessary for fiscal years 1984 through 1990 to implement interagency agreements for the utilization of other Federal laws to assist in controlling water pollution.

SMALL FLOWS CLEARINGHOUSE

Senate bill

The Senate bill amends section 104(q) of the Act to use a portion of the funds set aside for innovative and alternative (I&A) technologies, but not obligated within the 2 year deadline, to fund the Small Flows Clearinghouse. This Clearinghouse was established under the 1977 amendments to collect and disseminate information on alternatives to traditional expensive community-wide sewage treatment systems, suitable for rural settings and individual or cluster application.

At the end of the last two obligation periods, several million dollars remained unobligated and had to be reallotted. The amendment dedicates $1 million of that to funding the Clearinghouse.

House amendment

Substantially the same as the Senate bill.

Conference substitute

The conference substitute adopts the House provision.

CHESAPEAKE BAY

Senate bill

The Senate bill requires the Administrator to establish an Office of Chesapeake Bay Programs in support of a continuing State/Federal Chesapeake Bay program, at an authorization level of $3 million for the purposes of a) collecting, coordinating, and disseminating all research information concerning the environmental quality of the Bay, b) conducting research to identify the sources, quantity, and effects of sediment deposition on the Bay, and c) conducting research on the impacts of pollutant loadings on the Bay's water quality and biota.

The Administrator is authorized to make grants to those States affected by the Chesapeake Bay interstate management plan, at the request of the Governors, which commit to implement all or substantially all aspects of the plan within one year from enactment. States are required to submit a description of selected abatement actions and estimated costs for the Administrator's approval. The Federal share, with an authorization level of $10 million per year, will not exceed 55 percent of annual implementation costs. Administrative costs are limited to 10 percent of the annual Federal grant made to the State. States receiving grants must submit a progress report 18 months after receipt and biennally thereafter.

House amendment

Substantially the same as the Senate bill, but also included a provision on Narragansett Bay.

Conference substitute

The conference substitute combines the House and Senate provisions (making no substantive changes except as to grant percentage) as follows:

—House amendment on establishment and responsibilities of Office of Chesapeake Bay programs.

—Senate bill on grants to implement management mechanisms, with House 50 percent grants in lieu of Senate's 55 percent grants.

—House amendment on State reports to E.P.A. and E.P.A. transmittal of reports, with comments, to Congress.

The conference substitute deletes the separate provision on Narragansett Bay and adds it to the list of estuaries for priority consideration by the Administrator in the National Estuary Program in new section 320 of the Act.

In review of funding proposals submitted under subsection (b)(2) of this section, the Administrator shall consider the need to provide for effective control of nonpoint sources of pollution to the Bay and should use the authority provided in subsection (b)(1) to assure that such sources are adequately addressed.

GREAT LAKES

Senate bill

The Senate bill establishes the Great Lakes National Program Office within the Environmental Protection Agency and describes the duties and responsibilities of the Program Office.

The Program Office is given three basic duties: 1) developing and implementing plans to carry out U.S. responsibilities under the Great Lakes Water Quality Agreement of 1978; 2) establishing a water quality surveillance network; and 3) serving as a liaison to the Canadian members of the International Joint Commission and the Canadian counterpart to the EPA. In addition, the office is required to develop programs for the control of nutrients, including phosphates, and toxic chemicals.

The nutrient program will incorporate any actions taken in the Great Lakes Basin under the nonpoint source pollution program which is established by section 319 of this Act. The toxic chemical program will emphasize the removal of pollutants from bottom sediments.

Under the provisions of this amendment the annual budget submission of the Environmental Protection Agency to the Congress is to include a funding request for the Program Office as a separate line item.

The Administrator is required to submit a comprehensive report at the end of each fiscal year detailing the achievements of the program.

The bill establishes a Great Lakes Research Office in the National Oceanic and Atmospheric Administration. The Research Office is to identify issues on which research is needed and is to compile an inventory of on-going research on those questions. The Research Office is to develop a comprehensive data base for the Great Lakes System and may conduct research and monitoring activities.

For each fiscal year the Program Office and the Research Office are to prepare a joint research program for the following fiscal year. The head of each Federal department, agency or instrumentality which is engaged in programs or activities which may have an impact on the quality of the Great Lakes shall submit an annual report to the Administrator with respect to those activities and their effect on compliance with the Great Lakes Water Quality Agreement.

The bill authorizes $50 million over a five-year period to carry out the purposes of this section, 50% of which is to be used for demonstrating methods to control toxic pollution, 7% of which is for nutrient monitoring and 30% of which is for the Research Office.

House amendment

The House amendment includes a statement of purpose for this section which is to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978. The amendment establishes the Great Lakes International Coordination Office. The Office is to: carry out the Great Lakes Water Quality Agreement of 1978; conduct toxic pollutant control demonstration programs at five specific sites; coordinate the activities of the Agency related to the Great Lakes; coordinate actions of other Federal departments and agencies related to the Great Lakes; establish a system-wide surveillance network; and serve as a liaison to Canadian members of the International Joint Commission.

The annual budget submission of the Agency to Congress is to include a specific line item for the Office. The Administrator is to submit annual assessments and reports on progress in meeting the Great Lakes Water Quality Agreement of 1978.

The amendment establishes a Great Lakes Research Office in the National Oceanic and Atmospheric Administration. The Research Office is to identify issues on which research is needed and is to compile an inventory of on-going research on those questions. The Research Office is to develop a comprehensive data base for the Great Lakes System and may conduct research and monitoring activities.

For each fiscal year the Coordination Office within EPA and the Research Office at NOAA are to prepare a joint research program.

The amendment authorizes $52 million over a five-year period for the EPA Coordination Office of which $17.5 million is to be used to carry out the toxic pollutant control demonstration projects. In addition $10 million is authorized to carry out the existing Great Lakes authorities of the Clean Water Act in fiscal year 1986 and $16 million is authorized for the activities of the Research Office over a five-year period.

Conference substitute

The conference substitute contains a statement of purpose which is to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978. It establishes the Great Lakes National Program Office within the Environmental Protection Agency and specifies the duties and responsibilities of the Program Office.

The Program Office is to: develop and implement action plans to carry out the duties of the United States under the Great Lakes Water Quality Agreement of 1978; establish a system-wide surveillance network; coordinate the activities of the Environmental Protection Agency with respect to the Great Lakes; to work with other Federal agencies to achieve the objectives of the Agreement.

The Program Office is to develop a five-year plan for reducing the amount of nutrients that enter into the Great Lakes and shall incorporate into that plan management programs for nonpoint sources of pollution developed pursuant to section 319 of this Act.

The Program Office is to conduct a five-year study of methods to remove toxic pollutants from the Great Lakes with emphasis on the removal of toxic pollutants from bottom sediments. Demonstration projects at Saginaw Bay, Michigan; Sheboygan Harbor, Wisconsin; Grand Calumet River, Indiana; Ashtabula River, Ohio; and Buffalo River, New York are to receive high priority under this program.

The annual budget submission of the Agency to the Congress is to include a line item for the Great Lakes Program Office. At the end of each fiscal year the Administrator is to submit to the Congress a comprehensive report on the achievements of the Program Office during the preceding fiscal year.

The conference substitute establishes a Great Lakes Research Office in the National Oceanic and Atmospheric Administration. The Research Office is to identify issues with respect to Great Lakes water quality on which research is needed and is to compile an inventory of on-going research on those questions. The Research Office is to develop a comprehensive data base for the Great Lakes System and may conduct research and monitoring activities.

For each fiscal year the Program Office and the Research Office are to prepare a joint research program. The head of each Federal department, agency or instrumentality which is engaged in programs or ac-

tivities which may have an impact on the quality of the Great Lakes shall submit an annual report to the Administrator of the Environmental Protection Agency with respect to those activities and their effect on compliance with the Great Lakes Water Quality Agreement of 1978.

The conference substitute provides an authorization to the Administrator of the Environmental Protection Agency of $11,000,000 for each of the fiscal years 1987 through 1991 to carry out the provisions of this section. Of the amounts appropriated, 40 percent is to be used by the Program Office to demonstrate the control and removal of toxic pollutants; 7 percent is to be used for nutrient monitoring; and 30 percent is to be transferred to the Research Office for its programs.

RESEARCH ON EFFECTS OF POLLUTANTS

Senate bill

No comparable provision.

House amendment

The House amendment directs EPA, when establishing national programs to reduce and eliminate pollution, to conduct research on the harmful effects on persons caused by pollutants in water. Special emphasis is to be placed on the effects of bioaccumulation of pollutants in aquatic species. The study will be carried out in conjunction with the Fish and Wildlife Service, the National Oceanic and Atmospheric Administration and other Federal and State agencies.

Conference substitute

The conference substitute adopts the House provision requiring the Administrator to undertake research on the harmful effects of pollutants in water but deletes the specific authorization of appropriations to carry out the purposes of this section. Research required by this section should be undertaken using funds made available to carry out section 104 of the Act. In conducting this research, the Administrator should address the health impacts of waterborne pollutants on both human and aquatic species.

TIME LIMIT ON RESOLVING CERTAIN DISPUTES

Senate bill

No comparable provision.

House amendment

This provision states that in any case in which a dispute arises with respect to the awarding of a contract for construction of treatment works by a grantee of funds under this title and a party to such dispute files an appeal with the Administrator for resolution of the dispute, the Administrator shall make a final decision on the appeal within 60 days of the filing of such appeal.

Conference substitute

The conference substitute adopts the House provision, except that the time limit for final decision is 90 days after the filing of the appeal.

FEDERAL SHARE

Senate bill

No comparable provision.

House amendment

The House amendment amends section 202(a)(1) of the Act by adding projects to address water quality problems due to impacts of discharges from combined storm water and sanitary sewer overflows. This is the subsection which provides that projects which have received a step three construction grant before October 1, 1984, will continue to receive a Federal grant of 75 percent until completion.

The House amendment provides that, in the case of any project for which an application for a grant has been made before October 1, 1984, and which project is under judicial injunction on such date prohibiting its construction, the project shall still be eligible for grants of 75 percent of the construction cost.

The House amendment also provides that in the case of the Wyoming Valley Sanitary project required by judicial order, the Federal share shall be 75 percent of the cost of construction.

The House amendment provides that, in addition, the Administrator is authorized to make a grant to fund all the costs of the modification or replacement of biodisc equipment (rotating biological contractors) in any publicly owned treatment works if the Administrator finds that the equipment has not met design performance specifications, unless the failure is attributable to negligence on the part of any person, and if the failure has significantly increased capital or operating and maintenance expenditures.

The House amendment provides that the activated bio-filter feature for treatment works of the City of Little Falls, Minnesota, shall be deemed to be an innovative wastewater process and technique and shall be eligible for the increased grants which the Act makes available for innovative technology projects.

Federal assistance made available by the Farmers Home Administration is authorized to be used to provide the non-Federal share of construction projects costs.

CONFERENCE SUBSTITUTE

The conference substitute adopts the House amendment as modified. Subsection (a) of the House amendment is deleted. The conference substitute adopts a modification of a Senate provision limiting the eligibility of facilities to receive 75 percent Federal grants to those grants made pursuant to a State obligation occurring before October 1, 1990. The conference substitute also provides that a project for wastewater treatment at Altoona, Pennsylvania, shall be eligible for 75 percent grants.

Subsection (f) clarifies that assistance made available to communities through the Farmers Home Administration may be used to provide the non-Federal share of the cost of a construction project carried out under section 201 of this Act. A number of projects have proceeded with Farmers Home Administration funding of the non-Federal share. Subsection (f) is intended to simply clarify that such practices have been and continue to be acceptable. Adoption of this provision should not be interpreted as implying that, prior to this action, such practices were not acceptable.

ELIGIBILITIES AFTER 1990

Senate bill

The bill amends three sections of the Act to provide consistency between programmatic aspects of title II and the funding phaseout. The bill amends section 202(a)(1) of the Act to prohibit grandfathering of the 75 percent Federal share for grants for phased or segmented projects that receive a grant award on or after October 1, 1990. Section 204(c) of the Act is amended to prohibit grandfathering of reserve capacity for phased or segmented projects that receive a grant award on or after October 1, 1990. Section 205(g)(1) of the Act is amended to extend the Administrator's authority to reserve four percent of the State's allotment through fiscal year 1994 for the purpose of making grants to States for the management of the delegated construction grant program. This is to assure that management funds will be available for any project constructed within the legal obligation period after 1990.

House amendment

The House amendment also amends section 205(g)(1) of the act, but only extends the reservation for costs of administration until 1990.

Conference substitute

The conference substitute adopts the Senate bill, as modified, among other things to provide that 75 percent Federal grants will no longer be available for any grant made pursuant to a State obligation made after September 30, 1990, and to delete the resource capacity prohibition after October 1, 1990, for certain phased or segmented projects.

AGREEMENT ON ELIGIBLE COSTS; GRANTEE CERTIFICATION OF TREATMENT PROCESS

Senate bill

No comparable provision.

House amendment

Section 203(a) of the Federal Water Pollution Control Act requires each applicant for a grant to submit to the Administrator for his approval plans, specifications and estimates for each proposed project for the construction of treatment works for which a grant application is made. The House amendment amends this provision to provide that before taking final action on such plans, specifications and estimates, the Administrator must first enter into an agreement with the applicant which establishes and specifies to the extent practicable which items of the proposed project are eligible for Federal payments under this section. Once this agreement has been entered into, the Administrator may not refuse to make payments for the Federal share of those reasonable costs of any item specified in the agreement which are incurred on the project.

The House amendment also provides that the approval of construction plans and specifications by the Administrator under Section 203(a) shall not include a determination or approval of the treatment work's unit processes, or the configuration of the treatment work's unit processes, which constitute the treatment technology. In addition, the Administrator is not to approve plans, specifications or estimates for a project unless the applicant certifies that the proposed unit processes and treatment technology are capable of meeting the effluent limitations for which they are designed.

Conference substitute

The conference substitute basically adopts the House language, but adds language which provides that the requirements of this section are only applicable to final action on plans, specifications, and estimates submitted sixty days after enactment of the Water Quality Act of 1986. In addition, the conference substitute deletes language specifying that approvals by the Administrator under this section shall not include a determination or approval of the treatment work's unit process or the configuration of the treatment work's unit process, which constitute the treatment technology. Also deleted is language prohibiting the Administrator from approving plans, specifications, and estimates under section 203 of the Act unless the applicant certifies the

ability of the process or technology to meet the applicable effluent limitations.

DESIGN-BUILD PROJECTS

Senate bill

Section 203 of the Act is amended to provide that communities applying for construction grant assistance may enter into an agreement with the Administrator to erect treatment works under alternate "design-build" grant management procedures. This alternate management procedure allows applicants to contract for both the design and construction of treatment works, thereby avoiding several costly review and bidding requirements.

The agreement between the applicant and Administrator provides for a specified Federal contribution, start and end dates for construction, effective project management procedures, and a bond to assure performance.

Design-build project management procedures are limited to those projects which have a total cost of less than $8 million and are specified, simple treatment systems (e.g., aerated lagoons). In addition, not more than 25 percent of a State grant allocation may be used under this alternate management procedure.

House amendment

The House amendment authorizes grants for turnkey provisions for construction of treatment works which have an estimated total cost of $8 million or less. E.P.A. and the applicant must enter into an agreement specifying maximum Federal contribution, completion dates, and the like. The Federal share is to be deposited into an interest-bearing account and earned interest is available for payments to the grantee. The House provision allows use of "turnkey" management for any type of treatment system.

CONFERENCE SUBSTITUTE

The conference substitute adopts a combination of Senate and House bills. The interest-bearing account provision of the House amendment is deleted. The House provision limiting use of more than 20 percent of the amount allotted to a State for grants under this subsection is adopted. And, the Senate provision limiting use of the design/build approach to specified, simple treatment systems is adopted.

The provision in the conference substitute provides that the agreement between the Administrator and applicant must include an amount agreed to as the maximum contribution to a project. This amount is to be based on a determination of the Federally eligible costs of the project at the applicable Federal share under section 202 of the Act and on a competitively bid document of basic design data and applicable standard construction specifications. Because design-build management is limited to specified, conventional treatment systems, the facility plan is expected to provide sufficient, basic information to assure that bids reflect comparable design and construction standards. The applicant, with the assistance of the State and the Administrator, may supplement the facility plan with additional basic design data and construction specifications prior to bidding if necessary.

It is expected that applicants will not need to hire professional services to upgrade a facility plan to a bid document. However, if the Administrator or State determines that additional professional services are needed in order to prepare a bid document, costs of such services are to be eligible under section 201(1) of this Act. The Administrator may decline to agree to an amount of Federal contribution and decline to enter an agreement under this section if he finds that the bid document is not adequate to assure that bids reflect comparable design and construction standards.

GRANT CONDITIONS—USER CHARGES ON LOW-INCOME RESIDENTIAL USERS

Senate bill

No comparable provision.

House amendment

The House amendment amends section 204(a)(1) of the Federal Water Pollution Control Act to require the Administrator, before approving sewage treatment construction grants for any project, to determine that either any required areawide waste treatment management plan under section 208 is being implemented for such area and the proposed treatment works are included in such plan or that reasonable progress toward implementation is being made.

It also amends section 204(a)(2) of the Act and requires similar conformance with plans and reports in section 303(e) and 305(b) of the Act.

These amendment made shall take effect two years after the date of enactment of this legislation.

Section 204(b)(1) of the Federal Water Pollution Control Act provides that, notwithstanding any other provisions of the Act, the Administrator shall not approve any grant for any treatment works unless he shall first have determined that the applicant has adopted or will adopt a system of charges to assure that each recipient of waste treatment services within the applicant's jurisdiction will pay its proportionate share of the costs of operation and maintenance of any waste treatment services provided by the applicant.

The House amendment amends this by providing that a system of user charges which imposes a lower charge for low-income residential users, as defined by the Administrator, shall be deemed to be a user charge system meeting the requirements of section 204, if the Administrator determines that the system was adopted after public notice and hearing. Any additional user charges required of other users of the waste treatment services resulting from application of this subsection are to be determined in accordance with the proportionality requirements of section 204.

Conference substitute

The conference substitute adopts the House provision. The inclusion of subsection (d), providing for an effective date beginning two years after the date of enactment for new provisions concerning areawide plans and continuing planning processes, is not intended to affect or override any related provision of this Act.

ALLOTMENT OF CONSTRUCTION GRANT FUNDS

Senate bill

The bill amends section 205(c) of the Act to establish an allotment formula for distributing construction grant funds and State revolving fund capitalization grants among States for the fiscal years 1986 through 1990. The formula in existing law expires with the fiscal year 1985 authorization. The allotment formula in the bill states as a 6-place decimal fraction the share of the total appropriation each State will receive in each of the fiscal years for which it is applicable. The first table in the bill contains the allotment share for each State for fiscal years 1986-1988. Table 2 is for fiscal years 1989-1990.

House amendment

The House amendment extends the existing allotment formula through fiscal year 1990.

Conference substitute

The conference substitute adopts a new formula for distributing construction grant funds and the State revolving loan fund capitalization grants among States for fiscal years 1987 through 1990. The allotment formula for fiscal year 1986 is the same as under current law.

RURAL SET-ASIDE

Senate bill

The Senate bill extended the rural set-aside of current laws.

House amendment

The House amendment amends section 205(h) of the Act which relates to alternatives to conventional sewage treatment works in rural areas by changing the four percent mandatory set-aside to provide that it shall be a minimum of four percent, but shall be increased to as much as seven and one-half percent at the request of the Governor. Also, the authorization of a discretionary set-aside for other states of up to four percent at the request of the Governor is changed to authorize a set-aside of up to seven and one-half percent.

Conference substitute

The conference agreement adopts the House amendment.

INNOVATIVE AND ALTERNATIVE PROJECTS

Senate bill

The bill amends section 205(i) of the Act to extend through fiscal year 1990 the requirement that a percentage of allotted funds be reserved to be used to increase the Federal share for innovative and alternative projects.

House amendment

The amendment amends section 205(i) to extend the set aside for innvative and alternative processes until 1990.

Conference substitute

The conference substitute combines the House and Senate provisions, including technical amendments included in the Senate provision.

REGIONAL ORGANIZATION FUNDING

Seante bill

No comparable provision.

House amendment

The House amendment contains a provision requiring States to allocate 50 percent of the funds received in each year pursuant to the provisions of section 205(j) of the Act and with respect to water quality planning for use by regional and interstate comprehensive public planning organizations. An exception to the requirements of the section is made if the Administrator, in consultation with the affected Governor, determines that such an allocation will not significantly assist in encouraging participation by such entities.

Conference substitute

The conference substitute adopts the House provision with modifications. The States are to allocate at least 40 percent of the 205(j) planning funds for use by regional comprehensive public planning organizations and appropriate interstate planning organizations. The Governor, after receiving

approval from the Administrator, may allocate a lesser amount in any fiscal year, but only where allocation of 40 percent will not result in significant participation by such entities in the water quality planning activities conducted pursuant to this Act.

This provision establishes a minimum allocation and the conferees encourage States to provide a larger percentage of funds to regional and interstate organizations where a higher allocation will encourage participation by such entities in water quality planning.

MARINE CSO'S AND ESTUARIES

Senate bill

The Senate bill amends section 205 of the Act to provide for reservation of not to exceed 1 percent of the construction grant funds for fiscal years 1986-1988 and 1½ percent for fiscal years 1989-1990.

Two-thirds of the reserve, or one percent of the construction grants appropriation, shall be available for marine CSO correction where lower levels of water quality exist in marine bays and estuaries as a result of discharges by marine CSO's. The remaining one third of the reserve, or one half of one percent of the construction grants appropriation, shall be made available to supplement the funding of the newly established National Estuary Program pursuant to section 320 of the Act. The total reserve authorized by this provision is subject to the two year period of availability for obligation as provided for in section 205(d).

House amendment

Amends section 201(g)(1) of the Federal Water Pollution Control Act by adding projects to address water quality problems due to impacts of discharges from combined storm water and sanitary sewer overflows to the list of categories which are eligible for Federal grant assistance.

Conference substitute

The conference substitute adopts the Senate provision, except that the reservation is 1% for fiscal years 1977-1978 and 1.5% for 1989-1990. The conference substitute also treats certain portions of tributaries draining into marine bays and estuaries as marine bays and estuaries.

CONSTRUCTION GRANT AUTHORIZATION

Senate bill

The bill amends section 207 of the Clean Water Act to authorize $2.4 billion annually for the Title II construction grants program for fiscal years 1986 through 1988, and not to exceed $1.2 billion annually for fiscal years 1989 and 1990.

The bill amends section 205(e) of the Clean Water Act (providing a minimum allotment of ½ percent to each State, but not more than ⅓ percent in the aggregate for the territories) by extending authorization dates through 1994.

House amendment

The House amendment extends the authorization level for the Construction Grants Program of $2.4 billion per fiscal year through fiscal year 1990 and extends the Act through 1990.

The House amendment adds fiscal years 1986 through 1990 to section 205(e) and changes the maximum amount available to Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the Trust Territories from one-third of one percent to two-thirds of one percent in order to better meet their water quality needs.

Conference substitute

The conference substitute is the same as the Senate bill for construction grants authorizations.

REPORT TO CONGRESS

Senate bill

The bill amends section 516 of the Act to require the Administrators to submit a report to Congress on the financial status and operations of the Water Pollution Control Revolving Funds.

House amendment

The House amendment contains a similar provision.

Conference substitute

The conference substitute adopts a comparable provision, which is included in the State Water Pollution Control Revolving Fund section.

STATE WATER POLLUTION CONTROL REVOLVING FUNDS

Senate bill

The bill adds a new title VI to the Clean Water Act to provide for the establishment of State-administered Water Pollution Control Revolving Funds (SRFs). The creation of SRFs through a program of capitalization grants to States will provide a feasible transition to State and local financing of municipal wastewater treatment facilities.

To complete the remaining core municipal wastewater treatment needs, funds must be dedicated as quickly as possible. This policy is implemented through a provision which requires that binding loan agreements for the use of Federal funds be completed within one year of receipt of such funds, and that the projects financed with such loans comply with the eligibility and other requirements that are applicable to grant-funding projects under title II. In addition to meeting title II eligibility requirements, a State must also commit to first using its revolving fund resources in financing the construction of municipal treatment works needed to meet the 1988 municipal compliance deadline.

The bill authorizes $8.4 billion in the period beginning fiscal year 1989 and ending fiscal year 1994 and provides that appropriations from the authorized amounts be allotted among the States in accordance with the same allocation formula that is used to allot title II construction grant funds. Funds allotted under a grant award in a given fiscal year must be made by the end of that fiscal year. Funds allotted to a State that have not been awarded by the end of the fiscal year that such funds became available will be reallotted among the States that have already established acceptable State Revolving Funds.

Under the Senate bill States are required to enter into agreements with the Administrator prior to receiving the award of a capitalization grant.

A State must establish (through statute or other legal mechanism creating a legal entity of the State with the powers and limitations prescribed in this bill) a revolving fund dedicated solely to such purposes. The State must also negotiate a schedule of payments as described above. Prior to receiving payments, a State must make a 15 percent matching contribution to the revolving funds. This section also enables a State to meet the 15 percent matching requirements by depositing State monies in the dedicated revolving fund during fiscal years prior to the fiscal year that Federal grant funds are received.

All funds available to the revolving fund must be committed in an expeditious and timely manner; funds provided by capitalization grants (or an amount equal to such funds), however, must be made available to loan recipients in binding loan agreements within one year of receipt of the Federal funds by the State Revolving Fund. Binding loan commitments entered into within 12 months of receipt of a Federal grant payment may also be greater than 100 percent of the amount of the Federal grant payment. Any treatment project that is financed with funds directly made available by capitalization grants, prior to fiscal year 1985, will have to meet the same requirements that the project would have had to have met if it had received a grant under Title II.

A State must further agree to first use funds available in the State Revolving Fund to assure maintenance of progress in completing municipal treatment works needed to comply with enforceable requirements of the Act, including the 1988 municipal compliance deadline.

The Senate bill provides that a State must establish a Water Pollution Control Revolving Fund, which must be administered by an instrumentality of the State, to be eligible for an award of a capitalization grant. The State must provide the SFR with powers and impose limitations on the Revolving Fund; some of the powers and limitations are specified in the remaining subsections of section 603.

The bill also provides that SRFs be maintained and credited with repayments so that the fund balance shall be available in perpetuity. The Revolving Fund is dedicated for only two purposes: one, to provide financial assistance for the construction of publicly owned treatment works as defined in Section 212(2) of the Act; and two, to provide financial assistance (except from funds made directly available to the SFR in the capitalization grant) for the implementation of projects and programs established under sections 319 (Nonpoint Source Pollution Control Program) and 320 (National Estuarine Program). In both cases, the financial assistance must be for capital projects that are capable of enabling the State to establish a revenue stream to support repayment of the financial assistance.

The State Revolving Fund may buy or refinance debt obligations of local communities which were incurred for construction of publicly owned treatment works after March 7, 1985. The purpose of this provision is to encourage municipalities to proceed with construction with their own means of interim financing in advance of availability of a loan from the revolving fund, by offering municipalities the prospect of project refinancing at reasonably better financial terms at a later date.

The bill requires fiscal control and accounting procedures be established for SFRs. The State is required to establish fiscal controls and procedures to assure proper accounting for payment periods, disbursements, and fund balances. All funds must be accounted for, including capitalization grants, State matching grant, and loan repayments. The Administrator shall conduct, or the State shall have an entity independent of the State conduct an audit, not less than annually, of the operations of each SRF.

The bill requires each State to prepare a plan for the intended uses of amounts available in the Revolving Fund. The intended use plan may be adopted from the priority

systems and lists developed under section 216 of the Act for construction grant projects. The State may also consider other information on the extent and nature of water pollution problems. The State must provide an opportunity for public comment on the use of the funds.

The bill requires the State to prepare a report to the Administrator describing how the State implemented its intended use plan prepared pursuant to subsection (c). This report is to be prepared annually and the first report must be provided in the first fiscal year after receipt of payments. The report shall include identification of loan recipients, amounts, and terms.

The bill requires the Administrator to conduct an annual review of the intended use plan and the annual report to determine whether the State is complying with the annual report to determine whether the State is complying with the requirements of this Title. Subsection (e) also requires that a State or loan recipient make records available to the Administrator, after reasonable notice, to help in making a determination.

The bill amends the Clean Water Act by adding a new subsection (m) to Section 205. This section would provide States with the option of using all or a portion of their funds available for obligation under Title II for capitalization grants for State Revolving Funds under Title VI.

The House amendment establishes a program for grants to states for establishment of water pollution control revolving funds.

Subsection (a) of new section 220 directs the Administrator to make a grant to each state for the purpose of establishing a Water Pollution Control Revolving Fund for providing assistance to municipalities and intermunicipal and interstate agencies for construction of treatment works as defined in section 212 of the Act which are publicly owned.

Before receiving a grant, the state must first deposit in the fund an amount equal to 20 percent of the amount allotted to the state for a fiscal year. In addition, the Governor may deposit not to exceed twenty percent of the amount allotted to the state under section 205 (construction grant funds), if the state has deposited from non-Federal funds an amount equal to twenty percent of the section 205 funds to be deposited.

Each state must submit annually to the administrator a certification that, upon completion of any project for treatment works for which financial assistance is made available under this section, discharges from such treatment works will meet all applicable requirements necessary to achieve applicable state and Federal water quality standards. The state must further certify that it will comply with all provisions of section 16.

A state may use amounts in the Revolving Fund only to make loans, loan guarantees, payments to reduce interest on loans and loan guarantees, bond interest subsidies, and bond guarantees to municipalities and intermunicipal and interstate agencies, or purchase of insurance for obligations. A state may also use the fund as security for revenue bonds issued to finance construction of treatment works.

Each state shall establish a Water Pollution Control Revolving Fund to provide assistance under this section. The state must deposit in the revolving fund any Federal funds allotted to the state under this section, any amounts received by the state for repayment of loans made by the state with amounts in the fund, any amounts required to be deposited in the fund state 20 percent share and up to 20 percent of construction grant funds and any additional funds which the state wishes to deposit in the fund.

A state may provide assistance under this section to a municipality or intermunicipal or interstate agency with respect to the non-Federal share of the costs of a project for which such municipality or agency is receiving assistance from the Administrator under any other section of Title II.

A state may provide assistance from a revolving fund to a municipality or intermunicipal or interstate agency for the non-Federal share of the costs of a project which is receiving assistance under the construction grants program.

A state may only make a loan from the revolving fund if the recipient establishes a dedicated source of revenue for repayment of the loan.

A state may provide financial assistance from the revolving fund only for projects which are on the state priority list. Assistance may be provided regardless of the rank of a project on the priority list.

Each state must annually make a full and complete report to the Administrator concerning the use of Federal funds made available under this section in such manner as the Administrator shall prescribe. Also, at least annually, the Administrator shall conduct, or require each state to have independently conducted, reviews and audits as may be deemed necessary and appropriate by the Administrator to carry our the objectives of this section. Audits of the use of Federal funds shall be conducted in accordance with the auditing procedures of the General Accounting Office.

The provisions of Title II of the Federal Water Pollution Control Act shall not apply to financial assistance under new section 220 except to the extent specifically provided in new section 220.

There is authorized to be appropriated to carry out this section not to exceed $600,000,000 per fiscal year for each of the fiscal years 1986 through 1990, $2,400,000,000 for fiscal year 1991. $1,800,000,000 for fiscal year 1992. $1,200,000,000 for fiscal year 1993, and $600,000,000 for fiscal year 1994. These funds are to be allotted by the administrator in accordance with the same table which provides for allotment of Construction Grant funds. Sums allotted to a state for a fiscal year shall remain available for a grant to such state for the fiscal year for which authorized and for the following two fiscal years as well. Any funds granted to a state for a fiscal year under this section which are not utilized by such state for any of the purposes of this section during such fiscal years shall be repaid to the Administrator for reallotment among the other states.

The conference substitute combines both House and Senate bills.

The provision provides that the Administrator and States may enter into capitalization grant agreements under this title. States must agree to accept payments under a schedule to be developed jointly with the Administrator, must agree to provide a 20% match of Federal funds, and must agree to make binding commitments for assistance in an amount equal to 120% of the amount of the grant payment within one year. Monies contributed by a State match Federal capitalization grants under section 602(b)(3) are to be cash and not in-kind.

The schedule under which payments are to be made by the Administrator to the State shall be developed jointly by the State and the Administrator. Such schedule shall be based on the State intended use plan and shall provide that payments be made as expeditiously as possible, consistent with such plan. Payments to a State must me made not later than the earlier of eight quarters after the date funds were obliged by the State or 12 quarters after the date such funds were alloted to the State.

In addition, the State must agree to assure, as part of the intended use plan submitted annually, that all Federal and State funds provided to the SRF will be committed in an expeditious and timely manner. This provision reinforces the requirement that States make binding commitments for funds within one year of any given payment to the fund.

Section 602(b)(5) refers to all Federal funds, in the form of capitalization grants, and all other funds in the SRF as a result of those capitalization grants, including repayment of loans originating from those grants and State funds contributed as the required match for those grants, and funds deposited in the fund under section 205(m). The State must use these funds first to assure that treatment works maintain progress toward compliance with the enforceable deadlines, goals and requirements of this Act, including the municipal compliance deadline of July 1, 1988, or are on enforceable schedules for compliance after that date.

Progress toward compliance with enforceable deadlines, goals and requirements of the Act, in the case of treatment works that are not voluntarily on a schedule to achieve compliance, may be assured through a funding commitment or through establishment of an enforceable compliance schedule. Thus, the requirement of section 602(b)(5) is met if treatment works in a State are on an enforceable schedule to achieve compliance with uniform secondary treatment requirements of the Act, whether or not there is a commitment to fund such treatment works from a State revolving loan fund or with a grant under Title II of this Act. Governors of each State shall make the determination of progress toward compliance required under this subsection and the Administrator shall oversee such determinations.

Once a State has met the requirement of paragraph (B), funds from the SRF may be used for any other treatment works as defined by section 212 of the Act (subject to the restrictions of section 602(b)(6), programs and projects identified under the Nonpoint Source Pollution Control Program (section 319), or programs and projects identified under the National Estuaries Program (section 320). This provision is intended to allow States the flexibility to utilize funds from the SRF to support a variety of measures that the State determines are needed to achieve water quality goals.

Further, a State must demonstrate that any treatment works which is constructed in whole or in part prior to fiscal year 1995 with funds directly made available by capitalization grants under this title or section 205 (m), will meet the requirements of the sections 201(b), 201(g)(1), 201(g)(2), 201(g)(3), 201(g)(5), 201(g)(6), 201(n)(1), 201(o), 204(a)(1), 204(a)(2), 204(b)(1), 204(d)(2), 211, 218, 511(c)(1) and 513. This restriction on the use of Federal capitalization grant funds does not apply to funds contributed by the State in accord with section 602(b)(3), monies repaid to the fund, or other monies. State Governors shall assure that the requirements of this subsection are met.

The restrictions on the use of capitalization grant funds used directly to support treatment works are intended to assure that Federal funds are used in an effective and efficient manner. However, nothing in the conference substitute limits or otherwise affects the authority a Governor has by virtue of section 201(g)(1) of the Act to reserve 20 percent of the State's allotment for otherwise ineligible assistance.

Section 201(b) requires that projects apply best practicable waste treatment technology.

Section 201(g)(1) limits assistance to projects for secondary treatment or more stringent treatment, or any cost effective alternative thereto, new interceptors and appurtenances, and infiltration-in-flow correction. This subsection also provides that State Governors may reserve 20 percent of a State's allotment for projects which meet the definition of treatment works in section 212(2) but are otherwise not eligible for assistance under this subsection. This Governor's reserve is intended to apply to funds made available under this title.

Section 201(g)(2) requires that alternative waste treatment techniques be considered in project design.

Section 201(g)(3) requires the applicant to show that the related sewer collection system is not subject to excessive infiltration.

Section 201(g)(5) requires that applicants study innovative and alternative treatment technologies and take into account opportunities to make more efficient use of energy and resources.

Section 201(g)(6) requires that the applicant analyze the potential recreation and open space opportunities in the planning of the proposed facility.

Section 201(n)(1) provides that funds under section 205 may be used to address water quality problems due to discharges of combined stormwater and sanitary sewer overflows, which are not otherwise eligible, if such discharges are a major priority in a State. This provision is intended to apply to use of funds under title VI as well as section 205.

Section 201(o) calls on the Administrator to encourage and assist communities in development of capital financing plans.

Section 201(a) (1) and (2) require that treatment works projects be included in plans developed under sections 208 and 303(e).

Section 204(b)(1) requires communities to develop user charge systems and to have the legal, institutional, managerial, and financial capability to construct, operate and maintain the treatment works.

Section 204(d)(2) requires that, one year after the date of construction, the owner/operator of the treatment works must certify that the facility meets design specifications and effluent limitations included in its permit.

Section 211 provides that collectors are not eligible unless the collector is needed to assure the total integrity of the treatment works or that adequate capacity exists at the facility.

Section 218 assures that treatment systems are cost effective and requires that projects of over $10 million include a value-engineering review.

Section 511(c)(1) applies the National Environmental Policy Act to treatment works projects.

Section 513 applies Davis-Bacon labor wage provisions to treatment works construction.

As noted above, the fund may be used to assist publicly owned treatment works as defined by section 212 of the act, the development and implementation of a nonpoint source management program established under section 319 and development and implementation of an estuary program under section 320. This provision is intended to provide a basis for funding of projects to control nonpoint pollution and pollution to estuaries where such projects are conducted by municipalities, a State, other public organizations, or individual. All fund management provisions of this title apply to such projects.

The definition of projects eligible for funding under the loan program includes publicly owned treatment works as defined by section 212 of the Act. This definition includes planning and design as defined in section 212(1), treatment works as defined in section 212(2) and replacement as defined in section 212(3). Each of these aspects of treatment works is eligible for assistance under this title.

Some municipalities have developed, or may develop in the future, innovative financing arrangements involving private ownership and operation of portions of municipal sewage treatment systems. It is not the intent of this section to prohibit or discourage States from using their revolving loan funds to support the publicly owned portion of such treatment systems.

Funds under this title may be used to make loans as provided under section 603(d)(1), but are not to be used to provide direct grants. If as a result of audits under this section, the Administrator finds a consistent and substantial failure to repay loans, he may take corrective action as provided under this title.

Section 603(d)(2) provides that loan funds may be used to refinance debt obligations of municipalities for eligible projects, where such obligations were incurred after March 7, 1985.

Section 603(h) limits the authority of section 603(d)(2) by providing that funds may not be used to make direct loans to support the non-federal share of a project receiving assistance under title II of this Act. This limitation on direct loan assistance does not include ancillary assistance to the municipality which results in a lowering of costs of the obligation (e.g. guarantee of the local share obligation, insurance of the obligation, etc.). However, such indirect assistance to support the costs of the non-Federal share shall only be available to municipalities which face severe financial constraints, as determined by the State Governor.

This section provides that wastewater treatment projects, but not other eligible projects, assisted with funds in the loan fund are required to be on the State priority list. Such assistance may be provided without regard to rank of the project on the list.

The provision provides for the allotment of certain funds to states, reservation of funds for planning, and the reallotment of unobligated funds. Funds reserved for water quality management planning under this provision are to be used by whichever agency or agencies in the State conduct environmental programs, rather than an agency established to manage the financing of projects with funds provided under this title.

The provision contains requirements for audits, fiscal controls, and corrective action by the Administrator where needed.

Authorizations are provided as in the Senate bill. In addition, the conference substitute allows transfer of funds under title II to a loan fund established under this title. Such transfers may not exceed 50% of grant funds in FY 1987 and 75% of grant funds in 1988. Such title II funds are to be treated as capitalization grants when transferred to the fund.

The provision provides for reports to Congress on the progress and status of State loan funds.

Funds available to States under section 205(g) for the management of construction grant programs under title II may be used to assist the development of revolving loan funds under this title.

EMPLOYMENT PROJECTS

Senate bill

No comparable provision.

House amendment

The House amendment provides that the Administrator shall make a grant of $3,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California, for fiscal year 1986 to the city of Avalon, California for improvements to the publicly owned treatment works of such city.

Subsection (b) provides that the Administrator shall make grants from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of Pennsylvania for fiscal year 1986—

(1) to Walker Township, Pennsylvania, for developing a collector system and connecting its wastewater treatment system into the Huntingdon Borough, Pennsylvania, sewage treatment plant, and

(2) to Smithfield Township, Pennsylvania, for rehabilitating and extending its collector system.

The House amendment provides that notwithstanding section 201(g)(1) of the Federal Water Pollution Control Act or any other provision of law, the Administrator shall make a grant of $250,000 fron funds allotted under section 205 of such Act to the State of Kentucky for fiscal year 1986 to the city of Taylor Mill, Kentucky, for the repair and reconstruction, as necessary, of the publicly owned treatment works of such city.

The House amendment provides that the Administrator shall make a grant of $27,000,000 from funds allotted under section 205 of the Federal Water Pollution Control Act to the State of California for fiscal years beginning after September 30, 1985, to the city of Watsonsville, California, for improvements to the wastewater treatment and disposal facilities of such city.

The House amendment directs the Administrator to make a grant from funds allotted to the State of New Jersey to the Wanaque Valley Regional Sewerage Authority for the construction of treatment works with a total capacity of 1,050,000 gallons per day.

The House amendment provides for a grant to the village of Lena, IL, from funds allotted to Illinois, for the construction of a replacement moving bed filter press for the city's treatment works.

The House amendment directs the Commonwealth of Pennsylvania, from the sums allocated to it under this Act, give first priority to the Wyoming Valley Sanitary Authority Secondary Treatment project mandated under federal court order, regardless of the date of start of construction made pursuant to the court order.

Conference substitute

The conference agreement adopts the House amendment relating to Avalon, California; adopts the House amendment, as

modified, relating to Walker and Smithfield Townships, Pennsylvania; adopts the House amendment relating to Taylor Mill, Kentucky; deletes the House amendment relating to Watsonville, California; adopts the House amendment, as modified, relating to Nevada County, California; adopts the House amendment, as modified, relating to Wanaque, New Jersey; adopts the House amendment relating to Lena, Illinois; and, adopts the House amendment relating to the Wyoming Valley Sanitary Authority Secondary Treatment project, modified to require a funding priority, and modified to include funding priority for the Altoona, Pennsylvania, wastewater treatment project.

The Federal and non-Federal shares for the Avalon treatment works will be determined in accordance with the provisions of section 202(a)(1) of the Act.

CHICAGO TUNNEL AND RESERVOIR PROJECT

Senate bill

The Senate bill provides that the Chicago tunnel and reservoir project may receive grants without regard to the allocation limitation, if the Administrator determines that such project meets the cost-effectiveness requirements of sections 217 and 218 without any redesign or reconstruction, and the governor of the affected State demonstrates to the satisfaction of the Administrator the water quality benefits of such project.

House amendment

No comparable provision.

Conference substitute

The conference substitute includes language consistent with the Senate bill but as a free standing provision, rather than as an amendment to the Federal Water Pollution Control Act.

HAMPTON, NH AD VALOREM TAX AMENDMENT

Senate bill

This section permits the town of Hampton, New Hampshire, to continue using its ad valorem tax user charge system for collecting the costs of operation and maintenance of its sewage treatment works. Previously, Hampton had been unable to submit its ad valorem tax system to the Environmental Protection Agency for review and approval because of a disagreement over whether the tax system was dedicated to this purpose as of December 27, 1977.

House amendment

No comparable provision.

Conference substitute

The conference substitute adopts the Senate provision as modified to include the city of Nashua, New Hampshire.

COMPLIANCE DATES

Senate bill

The bill extends deadlines for compliance with several technology-based requirements of existing law. Section 301(b)(2)(C) is amended to require compliance with best available technology (BAT) effluent limitations for toxic pollutants as expeditiously as practicable but not later than three years after promulgation of the effluent limitations, but in no case later than July 1, 1988.

Under section 301(b)(2)(E) as amended, best conventional pollutant control technology (BCT) effluent limitations for conventional pollutants must also be complied with by those deadlines. Compliance with BAT effluent limitations for nonconventional, nontoxic pollutants under section 301(b)(2)(F) as amended is required not later than three years after such limitations are promulgated but in no case later than July 1, 1988.

A new paragraph (3) is added to section 301(b), providing that best practicable control technology (BPT) effluent limitations promulgated after January 1, 1982, which require a level of control substantially greater or based on fundamentally different control technology than limitations in the permits for such industrial category issued before that date, shall be complied with as expeditiously as practicable but not later than three years after promulgation of the effluent limitations but in no case later than July 1, 1988.

New section 302(b)(3)(B) provides that effluent limitations established in permits issued after enactment of these amendments on the basis of best engineering judgment or best professional judgment, in lieu of effluent guidelines for BPT, BAT, or BCT for toxic conventional or nonconventional pollutants, shall be complied with as expeditiously as practicable but no later than three years after such limitations are established in the permit (and in no case later than July 1, 1988). These extensions only affect deadlines for technology-based effluent limitations for direct dischargers. They do not affect pretreatment compliance dates.

House amendment

The amendment extends the compliance dates for achievement of best available technology and best conventional technology.

Subsection (a) of section 4 extends the compliance date for all toxic pollutants referred to in Table 1 of Committee Print 95-30 of the House Committee on Public Works and Transportation (the priority pollutants). Compliance is to be as expeditiously as possible, but in no case later than three years and six months after the date such effluent limitations are established.

The amendment extends the compliance date for all other toxic pollutants which may be listed under Section 307(a). Compliance is to be as expeditiously as possible, but in no case later than three years and six months after the date of establishment of any applicable effluent limitations.

The amendment extends the compliance date for application of best conventional technology (for conventional pollutants—biological oxygen demand, fecal coliform, suspended solids and pH). Compliance is to be as expeditiously as possible, but in no case later than three years and six months after the establishment of applicable effluent limitations.

The amendment extends the requirement for best available technology for all other pollutants. Compliance is to be as expeditiously as possible, but in no case later than three years and six months after the date the effluent limitations are established.

The amendment requires the Administrator of the Environmental Protection Agency to promulgate final regulations establishing effluent limitations for direct dischargers and limitations requiring pretreatment for all of the toxic pollutants referred to in Table I of Committee Print 95-30 in accordance with the following schedule:

Foundries	June 30, 1985.
Nonferrous metals forming	June 30, 1985.
Organic chemicals and plastics and synthetic fibers.	March 31, 1986.
Pesticides	August 31, 1985.
Nonferrous metals (phase II).	July 31, 1985.

Conference substitute

The Conference substitute establishes compliance deadlines for all technology-based requirements specified in both the House and Senate bills. These include compliance deadlines for effluent limitations applicable to priority toxic pollutants under section 301(b)(2)(C), other toxic pollutants under section 301(b)(2)(D), conventional pollutants under section 301(b)(2)(E), and non-conventional pollutants under section 301(b)(2)(F), as well as for best practicable control technology and best professional judgment effluent limitations established under section 301(b)(1)(A)(i) or on the basis of section 402(a)(1), respectively. The deadline established in each case is as expeditiously as practicable but in no case later than three years after the date the requirement is promulgated or established, and in no case later than March 31, 1989. In addition, the Conference substitute adopts modified House language directing the Administrator to establish effluent limitations by December 31, 1986, for toxic pollutants discharged from the two remaining categories of industrial dischargers for which no such limitations have been established.

With respect to the establishment of an outside date of March 31, 1989, for compliance with technology based requirements, the conferees note that prompt promulgation of the relevant effluent limitations will be essential to allow dischargers sufficient time to come into compliance. Therefore, the conferees direct that the Administrator promulgate such limitations as expeditiously as possible.

If dischargers in an entire category are unable to meet the March 31, 1989, deadline provided in the conference substitute as a result of the Administrator's failure to promulgate effluent limitations in sufficient time to allow for compliance by such date, noncompliance resulting from the Administrator's delay can be dealt with under EPA's current post-1984 deadline enforcement policy. That policy calls for the Agency, at the same time a permit containing the statutory deadline is issued, to issue an administrative order to the non-complying company which specifies a schedule of compliance as expeditiously as practicable, but not later than three years after permit issuance. Permits issued on the basis of best professional judgment, in advance of promulgation of effluent guidelines, will be able to comply with the statutory deadline, and EPA and the States should consider the use of such permits if effluent guidelines are delayed.

MODIFICATION FOR NONCONVENTIONAL POLLUTANTS

Senate bill

The bill amends section 301(g) of the Act to restrict the circumstances under which a modification from best available technology standards (BAT) can be granted for nonconventional pollutants.

The amendment to section 301(g) allows modifications to BAT guidelines only for five well studied nonconventional pollutants—ammonia, chlorine, color, iron and total phenols (4AAP). EPA has developed adequate information on these pollutants as a result of currently pending applications for modifications from the iron and steel and steam electric industries.

The Administrator may evaluate additional nonconventional pollutants and recommend to Congress that they are eligible for inclusion under section 301(g), but any such recommendation must be enacted by Congress to become effective.

The provision also limits to one year the time in which the Administrator can make a determination on a request for a modification under section 301(g)(4). The discharger must, in its application, make an affirmative showing that the discharge will meet the conditions in section 301(g)(4). The discharger must, in its application, make an affirmative showing that the discharge will meet the conditions in section 301(g)(A), (B) and (C). For the purposes of this provision, final Agency action means the administrative decision document or final permit issued by EPA, following public notice and comment as appropriate.

Section 301(g)(5) clarifies that this amendment applied to all modification requests under this subsection which are pending upon the date of enactment of the Clean Water Act Amendments of 1985. Specifically, for such pending requests, this provision is intended to restrict EPA's consideration to requests for modification to only those five nonconventional pollutants listed in section 301(g)(1) as amended. Pending requests for modification for other nonconventional pollutants cannot be granted and therefore will not be acted upon. For completed applications pending at the time of enactment of the Clean Water Act Amendments of 1985, EPA must take final Agency action within one year of the date of submission of the completed application to EPA, or under section 301(g)(4) the application will be deemed to be denied. This restriction applies specifically to completed applications as defined in EPA's regulations. Applicants with pending initial applications filed in accordance with section 301(j) may file completed application within a reasonable time after enactment.

The bill amends section 301(j) of the Act to forbid the stay of any requirements or limitations for any pollutant other than for the pollutants for which a section 301(j) modification may be sought.

House amendment

The House amendment amends section 301(g) of the act which provides for variances from effluent limitations for conventional pollutants. The amendment provides that variances may be sought only for ammonia, chlorine, color, iron and phenols. The Administrator may add pollutants to this list of those for which variances may be sought and may also remove pollutants from this list.

Conference substitute

NON-CONVENTIONAL POLLUTANTS

The Conference substitute specifies five pollutants for which modifications under section 301(g) may be sought. It provides that the Administrator may list additional pollutants in response to a petition. To apply to a particular industrial category, this listing must occur prior to the deadline for submitting applications for modifications, which is 270 days after promulgation of an applicable effluent limitation guideline. A petitioner may file an application for modification simultaneously with a petition for listing a pollutant under section 301(g).

Before listing a pollutant under section 301(g), the Administrator first must determine whether the pollutant meets the criteria for listing as a toxic pollutant under section 307(a)(1), as that term is defined in section 502(13). If the Administrator determines that the pollutant does meet these criteria, then the Administrator is required to list the pollutant under section 307(a)(1). If the Administrator determines that the pollutant does not meet these criteria, and the Administrator determines that adequate methods and sufficient data about the pollutant are available to enable the Administrator to make decisions respecting modifications under subsection (g)(2), then he shall list it under section 301(g). The burden of proof respecting submission of these data and for showing the adequacy of the data and of test methods is upon the person submitting the application for listing.

An application for listing a pollutant under section 301(g) or for a modification of permit respecting such pollutant does not stay compliance deadline requirements for any pollutant other than that for which the modification is being sought. The Administrator is required to approve or disapprove an application for a modification within one year of the date of application or, in a case in which a petition for listing the pollutant under section 301(g) is approved, within one year of such approval.

If an application for modification under section 301(g) is disapproved, the applicant must meet compliance deadlines for all applicable effluent limitations, including those for the pollutant subject to the application. If such an application is approved, the applicable compliance date with respect to the pollutant for which the modification is sought will be determined under section 301(b) and section 309.

DISCHARGE INTO MARINE WATERS

Senate bill

The bill establishes restrictive conditions on the qualifications of applicants for a section 301(h) modification and the ocean water into which they discharge. In order to apply for a section 301(h) ocean discharge modification, a municipal treatment facility must be in compliance with applicable pretreatment regulations. In the absence of Federal categorical pretreatment standards, treatment works serving a population of 5,000 or more persons must be enforcing a comparable pretreatment program to assure the control of toxic pollutants at the time of application.

The bill clarifies that marine waters receiving discharges must exhibit characteristics which assure that the diluting water does not contain significant amounts of effluents previously discharged from the POTW.

Another amendment to section 301(h) deals with discharges into stressed waters. The amendment provides that a section 301(h) modification may not be issued for esturaine waters if, at the time of application, the waters do not support a balanced indigenous population or allow recreational activities, or exhibit water quality below the water quality standards adopted to protect public water supplies, wildlife, or recreational activities. The prohibition applies regardless of any causal relationship between such characteristics and the applicant's discharge.

Section 310(j) is amended to allow a period of thirty days after enactment for a publicly owned treatment works with an existing contract to discharge its sewage into another treatment works which has applied for a section 301(h) modification, in which to apply for such a modification in its own right.

House amendment

The amendment amends section 301(h) of the Act with respect to discharges into marine waters. The amendment provides that in order to obtain a permit for less than secondary treatment where the effluent will be discharged into the ocean the applicant must have in effect a pretreatment program and must provide at least primary treatment. Also, section 307(b)(1) relating to pretreatment removal credits is amended to provide that these credits must be given where effluent limitations will not be violated, and will be no interference with the method of disposal of the sludge and the revised pretreatment standards will not interfere with the operations of a treatment works. The other provisions of section 307(b)(1) relating to effluent limitation and determination of removal by the treatment works remain in effect.

This amendment also prohibits the discharge of sewage treatment effluent into estuaries.

The amendment relating to applications for ocean discharge modifications provides that a publicly-owned treatment works which has a contractual arrangement to use a portion of the capacity of an ocean outfall operated by another treatment works which has applied for a modification may also apply for a modification in its own right.

Conference substitute

The conference substitute adopts a combination of the House and Senate provisions. The House amendment concerning consideration of other sources of pollutants, and limitations on scope of monitoring, is adopted. The limitation on monitoring is limited to modifications not tentatively or finally approved as of enactment. The House provision concerning urban areas pretreatment programs is adopted and modified by including the Senate language requiring sources to be in compliance with applicable pretreatment requirements, and requiring the applicant to enforce such requirements. House and Senate language is combined to provide that an applicant must be discharging effluent which has received at least primary or equivalent treatment and meets section 304(a)(1) criteria after initial mixing. The phrase "initial mixing" shall not be interpreted expansively. The substitute adopts Senate language regarding the definition of primary or equivalent treatment and on limitations on issuance of permits. The conference substitute prohibits issuing any modification for the discharge of any pollutant into the New York Bight Apex.

Section 301(h) is amended by the conference substitute to provide that in order for a permit to be issued, the marine waters must exhibit characteristics assuring that water providing dilution does not contain significant amounts of previously discharged effluent from the treatment works from which the discharge is made. The reference to water supplying dilution does not include those waters immediately surrounding the point at which the effluent is discharged in which initial mixing occurs.

With respect to the amendments to Section 301(j) of the Act, the Conference substitute adopts the Senate language.

FILING DEADLINE FOR TREATMENT WORKS MODIFICATION

Senate bill

No comparable provision.

House amendment

The provision amends section 301(i) by removing the filing deadline for applications for extensions of the date by which secondary treatment must be achieved and provides that the extension of a filing date does not apply to treatment works which are subject to an administrative or judicial compliance schedule.

Conference substitute

In lieu of the House language, the conference substitute extends the filing deadline for such applications to 180 days after enactment of the Water Quality Act of 1986. The conference substitute adopts language of the House bill limiting the application of the extension to treatment works not subject to a court order or final administrative order issued by EPA or a State. The Administrator should use the discretion provided under this subsection to assure that granting such request would not upset an existing compliance schedule or delay compliance with the July 1, 1988, compliance deadline. This amendment should be read to be consistent with the EPA's National Municipal Policy.

INNOVATIVE TECHNOLOGY COMPLIANCE DEADLINES FOR DIRECT DISCHARGERS

Senate bill

No comparable provision.

House amendment

Section 301(k) of the Act provides that, in the case of any facility which proposes to comply with the requirements of best available technology by replacing existing production capacity with an innovative production process, which will result in an effluent reduction significantly greater than that required by the otherwise applicable effluent limitation or with the installation of an innovative control technique that has a substantial likelihood for enabling the facility to comply with the applicable effluent limitation by achieving a significantly greater effluent reduction than that required by the applicable limitation, the Administrator may establish a compliance date no later than July 1, 1987, three years later than the final compliance date otherwise provided in the Act. The House bill amends this provision, changing the compliance date from July 1, 1987, to a date two years after the date for compliance with the effluent limitation which is otherwise applicable.

The House bill also amends section 301(k) to permit the same extension for conventional pollutants.

Conference substitute

The conference substitute adopts the House provision.

The conferees intend that the term "industry-wide application" means that application of the innovative system, production process, or control technique is technically feasible at a significant portion of the facilities in an industrial category or subcategory and will be made commercially available by the applicant, unless the applicant is the only facility in the subcategory.

FUNDAMENTALLY DIFFERENT FACTORS

Senate bill

The Senate bill authorizes the Administrator to grant fundamentally different factors (FDF) modifications and defines the conditions under which the Administrator may do so.

The amendment specifies four criteria that must be demonstrated by the applicant to the satisfaction of the Administrator, before alternative requirements can be established.

First, a facility must be fundamentally different with respect to at least one factor, other than cost, specified in section 304(b), 304(g), or 307(b) and considered by the Administrator in establishing the specific national effluent limitations guidelines and standards of concern to the facility. Cost may not be a factor upon which relief may be granted.

The second criteria requires that applications for an FDF modification must be based solely on information and supporting data which have been submitted to the Administrator during the rulemaking process and which specifically raise the factors that are fundamentally different for the facility.

Third, the amendment specifies that the alternative requirement imposed on the applicant can be no less stringent than justified by the applicant's fundamental difference from the rest of the category or subcategory with respect to the statutory factors (other than cost) specified in section 304(b) or (g) of the Act.

Fourth, if relief is granted, any alternative requirement shall not result in any nonwater quality environmental impact markedly more adverse than the impact considered by the Administrator in establishing the applicable national effluent limitations guidelines and standards.

The bill contains several additional restrictions on EPA's authority to grant modifications in order to avoid the delays in "fundamentally different factors" proceedings. An applicant for an alternative requirement must submit a complete application to the Administrator not later than 120 days after publication of the final effluent limitation guideline or categorical pretreatment standard in the Federal Register. The Administrator may not waive this deadline or extend it for submission of additional data.

If EPA amends a guideline or standard, an applicant may submit an FDF variance request within 120 days of publication of the final revision in the Federal Register. In such a case, the revision must specifically affect the discharge limitations or standards applicable to the facility and must be the limitations or standards from which the applicant is seeking relief under this subsection.

Section 301(n)(2) requires the Administrator to deny any application that is not complete, without providing for an opportunity for reapplication. The applicant must submit a complete application within the 120 day period.

Section 301(n)(2)(B) requires that final EPA action be taken within 240 days after submission of an application to a State or to EPA, or the application will be deemed to be denied.

Pending applications on the date of enactment shall be deemed to have been submitted to the Administrator 30 days after enactment of this amendment. This provision sets in motion the Administrator's duty to act on the application within 240 days. Applications filed after enactment shall not be deemed complete unless accompanied by the required application fee.

Section 301(n)(3) provides that an application for alternative requirements under section 301(n) shall not stay the facility's obligation to comply with the effluent limitations guideline or standard which is the subject of the application.

House amendment

The House amendment adds a new subsection and to section 301 of the Federal Water Pollution Control Act. Section 301 requires compliance with effluent limitations based on best practical best available, and best conventional technologies.

The new subsection provides that upon application of any person who provided or did not have a reasonable opportunity to provide information to the Administrator in the rulemaking to establish or revise any effluent limitation under section 301 or section 304 of the Act, the Administrator may grant a variance from the application of the limitation with respect to the discharge by the person of any pollutant if the Administrator determines that factors relating to the facilities, equipment, and processes of the person are fundamentally different than the factors considered in the establishment of the effluent limitations.

An application for a variance must be made within 180 days after the establishment or revision of an effluent limitation for which a variance is sought. If the application is denied, the applicant must comply with the original compliance date for the limitation. E.P.A. is directed to take prompt action in making a decision, and is directed to do so within 180 days, to the maximum extent practicable.

The House amendment applies only to effluent limitations established or revised after the date of enactment. The granting of variances from effluent limitations established or revised prior to the date of enactment is to be in accordance with procedures established before the date of enactment. Also, the amendment shall not affect any procedures or requirements in effect before the date of the enactment with respect to the granting of variances from the application of effluent limitations established or revised on or before the date of the enactment with respect to the granting of variances from the application of effluent limitations established or revised on or before the date of enactment in accordance with any provision of the Federal Water Pollution Control Act.

Conference substitute

The conference substitute limits the authority of the EPA Administrator to modify a minimum, national treatment requirement for an indivdual facility within an industry if the facility is found to be fundamentally different from other facilities within the industry on the basis of certain factors considered by the Administrator in establishing the guidelines or standards applicable to the facility's industrial category.

This new provision provides a clearly defined and limited authority in the statute for modification of treatment requirements for individual facilities. The provision is intended to assist the Administrator in addressing unique circumstances and other variations in development and effective administration of national effluent guidelines and standards.

This section will require the EPA Administrator to make difficult decisions with regard to the magnitude of differences among similar facilities within an industry. In exercising this judgment, the Administrator should place high priority on the principle that all similarly situated facilities within an industrial category or subcategory are to meet national minimum treatment requirements. The authority of this section is intended only to provide the Administrator with the authority needed to implement this aspect of the statute effectively and should not be used to generally relax or retreat from national minimum requirements for an industry.

The conference substitute places several important new limits on the Administrator's fundamentally different factors authority.

The new provison provides that a facility may be found to be fundamentally different based on factors identified in sections 304(b)(2) and (g). These factors include the age of equipment and facilities, the process employed, the engineering aspects of the

types of control techniques, process changes, and other factors deemed appropriate by the Administrator.

The bill specifically excludes consideration of costs, independent of other eligible factors, as a basis for establishing a fundamental difference with regard to an individual facility.

This new subsection is not intended to prohibit the EPA from modifying treatment requirements in a case where a fundamental difference in an aspect of a facility which is eligible for consideration (e.g., age of facility, process employed) would result in a reduction in costs to a facility. When such an eligible factor is under review, EPA may consider the costs specifically associated with that factor, but must be able to justify a finding of a fundamental difference on the basis of eligible factors. EPA shall not replace a substantive and technical assessment of eligible factors with a shortened cost test designed to indicate a fundamental difference (e.g., by suggesting that when the costs of an eligible factor at an individual facility are twice the costs at average facilities, the factor is fundamentally different).

The reported bill specifies several procedural requirements and other limitations governing applications for modifications under this section.

Subsection (n)(1)(B) provides that an application be based solely on information and supporting data submitted to the Administrator during the development or revision of a guideline or on information the applicant did not have a reasonable opportunity to submit during the rulemaking. The lack of a reasonable opportunity to submit information is based on a lack of actual or constructive notice of the rulemaking or on the development of new circumstances in the field facing specific facilities. This provision will assure that effluent limitations and standards are as comprehensive as possible, and thereby reduce the need for applications under this subsection. This provision will also discourage withholding of information during the rulemaking process for subsequent use in an application for treatment modification under this subsection.

The conferees recognize that, where the record is already closed and an applicant has new information to present bearing on the guideline or standard, the applicant continues to have the right to petition the Administrator to reopen the rulemaking and record and consider creation of a subcategory. The Administrator's disposition of such a petition is subject to judicial review under section 509(b) of the Act.

Subsection (n)(1)(C) provides that the alternative requirement imposed on the applicant can be no less stringent than justified by the applicant's fundamental difference from the rest of the category or subcategory with respect to eligible factors.

Subsection (n)(1)(D) provides that any alternative requirement shall not result in a nonwater quality environmental impact which is markedly more adverse than the impact considered by the Administrator.

Subsection (n)(2) requires that an applicant under this section shall be submitted within 180 days after the publication of the initial guideline or standard. Subsection (n)(3) provides that an application shall be approved or denied by final Agency action within 180 days after submission. For the purposes of this section, final Agency action means the administrative decision issued by the EPA, following public notice and comment, as appropriate and including a statement of the basis for the decision. Subsection (n)(4) states that the Administrator may allow the applicant to submit additional information and supporting data with regard to an application prior to the 180-day decision deadline.

In the case of guidelines for the oil and gas extraction industry and with respect to three cane sugar processing mills along the Hamakua Coast of Hawaii, the EPA may temporarily withdraw the applicable guideline at any time, issue a Best Practical Judgment permit to affected facilities, and then reissue the guideline with an appropriate subcategory.

Subsection (n)(5) provides that an application for an alternative requirement based on fundamentally different factors which is pending on the date of enactment may be amended by the applicant within 180 days after such date of enactment.

Section 301(n)(6) provides that an application for an alternative requirement under this section shall not stay the facility's obligation to comply with the effluent limitation guideline or standard which is the subject of the application. If an application for an alternative requirement is denied by the Administrator, the applicant must comply with the limitation or standard as established and the original deadline. The compliance date for a requirement for which an alternative is granted is to be determined under sections 301(b) and 309.

Section 301(n)(8) of the conference substitute also provides that the Administrator shall provide to the Congress a report on the status of applications for modifications under sections 301, 304 and 307(b) of the Act every six months after the date of enactment.

The conference substitute shall apply to primary and secondary national effluent limitations and categorical pretreatment standards for industrial categories currently identified, such categories as may be identified in the future, and to any revisions of guidelines or standards for such categories.

The owner or operator of a facility seeking a fundamentally different factor modification has the burden of proving to the satisfaction of the Administrator that the facility is eligible for an alternative requirement under this subsection.

Under the conference substitute, section 301(l) of the Act, which excludes toxic pollutants from modifications under this Act, is amended to allow modifications only under this section for toxic pollutants. This amendment to section 301(l) does not in any way weaken the application of the section to modifications of the Act other than provided under section 301(n).

The Administrator shall obtain the concurrence of a State before approving any alternative requirements under this subsection.

All of these provisions are to be self-implementing and are to take effect upon enactment of the Water Quality Act of 1986. The Administrator is encouraged to amend the appropriate regulations to make them consistent with these requirements; however, the failure of the Administrator to make such revisions will not affect the implementation of these provisions.

Section 301(o) of the conference substitute requires the Administrator to establish a system of fees to recover costs of reviewing and processing these applications. Applications are to be accompanied by an appropriate fee, as determined by the Administrator.

Fees collected under this section shall be deposited into a special fund in the United States Treasury entitled "Water Permits and Other Services". Such funds are to be available for appropriation to carry out the Agency activity for which the fee was charged. Creation of this special fund will assure that fees charged for processing of applications will be used to support water permit related activities, rather than other activities. The existence of this fund shall not be a basis for reductions in funding levels for related program activities.

The Administrator is to withdraw existing effluent guidelines applying to fertilizer plants in Louisiana which had commenced construction on or before April 8, 1974. Within 180 day, the Administrator is to issue Best Practical Judgment permits to facilities no longer covered by the guidelines.

COAL REMINING OPERATIONS

Senate bill

No comparable provision.

House amendment

The House amendment allows the issuance of a permit modifying effluent limitations with respect to the pH level of preexisting discharges of iron and manganese from the remined area of a coal remining operation. The applicant for such a permit modification must demonstrate to the satisfaction of EPA or, where applicable, the State that the coal remining operation will result in the potential for improved water quality from the remining operation.

Conference substitute

The conference substitute adopts the House amendment. The conferees specifically agreed to retain the language "potential for" with the understanding that EPA and the States may be "satisfied" based on a conviction that it is probable that there will be actual improvement in water quality as a result of modified requirements.

INDIVIDUAL CONTROL STRATEGIES FOR TOXIC POLLUTANTS

Senate bill

The reported bill modifies sections 302, 303, 304, and 305 of the Act, to provide for the development of water quality based effluent limitations after the implementation of best available technology (BAT).

States are required to undertake a progressive program of toxic pollutant load reduction where BAT is not sufficient to meet State water quality standards and support public health and water quality objectives of the Act. The following scheduled requirements are included in this provision.

(1) Under new section 305(c), within two years of enactment of the Clean Water act Amendments of 1985, States must identify those water bodies within or adjacent to them which will not meet State water quality standards because of toxic pollutants after the implementation of BAT.

(2) Under new section 303(c)(2)(B), whenever a State reviews or revises existing water quality standards or adopts new standards, it must adopt numerical criteria for those toxic pollutants which could reasonably be expected to interfere with designated water uses and set such criteria at the levels necessary to support such uses. States shall establish specific numerical criteria based on the Environmental Protection Agency's existing national water quality criteria and other sources. A State may also utilize toxic pollutant criteria based on biomonitoring techniques or assessment methods to supplement numerical criteria. While numerical criteria are immediately required for toxic pollutants which are highly per-

sistent, bioaccumulative, or known or suspected carcinogens, mutagens, or teratogens, for other toxic pollutants biomonitoring can be used until numerical criteria can be developed.

(3) Under new section 304(a)(8), the Administrator, in consultation with appropriate State agencies, is to provide information within two years of enactment of the Clean Water Act Amendments of 1985, on methods of establishing criteria with biomonitoring assessment techniques.

(4) Under new section 303(d)(4), not later than two years after the identification of water bodies with toxic pollutant water quality standard problems, States must establish effluent limitations for individual dischargers into such water bodies, based on established toxic pollutant criteria and adequate to attain water quality standards. These effluent limitations must be incorporated into permits which must be complied with no later than three years after the establishment of the effluent limitation.

Section 302(a) of the Act, as amended by the reported bill, provides for effluent limitations to be established whenever, in the judgment of the Administrator, a water body will not attain or maintain the level of water quality which will assure protection of public health, public water supplies, agricultural and industrial uses, and the protection and propagation of a balanced population of shellfish, fish and wildlife, and allow recreational activities in and on the water, even after the application of all the technology-based requirements of the Act, or whenever such a water body has been identified under new section 305(c)(1)(B). For such water bodies, the Administrator must establish effluent limitations for any point sources interfering with attainment or maintenance of that level of water quality providing a degree of control which can reasonably be expected to contribute to attaining or maintaining the required water quality.

Under section 302(b), as amended, the Administrator is permitted, with the concurrence of the State, to modify effluent limitations for non-toxic pollutants established by the Administrator under section 302(a) if the applicant demonstrates at the time the effluent limitation is proposed that there is no reasonable relationship between the economic and social costs and the benefits to be obtained from achieving the proposed limitation.

The Administrator, with the concurrence of the State, may also modify effluent limitations established under section 302(a) for discharges of toxic pollutants, for single period not to exceed five years, if the applicant demonstrates at the time the effluent limitation is proposed that the modified requirement represents the maximum degree of control within the economic capability of the owner of the particular source, and will result in reasonable further progress (beyond BAT) toward attaining the level of water quality specified in section 302(a). The provisions of new section 302(b)(2) apply only to effluent limitations established by the Administrator under section 302(a).

The provisions of section 302(b)(2) authorizing the modification of effluent limitations apply only to the effluent limitations established under section 302(a).

New section 304(l) requires the Administrator to publish within 12 months a plan (1) establishing a schedule for the annual review and revision of effluent guidelines already promulgated; (2) identifying categories of sources of toxic or nonconventional pollutants for which guidelines have not yet been promulgated; and (3) establishing a schedule for promulgation of those guidelines, no later than 3 years after identification of the categories. Guidelines are required for any category of sources discharging significant amounts of toxic pollutants.

House amendment

The House amendment provides for the development and implementation of individual control strategies to achieve compliance with applicable water quality standards where it is determined that such compliance will not result from the application of best available technology and best conventional technology.

The House amendment requires each state, not later than one year after the date of enactment of this legislation, to submit to the Administrator a list of all navigable waters in such state for which the State does not expect the applicable water quality standard to be achieved after the requirements for best available technology and best conventional technology are met, due entirely or substantially to discharges from point sources of toxic pollutants listed pursuant to section 307(a). For each segment of the waters included on this list, the State is to determine the specific point sources discharging toxic pollutants which are believed to be preventing or impairing such water quality, and the amount of each toxic pollutant discharged by each source. The State submission is to also include an individual control strategy, which the state determines will produce a reduction in the discharge of toxic pollutants from point sources identified by the state, through the establishment of effluent limitations and water quality standards. The State's proposed reduction in toxic discharges must be sufficient, in combination with other controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of the establishment of the strategy.

Not later than 120 days after the last day of the one-year submittal period, the Administrator shall approve or disapprove the control strategies submitted by a state.

If a State fails to submit control strategies or the Administrator does not approve the control strategies submitted by a State, then, not later than one year after the last day of the submittal period the Administrator, in cooperation with the State and after notice and opportunity for public comment, shall publish in the Federal Register a list of all navigable waters in the State for which the Administrator does not expect the applicable water quality standard will be achieved after the requirements for best available technology and best conventional technology are met, due entirely or substantially to discharges from point sources of any toxic pollutants listed pursuant to section 307(a). For each segment of the navigable waters included on the list, the Administrator shall determine the specific point sources discharging any such toxic pollutant which is believed to be preventing or impairing such water quality and the amount of each such toxic pollutant discharged by each such source. At a minimum, the Administrator shall consider for listing any navigable waters for which any person submits a petition to the Administrator for listing not later than 120 days after the last day of the submittal period.

Not later than one year after the date of publication of the required list, the Administrator, in cooperation with the States, shall issue proposed regulations setting forth, for each segment of the navigable waters listed, an individual control strategy. Each individual control strategy shall produce a reduction in the discharge of toxic pollutants from point sources identified by the Administrator through the establishment of effluent limitations and water quality standards which reduction is sufficient, in combination with existing controls on point and nonpoint sources of pollution, to achieve the applicable water quality standard as soon as possible, but not later than three years after the date of promulgation of the final strategy. Not later than 180 days after issuing the proposed regulations, the Administrator shall promulgate each individual control strategy as a final regulation.

The Administrator shall implement each individual control strategy established or promulgated under this subsection by modifying or requiring the modification of permits under section 402 of the Act.

The House amendment also amends the citizen suits provision of section 509 of the Act to allow interested persons to bring a legal action for review of the Administrator's promulgation of individual control strategies.

Conference substitute

The conference substitute adopts a comprehensive program for development of individual control strategies for toxic pollutants based on elements from both the Senate and House bills.

The conference substitute modifies sections 303 and 304 of the Act, to provide for the development of water quality based effluent limitations after the implementation of best available technology (BAT).

Under subsection (a) of the conference substitute, States are required to undertake a progressive program of toxic pollutant load reduction where BAT is not sufficient to meet State water quality standards and support public health and water quality objectives of the Act. Under new section 304(l), within two years of enactment of the Water Quality Act of 1986, States must identify those water bodies within or adjacent to them which will not meet State water quality standards because of toxic pollutants after the implementation of BAT, new source performance standards and pretreatment standards. For each segment of the waters included on this list, the State is to determine the specific point sources discharging toxic pollutants which are believed to be preventing or impairing such water quality, and the amount of each toxic pollutant discharged by each source. The State submission is to also include an individual control strategy which the State determines will produce a reduction in the discharge of toxic pollutants from point sources identified by the State, through the establishment of effluent limitations and water quality standards containing numerical criteria. The State's proposed reduction in toxic discharges, in combination with other controls on point and nonpoint sources of pollution, must achieve the applicable water quality standard as soon as possible, but not later than three years after the date of the establishment of the strategy.

Not later than 120 days after the day the submittal is due, the Administrator must approve or disapprove the control strategies submitted by a State. If a State fails to submit control strategies or the Administra-

tor does not approve the control strategies submitted by a State, then not later than one year after the day the submittal is due, the Administrator, in cooperation with the State and after notice and opportunity for public comment, must devlop an individual control strategy which meets the requirements otherwise applicable to the State. At a minimum, the Administrator shall consider for listing any navigable waters for which any person submits a petition to the Administrator for listing not later than 120 days after the last day of the submittal period.

Subsection (b) of the conference substitute adopts language in the House bill amending section 509 of the Act to allow interested persons to bring a legal action for review of the Administrator's promulgation of individual control strategies.

Subsection (c) adopts Senate language requiring the Administrator to develop and publish (1) guidance to be used by the States in identifying those waters for which individual control strategies will be required and (2) information on methods for establishing and measuring water quality criteria for toxic pollutants.

Subsection (d) of the substitute follows language in the Senate bill to require that during State review, revision, or adoption of water quality standards, the State must adopt criteria for all priority toxic pollutants for which quality criteria have been published under section 304(a). The State's criteria are to be based on specific numerical criteria. Where numerical criteria are not available, the State shall use biological monitoring or assessment methods.

Subsection (e) adopts Senate language amending section 302 of the Act.

Subsection (f) adopts Senate language providing for development of a plan which will include a schedule for periodic review and revision of promulgated effluent guidelines, categorization of toxic and nonconventional pollutant sources for which effluent limitation guidelines and new source performance standards have not been established, and a schedule for promulgation of effluent limitations for such categories of point sources.

Subsection (g) contains slightly modified language taken from the House bill calling for EPA to undertake a study of water quality improvements achieved pursuant to the application of technology-based effluent limitations under section 301(b)(1) of the Act. The Administrator is to report the results of the study within two years.

WATER QUALITY IMPROVEMENT STUDY

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator to study the water quality improvements which have been achieved by application of best available technology. The study must include an analysis of the effectiveness of, and the costs and benefits associated with, application of best available technology and must also include an analysis of methods of improving the Nation's water quality program and its effectiveness.

Conference substitute

The Conference substitute adopts the House amendment with modification.

PRETREATMENT STANDARDS

Senate bill

No comparable provision.

House amendment

The amendment amends section 307 of the Federal Water Pollution Control Act to authorize the owner or operator of a publicly owned treatment works to grant up to a two-year extension for compliance with a categorical pretreatment standard to an indirect discharger that intends to comply with such applicable standard by using an innovative treatment system that meets the criteria specified in section 301(k) of the Act, if (1) the Administrator determines that the innovative system has the potential for industry-wide application and the action will not cause the publicly owned treatment works to violate its NPDES permit and (2) the Administrator or a State having an approved pretreatment program concurs with the proposed action of the owner or operator of the publicly owned treatment works.

The amendment directs the Administrator to increase the number of employees in the Agency in order to effectively implement the Federal Water Pollution Control Act's pretreatment requirements.

Conference substitute

The Conference Agreement adopts the House Amendment and amends section 307 of the Federal Water Pollution Control Act. A 2-year compliance extension is available for existing but not new, facilities using innovative pretreatment systems. Application for such modification does not extend the time in which compliance guidelines must be met, and general pretreatment and sludge regulations must be complied with.

No facility that receives an innovative pretreatment modification can cause or contribute to any violation of section 402 or section 405 of the Act.

The conferees intend that the term "industry-wide application" in section 307(e) means that application of the innovative system or control technique is technically feasible at a significant portion of the facilities in an industrial category or subcategory and will be made commercially available by the applicant unless the applicant is the only facility in the subcategory.

INSPECTION AND ENTRY

Senate bill

No comparable provision.

House amendment

The amendment imposes a penalty on any authorized representative of the Administrator who discloses confidential information obtained in the inspection and monitoring of a discharger.

Conference substitute

The Conference substitute adopts the House amendment as modified to provide that all information reported to, or otherwise obtained by, EPA shall be made available upon written request to any committee of Congress.0ZSmith, Johnie Lovell Jr, 85111 J.091-060 F. Filnam A15oc7.894

MARINE SANITATIAN DEVICES

Senate bill

No comparable provision.

House amendment

The amendment modifies the requirement for marine sanitation devices to provide that a State may impose a more stringent standard for vessels which are used primarily as residences.

Conference substitute

The conference substitute adopts the House language with the addition of a provision authorizing States to enforce Federal standards for all vessels.

The question of whether a houseboat is used primarily as a residence is a matter to be determined by the State in which the houseboat is located.

CIVIL AND CRIMINAL PENALTIES

Senate bill

The bill amends sections 309 and 404 of the Clean Water Act relating to civil and criminal penalties.

Civil Penalties

Sections 309 and 404 of the Act are amended to increase the civil judicial penalty limit from $10,000 to $25,000 per violation, to clarify that each distinct violation is subject to a separate daily penalty assessment of up to $25,000, and to clarify that violations of pretreatment program requirements are subject to civil penalties.

The bill would also expressly require the courts to consider a number of factors, including, in particular, the economic benefit gained as a result of the violation. Reasonable approximations of economic benefit will suffice. Other objective factors customarily taken into account in assessing penalties, such as the history of violations, good faith efforts to comply and economic impact on the violator, also may be taken into account in arriving at an appropriate penalty.

Administrative civil penalties

The Clean Water Act currently provides the Administrator with two civil enforcement options. When faced with a violation of the Act, the Administrator may issue an order requiring compliance or the Administrator may bring a civil action in the appropriate U.S. district court for penalties and injunctive relief.

The bill gives the Administrator a third option: to assess administrative civil penalties of up to $10,000 per day for each violation of a Clean Water Act requirement. The total maximum administrative penalty that may be assessed under this provision is $125,000 for an individual enforcement action.

This new authority to administratively assess civil penalties sunsets after five years.

Prior to issuing an administrative order assessing a civil penalty, the Administrator must give the person against whom the penalty is to be assessed written notice of the proposed penalty and an opportunity to request, within 30 days of receipt of such notice, a hearing. Such a hearing includes the right to a reasonable opportunity to be heard and to present evidence. Because administrative penalty assessments will be used in smaller cases and often will be based on discharge monitoring reports routinely submitted by permittees, formal administrative procedures strictly in accordance with the formal adjudicatory procedures of the Administrative Procedures Act are not required.

However, the Administrator is required to provide the public with notice of the proposed penalty assessment and a reasonable opportunity to comment on the proposal. Public notice of such proceedings must be given in a manner that will apprise interested citizens of the proceeding. If a hearing on the proposed assessment is conducted, any citizen who commented on the proposal shall be given notice of such a hearing and a reasonable opportunity to be heard and to present evidence at the hearing. If no hearing is held, the Administrator must set aside the penalty order and provide a hearing when presented with evidence that the order was inadequate or improper.

An order assessing a penalty becomes final and nonappealable 30 days after its issuance or, in the case of a post-assessment request for a hearing, 30 days following the final action by the Administrator.

No one may bring an action to recover civil penalties under sections 309 (b) and (d), 311(b), or 505 of this Act for any violation with respect to which the Administrator has commenced and is diligently prosecuting an administrative civil penalty action, or for which the Administrator has issued a final order not subject to further judicial review (and for which the violator has paid the penalty). This limitation applies only to an action for civil penalties for the same violations which are the subject of the administrative civil penalties proceeding. It would not apply to an action for civil penalties for a violation of the same requirement of the Act that is not being addressed administratively or for a past violation of another pollutant parameter (even one resulting from the same discharge which is the subject of the administrative civil penalty proceeding). In addition, this limitation would not apply to: 1) an action seeking relief other than civil penalties (e.g., an injunction or declaratory judgment); 2) an action under section 505(a)(1) of this Act filed prior to commencement of an administrative civil penalty proceeding for the same violation; or 3) a violation which has been the subject of a notice of violation under section 505(b)(1) of this Act prior to initiation of the administrative penalty process, provided that, in the latter case, an action under section 505(a)(1) of this Act is filed within 120 days of the notice of violation.

The Agency can prevent duplicate proceedings by intervening in the ongoing citizen enforcement suit or by bringing its own judicial action before a citizen suit is filed. This amendment does not preclude administrative or judicial enforcement actions by the Administrator for any violations not specifically penalized by the initial enforcement action.

Judicial review of a penalty assessment is available to any person against whom a civil penalty order is issued as well as to any citizen who commented on a proposed assessment. Judicial review is not to be de novo review, but will be based upon whether the Agency's findings of a violation is supported by substantial evidence in the administrative record and whether the assessment of the penalty is an abuse of discretion. Where it is clear that the Agency has assessed such an unreasonable low penalty as to constitute an abuse of discretion, the court may choose to impose its own higher penalty rather than exercise its authority to remand. District courts are free to remand cases in appropriate circumstances.

The penalty collection proceeding will not be an opportunity to contest the penalty assessment. The discretion to compromise, mitigate or abandon such claims continues to reside with the Attorney General.

Criminal penalties

The bill would elevate penalties for persons who knowingly or negligently introduce into a sewer system or a POTW, a pollutant or hazardous substances which such person knew or reasonably should have known could cause personal injury or property damage. Criminal liability shall also attach to any person who is not in compliance with all applicable Federal, State and local requirements and permits and causes a POTW to violate any effluent limitation or condition in any permit issued to the treatment works under section 402 of the Act.

The felony level penalties for knowing violations (not less than $5,000 nor more than $50,000 per day of violation and imprisonment for up to three years) are more closely comparable to the levels provided by the 1984 amendments to the Solid Waste Disposal Act RCRA and reflect the commensurately serious nature of the violations to be criminally prosecuted under the Clean Water Act. Existing misdemeanor penalties are retained to address those negligent violations which merit lesser punishment.

This section also adds to section 309(c) enhanced felony penalties for certain life-threatening conduct based upon knowing violation of certain predicates in the Act. In the event of such knowing violation, the Senate bill subjects to greater punishment one who knows that he thereby placed another person in imminent danger of death or serious bodily injury. The criminal penalties that apply upon conviction (up to 15 years imprisonment plus fine of up to $250,000 for individuals, a fine of up to $1,000,000 for organizations) are equivalent to the RCRA knowing endangerment provision, as recently amended.

The maximum term of imprisonment contained in the provision of the current law penalizing the knowing making of false statements, representations and certification, or tampering with monitoring equipment required under the Act, is increased from six months (a petty offense) to two years (a felony). The provision doubling the maximum punishment with respect to both fine and imprisonment for second and subsequent convictions under the same paragraph of the Act is extended to this provision as well as to the knowing endangerment provision.

This bill also extends and consolidates criminal sanctions involving violations of the provisions of section 405 governing disposal of sewage sludge, violations of requirements imposed in State pretreatment programs approved under section 402(b)(8), violations of section 318 permits, and violations of section 404 permits issued by the Secretary of the Army or by a State.

CIVIL PENALTIES

House amendment

The amendment increases the maximum amount of a civil penalty for violating certain provisions of the Act from $10,000 per day to $25,000 per day.

The amendment provides that the Federal Water Pollution Control Act shall not be construed as requiring a state to have a civil penalty for violations described in section 309(d) which has the same monetary amount as the civil penalty established by this section. This relates to the requirement in the Act that a state have adequate enforcement and penalty provisions in order to assume management of the National Pollution Discharge Elimination System under section 402 of the Act.

The amendment provides that a civil penalty may not be assessed with respect to a violation if a penalty has been assessed with respect to the same violation of a violation having substantially the same cause.

ADMINISTRATIVE PENALTIES

The amendment authorizes the assessment of administrative civil penalties for violations of the Act. Whenever on the basis of any information available to him the Administrator finds that any person is in violation of sections 301 except with respect to a violation of section 404), 302, 306, 307, 318 or 405 of the Act or is in violation of any permit condition or limitation implementing any of these sections in a permit issued under section 402 of the Act, he may, after consultation with the state in which the violation occurs, assess a civil penalty of not more than $10,000 per day of violation, except that the penalty shall not exceed a total of $125,000. The Secretary of the Army is given similar authority in connection with permits issued under section 404 of the Act, which relates to the discharge of dredged or fill material.

A civil penalty is assessed under this provision by the Administrator or the Secretary, as the case may be, by an order made on the record after opportunity for a hearing. Before issuing such an order, the Administrator or the Secretary is required to give written notice to the person to be assessed the civil penalty of the proposal to issue such an order and is required to provide the person with an opportunity to request, within 15 days, a hearing on the order. Public notice and reasonable opportunity to comment must also be provided.

Any person who comments on a proposed assessment shall be given notice of any hearing held and any order assessing a penalty. In any such hearing, the person shall have a reasonable opportunity to present evidence.

If no hearing is held before the issuance of an order assessing a penalty, any person who commented on the proposed assessment may petition the Administrator or Secretary to set aside the order and to provide a hearing on the penalty. The Administrator or Secretary must set aside the order and provide a hearing if the Administrator or Secretary determines that the evidence presented by the petitioner in support of the petition is material and was not considered in the issuance of the order. If the Administrator or Secretary denies a hearing, the Administrator or Secretary shall provide to the petitioner, and publish in the Federal Register, notice of the reasons for the denial.

Any person who requested a hearing with regard to the assessment of a civil penalty and who is aggrieved by an order assessing a civil penalty may file a petition for judicial review of the order with the United States Court of Appeals for the District of Columbia Circuit or for any other Circuit in which such person resides or transacts business. Such a petition may only be filed within the 30-day period beginning on the date the order making the assessment was issued.

If any person fails to pay an assessment of his civil penalty, after the order making the assessment has become a final order, and where the person does not file a petition for judicial review of the order, or after the court has entered a final judgment in favor of the Secretary of the Administrator, the Attorney General shall recover the amount assessed in an action brought in any appropriate District Court of the United States. A penalty for late payment of a fine is provided.

The Administrator and the Secretary are given the authority to issue subpoenas in connection with hearings under this provision and may request the Attorney General to bring an action to enforce any subpoena.

Any violation with respect to which any civil penalty is imposed under this provision is not subject to a civil penalty under section 309(d) of section 311(b) of the Federal Water Pollution Control Act.

When a state has proceeded with an enforcement action relating to a violation with respect to which the Administrator or the Secretary is authorized to assess a civil penalty under this provision the Administrator and the Secretary are not authorized to take any action under this subsection if the state demonstrates that the state-imposed penalty is appropriate.

No action by the Administrator under section 24 shall affect any person's obligation to comply with any section of the Act or with the terms and conditions of any permit issued pursuant to section 402 or 404 of the Act.

The citizen suits provision in section 505(b)(1) of the Federal Water Pollution Control Act is amended to provide that no action can be commenced by a citizen if the Administrator or state has commenced and is diligently pursuing the assessment of a civil penalty. The same prohibition applies in existing law to those instances where the Administrator or a state is diligently pursuing a civil or criminal action.

In determining the amount of a administrative civil penalty, the Administrator or Secretary must take into account the nature, circumstances, extent and gravity of the violation or violations and with respect to the violator, ability to pay, effect on ability to continue to do business any history of prior such violations, the degree of culpability, economic savings if any resulting from the violation, and such other matters as justice may require.

The maximum administrative penalty that may be assessed in an administrative enforcement action under this provision is $125,000.

The amendment provides that civil penalties under other provisions of the law shall not apply where a person has paid an administrative penalty for the same violation.

The amendment provides that where an administrative penalty is being pursued, a citizen suit may not be filed for the same violation.

A citizen suit is barred not only by an EPA administrative action but also by a State proceeding under a comparable State law.

CRIMINAL PENALTIES

The amendment amends section 309 of the Federal Water Pollution Control Act to provide penalties for dischargers or individuals who knowingly or negligently violate or cause the violation of certain of the Act's requirements.

Punishment by fine of between $25,000 and $25,000 per day, or imprisonment for up to a year, or both, is required with respect to (1) any person who negligently violates section 301, 302, 306, 307, 308, 318, or 405 of the Federal Water Pollution Control Act, or any permit condition or limitation implementing any of these sections in an NPDES permit, or any requirement imposed in an approved pretreatment program, or any requirement in a dredge and fill permit under section 404 of the Act, or (2) any person who negligently introduces into a sewer system or a publicly owned treatment works any pollutant or hazardous substance which causes or may reasonably be anticipated to cause personal injury or property damage or which causes the treatment works to be in violation of its NPDES permit requirements. Second and subsequent violations shall be punished by a fine or not more than $50,000 per day, or by imprisonnment of up to two years. or both.

The House amendment also requires punishment by fine of between $5,000 and $50,000 per day, or imprisonment for up to two years, or both, for (1) any person who knowingly violates section 301, 302, 306, 307, 308, 318, or 405 of the Act, or any permit condition or limitation implementing any of these sections in an NPDES permit or any requirement imposed in an approved pretreatment program, or any requirement in a dredge and fill permit under section 404 of the Act; or (2) any person who knowingly introduces into a sewer system or a publicly owned treatment works any pollutant or hazardous substances which causes or may reasonably be anticipated to cause personal injury or property damage or which causes the treatment; works to be in violation, of its NPDES permit requirements. As with negligent violations, for subsequent knowing violations, the maximum punishment which may be imposed for these knowing violations is twice that pertaining to the initial violation.

The House amendment provides for a fine or imprisonment of any person who knowingly violates provisions of the act or permit conditions knowing that he thereby places another person in imminent danger of death or serious bodily injury.

The House amendment provides, for both of these negligent or knowing violations, an affirmative defense that the introduction of any pollutant or hazardous substance into the sewer system or treatment; works was in compliance with all applicable Federal, state and local requirements governing the introduction.

Any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under the Act or who knowingly falsifies, tampers with, or renders inaccurate any monitoring device or method required to be maintained under the Act shall upon conviction be punished by a fine of up to $10,000 or imprisonment for up to two years, or both. Second and subsequent convictions shall be punished by fine of up to $20,000 or by imprisonment of up to four years or both.

For the purpose of section 22, the term "person" means any responsible corporate officer in addition to the definer of the term in section 502.5 of the Federal Water Pollution Control Act. The term "hazardous substance" means any substance designated pursuant to section 311 of the Federal Water Pollution Control Act; any element, compound, mixture, solution, or substance designated under section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980; hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act; any toxic pollutant listed under section 307(a) of the Federal Water Pollution Control Act;nd any imminently hazardous chemical substance or mixture with respect to which the Administrator has taken action pursuant to section 7 of the Toxic Substances Control Act.

Conference substitute

The conference substitute combines provisions from the Senate bill and House amendment to provide increased penalties for civil and criminal violations of the law and to provide new authority to assess civil penalties administratively.

For all three classes of penalties covered by the conference substitute—criminal, judicial civil, and administrative civil—the conference substitute provides that a single operational upset which leads to simultaneous violations of more than one pollutant parameter in an NPDES permit shall be treated as a single violation.

The conference substitute provides for criminal penalties as set forth in the Senate bill, with an amendment contained in the House bill deleting the reference to section 303.

Civil judicial penalties are as set forth in the Senate bill with amendments based on the House amendment. The conference substitute provides that no State shall be required, before July 1, 1988, to modify a section 402 percent program as a result of the civil penalty amendments in the conference substitute. With respect to civil penalties for violation of a pretreatment program, the provision of the Senate bill regarding State permit programs is retained, but with a July 1, 1988, date. With respect to the increased amount of civil penalties, the House amendment providing that no State shall be required, as a result of these amendments, to modify a permit program is adopted with the addition of a clarification. The additional language preserves the Administrator's authority to establish, for purposes of program delegation, minimum acceptable levels of State civil penalty authorities.

The new authority to assess administrative civil penalties combines provisions of the Senate bill and the House amendment. As in the Superfund Amendments and Reauthorization Act of 1986, the conference substitute provides for a two-tiered penalty authority. The first tier involves an informal process with relatively low penalty limits. The maximum first tier penalty that may be assessed in any enforcement action is $25,000, regardless of the number of violations or number of days of violation. The second tier is subject to a maximum penalty limit of $125,000 and a formal Administrative Procedure Act hearing process.

The conference substitute authorizes the Secretary of the Army to levy administrative civil penalties, as provided in both the Senate bill and the House amendment, for Clean Water Act violations relating to permits issued by the Secretary under Section 404 of the Act. The conference substitute authorizes the Administrator, as in the Senate bill, to issue administrative civil penalties with respect to unpermitted discharges violating section 301 as it relates to section 404 of the Act and violations of State-issued section 404 permits. It is the conferees' intention that the Administrator and the Secretary of the Army develop a memorandum of agreement concerning the implementation of this new administrative civil penalty authority relating to unpermitted section 404 violations. The conferees expect the Administrator and the Secretary to reach agreement on this matter as soon as possible, but in no event later than six months after the date of enactment.

In the administrative penalties provision, language is included from the House amendment on required consultation with States prior to assessing any administrative penalties, on assessment of additional penalties for late payment and collection fees, and on the standard for setting aside a penalty assessed without a hearing. From the Senate bill, language on collection procedures and court authority to impose additional penalties is included in the conference substitute, as is the language on preclusion of citizen suits.

For any given violation, the government must choose from among the three approaches included in this section: informal administrative process; formal administrative process; or judicial process. A single violation shall not be subject to multiple civil penalties.

In certain instances settlements of fines and penalties levied due to NPDES permit and other violations have been used to fund research, development and other related projects which further the goals of the Act. In these cases, the funds collected in connection with these violations were used to

investigate pollution problems other than those leading to the violation. Settlements of this type preserve the punitive nature of enforcement actions while putting the funds collected to use on behalf of environmental protection. Although this practice has been used on a selective basis, the conferees encourage this procedure where appropriate.

CLEAN LAKES.

Senate bill

The Senate bill provided for effective reporting of lake quality by State agencies on a regular basis. Reports were to identify lakes in each State, identify lakes with impaired uses, and include a descripton of the State program for lake protection.

To avoid unnecessary reporting burden, the lake quality reports were to be included in the State water quality report prepared every two years under section 305(b) of the Act. Also, a State must prepare and submit a lake quality report to EPA in order to receive a grant under section 314 of the Act.

Finally, section 314 was amended to inlcude saline lakes under the Clean Lakes Program.

House amendment

The House amendment provided for a new grant program for control of nonpoint sources contributing pollution to lakes. A total authorization of $250,000,000 was provided.

In addition, the amendment authorized the Administrator to carry out a demonstration program to restore the biological integrity of acidified lakes through liming. The provision provided for a report to Congress and an authorization of $10,000,000.

The amendment also provides for a program of grants to States to carrying out methods of mitigating the effects of high acidity in lakes. A total authorization of $125,000,000 was provided and an annual report to the Congress was required.

The amendment also provided for projects for the clean-up of selected lakes.

Finally, the amendment provided for publication of a lake restoration guidance manual.

Conference substitute

The conference substitute includes modified provisions of Senate and House bills.

The Conferences reaffirm their belief that lakes are a vital national resource. Fifty percent of the Nation's water supply comes from lakes and lakes offer outstanding recreational opportunities. There is evidence, however, of declines in lake quality. A recent survey by the North American Lakes Management Society found that 4,200 lakes in 38 States suffer impaired uses.

Despite this evidence there is currently no comprehensive and complete picture of the quality of lakes nationally. In addition, there is no clear description of trends in lake quality.

The conference substitute provides that States are to submit reports on lake quality on a biennial basis. Reports are to provide a list and description of the quality of lakes and description of methods and procedures to control sources of pollution to lakes including methods and procedures to mitigate the harmful effects of high acidity, inlcuding innovative methods of neutralizing, restoration of buffering capacity, and the like. States reports shall be included in reports proposed under section 305(b) of the Act, beginning with the report required by April 1, 1988. The provision provide that States not submitting reports are not eligible for grants under this section.

Not later than 180 days after receipt of biennial reports from States, the Administrator shall submit to congress a report on the status of water quality in lakes. This national report is intended to be published separately from the reports to Congress prepared under section 305(b) of the Act.

The provision also provides that the Administrator is to establish and conduct a lake water quality demonstration program. As a priority, the Administrator shall undertake demonstration projects at several lakes identified in the bill. The Administrator is to provide an annual report to the Congress on work undertaken pursuant to this section. The demonstration program is supported by a total authorization of $40,000,000. An additional authorization of $15 million is provided for acid mitigation award of a grant under this provision shall not effect or restrict award of grants under related assistance programs.

The conference substitute also directs the Administrator to develop a lake restoration guidance manual within one year and to revise the manual biennially.

MANAGEMENT OF NONPOINT SOURCES OF POLLUTION

Senate bill

The Senate bill provides $300 million over 3 years to States and combinations of adjacent States to implement nonpoint source pollution management programs.

States are to submit to the Administrator of the Environmental Protection Agency, within 18 months of enactment, programs which: identify waters which without additional action to control nonpoint sources of pollution cannot reasonably be expected to attain or maintain applicable water quality standards or the goals and requirements of the Act; categories, subcategories or, where appropriate, particular sources that contribute significant pollution loadings; best management practices which will be undertaken; programs (including nonregulatory or regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, and demonstration projects) to achieve implementation of best management practices; a schedule containing annual milestones for program implementation at the earliest practicable date; and which identify Federal programs and projects which the State will review pursuant to the procedures set forth in Executive Order 12372 as in effect on September 17, 1983, to determine whether such assistance is consistent with the purposes and objectives of the program under this section.

Within 6 months of receipt, EPA is to approve or disapprove the program; states have 3 months to revise the program, and the Administrator an additional 3 months to approve or disapprove the revised program. If the Administrator fails to approve or disapprove the program within the allotted times, the program is deemed to have been approved.

The State may make use of local agencies or organizations in developing and implementing the program.

The Federal share of grants shall not exceed 75%. Two-thirds of the funds appropriated are to be allotted by formula, one-third for priority purposes.

States may use Federal funds authorized by the bill for financial assistance to individuals only insofar as the assistance is related to costs of implementing demonstration projects. Federal funds are not to be used as a general subsidy or for general cost sharing to support implementation of best management practices. However, a State is not precluded from using or directing other funds for cost sharing or other incentive programs if it chooses. The term "demonstration projects" includes projects designed to educate individuals as to the use of best management practices and to demonstrate their feasibility and utility as well as research projects to establish the cost effectiveness of particular BMPs.

Each State shall report annually to the Administrator. The Administrator shall transmit to the Office of Management and Budget and appropriate Federal departments and agencies a list of the programs and projects identified by each State under the consistency provision, and each Federal department or agency shall modify its regulations and accommodate the concerns of the state according to the requirements and definitions of Executive Order 12372 as in effect on September 17, 1983.

The Administrator shall submit to Congress within 3 years of enactment a report on the program.

Section 205(j) is amended to contain a new paragraph (5), setting aside 1% of each state's allotment, or $100,000, whichever is greater, to carry out this section.

House amendment

Establishes a national policy that plans for the control of nonpoint sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this Act to be met through the control of both point and nonpoint sources of pollution.

Provides $150 million per year over 5 years to States to implement nonpoint source control programs.

Each State shall submit to the Administrator a State Assessment Report which includes an identification of those waters which as a result of pollution from nonpoint sources are not meeting applicable water quality standards or the goals and requirements of the Act, and those categories and subcategories of nonpoint sources which add significant pollution to those waters. Each State shall also submit a four-year Implementation Plan which includes an identification of those waters with respect to which the State plans to implement best management practices and measures; the schedule for expeditious implementation of such practices and measures; those categories and subcategories with respect to which controls will be implemented; an identification of best management practices to be implemented; and an identification of methods (including but not limited to demonstration, enforcement, technical assistance, education, training and cost sharing programs) which will be used. The State shall also identify Federal departments and agencies which are likely to engage in activities which would be inconsistent with implementation of the plan, and recommend to the Administrator methods for modifying such activities to make them consistent with plan implementation.

Programs shall be developed and implemented, to the maximum extent practicable, with the involvement of local and other entities with expertise and experience in control of nonpoint sources of pollution. The States shall to the maximum extent practicable develop and implement programs on a watershed-by-watershed basis.

States have 270 days from enactment to submit the above, with an additional 270 days if necessary. The Administrator shall consolidate recommendations for modifica-

tion of Federal activities and programs, and submit them to the appropriate Federal departments, agencies and instrumentalities which shall, to the maximum extent practicable and consistent with existing law, accommodate such recommendations. The Administrator shall have 180 days to approve or disapprove the submissions, or portions of them, or they shall be deemed approved. The Administrator may disapprove a plan or portion of it upon determination, among other considerations, that it is not likely to satisfy the goals and requirements of the Act, that the implementation schedule is not sufficiently expeditious, or that the practices and measures proposed in the plan are not adequate to improve water quality and to reduce nonpoint source pollution. States have 90 days to revise their plans. If a State fails to submit a plan, or if it is not approved, a local public agency or organization with expertise in and adequate authority to control nonpoint sources may with the State's approval submit and implement a plan for its area under the same conditions as States do.

Where waters in a State with an approved plan are not meeting applicable water quality standards or the goals and requirements of the Act, because of upstream pollution, the State may petition EPA to convene and EPA shall convene, or EPA may initiate, an interstate management conference to develop an agreement. The involved states shall revise their plans and submit them to EPA for approval. The plans shall be consistent with Federal and State law.

The maximum Federal share shall be 50%, except where a significant number of local interests in an area are willing and able to participate, in which case the Federal share shall be between 50% and 60%.

States shall submit annual reports to EPA, and EPA shall report annually to Congress on the program. Not later than July 1, 1990 the Administrator shall submit a final report to the Congress.

Section 201(g)(1) is amended to permit use of these funds to implement this section.

Conference substitute

The conference substitute establishes a national policy that programs for the control of nonpoint sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this Act to be met through the control of both point and nonpoint sources of pollution.

The provision provides $400 million over 4 years to States or combinations of adjacent States to implement nonpoint source management programs. An authorization for grants to States to carry out ground water quality protection activities as part of a comprehensive nonpoint source pollution control program is also provided.

Each State is required to submit a report which identifies state waters which without additional action to control nonpoint sources of pollution cannot reasonably be expected to attain or maintain applicable water quality standards or the goals and requirements of the Act. A particular water body or segment should not be excluded from identification under this subsection on a theoretical showing that it would be possible to meet water quality standards without nonpoint source controls. "Reasonably expected" is intended to mean that all waters for which nonpoint controls would be an appropriate and effective means to achieving water quality standards will be identified in the State's report.

The report shall also include identification of and management practices for categories and subcategories of nonpoint sources and may include, where appropriate, particular nonpoint sources which add significant pollution to each portion of the identified waters. It would be appropriate to identify such particular sources where they contribute significant nonpoint pollution to waters not meeting water quality standards.

States or combinations of adjacent States shall also prepare and submit to EPA Management Programs for implementation, which shall include an identification of best management practices and measures which the state will undertake. When identifying best management practices for categories and subcategories which will be undertaken to reduce nonpoint pollution, it is appropriate for States to focus on specific categories and subcategories or watersheds where nonpoint pollution is a significant problem and to set priorities among categories, subcategories and watersheds. Setting priorities, however, should not be construed to allow States to exclude watersheds not meeting water quality standards, or categories or subcategories contributing significant nonpoint pollution, from the report and management program submitted by the State.

The management program shall also identify the programs (including, as appropriate, nonregulatory or regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, and demonstration projects) to achieve implementation of best management practices; a schedule containing annual implementation milestones and providing for utilization of best management practices at the earliest possible date; and an identification of Federal programs and projects which the State will review pursuant to the procedures set forth in Executive Order 12372, as in effect on September 17, 1983, to determine whether such assistance is consistent with the purposes and objectives of the program under this section. Programs shall be developed and implemented, to the maximum extent practicable, with the involvement of local and other entities with expertise and experience in control of nonpoint sources of pollution. States shall, to the maximum extent practicable, develop and implement programs on a watershed-by-watershed basis.

The States shall submit their reports and management programs to EPA within 18 months of enactment. The Administrator must approve or disapprove the submissions within 180 days or they are deemed approved. The Administrator may disapprove a program or portion of it upon determination, among other considerations, that it is not likely to satisfy the goals and requirements of the Act, or that the practices and measures proposed in the plan are not adequate to reduce nonpoint source pollution and to improve water quality. The State shall have 3 months to revise its plan and the Administrator shall approve or disapprove the revised program within 3 months. If a state fails to submit the report, or if it is not approved, a local public agency or organization with expertise in and authority to control nonpoint sources, may, with the approval of the State, develop and implement a program for its area.

Where waters in a State with an approved program are not meeting applicable water quality standards or the goals and requirements of the Act because of upstream pollution, the State may petition EPA to convene and EPA shall convene, or EPA may initiate, an interstate management conference to develop an agreement. Nothing in the agreement shall supersede or abrogate water rights established by interstate water compacts, Supreme Court decrees or State water laws. Nor shall the subsection apply to any pollution subject to the Colorado River Basin Salinity Control Act. The requirement that the Administrator convene a conference shall not be subject to Section 505 of this Act. To the extent that States reach agreement through the conference, their management programs will be revised to "reflect" agreements reached at an interstate management conference. It is intended that the agreements will be incorporated in revised state programs and will be carried out. Management programs shall be consistent with Federal and State law.

In making grants under this provision, the Administrator shall give priority to effective mechanisms particularly difficult nonpoint source problems; implement innovative methods or practices; control interstate nonpoint source pollution; carry out ground water quality protection activities.

The Federal grant share shall not exceed 60% of the implementation costs, and non-Federal sources shall provide at least 40% of the costs.

States may use Federal funds authorized by the bill for financial assistance to individuals only insofar as the assistance is related to costs of implementation of best management practices.

No grant may be made unless the Administrator determines that the State has made satisfactory progress in the preceding year in meeting its schedule.

Each State shall submit annual progress reports to the Administrator. The Administrator shall transmit to the Office of Management and Budget and appropriate Federal departments and agencies a list of the programs and projects identified by each State under the consistency provision, and each Federal department or agency shall modify its regulations and accommodate the concerns of the State according to the requirements and definitions of Executive Order 122372 as in effect on September 17, 1983.

The Administrator shall report annually to Congress on the activities, programs and progress made in the preceding year, and shall transmit a final report not later than January 1, 1990 on the activities carried out under this section.

The conference substitute contains both the Section 205(j) (5) and Section 201(g) (1) set-aside provisions.

GRANTS FOR PROTECTING GROUNDWATER QUALITY

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator to make 50 percent grants to States for the purpose of assisting the States in carrying out ground water quality protection activities.

Conference substitute

The Conference substitute includes a comparable provision in the new nonpoint source pollution section.

NATIONAL ESTUARY PROGRAM

Senate bill

The bill adds a new section 320 which authorizes the Administrator to convene management conferences to solve pollution problems in interstate and international estuaries. Under the provisions, EPA would convene a management conference if the

Administrator determine that the attainment and maintenance of water quality in an estuary requires the control of interstate or international pollution.

The management conferences would be convened for up to five years and would develop comprehensive conservation and management plans which recommend priority actions for the control of point and nonpoint sources of pollution. These conferences shall include representatives of international, interstate, and regional agencies; state and local governments and entities; interested Federal agencies; affected industries, public and private educational institutions and the general public in the estuarine zone. It is important to note, however, that any priority corrective actions or compliance schedules recommended by the conference shall in no manner be less stringent than any requirements of Federal law. Nothing in this section shall affect compliance schedules or other requirements established by law or by the Agency for municipal, industrial or other dischargers.

The Administrator shall approve the plan if it satisfies the purposes of section 320, and the affected Governor or Governors concur. Once a plan is approved, funds authorized to be appropriated under the title II construction grants program, the title VI water pollution control revolving loan program and the section 319 nonpoint source pollution program may be used in accordance with the applicable requirements of the Act, to assist states in implementing programs. This provision does not in any way preclude the use of funds for any eligible project under title II, title VI of section 319 of the Act.

The provision authorizes $12 million annually for the management conferences. Expenses related to the administration of management conferences are not to exceed 10% of amounts appropriated. Grants are provided on a 75 percent Federal, 25 percent non-Federal basis to states, interstate or regional water pollution control agencies to conduct research, monitoring, modeling and other technical work necessary to develop conservation and management plan. Those agencies which receive grants are required to report to the Administrator 18 months after receipt of the grant and biennially thereafter.

The Administrator is directed to provide not to exceed $5,000,000 per fiscal year of the authorized funds to the Administrator of NOAA to do water quality monitoring and ecosystem assessment research in the estuaries. The Administrator of EPA, in cooperation with the Administrator of NOAA, shall submit a biennial report to Congress on the results of such monitoring and research. This report shall provide a listing of priority monitoring and research needs; and assessment of the state and health of the Nations' estuarine zones to the extent evaluated; a discussion of pollution problems and trends in pollutant concentrations that have a direct or indirect effect on water quality, the ecosystem, and designated or potential uses of each estuarine zone; and evaluation of pollution abatement activities and management measures implemented to determine the degree of improvement made toward restoring and maintaining the chemical, physical, and biological integrity of the estuaries studied.

House amendment

The House amendment establishes a program to improve water quality in estuaries. EPA is authorized to convene management conferences on estuaries in order to develop master plans for the improvement of the environmental quality of estuaries. The participants in the conference include EPA, NOAA, and the States. Fifty percent grants are authorized for implementation of the master plans.

Conference substitute

The conference substitute contains purposes and policies of the National Estuary Program which declare that the Nation's estuaries are of great national significance for fish and wildlife resources and provide important recreation and economic opportunities. As such, it is national policy to maintain and enhance the water quality in estuaries and provide for the biological integrity of these waters.

A Governor of a State may nominate an estuary which lies in whole or in part within such State and request a management conference to develop a comprehensive management plan. The Administrator is also authorized to nominate an estuary under his own initiative. In either case, the Administrator must make a determination as to whether an estuary can be included in the program on the basis of the ecological significance of the estuary; the biological productivity of the estuary and its contribution to fish and wildlife resources of commercial and recreational significance; the degree to which commercial, residential, recreational, or industrial activities within the estuary and its watershed have impaired or may impair the health and ecological integrity of the estuary; and the degree to which comprehensive planning and management may contribute significantly to the wise use of the estuary and to its health and ecological integrity.

Although the national estuary program established in this legislation is national in scope, several estuaries are listed in the conference substitute for priority consideration. These estuaries, which are of national significance, are as follows:

Long Island Sound, New York and Connecticut; Narragansett Bay, Rhode Island; Buzzards Bay, Massachusetts; Puget Sound, Washington; New York-New Jersey Harbor, New York and New Jersey; Delaware Bay, Delaware and New Jersey; Delaware Inland Bays, Delaware; Albermarle Sound, North Carolina; Sarasota Bay, Florida; San Francisco Bay, California; and Galveston Bay, Texas.

The management conferences are, among the other purposes stated in the conference substitute, required to develop comprehensive conservation and management plans which recommend priority corrective actions and compliance schedules addressing point and nonpoint sources of pollution to restore and maintain the chemical, physical, and biological integrity of the estuary. This includes restoration and maintenance of water quality, a balanced indigenous population of shellfish, fish and wildlife, and recreational activities in the estuary. Plans shall assure that the designated uses of the estuary are protected. Another important responsibility of the management conferences is to review any Federal financial assistance program or Federal development project subject to the requirements of Executive Order 12372, as in effect on September 17, 1983, to determine whether such assistance program or project would be consistent with and further the purposes and objectives of any plan prepared under this section. These programs and projects shall not be limited to the assistance programs or development projects subject to Executive Order 12372, but may include any programs listed in the most recent Catalog of Federal Domestic Assistance which may have an effect on the purposes and objectives of any plan developed by the management conference.

Members of the management conference shall include the Administrator and representatives of State and foreign governments, appropriate interstate or regional agencies and as determined by the Administrator other appropriate Federal agencies, local governments, affected industries, public and private education institutions and the general public. Management conferences shall be convened for a period up to five years and may be extended or reconvened by the Administrator.

Management conferences shall consider any relevant special area management plan under the Coastal Zone Management Act. The estuarine management conferences shall also cooperate fully with the State coastal management program agencies so as to assure effective coordination of all relevant coastal activities affecting the estuary. When appropriate, approved estuarine conservation and management plans may be incorporated into State coastal zone management programs.

The plan developed by a management conference shall include requirements necessary for attainment of water quality in estuaries and may include, but not be limited to:

The development of water quality standards for waters within the estuarine zone.

The development of toxicity-based standards for toxic pollutants.

The development of water quality based standards for significant point sources pollution.

The development of best management practices to control nonpoint sources of pollution.

Other measures providing for the conservation and management of the living resources of the estuary.

Once plans are approved by the Administrator with the concurrence of the affected Governor or Governors, the plan shall be implemented. Funds authorized under titles II and VI and section 319 may be used to assist States with implementation of plans.

The Administrator is authorized to make grants to appropriate public and private agencies, institutions, or individuals to assist in research, surveys, studies, modeling and other technical work necessary for the development of a conservation and management plan. The amount of such grants shall not exceed 75 percent and shall be made on condition that the non-Federal share of such costs are provided from non-Federal sources. Any entity or person receiving a grant shall report to the Administrator within 18 months of receipt of such grant and biennially thereafter.

The authorization under this section shall not exceed $12 million per year for fiscal years 1987, 1988, 1989, 1990, and 1991. Up to $5 million per fiscal year of the sums authorized to be appropriated under the section shall, at the Administrator's discretion, be provided to the Administrator of the National Oceanic and Atmospheric Administration (NOAA) to do water quality monitoring and ecosystem assessment in estuaries.

The Administrator, in cooperation with the Administrator of NOAA is required to submit a biennial report to Congress on the results of such monitoring and research. This report shall provide an assessment of the state and health of the Nations' estuarine zones to the extent evaluated; a discussion of pollution problems and trends in pollutant concentrations that have a direct or

indirect effect on water quality, the ecosystem, and designated or potential uses of each estuarine zone; and evaluation of pollution abatement activities and management measures implemented to determine the degree of improvement made toward restoring and maintaining the chemical, physical, and biological integrity.

The definition of estuaries includes associated aquative ecosystems and those portions of tributaries drained into the estuary up to the historic height of migration of anadromous fish or the head of tidal influence, whichever is higher. The definition was specifically included in this section to ensure that management conferences addressed problems created by the degradation of wetland areas or upstream diversions of water from tributaries draining into the estuary. The definition of "estuarine zone" in section 104(n)(4) continues to apply to other provisions of the Act.

PUGET SOUND

Senate bill

No comparable provision.

House amendment

The House amendment provides for the development of a comprehensive master plan for Puget Sound, Washington. Fifty percent grants are authorized for implementation of the plan.

Conference substitute

The conference substitute deletes this separate House provision and addresses Puget Sound in the National Estuary Program.

SAN FRANCISCO BAY

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator to study and develop information on the quality of San Francisco Bay, develop a master plan to reduce pollution loadings in the bay, and to make grants for implementation of the plan.

Conference substitute

The conference substitute deletes the separate House provision and addresses the San Francisco Bay in the National Estuary Program.

NEW YORK AND NEW JERSEY HARBOR AREA

Senate bill

No comparable provision.

House amendment

The House amendment authorizes EPA to assist in the study of environmental problems in the New York and New Jersey harbor areas, and to make 50 percent grants for implementation of plans to improve the area.

Conference substitute

The conference substitute deletes the separate House provision and addresses the New York and New Jersey Harbor area in the National Estuaries Program.

UNCONSOLIDATED QUATERNARY AQUIFER

Senate bill

No comparable provision.

House amendment

The House amendment provides that no person may locate or authorize the location of a landfill, surface impoundment, waste pile injection well or land treatment facility over the unconsolidated quaternary aquifer in New Jersey.

Conference substitute

The conference substitute adopts the House provision.

STORMWATER RUNOFF FROM OIL, GAS, AND MINING OPERATIONS

Senate bill

The Senate bill adds a new paragraph to section 403(1) of the Clean Water Act, specifically exempting certain stormwater runoff discharges from permit requirements and effluent limitations. Discharges from oil or gas exploration, production, processing, or treatment operations are covered by this provision. To be exempted, such discharges must be composed entirely of flow of precipitation, runoff from conveyances or systems of conveyances used for collecting and conveying such water. Such flows cannot be contaminated with process wastes, toxic pollutants, hazardous substances, or oil and grease. The Administrator shall determine what constitutes contaminated runoff for the purposes of this subsection.

House amendment

The House amendment provides that the Administrator shall not require a permit under section 402 or directly or indirectly require any state to require such a permit for discharges of stormwater run-off which (1) are from mining operations or oil gas exploration, production, processing, or treatment operations, (2) are composed entirely of flows from conveyances or systems of conveyances used for collecting and conveying precipitation run-off; and (3) do not come in contact with any overburden raw material, or product located on the site.

Any person discharging stormwater runoff described in the preceding sentence shall monitor the quality of water in such flows and shall report not less often than annually to the Administrator on the results of such monitoring.

Conference substitute

The conference substitute adopts the House provision, eliminating the separate monitoring requirement and adding a provision dealing with contamination by contact with raw materials or waste products based on the Senate bill.

The substitute provides that permits are not required where stormwater runoff is diverted around mining operations or oil and gas operations and does not come in contact with overburden, raw material, product, or process wastes. In addition, where stormwater runoff is not contaminated by contact with such materials, as determined by the Administrator, permits are also not required. With respect to oil or grease or hazardous substances, the determination of whether stormwater is "contaminated by contact with" such materials, as established by the Administrator, shall take into consideration whether these materials are present in such stormwater runoff in excess of reportable quantities under section 311 of the Clean Water Act or Section 102 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, or in the case of mining operations, above natural background levels.

ADDITIONAL PRETREATMENT OF CONVENTIONAL POLLUTANTS NOT REQUIRED

Senate bill

In cases where a publicly owned municipal treatment works is not able to meet the requirements of its permit because of operational, mechanical, or design failures, the Administrator should not require pretreatment of conventional pollutants by indirect discharges to allow the treatment works to meet the conditions of their permits. This provision does not modify or limit the Administrator's authority and obligation to promulgate pretreatment standards which regulate pollutants which interfere with a publicly owned treatment works. It does not affect a discharger's obligation to comply with Federal, State, and local pretreatment requirements. The Administrator's enforcement authorities against indirect dischargers or municipalities under the Act are not limited by this provision. Nor does it restrict a POTW from imposing any treatment conditions it chooses on its contributors.

House amendment

The House amendment provides that, in issuing a permit to a publicly owned treatment works, the Administrator shall not require additional pretreatment by any indirect discharger of conventional pollutants introduced into the treatment works as a substitute for inadequate pollution removal by the treatment works due to design or operation problems for which the treatment works is responsible. Indirect dischargers into the works must comply with all applicable pretreatment standards promulgated under the Federal Water Pollution Control Act. Nothing in this subsection affects the Administrator's authority under sections 307 and 309 of the Act, affects state and local authority under section 307(b)(1) (pretreatment programs) or section 510 (state authority to establish limitations on discharges or pollutants), relieves the treatment works from its obligations to meet requirements of the Act, or otherwise precludes the treatment works from pursuing whatever feasible options are available to meet its responsibility to comply with its permit.

Conference substitute

The conference substitute adopts the House provision.

PARTIAL NYPDES PROGRAM

Senate Bill

The Senate bill amends section 402 of the Clean Water Act to permit the Administrator of the Environmental Protection Agency to delegate a protion of the National Pollutant Discharge Elimination System program to a State under conditions.

A State would have two options. Under either option, the Governor must submit a plan to the EPA for approval. Such a plan must either show that the State is prepared to administer program components representing a significant part of the State program, and be prepared to make all reasonable efforts to assume administration of the total program within the ensuing five years, or the plan must provide for administration of a permit program for all of one or more discharge categories. Under this option, the plan must cover all categories of discharges and represent a complete permit program for all categories of discharges under the jurisdiction of the State.

In the event that a State wishes to return NPDES program administration authority to the Federal Government, or in the event the Administrator withdraws approval of a state-operated program, the entire program must be returned to the Federal Government.

House amendment

The House amendment amends section 402 of the Federal Water Pollution Control Act by adding new subsection (n). New subsection (n) allows partial delegation to the states of the Act's NPDES program. Under this provision, the Governor of a State may submit and the Administrator may approve a partial permit program for point source

discharges into the navigable waters of the State where the State's partial permit program covers, at a minimum, either administration of a major category of the discharges into the state's navigable waters or a major component of the state's NPDES permit program. With respect to a partial permit program covering administration of a major category of discharges, the Administrator is authorized to approve such a program if the program covers in a complete fashion all of the discharges under the jurisdiciton of a department or agency of the state and if the Administrator determines that the partial program represents a significant and identifiable part of the state's NPDES program. Under partial delegation and assumption, States with point source jurisdiction split among two or more State agencies could apply for all of the point sources under the jurisdiction of a single state agency. Upon approval, the State agency could assume full administration of all point sources within that agency's jurisdiction and responsibility. Such state agency could assume and administer its part of the total NPDES program regardless of whether other state agencies with jurisdiction over other parts of the total program assumed administration of their respective parts.

With respect to a partial and phased permit program covering a major component of the State's NPDES program, the Administrator is authorized to approve such a program if the Administrator determines that the partial program represents a significant and identifiable part of the State's NPDES program, such as all major industrial dischargers of all major municipal dischargers, and if the State submits and the Administrator approves a plan for the State to assume administration by phases of the remainder of the State's NPDES program within five years. Under partial and phased assumption, the State would be required to assume all of the program within the specified period of time, but it could do so by assuming some significant part of the program each year up to the end of the specified period.

A state may return or the Administrator may withdraw approval of delegated NPDES program responsibilities. In the case of an approved partial permit program covering administration of a major category of a state's point source discharges, the entire permit program related to that category and being administered by one of the state's departments or agencies must be returned or withdrawn.

Partial programs relating to other categories and being administered by other of the state's departments or agencies, if such is the case, may remain delegated. In the case of an approved partial and phased program covering administration of a major component of a state's NPDES program, any approved phased component must be returned or withdrawn.

Conference substitute

The conference substitute adopts the House amendment with regard to partial NPDES program approval and NPDES program return. Nothing in either provision confers authority to a State to return parts of a program approved prior to the date of enactment.

ANTI-BACKSLIDING

Senate bill

The Senate bill adds new subsections to section 303 and 402 which clarify the Clean Water Act's prohibition of backsliding on effluent limitations.

The amendment to section 402 makes explicit that where a permit limitation is based on section 402(a)(1)(B), that limitation may not be made less stringent because there has been a subsequently promulgated effluent guideline that would have resulted in less stringent effluent limitations had it been used as a basis for the permit. The proposed amendment states that best professional judgment (or) (BPJ) permits may not be made less stringent "solely" on the basis of a subsequent guideline.

Where the permittee can demonstrate that installation and adequate operation of treatment facilities has failed to achieve the permitted effluent limitation, limits in the new permit may reflect the level of control actually achieved, but shall not be less stringent than required by the effluent guidelines in effect at the time of permit issuance or renewal.

The amendment to section 402 also provides that, with respect to permits developed on the basis of water quality based effluent limitations under section 301(b)(1)(c) or section 303(d) or (e), permits may be renewed, reissued or modified on the basis of subsequently revised waste load allocation formulas (WLAs) but only if those WLAs are in compliance with new section 303(d)(5).

Under new paragraph (5)(A) where the applicable water quality standard has not been attained, the total maximum daily load of pollutants or other WLA may be revised only under two circumstances. First, the cumulative effect of the revised effluent limitations based on the total maximum daily loads or WLA must assure attainment of water quality standards. Second, the daily maximum load of pollutants or the WLA may only be revised if the designated use of the receiving waters which is not being attained is changed in accordance with the water quality standards regulations established under section 303.

Under paragraph (5)(B) of the new subsection, where water quality in the receiving waters exceeds or equals water quality standards or the levels needed to protect the actual or designated uses of the receiving waters, backsliding from water quality-based effluent limitations is prohibited except to the extent EPA or an approved NPDES state agency proceeds according to the procedures and applying the decision standard of the antidegradation policy established by section 303 of the Act (1984), and the proposed backsliding is found to be consistent with this antidegradation policy.

House amendment

The House amendment amends Section 402 of the Federal Water Pollution Control Act to provide that, except in specific limited circumstances, neither water quality based permits nor permits based on best professional judgment may be renewed, reissued, or modified to contain less stringent effluent limitations. Under the House amendment, the only situations in which a BPJ permit may be adjusted to contain less stringent effluent limitations are where there have been material and substantial alterations to the permitted facility, persuasive new information becomes available, good cause exists due to matters outside the permittee's control, a variance request has been filed, the permittee's operation and maintenance costs are disproportionately high, mistakes of fact or law were made, or the permittee has installed and properly operated and maintained required equipment and facilities but has nonetheless been unable to meet the permit limitations. For water quality based permits, these same situations applicable to BPJ permits may lead to less stringent effluent limitations in renewed, reissued, or modified permits, except for mistakes of fact or law. In no event under the House amendment may either BPJ or water quality based permits be renewed, reissued, or modified to contain less stringent limitations than required pursuant to applicable effluent guidelines, and in no event may a water quality based permit be changed in a way that would result in a violation of an applicable water quality standard. The House provision is effective for two and one-half years, beginning on date of enactment.

Conference substitute

The conference substitute combines concepts and provisions from both the Senate and House bills, while preserving the intent underlying both bills' provisions: to preserve pollution control levels achieved by dischargers by prohibiting the adoption of less stringent treatment or control limitations, standards, or conditions than those already contained in a permit, except in certain narrowly-defined circumstances.

The conference substitute prohibits the renewal, reissuance, or modification of BPJ and water quality based permits to contain less stringent effluent limitations, except as provided in the substitute. Best professional judgment permits may be adjusted if material and substantial alterations or additions to the permitted facility occurred after issuance of the permit which justify the application of a less stringent effluent limitation; information is available which was not available at the time the permit was issued (other than revised regulations, guidance, or test methods) and which would have justified the application of a less stringent effluent limitation at that time; the Administrator determines that technical mistakes or mistaken interpretations of law were made in issuing the permit; a less stringent effluent limitation is necessary because of events over which the permittee has no control and for which there is no reasonably available remedy; the permittee has received a permit modification under section 301(c), 301(g), 301(h), 301(i), 301(k), 301(n), or 316(a) of the Act; or the permittee has installed the treatment facilities required to meet the effluent limitations in the previous permit and has properly operated and maintained the facilities but has nevertheless been unable to achieve the previous effluent limitations.

For water quality based permits, all of the circumstances under which BPJ permits may be adjusted to reflect less stringent effluent limitations may also lead to the same result for water quality based permits, except for technical mistakes or mistaken interpretations of law.

For both BPJ and water quality based permits when the permittee has installed and properly operated required treatment facilities but has not been able to achieve the effluent limitations required in its permit, the permit's limitations may be adjusted, but never to a level less stringent than the level of pollutant control actually being achieved and never to a level less stringent than required by effluent guidelines in effect at the time of permit renewal, reissuance, or modification.

The conference substitute also provides that neither the new information exception—for both BPJ and water quality based

permits—nor the mistake of fact or law exception—for BPJ permits—allows permits to be adjusted to require less stringent effluent limitations with respect to any revised waste load allocation or any alternative grounds for translating water quality standards into effluent limitations, except in one narrow circumstance. Where the cumulative effect of a revised waste load allocation results in a decrease in the amount of pollutants being discharged into the waters covered by the allocation and the revised waste load allocation is not the result of a discharger eliminating or substantially reducing its discharge of pollutants due to complying with the requirements of the Clean Water Act or for reasons otherwise unrelated to water quality, then the two exception may be used to allow permit adjustments.

With respect to water quality based permits, in addition to justification based on the limited circumstances just described, the conference substitute also provides that permits developed on the basis of water quality based effluent limitations under section 301(b)(1)(c) or section 303(d) or (e), may be renewed, reissued or modified on the basis of subsequently revised waste load allocation formulas, only in compliance with new section 303(d)(4).

Under paragraph (5)(A) of subsection 303(d), where the applicable water quality standard has not been attained, the total maximum daily load of pollutants or other waste load allocation may be revised only under two circumstances. First, the cumulative effect of the revised effluent limitations based on the total maximum daily loads or waste load allocation must assure attainment of water quality standards. Second, the daily maximum load of pollutants or the waste load allocation may only be revised if the designated use of the receiving waters which is not being attained is changed in accordance with the water quality standards regulations established under section 303.

Under paragraph (5)(B) of the subsection, where water quality in the receiving waters exceeds or equals that required by applicable water quality standards or the levels needed to protect the actual or designated uses of the receiving waters, backsliding from water quality-based effluent limitations can only proceed according to the procedures and applying the decision standard of the antidegradation policy established by section 303 of the Act, and where the proposed backsliding is found to be consistent with this antidegradation policy.

The conference substitute establishes the general antibacksliding limitation that, with respect to both BPJ and water quality based permits, in no event may such a permit be renewed, reissued, or modified to contain an effluent limitation which is less stringent than required by effluent guidelines in effect at the time the permit is renewed, reissued, or modified. Similarly, in no event may such a permit to discharge into waters be renewed, reissued, or modified to contain a less stringent effluent limitation if the implementation of such limitation would result in a violation of an applicable water quality standard established under section 303 of the Clean Water Act.

Finally, the conference substitute requires the Administrator to study the extent to which States have reviewed, revised, and adopted water quality standards in accordance with section 24 of the Municipal Wastewater Treatment Construction Grant Amendments of 1981, and the extent to which modifications of permits issued under section 402(a)(1)(B) of the Federal Water Pollution Control Act for the purpose of reflecting any revisions to water quality standards should be encouraged or discouraged. The Administrator is required to submit a report on the study, together with recommendations, to Congress not later than two years after the date of the enactment of the Water Quality Act of 1986.

MUNICIPAL INDUSTRIAL STORMWATER DISCHARGES

Senate bill

The Senate bill includes an amendment providing that, prior to October 1, 1992, the Administrator or the State (in the case of a State with a permit program approved under section 402 of the Act) shall not require a permit for discharges composed entirely of stormwater, other than (a) those associated with industrial activity or a municipal separate storm sewer, or (b) those for which the Administrator or the State determines that the stormwater discharge violates a water quality standard or is a significant contributor of pollutants to waters of the United States; and providing for a report to Congress prior to October 1, 1988.

House amendment

The House amendment establishes procedures for the regulation of stormwater discharges. For the period ending December 31, 1989, EPA may not require a permit for discharges composed entirely of stormwater runoff unless the administrator determines in the case of a class or category of discharges that the class or category may be a significant contribution of pollutants or, in the case of an individual discharge, that it violates a water quality standard or is a significant contributor of pollutants.

All discharges from municipal separate storm sewers must be regulated through the permit program.

With regard to discharges from industrial sites, within one year EPA must promulgate regulations identifying the classes and categories for which permits are required. Not later than 6 months after the study of regulation of stormwater runoff required to be undertaken by EPA, then regulations must be revised as necessary to take into account the results of the study. The study is to be submitted to Congress not later than December 31, 1987.

Conference substitute

The conference substitute follows the Senate provision with respect to stormwater associated with industrial activities. The permit requirements of the Clean Water Act respecting such stormwater discharges are not affected by this amendment.

With respect to municipal separate stormwater discharges, the conference substitute temporarily prohibits the Environmental Protection Agency and States from requiring permits for certain municipal separate storm sewers for discharges composed entirely of stormwater, in order to provide a sufficient period of time to develop and implement methods for managing and controlling discharges from municipal storm sewers. The relief afforded by this provision extends only to October 1, 1992. After that date, all municipal separate storm sewers are subject to the requirements of sections 301 and 402.

Before October 1, 1992, relief from the permit requirement is afforded only to discharges composed entirely of stormwater. Storm sewers that discharge any other type of effluent or into which pollutants are introduced by means other than incidental to stormwater runoff are required to obtain a permit.

The conference substitute estabishes a schedule for developing necessary regulations and issuing permits for municipal separate storm sewers. Before the end of the four-year period beginning on the date of enactment, EPA and the States are to issue permits for all storm sewer systems serving a population of 250,000 persons or more. All permits for these systems are to be issued by the end of this four year period.

Beginning four years after enactment, EPA and the States are to issue permits for storm sewer systems serving a population of more than 100,000 persons and fewer than 250,000 persons. These permits are to be issued no later than six years from the date of enactment.

After October 1, 1992, the permit requirements of the Clean Water Act are restored for municipal separate storm sewer systems serving a population of fewer than 100,000 persons.

Subsection (o)(2)(B) requires that permits for municipal storm sewers contain a requirement to effectively prohibit non-stormwater discharges into storm sewers. Under this provision, all such permits must assure that such discharges are prohibited. The conference substitute does not specify the type of permit requirement to be used, but it does require that the permit requirement be effective in achieving prohibition of non-stormwater discharges.

Permits for discharges from municipal separate stormwater systems may be issued on a system or jurisdiction-wide basis. They must include a requirement to effectively prohibit non-stormwater discharges into storm sewers and controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and systems, design and engineering methods, and other provisions determined appropriate by the EPA or a State. These controls may be different in different permits. All the types of controls listed in subsection (o)(2)(C) are not required to be incorporated into each permit.

SEWAGE SLUDGE

Senate bill

Section 405 of the Clean Water Act is amended to establish a timetable for promulgation of toxic contaminant criteria for sewage sludge use and disposal, to establish a public health and environmental protection basis for these criteria, and to provide authority to implement and enforce criteria for toxic and other pollutants.

A new section 405(d)(2) requires the Administrator to identify by April 1, 1986, toxic pollutants which may be present in sewage sludge in concentrations which may affect public health or the environment. These toxic pollutants are those about which the Administrator currently has available information on the toxicity, persistence, concentration, mobility or potential for exposure on which to base use and disposal criteria. The criteria are to be promulgated by March 1, 1987. Toxic sludge contaminants not included on this list are to be identified by February 1, 1987, and criteria promulgated by December 15, 1987.

New section 405(d)(2)(C) requires compliance with these criteria within twelve months of their promulgation. If new pollution control technology must be constructed, the compliance deadline is extended to two years. In recognition of the fact that some compliance deadlines for toxic con-

taminants in the second phase of regulation may extend to late 1989, new section 405(d)(2)(E) requires the Administrator to impose permit conditions or to take other steps he deems necessary to protect against adverse effects from contaminated sludge prior to the promulgation of the required regulations.

Section 405(e) is amended to expand the applicability of the 405(d) sludge use and disposal regulations to "any person" and to broaden the scope of the section beyond publicly owned treatment works to include any treatment works treating primarily domestic sewage.

Because the current language of section 405 does not specifically define compliance mechanisms, a new subsection (f) is designed to provide for this by allowing the 405(d) guidelines to be imposed through the NPDES permit program under section 402 of the Clean Water Act, a comparable Federal permit program, or an approved State permit program. To be approved, a State's permit program must have substantive standards at least as stringent as those contained in the 405(d) guidelines. These alternative programs may be used when the Administrator determines that they will assure compliance with applicable requirements of section 405. New subsection (f)(2) authorizes EPA to issue a separate permit solely to impose section 405(d) requirments if the treatment works, such as a land treatment system, does not require a discharge permit under one of the authorities listed in subsection (f)(1) and is not covered by an appropriate State permit.

Section 405(d) guidelines that are incorporated into a Federal or State permit would be enforceable in the same manner as other permit provisions under the applicable statutory permit-issuance authority.

Notwithstanding the issuance of a permit that implements a section 405(d) guideline, the guideline itself would remain directly enforceable under sections 309 and 405(e) of the Act.

House amendment

The House amendment directs E.P.A. to identify toxic pollutants which may be present in sewage sludge. E.P.A. must publish regulations on acceptable management practices for sludge and establish numerical limitations for toxics in sludge. If numerical limitations are not feasible, E.P.A. may promulgate design, equipment, management practices, or operational standards.

The House amendment also authorizes E.P.A. to conduct studies, demonstration projects and public information projects designed to promote the safe and beneficial use of sewage sludge. E.P.A. may make grants to states and organizations and individuals to carry out this provision. To carry out the studies, demonstration projects and information projects, $15 million is authorized to be appropriated.

Conference substitute

The conference substitute combines the provisions of the Senate bill with those in the House amendment. It retains the original 1978 deadline for promulgation of sewage sludge regulations as in current law. The conference substitute also sets additional 1987 and 1988 deadlines for issuing these regulations. These new deadlines are intended to put EPA on a schedule to correct its failure to meet the 1978 promulgation deadline in section 405 and are not intended to excuse the Agency from its failure to meet the original deadline.

Similarly, the provision requiring periodic review and revision of sludge regulations is intended to allow for future changes in the regulations as technical knowledge increases. It is not intended to excuse the Agency from writing comprehensive regulations on the schedule required by the conference substitute. Agency officials informed the Congress over three years ago that there were at that time sufficient data to regulate comprehensively approximately twenty of the most common toxic sludge pollutants. The conferees intend these twenty to be regulated in the 1987 regulations.

The conference substitute directs the Agency to impose conditions in individual section 402 permits incorporating criteria and limitations on sludge use or disposal or take other appropriate measures to protect public health and the environment. This provision is intended to protect public health and the environment until the Agency implements the regulations required by paragraph (2). It does not substitute for sludge regulations, so compliance with this provision does not relieve the Agency of the need to comply with paragraph (2) for purposes of both regulating sludge use or disposal and granting removal credits.

The conference substitute modifies the Senate provision by deleting an exclusion of privately owned treatment works operated in conjunction with industrial manufacturing and processing facilities. Such treatment works are covered by the Conference substitute, and their sludge is to be regulated by the same criteria as sludge from publicly owned treatment works. Similarly, the Conference substitute regulates any treatment works treating domestic sewage, not just treatment works treating "primarily" domestic sewage.

Section 307(b)(1) of the Clean Water Act provides that a publicly owned treatment works may issue removal credits to industrial users so long as sludge use or disposal in accordance with regulations under section 405 is not prevented. However, in the absence of full 405 sludge regulations, twelve publicly owned treatment works (POTW's) have obtained EPA approval to grant removal credits, and the industrial users of these POTWs may have relied on EPA's approval in planning their pollution control systems. The U.S. Court of Appeals for the Third Circuit recently invalidated the regulations on which these credits were based in *Natural Resources Defense Council, Inc.* v. *U.S. Environmental Protection Agency*, No. 84-3530 (1986).

The conference substitute prevents temporary inequities that may arise regarding industrial users in these twelve cities. It stays the effect of that part of the court's decision which addresses section 405(d) for these twelve cities until August 31, 1987, the date established by subsection (d)(2)(A)(ii) for the promulgation of sludge regulations. This will allow these cities to issue removal credits, assuming all other criteria for removal credits are met. Similarly, the court's decision is stayed for up to fourteen cities which have applications to issue removal credits pending on the date of enactment and for which EPA approves a program to issue removal credits after the date of enactment and before August 31, 1987. This interim authority may not extend beyond August 31, 1987, and neither may the Agency approve any additional programs to issue removal credits until the regulations required by subsection (d)(2(A)(ii) are published. Pursuant to subsection (d)(4), the Agency should revise the permits for these cities to incorporate the sludge criteria required by this subsection.

The court's decision is stayed only with respect to that part of the decision relating to the promulgation of regulations under section 405(d). Other bases used by the Court for invalidating the removal credit program regulations are not affected by this subsection.

Section 304(h) of the Clean Water Act requires the Administrator to promulgate guidelines establishing test procedures for the analysis of pollutants. These guidelines have been published. In light of the subsequent enactment of the Water Quality Act of 1986 the Administrator should revise the section 301(h) guidelines to include procedures for testing for regulated pollutants in sewage sludge. Promulgation of these procedures should not delay promulgation of the regulations required by section 405(d)(2), as amended.

The purpose of removal credits under section 307(b)(1) is to allow reduced pretreatment requirements on the basis of treatment consistently achieved by the particular publicly owned treatment works. Evaporation into the air of toxic volatile organic chemicals does not constitute treatment of these pollutants. Consequently, removal credits cannot be issued for such pollutants on the basis of their evaporation from treatment works.

In making grants under subsection (g) the Administrator may assist projects related to incineration of sludge.

LOG TRANSFER FACILITIES

Senate bill

The Senate bill provides that not later than October 12, 1985, the Administrator and the Secretary of the Army shall enter into an agreement to designate a lead agency and to process permits required under section 402 and section 404 of the Act, where both sections apply, for discharges associated with the construction and operation of log transfer facilities.

House amendment

The House amendment sets forth a regulatory procedure for log transfer facilities which are required to have a permit under both section 402 and section 404. Where a section 404 permit (discharge of dredged or fill material) has been obtained EPA is to determine, after opportunity for a public hearing, whether the section 404 permit satisfies other requirements of the act. If this is the case, a section 402 permit (discharges of pollutants) need not be applied for. If EPA determines that these other requirements are not satisfied, EPA proposes permit modifications to the Secretary of the Army. If the modifications are not made, then EPA requires that a section 402 permit be obtained.

Conference substitute

LOG TRANSFER FACILITIES

The conference substitute adopts the Senate provision, with modifications.

The Memorandum of Agreement between the Department of the Army and the Environmental Protection Agency contemplated by this section was entered into on October 22, 1985. This agreement represents a promising high degree of early and continuing cooperation between the agencies and the private sector and a proper reliance on their joint efforts in developing Alaska Timber Task Force log transfer facility guidelines. The terms and conditions of permits subject to this section are to be implemented and enforced in accordance with the appropriate statutory authority of the respective federal agencies.

AUDITS

Senate bill

No comparable provision.

House amendment

The House amendment provides that for the purpose of carrying out audits and examinations with respect to recipients of Federal assistance under the Act, the Administrator is authorized to enter into non-competitive procurement contracts with state audit organizations. These contracts may only be entered into to the extent and in such amounts as may be provided in advance in appropriations Acts.

Section 501(d) of the Act provides that the Administrator and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access, for the purpose of audit and examination, to any books, documents, papers, and records of the recipients that are pertinent to the grants received under the Act. The purpose of the amendment is to clarify EPA's authority to negotiate contracts with state audit organizations rather than seeking competitive bids.

Conference substitute

The conference substitute is substantially the same as the House amendment. It authorizes EPA to enter into contracts with independent State audit organizations consistent with the Single Audit Act.

COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS

Senate bill

No comparable provision.

House amendment

The House amendment amends the definition of "State" in section 502 and "United States" in section 311 to include the Commonwealth of the Northern Mariana Islands. Since the Act was last reauthorized in 1977, a portion of the Trust Territory of the Pacific Islands has been redesignated as the Commonwealth of the Northern Mariana Islands. Amending the definitions of the terms "State" and "United States" to include the Northern Marianas reflects the new status of the Commonwealth.

Conference substitute

The conference substitute adopts the House provision.

AGRICULTURAL STORMWATER DISCHARGES

Senate bill

No comparable provision.

House amendment

The House amendment amends section 502(14) of the Federal Water Pollution Control Act to provide that the term "point source" of pollution does not include agricultural stormwater discharges.

Conference substitute

The conference substitute adopts the House amendment.

PROTECTION OF INTERESTS OF THE UNITED STATES IN CITIZEN SUITS

Senate bill

The Senate bill modifies the citizen suit provision of the Act to provide that the Attorney General and the Administrator of EPA must be notified when such a suit is commenced and to provide that no consent judgment shall be entered in an action brought under this section on which the United States is not a party prior to 45 days following the receipt of a copy of the proposed consent judgment by the Administrator and Attorney General.

House amendment

The House amendment is similar to the Senate bill, but also provides that no judgment in any action to which the United States is not a party may be binding on the United States.

Conference substitute

The conference substitute adopts the Senate provision.

JUDICIAL REVIEW AND AWARD OF FEES

Senate bill

The Senate bill revises the provisions of section 509 of the Clean Water Act governing judicial review of certain actions of the Administrator of EPA and provides for the awarding of costs of litigation in actions brought pursuant to section 505 or 509 to prevailing or substantially prevailing parties.

The purpose of the changes in section 509(b)(1) is to clarify the proper venue for court of appeals review of certain actions of the Administrator under the Clean Water Act and to extend the period within which an application for review of such actions must be filed from ninety to one hundred and twenty days.

The Senate bill provides that proper venue for judicial review under section 509 of the Act shall be in the Circuit Court of Appeals of the United States for the Federal judicial district in which the applicant resides or transacts business which is directly affected by the action in question.

The Senate bill changes from ninety to one hundred and twenty days the period within which an application under section 509 of the Act for judicial review of an action must be made.

The Senate bill establishes a random selection procedure, to be administered by the Administrative Office of the United States Courts, to determine in an orderly fashion the court of appeals in which an agency action is to be reviewed when applications for review have been filed in two or more courts of appeals. Following the selection of a court of appeals, other courts in which applications have been filed are directed to promptly transfer such applications to the court in which the agency record has been filed. Notwithstanding the outcome of the random selection procedure, any court in which an application has been filed would retain the power to transfer the application to any other court of appeals for the convenience of the parties or otherwise in the interest of justice. The court of appeals would be given the power to award costs of litigation to a prevailing or substantially prevailing party when such an award is appropriate.

The Senate bill limits the award of costs of litigation in citizen's suits under section 505(d) of the Act to prevailing or substantially prevailing parties.

Section 509(b)(3)(B), as amended, provides new authority for any court of appeals to grant a temporary stay of the effective date of a final agency action pending selection of the court of appeals in which the action will be reviewed.

House amendment

No comparable provision.

Conference substitute

The conference substitute adopts the Senate provisions.

INDIAN TRIBES

Senate bill

The bill amends title II of the Clean Water Act to accord Indian tribes assistance in the development and implementation of wastewater treatment facilities, including a one-year study of sewage treatment needs of Indian lands. Beginning in fiscal 1987, the section authorizes the use of up to one-half of one percent of the construction grants program for grants to Indian tribes to address unmet needs identified by the Administrator's report. This section also adds a definition of Indian tribes to the definitions contained in section 502 of the Act.

Title II of the Act is amended to direct the Administrator of the Environmental Protection Agency to conduct a study, in coordination with the Director of Indian Health Services, Department of Health and Human Services, to assess sewage treatment needs to serve Indian tribes. Additionally, this study will identify the degree to which such needs will be met through funds allotted to States under the construction grants program, and identify any obstacles which may prevent these needs from being met. Within one year of the date of enactment of the Clean Water Act amendments of 1985, the Administrator is directed to submit such report to Congress.

The Act is further amended to make tribes eligible, beginning in fiscal 1987, for direct EPA construction grants to address unmet needs identified in the Administrator's report to Congress. The Administrator is authorized to treat Indian tribes as States to the degree necessary to allot funds for sewage treatment needs, and is authorized to waive, where necessary, the non-Federal cost-sharing requirement, consistent with the trust responsibility and relationship which exists between tribal governments and the Federal Government.

Finally, this provision adds to the Act a definition of Indian tribes specifying that, for the purposes of the Clean Water Act, the Indian tribes to be covered by the provisions of this section include any Indian tribe, band, nation, or other organized group or community, including an Alaska Native village, which is recognized as eligible for the special programs and services provided by the United States. The definition does not include Alaska Native regional or village corporations, which are organized for other purposes.

House amendment

The House amendment contains a similar provision, except the Administrator is authorized to treat Indians as States under sections 104, 106, 303, 305, 308, 309, 314, 319, 402, and 404 of the act in addition to title II. The House amendment also contains a different definition of Indian tribes and establishes a setaside of ½ of 1 percent as a floor rather than a ceiling (as contained in the Senate bill).

Conference substitute

The conference substitute adopts the House amendment with modifications. Generally, the Conferees intend that to the extent to which the Administrator treats an Indian tribe as a State for purposes of this Act, such Indian tribe shall also be subject to the various provisions of the Act, such as section 101(g), which generically defines the regulatory reach of the Act. Further, with respect to section 101(g), the conference substitute adds explicit statutory recognition that the Indian tribes provisions do not in any way alter the requirements of section 101(g), and that Indian tribes are to be considered as States for the purposes of section 101(g).

The conference substitute also includes specific provisions related to the authority

of Indian tribes to exercise authority under section 303.

The conference substitute directs EPA, in consultation with Indian tribes, to promulgate regulations which specify how Indian tribes shall be treated as States for the purposes of the Act. EPA is also directed in promulgating these regulations to consult affected States sharing common water bodies and provide a mechanism for the resolution of any unreasonable consequences that may arise as a result of differing water quality standards that may be set by States and Indian tribes located on common bodies of water. The conference substitute also provides for the explicit consideration of relevant factors in the dispute resolution mechanism, including but not limited to the effects of differing water quality permit requirements on upstream and downstream dischargers, economic impacts, and present and historical uses and quality of the waters subject to such standards.

The Conferees also considered the question of the judicial review of water quality standards adopted by Indian tribes. The Conferees intend that the Agency's final action on a water quality standard adopted by an Indian tribe governing body pursuant to this section shall be subject to judicial review in the same manner and to the same extent as water quality standards adopted by States under this Act. However, the Congress does not intend to affect the outcome of pending litigation. Additionally, during the pendency of a judicial appeal, nothing in this provision shall be construed to enlarge, diminish or otherwise affect the authority of a tribal government which is a party to the appeal to set and enforce its own standards within and on land and water in its jurisdiction.

The conference substitute includes a section related to the application of the Indian tribes provision to Alaska Native organizations. It confirms that no provision of the Act shall be construed to have any effect on the scope of governmental authority, if any, of any Alaska Native organization (including any regional or village corporation) over lands or persons in Alaska. Additionally, the conference substitute provides that no provision of the Act shall be construed to create or validate any assertion by such organization or any form of governmental authority over lands or persons in Alaska. Finally, it provides that no provision of the Act shall affect any assertion that Indian country, as defined in section 1151 of Title 18, United States Code, exists or does not exist in Alaska.

The conferees intend that any Indian tribe be eligible for grant assistance under subsection (c) of this section, regardless of whether a tribe is treated as a State under subsection (d).

In allocation of funds under subsections (c) and (f), the Administrator shall consider the needs of tribes and the seriousness of the water quality problems to be addressed.

The Administrator, in cooperation with the Director of the Indian Health Service, may assist Indian tribes in development of waste treatment management plans and construction of treatment works.

This section does not override the provisions of the Maine Indian Claims Settlement Act (25 U.S.C. 1725). Consistent with subsection (h) of the Settlement Act, the tribes addressed by the Settlement Act are not eligible to be treated as States for regulatory purposes under subsection (d) of this provision. In addition, consistent with subsection (i) of the Settlement Act, such tribes are eligible for funds reserved under subsections (c) and (f) of this provision.

DEFINITION OF POINT SOURCE

Senate bill

No comparable provision.

House amendment

The House amendment provides that "point source" includes a leachate collection system, other than a leachate collection system used for agricultural purposes.

Conference substitute

The conference substitute adopts the House amendment which is intended to clarify existing law.

SPECIAL PROVISIONS REGARDING CERTAIN DUMPING SITES

Senate bill

No comparable provision.

House amendment

No comparable provision.

Conference substitute

The conference agreement amends title I of the Marine Protection Research and Sanctuaries Act of 1972 and prohibits issuance of any new permit to noneligible authorities (those not presently permitted to use the N.Y. Bight), to dump or transport municipal sludge within the New York Bight Apex. In addition, no permit may be issued or renewed to anyone other than an eligible authority to dump or transport municipal sludge within the 106-mile Ocean Waste Dump Site designated by E.P.A.

OCEAN DISCHARGE RESEARCH PROJECT

Senate bill

No comparable provision.

House Amendment

The House amendment authorizes EPA to issue a research permit to Orange County, CA, for the discharge of preconditioned sludge into the ocean for the purpose of enabling research to be conducted on the effects of disposing sewage sludge in ocean waters. The permit term is for a period of 5 years, and results of monitoring activities must be transmitted to Congress every 6 months. The permit is to be terminated at any time EPA determines that an unacceptable adverse impact on fish, shellfish and wildlife is occurring.

Conference substitute

The conference substitute is the House provision with the following changes. A requirement is added that, in order for the permit to be issued, the Administrator must determine that the permit would meet the requirements of section 301(h)(2) and the sentences after paragraph (9) of that subsection. These requirements include demonstrating that the permit will not interfere with the attainment or maintenance of water quality which assures protection of public water supplies, the protection and propagation of a balanced indigenous population of shellfish, fish and wildlife and allows recreational activities in and on the water. In addition, the discharge must occur where there is strong tidal movement and other hydrological and geological characteristics which will allow compliance with the goals of this Act and section 301(h)(2).

The permit shall be for a period of five years commencing on the date of the discharge and cannot be extended or renewed.

Monitoring will include whole effluent monitoring—the monitoring of all of the constituents of the discharge—and bioassay methodology testing.

The facts and circumstances involved present a unique situation which is not to establish a precedent for the relaxation of the requirements of the Federal Water Pollution Control Act applicable to similarly situated discharges.

The provision on termination of the permit is modified to allow the Administrator to terminate the permit if there has been a decline in ambient water quality of the receiving waters during the period of the permit even if a cause and effect relationship cannot be shown.

SAN DIEGO, CALIFORNIA

Senate bill

No comparable provision.

House amendment

The House amendment addresses the problems facing the economy, public health, environment, surface water, public beaches, and water quality of the city of San Diego, California, and surrounding area, which are endangered and are being polluted by raw sewage emanating from the city of Tijuana, Mexico.

The House amendment provides that, upon approval of the necessary plans and specifications, the Administrator is authorized to make grants to the Secretary of the Army, acting through the Chief of Engineers or any other Federal agency or any other appropriate commission or entity designated by the President. Such grants shall be for construction of a project consisting of treatment works in the city of San Diego, California, to provide primary or more advanced treatment of municipal sewage and industrial waste from the city of Tijuana, Mexico, and a publicly owned treatment works in the city to provide primary or more advanced treatment of municipal sewage and industrial waste for the city of San Diego as may be necessary to meet the objectives of the Federal Water Pollution Control Act.

The House amendment provides that upon application of the city of San Diego, the Administrator may issue a permit under section 402 of the Federal Water Pollution Control Act which modifies the requirements of section 301(b)(1)(B) of such Act to permit the discharge of pollutants for any ocean outfall constructed with Federal assistance under this Act if such pollutants have received primary or more advanced treatment. Any permit issued pursuant to this subsection shall not be effective after December 31, 1993.

Conference substitute

The conference substitute modifies the House amendment. Construction grants are authorized for the construction of defensive waste treatment works to protect the residents of the city of San Diego, California, and surrounding areas from pollution resulting from any inadequacies or breakdowns in wastewater treatment works and systems in Mexico. Grants are also available to provide primary or more advanced treatment of municipal sewage and industrial waste from Mexico; however, such grants are available only if the Administrator determines that treatment works in Mexico, in conjunction with any defensive treatment works constructed under this or any other act, are not sufficient to protect the residents of the city of San Diego, California, and surrounding areas from water pollution originating in Mexico.

In addition, the conference agreement provides that the Commission or such other agency, commission, or entity as may be des-

ignated under subsection (b) is authorized to operate and maintain any treatment works constructed under the subsection.

If treatment works are constructed to protect San Diego and surrounding areas from pollution originating from Mexico, and those treatment works are no longer needed for that purpose, the city may use the treatment works to treat municipal and individual waste generated by San Diego and surrounding areas, provided the city agrees to pay the United States 45% of the treatment works construction costs.

LIMITATION ON DISCHARGE OF RAW SEWAGE BY NEW YORK CITY

Senate bill

The bill contain provisions which limit the volume of raw sewage discharged by the city of New York. The limitations apply to the drainage areas of two sewage treatment plants currently under construction, North River in Manhattan and Red Hook in Brooklyn.

Raw discharges from the North River drainage area will be limited after August 1, 1986, if the North River plant has not achieved advanced preliminary treatment by that deadline, as required by a consent decree signed on December 29, 1982 by the United States, the State of New York, and the City of New York. The raw discharge in any 30 day period may not exceed 30 times the average daily raw discharge during a specific one year base period. The base period is the year ending on March 15, 1986, or on the date the plant becomes operational, whichever is earlier.

Raw discharges from the Red Hook drainage area will be similarly limited, except that the deadline and the base period are one year later than for the North River drainage area.

The Administrator shall waive these limitations if an increased discharge constituting a violation is caused by certain events, but only to such extent and for such limited period of time as the Administrator determines to be necessary to take into account the event. These events include an interruption in plant operation due to circumstances beyond the control of New York City, and precipitation. In addition, a waiver shall be granted in the event that a violation is due to a random or seasonal variation in flow, and that any sewer hookup occurring or permit granted after July 31, 1986, for North River and July 31, 1987, for Red Hook is not responsible for such violation.

The Administrator is also required to extend either deadline if necessary to account for circumstances beyond the control of New York City. A deadline may not extended on the basis of a lack of Federal funding under section 201 of the Federal Water Pollution Control Act, a lack of New York State or New York City to delay the achievement of advanced preliminary treatment.

For enforcement purposes, violations of the discharge limitations are to be treated as violations of section 301 of the Federal Water Pollution Control Act. If the Administrator makes a determination that a violation has occurred and that there is no basis for a waiver or deadline extension, the Administrator must start an enforcement action under section 301 within another 30 days.

This section states that it is the sense of the Congress that the Administrator should not agree to any further modification of the consent decree with respect to the schedule for achieving advanced preliminary treatment.

Under a "sunset" provision, any limitations remain in effect in a drainage area until the treatment plant for that area has achieved advanced preliminary treatment for six consecutive months.

The Administrator is responsible for performing all flow monitoring needed to determine the discharge limitations. The Administrator must, by July 31, 1986, for North River and July 31, 1987, for Red Hook, establish the methodologies and collect any information necessary for making determinations whether a waiver or deadline extension will be required. If the Administrator detects a violation, the Administrator must determine within 30 days whether a waiver or deadline extension is required. New York City is responsible for providing any additional information requested by the Administrator in order to make this determination.

House amendment

Substantially the same as the Senate bill.

Conference substitute

The conference substitute adopts the House amendment which is nearly identical to the Senate bill.

OAKWOOD BEACH AND RED HOOK PROJECTS, NEW YORK

Senate bill

No comparable provision.

House amendment

The House amendment provides that, notwithstanding any provision of the Federal Water Pollution Control Act, the Administrator of the Environmental Protection Agency shall pay, to the extent provided in appropriation Acts, in the same proportion as the Federal share of other project costs, all expenses for the relocation of facilities for the distribution of natural gas with respect to the entire wastewater treatment works known as the Oakwood Beach (EPA Grant Number 360932) and Red Hook (EPA Grant Number 360394) projects, New York.

Conference substitute

The conference agreement adopts the House amendment and changes the fiscal year to 1986, while authorizing $7,000,000.

BOSTON HARBOR AND ADJACENT WATERS

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator to make grants to the Massachusetts Water Resource Authority for purposes of assessing the principal factors having an adverse effect on the environmental quality of Boston Harbor and its adjacent waters, developing and implementing a management program to improve the water quality of such Harbor and waters, and constructing necessary wastewater treatment works for providing secondary treatment for the areas served by such authority.

Conference substitute

The conference substitute adopts the House amendment and adds authority for the Administrator to make grants for emergency improvements to the Deer Island Waste Treatment Plant in Boston, Massachusetts. A total of one hundred million dollars is authorized for fiscal years beginning after 1986, to remain available until expended.

DEER ISLAND TREATMENT PLANT, MASSACHUSETTS

Senate bill

No comparable provision.

House amendment

The House amendment authorizes and directs the Administrator of the Environmental Protection Agency to make grants to the Metropolitan District Commission, Massachusetts, for a project to undertake emergency improvements at the Deer Island Waste Water Treatment Plant in Boston, Massachusetts.

Conference substitute

The conference substitute incorporates the House amendment in the provision on Boston Harbor, at a total authorization of $100 million.

WASTEWATER RECLAMATION DEMONSTRATION

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator of the Environmental Protection Agency to make a grant to the San Diego Water Reclamation Agency, California, to demonstrate and field test for public use innovative processes which advance the technology of wastewater reclamation and which promote the use of reclaimed wastewater.

Conference substitute

The conference substitute adopts the House amendment and authorizes $2,000,000 for the San Diego, California, Water Reclamation Agency. The Federal share of grants made to the agency shall be 85% of the costs of conducting demonstration and field testing.

DES MOINES, IOWA

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator of the Environmental Protection Agency to make a grant to the City of Des Monies, Iowa, for construction of the Central Sewage Treatment Plant component of the Des Moines, Iowa, metropolitan area project.

Conference substitute

The conference substitute adopts the House amendment and authorizes $50,000,000 to provide a 757 grant for the construction of the treatment plant.

STUDY OF REGULATION OF DE MINIMIS DISCHARGES

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator to study the feasibility and desirability of eliminating the regulation of discharges of pollutants into the navigable waters in amounts which, in terms of volume, concentration, and type of pollutant, are not significant.

Conference substitute

The conference substitute adopts the House amendment with modifications to direct a study of discharges of pollutants to determine whether or not there are discharges in amounts which, in terms of volume, concentration, and type of pollutant, are not significant, and to determine the most effective and appropriate methods of regulating such discharges.

STUDY OF EFFECTIVENESS OF INNOVATIVE AND ALTERNATIVE PROCESSES AND TECHNIQUES

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator of the Environmental Protection Agency to study the effectiveness on waste treatment of innovative and alternative wastewater treatment processes and techniques which have been utilized in treatment works constructed under the Act.

Conference substitute

The conference substitute adopts the House amendment, modifying the deadline for submission of the Administrator's report from two years to one year after date of enactment of this Act.

STUDY OF TESTING PROCEDURE

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator to study the testing procedures for analysis of pollutants. The Administrator is also directed, biennially after the date of submission of the report on testing procedures, to conduct a state-of-the-art review of the testing procedures for the analysis of pollutants for the purpose of determining the adequacy and effectiveness of such procedures and, based on the results of such review, to submit to the Committees recommendations for modifying testing procedures to improve their effectiveness.

Conference substitute

The conference substitute adopts the House provision. The study and biennial review of test procedures established under section 304(h) should include test procedures for pollutants in sewage sludge.

STUDY OF PRETREATMENT OF TOXIC POLLUTANTS

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator of the Environmental Protection Agency to conduct a study and make a report with recommendations concerning a number of pretreatment-related issues.

The Administrator is directed to study the adequacy of data on environmental impacts of toxic industrial pollutants discharged through publicly owned treatment works; the extent that secondary treatment by these treatment works removes toxic pollutants; the capability of publicly owned treatment works to grant pretreatment removal credits authorized under section 307(b)(1) of the Federal Water Pollution Control Act; posssible alternative regulatory strategies for protecting the operations of publicly owned treatment works from industrial discharges, including an evaluation of how effective each strategy might be in achieving the goals of the Water Pollution Control Act and the Federal Water Pollution Control Act, and the adequacy under each of the strategies studied of Federal, state and local resources to establish, implement, and enforce multiple pretreatment limits for toxic pollutants.

Conference substitute

The conference substitute adopts the House provision, modified to assure that issues related to contamination of sewage sludge are included in the study for each identified alternative regulatory strategy. The study shall be completed within four years.

STUDIES OF WATER POLLUTION PROBLEMS IN AQUIFERS

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator in conjunction with State and local agencies to conduct studies of a number of aquifers for the purpose of identifying point and nonpoint sources of pollution and identifying measures necessary to control such pollution.

Conference substitute

The conference substitute includes a provision authorizing the Administrator of the Environmental Protection Agency to conduct studies of ground water quality problems for seven aquifers or areas of underground water supply. In addition to those aquifers originally identified in the House amendment, the areas include the northwestern portion of Connecticut including all or portions of Litchfield, Hartford, Fairfield, Tolland and New Haven counties. The conference substitute includes a one-time authorization of $7,000,000 to conduct such studies.

GREAT LAKES CONSUMPTIVE USE STUDY

Senate bill

No comparable provision.

House amendment

The House amendment authorizes EPA to conduct a study of control measures which can be implemented to reduce the quantity of Great Lakes water consumption.

Conference substitute

The conference substitute modifies the House amendment to provide that the Corps of Engineers and EPA must conduct a study of the effects of Great Lakes water consumption on economic growth or environmental quality in the Great Lakes region. The section authorizes $750,000.

The consumptive use study is to be responsive to the findings in the 1985 report of the International Joint Commission and is not to imply an immediate need for far reaching water conservation requirements. The 1985 report of the IJC indicated, among other things, the uncertainty of consumptive use estimates. Thus, the conferees recognize the need for improving data on water use trends.

SULFIDE CORROSION STUDY

Senate bill

No comparable provision.

House amendment

The House amendment provides that, in order to protect the Federal and other investment in treatment works, the Administrator shall conduct a study of the problem of the corrosive effects of sulfides in collection and treatment systems, the extent to which the uniform imposition of categorical pretreatment standards will exacerbate this problem, and the range of available options to deal with the effects. The required study is to be conducted in consultation with the Los Angeles City and County sanitation agencies which have observed examples of corrosion, probably caused by sulfides.

Conference substitute

The conference agreement adopts the House amendment with the authorization reduced from $2 million to $1 million.

STUDY OF RAINFALL INDUCED INFILTRATION INTO SEWER SYSTEMS

Senate bill

No comparable provision.

House amendment

The House amemdment directs the Administrator to study problems associated with rainfall induced infiltration into wastewater treatment sewer systems. The study shall include an examination of methods to regulate such infiltration into the sewage system of the East Bay Municipal Utility District, California.

Conference substitute

The conference substitute adopts the House amendment as modified.

DAM WATER QUALITY STUDY

Senate bill

No comparable provision.

House amendment

The House amendment directs the administrator, in cooperation with State and Federal agencies, to study and monitor the effects impoundment and discharge of water by dams have on water quality.

Conference substitute

The conference substitute is the House provision as modified.

LAKE PEND OREILLE STUDY

Senate bill

A comprehensive water quality investigation of the Clarks Fork/Lake Pend Oreille system in Idaho and Montana is authorized to identify sources of pollution and the remedial measures necessary to protect and enhance the water quality of this important resource. The Clarks Fork/Pend Oreille system is a primary feature of the environment of northern Idaho, western Montana and eastern Washington.

House amendment

Contains a similar provision.

Conference substitute

The conference substitute adopts the Senate language but broadens the area of the study to include the Clark Fork River and its tributaries in the States of Idaho, Montana, and Washington.

RESERVATION OF FUNDS FOR INTERSTATE SANITARY COMMISSION

Senate bill

No comparable provision.

House amendment

The House amendment amends section 205(g)(1) by adding a provision that the Administrator shall reserve each fiscal year beginning after September 30, 1985, $900,000 from the sums available to the State of New York under the subsection for such fiscal year, $900,000 from the sums available to the State of New Jersey under the subsection for such fiscal years and $200,000 from the sums available to the State of Connecticut under the subsection for such fiscal year. These sums shall be used by the Administrator to make a grant for each such fiscal year to the Interstate Sanitation Commission established by these States by interstate compact to carry out the functions of such Commission under the Federal Water Pollution Control Act.

Conference substitute

The conference substitute drops the House amendment.

GRANTS FOR PROTECTING GROUNDWATER QUALITY

Senate bill

No comparable provision.

House amendment

The House amendment authorized a new grant program to assist States in carrying out groundwater protection activities which the Administrator determines will advance the State toward implementation of an approved comprehensive nonpoint source pol-

lution control program. Not more than $7.5 million is authorized to be appropriated for each of fiscal years 1985 through 1990 to assist States with research, planning, groundwater assessments, demonstration programs, enforcement, technical assistance, education and training to protect groundwater quality and prevent contamination. Not more than $150,000 may be appropriated to any one State in any one fiscal year. The Federal share of activities eligible for grants would be 50 percent.

Conference substitute

The House provision was included in slightly modified form in the conference susbstitute as part of the new program for management of nonpoint source pollution in section 319 of the Act.

RESERVATION FOR INVESTIGATIONS AND AUDITS

Senate bill

The Senate bill contains no provision.

House amendment

The House amendment contains a provision reserving one-quarter of one percent of any amount appropriated pursuant to section 207 of the Act for carrying out audits and investigations.

Conference substitute

The conference substitute deletes the House provision.

INTERSTATE DISPUTE RESOLUTION

Senate bill

The bill amends section 402 of the Clean Water Act to require the Administrator to finally decide disputes between States as to whether a discharge for which one State proposes to issue a permit will cause or contribute to a substantial violation of water quality requirements or adversely affect public health in another State. Under current law, a State whose waters may be affected by the issuance of a permit in another State may submit recommendations to the permitting State. If those recommendations are not accepted by the permitting State, the Administrator may object to the issuance of the permit.

The Senate bill requires the Administrator to decide the merits of such a dispute. Where the permitting State fails to accept the recommendations of the downstream State, the Administrator shall determine whether any substantial violation of a water quality requirement (including any standard) or adverse effect on public health of the downstream State would result from the issuance of the permit. If so, the Administrator must object to the issuance of the permit or provide specific modifications to the permit. Any determination by the Administrator under this provision would constitute the issuance or denial of a permit and would be subject to judicial review under section 509(b).

In addition to the procedure established for resolving disputes over proposed permits, the bill requires that a permit which is in effect shall be reconsidered for termination or modification when a downstream State provides notice that the permitted discharge is causing a substantial violation of a water quality requirement (including any standard) or adversely affecting the public health of such State and seeks a modification of the permit. Then, in the permit proceeding to terminate, or modify, or reissue the permit, the affected State may make recommendations which, if not accepted, would be subject to the new dispute resolution provision proposed in the Senate bill.

A new section 511(e) is added by the bill, providing a new method of resolving disputes between States over the effects of activities in one State on the water quality of another State. The provision is intended to address sources of pollutants not covered by permits, and therefore not subject to the interstate dispute resolution mechanism proposed for inclusion in section 402. Under section 511(e) a State or municipality which alleges that its water quality is being adversely affected by pollutants from another State may petition the Administrator. The Administrator must then determine on the record, after a hearing under the Administrative Procedures Act, whether such pollution is causing a substantial violation of a water quality requirement (including any standard) of the downstream State or adversely affecting the public health of such State.

If the Administrator so determines, the Administrator must issue an order within 90 days restraining any permit causing or contributing to such pollution or providing such other relief as is appropriate, taking into account the goals and requirements of the Clean Water Act and other equitable considerations. Such an order is judicially reviewable.

In no case shall orders or other relief based solely on amendments proposed to section 511 supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees, or State water laws. This new subsection does not apply in any case in which the new disputes resolution provisions in the Senate amendments to section 402 are available, nor to any pollution which is subject to the Colorado River Salinity Control Act of 1974, nor to any water pollution which results from emissions from mobile or stationary sources which are regulated under the Clean Air Act.

House amendment

No comparable provision.

Conference substitute

The conference substitute deletes the provisions in the Senate bill.

PRESERVATION OF OTHER RIGHTS

Senate bill

The bill amends section 505 of the Clean Water Act, the citizen suit provisions, to clarify that nothing in the Act displaces, preempts, or limits the ability of any person injured by noncompliance with any Clean Water Act requirement or permit to seek damages under other Federal statutes. In addition, new subsection (e)(3) provides that States or municipalities may bring actions involving State law, in cases involving water pollution arising in another State, in Federal district court, in either the State bringing the action or the State in which the cause of action arose.

House amendment

The amendment contains a provision substantially the same as the Senate bill with respect to suits for damages under other Federal statutes but does not have a provision comparable to the treatment of States and municipalities as citizens.

Conference substitute

The conference substitute contains no comparable provision.

RELATIONSHIP TO OTHER LAWS

Senate bill

No comparable provision.

House amendment

The amendment provides that discharges from a deepwater port or a vessel within a deepwater port safety zone which are subject to the Deepwater Port Act are not also subject to the liability and penalty provisions of the Water Pollution Control Act.

Conference substitute

The conference substitute deletes Section 31 of the House bill solely in order to address the matter on the more appropriate context of comprehensive oil spill legislation. This section's purpose is to remove the current confusion over what liability and penalty provisions apply to deepwater port licenses and owners or operators of vessels within deepwater port safety zones. Presently, there is the potential for dual liability under Section 311 of the FWPCA and Section 18 of the Deepwater Port Act of 1974. Although not including Section 31 in the Conference Report, the Conferees continue to believe that reform is needed in this area, so that such licensees and vessel owners or operators are not exposed to overlapping or conflicting liability and penalty provisions.

TEST PROCEDURES

Senate bill

No comparable provision.

House amendment

The House amendment changes the date by which the Administrator must promulgate guidelines establishing test procedures for the analysis of pollutants to ninety days after the date of enactment.

Conference substitute

The conference substitute deletes the House provision because the guidelines for analysis of pollutants already have been issued. However, the Administrator also should publish guidelines for testing for pollutants in sewage sludge. All guidelines should be renewed every two years to insure their continued adequacy.

WATER QUALITY CRITERIA

Senate bill

No comparable provision.

House amendment

Section 304(a)(1) of the Act directs the Administrator to develop and publish criteria for water quality accurately reflecting the latest scientific knowledge on the kind and extent of all identifiable effects on health and welfare. The House amendment amends this provision by adding the requirement that, in developing, publishing and revising criteria, the Administrator shall consider, among other things, the effects on the ecosystem of water hardness ph, chemical and physical interactions, persistence of pollutants and the long-term effects of pollutants; sedimentation from chemical reaction of pollutants, the absorptive properties of sediments, resuspension, and biouptake.

The House amendment states that EPA, in issuing new or revised water quality criteria, should set criteria which will provide an ample margin of safety to protect human health and fish and wildlife resources.

The House amendment also adds the requirement that in the development of new or revised criteria with respect to a pollutant, whenever the Administrator determines that a well-founded and significant difference of opinion exists as to the latest scientific and research knowlege on the matters referred to in the section, the Administrator shall publish a description of this difference of opinion along with the publication of the criteria.

The House amendment also states that it is the sense of the Congress that the Admin-

istrator and the States in developing, publishing, and revising water quality criteria under section 304(a)(1) of the Federal Water Pollution Control Act, should consider the economic impact of their decisions on the impacted States.

Conference substitute

The conference substitute contains no comparable provision.

STUDY OF PH IN DISCHARGES FROM MINING OPERATIONS

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator to study effluent limitations as they relate to pH in discharges from mining operations. Not later than one year after the date of enactment, the Administrator is to submit to Congress a report on the results of the study along with recommendations as to the feasibility of permitting modifications of such effluent limitations to permit lower pH in such discharges than is otherwise required.

Conference substitute

The conference substitute deletes the House amendment.

PULP MILL STUDY

Senate bill

No comparable provision.

House amendment

The House amendment directs the Administrator of the Environmental Protection Agency, in consultation with the State of Alaska to conduct and prepare a study-report which shall determine the feasibility of resolving the air pollution control, solid waste disposal, water quality standards compliance, and energy impacts associated with the achievement of best practicable technology under section 301 of the Federal Water Pollution Control Act with respect to the Alaska Lumber and Pulp Company, located at Sitka, Alaska (NPDES permit numbered AK000053-1).

Conference substitute

The conference substitute deletes the House amendment.

TREATMENT WORKS IN WASHINGTON STATE

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator to make grants to the sewage treatment authorities discharging into Puget Sound and adjacent marine waters, including the Strait of Juan de Fuca and Bellingham Bay, to construct necessary treatment works for providing secondary treatment for the areas served by such authorities.

Conference substitute

The conference substitute deletes the House amendment.

CHIPPEWA TOWNSHIP, PENNSYLVANIA

Senate bill

No comparable provision.

House amendment

The House amendment providies that, in order to protect the public health, environment, and water quality endangered by the destruction of the Chippewa Township, Pennsylvania, sewage treatment facility and the resultant raw sewage discharge into Brady's Run, Pennsylvania, the Administrator of the Environmental Protection Agency is directed to remove the raw sewage.

Conference substitute

The conference substitute deletes the House amendment.

NACO, ARIZONA

Senate bill

No comparable provision.

House amendment

The House amendment provides, that, for purposes of protecting the economy, public health, environment, and surface and ground water of the community of Naco, Arizona, which are in danger and are being polluted by raw sewage emanating from the community of Naco, Sonora, Mexico, upon application of the County of Cochise, Arizona, the Administrator of the Environmental Protection Agency shall make grants to such County for construction of a project consisting of a publicly owned treatment works to provide primary or more advanced treatment of not less than 150,000 gallons of untreated sewage emanating from the City of Naco, Sonora, Mexico, and treatment of waste from Naco, Arizona.

Conference substitute

The conference substitute deletes the House amendment.

NEWTOWN CREEK, NEW YORK

Senate bill

No comparable provision.

House amendment

The House amendment authorizes the Administrator to make a grant to the City of New York to install such additional facilities in, and make such modifications to, the Newtown Creek sewage treatment plant as are necessary for the plant to provide secondary treatment. The Federal share of the project is 75 percent of the cost of installing such facilities and making such modifications.

Conference substitute

The conference substitute deletes the House amendment.

GRANTS FOR REPLACEMENT OF CONTAMINATED GROUNDWATER

Senate bill

No comparable provision.

House amendment

The House amendment authorizes EPA to make 50 percent grants to any public water supply system or local government for the provision of alternative water supplies where the water supply system is unable to supply water which is fit for human consumption because of ground water contamination. The Administrator is directed to make a grant to Jacksonville, Arkansas, for the purpose of providing a temporary alternative water supply.

Conference substitute

The conference substitute contains no comparable provision.

NPDES PERMIT AREA

Senate bill

No comparable provision.

House amendment

Section 402(b)(1)(B) of the Federal Water Pollution Control Act currently provides that permits for the discharge of pollutants are to be for fixed terms not exceeding five years.

The House amendment authorizes the issuance of certain permits for terms of up to ten years.

For a permit to be granted for a term not to exceed ten years, the State must determine, in accordance with regulations established by the Administrator, or the Administrator must determine (depending on whether the permit program is administered by the State or EPA) that the applicant has consistently complied with any permit issued under section 402 of the Act, and that toxic and nonconventional pollutants (other than the five nonconventional pollutants for which effluent limitation variances may be granted under section 301(g)) are not detectable in the effluent or that these pollutants are present only in trace amounts and are neither causing nor are likely to cause toxic effects, alone or in combination with pollutants from other sources.

For a permit issued for a term in excess of five years, the permit must be modified promptly to ensure compliance with any new or revised effluent limitation under section 307(a) of the Act (toxics) or any new or revised requirement pursuant to a standard under section 303 of the Act (water quality standards) when the effluent limitation is more stringent than the existing limitation or controls a pollutant not controlled in the permit and must ensure compliance with other revised effluent limitations, pretreatment standards, or sewage sludge regulations.

Conference substitute

The conference substitute has no comparable provision.

IN MEMORIAM

The managers on the part of the House and the Senate wish to acknowledge the contribution of the late Peter Perez of the Environmental Protection Agency to this reauthorization of the Clean Water Act. Mr. Perez' detailed knowledge of the clean water program and his tireless commitment to improve the quality of the Nation's environment have left an indelible mark on this legislation and those who benefit from it.

Managers on the Part of the Senate.

CONFERENCE REPORT ON S.1200, IMMIGRATION REFORM AND CONTROL ACT OF 1985

Mr. RODINO. Mr. Speaker, I call up the conference report on the Senate bill (S. 1200) to amend the Immigra-

tion and Nationality Act to effectively control unauthorized immigration to the United States and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to House Resolution 592, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of Tuesday, October 14, 1986.)

The SPEAKER pro tempore. The gentleman from New Jersey [Mr. RODINO] will be recognized for 30 minutes, the gentleman from California [Mr. LUNGREN] will be recognized for 30 minutes.

Mr. EDWARDS of California. Mr. Speaker, I rise in opposition to the bill.

The SPEAKER pro tempore. Is the gentleman from California [Mr. EDWARDS] opposed to the conference report?

Mr. EDWARDS of California. I am opposed to the conference report, Mr. Speaker.

The SPEAKER pro tempore. Is the gentleman from New Jersey [Mr. RODINO] opposed to the conference report?

Mr. RODINO. No, Mr. Speaker.

The SPEAKER pro tempore. Under the rules, the gentleman from California [Mr. EDWARDS], the senior member of the originally reporting committee, is entitled to 20 minutes.

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Speaker, I rise to a point of order. I believe that the member of the minority would have preference to control the 20 minutes in oppositon to the conference report under the precedents of the House and rule XXVIII, clause 2(b).

I am opposed to the conference report, Mr. Speaker.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Chair would state to the distingushed gentleman from Wisconsin under a ruling this year recognition goes to the opposition on the issue but not necessarily the minority party in the House; and under the rules the Chair is constrained to recognize the senior member of the Judiciary Committee.

Mr. LUNGREN. Mr. Speaker, I could not hear the Chair's ruling. It seems to me, Mr. Speaker, that a member of the Subcommittee on Immigration would have the right to this time.

The SPEAKER pro tempore. The Chair was stating that under a situation like this, it is regrettable where two Members are seeking equal time, the Chair must rule that under the precedents of the House that in this case 20 minutes should be given to the senior Member in opposition to the conference report. That senior Member is the gentleman from California [Mr. EDWARDS].

Therefore, the time will be divided, 20 minutes to the gentleman from New Jersey [Mr. RODINO], 20 minutes to the gentleman from California [Mr. LUNGREN], and 20 minutes to the gentleman from California [Mr. EDWARDS].

The Chair recognizes the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Speaker, I yield myself 6 minutes.

Mr. Speaker, at this time last week I stated that it was "almost a miracle" that the House was ready to proceed with the consideration of immigration reform legislation. This occurred after reaching a bipartisan agreement on the so-called Schumer agricultural compromise.

I wish to now state that indeed a miracle has occurred, as we now are considering a conference report on immigration reform legislation.

This is indeed historic legislation. It is the first comprehensive revision of our immigration laws in 34 years and it is something the Judiciary Committee has been considering since 1971.

The conference report before us contains the fundamental twin components of immigration reform—that is, employer sanctions and legalization. Those interlinked components have been in every Judiciary Committee bill since 1975 and any bill that does not contain both of these elements cannot be called immigration reform.

In my judgment, employer sanctions are essential if this country is to regain control of its borders. Indeed, it is our sovereign responsibility to do so.

I also believe legalization is essential in order to regularize the status of those aliens who have built up equities in this country and who have contributed for years toward our economic and social well-being.

Mr. Speaker, I am pleased to report that the House conferees were able to preserve the House position on legalization and have brought back the House legalization structure and the House 1982 legalization date. This was not easy and I am most gratified that we prevailed on this very important issue.

I know that this was a troubling issue to many of our colleagues on both sides of the aisle, but I can assure you that it is our intention and the conferees intention that legalization be a "one-time" only event and I wish to emphasize that with a 1982 date, we are talking about aliens who have been in this country almost 5 years—who have roots and families here—and who should be made a part of American society.

Mr. Speaker, this conference agreement is fair and balanced and I believe it will be effective in accomplishing the goals we set out to achieve.

The sanctions provisions are fair to decent and honest employers, but at the same time, ensure that repeat offenders will be subject to strong civil and criminal penalties.

Legalization is fair to the American people because it regularizes the status of only those who have resided continuously in this country for almost 5 years, but does not reward those who have been here for short periods of time or who have returned for lengthy periods to their home country.

The conference report is balanced because it contains both sanctions and legalization. You cannot have sanctions without legalization and you cannot have legalization without sanctions. As I have noted, this is the basic tradeoff in our attempt to legislate meaningful immigration reform.

Mr. Speaker, I would like to state that the positions of the Judiciary Committee and all of the other six committees to which this legislation was sequentially referred have been completely protected and preserved during the conference negotiations process. This could not have been achieved without the support and cooperation of all of the House conferees. There was a spirit of complete bipartisan cooperation throughout the difficult—and often emotional—conference deliberations.

I want to particularly commend some of the Judiciary Committee conferees who have worked so long and so hard as we have gone through this torturous process of reforming our immigration laws.

I want to particularly commend the chairman of the Immigration Subcommittee, Mr. MAZZOLI, as well as the ranking minority member of the full Judiciary Committee, Mr. FISH, and the ranking minority member of the Immigration Subcommittee, Mr. LUNGREN for their extraordinary efforts on this matter, not only in this Congress, but over the past three Congresses.

Further, I do not believe we could have reached this point in the legislative process had it not been for the diligent and tireless efforts of the gentleman from New York [Mr. SCHUMER] and the gentlemen from California [Mr. BERMAN and Mr. PANETTA].

I would now like to briefly discuss some of the major agreements reached by the conferees on the other significant provisions in the bill.

First, the so-called Frank antidiscrimination provision is included in this conference agreement. We were able to reach agreement with the conferees of the other body as long as the antidiscrimination provision was treated identically to the "soft sunset" on sanctions that was in the original Senate bill.

This provision is a direct response to the fears and concerns expressed by

many Hispanic organizations that sanctions would automatically result in discrimination based on national origins. We included this provision to allay their concerns and to provide an immediate and effective remedy should discrimination occur.

Antidiscrimination legislation of this nature is unprecedented in that it is based upon anticipated discrimination, rather than an historical pattern of past discrimination. Nevertheless, we included this provision to meet the concerns expressed about sanctions and I believe this can be viewed as one of the most far-reaching and important civil rights provisions in recent history.

At the same time, procedures are built into the bill to ensure that sanctions and the antidiscrimination mechanism are reviewed closely by GAO and by the Congress.

The studies will reveal whether sanctions work, whether they result in discrimination and whether the antidiscrimination mechanism has been effective in responding to discriminatory conduct. Nothing would happen, however, until Congress reviewed these findings and enacted subsequent legislation.

The conference agreement also provides substantial funding to meet State and local costs incurred for legalized aliens. In effect, the provision provides $1 billion each year for 4 years to meet these costs. The provision has been drafted in the form of a directed appropriation of this level of funding. This subject was discussed directly with the President last spring and he assured me and the Director of OMB assured me that this amount of funding—$4 billion over 4 years—would be supported.

The agricultural provisions of the conference agreement are in every respect identical to the provisions already approved by the House. Those provisions accommodate the needs of Western growers of perishable crops by assuring an adequate supply of labor. At the same time, they ensure that all such workers will be fully protected under our various labor laws and that they will have the freedom to select their employer on the basis of free market principles and will be able to exercise the same collective bargaining rights as their U.S. citizen counterparts.

This program has none of the elements of the old Bracero Program and can in no way be classified as a guestworker program. On the other hand, for those who felt that some of our original proposals in this area were overly generous, I would note that no one under this program will receive immediate permanent residency.

Mr. Speaker, in closing I wish to simply state that the conference report is a humane, reasonable, and effective approach to a vexing, complex and multifaceted problem. I am proud of this conference report and believe it deserves the wholehearted support of my colleagues.

I urge an "aye" vote on it.

SUMMARY OF CONFERENCE COMPROMISE
(S. 1200/H.R. 3810)

I. CONTROL OF ILLEGAL IMMIGRATION

A. Employer sanctions

Makes it unlawful for any person, knowingly to hire for employment or to recruit or refer for a fee, after the date of enactment, any alien not authorized to work in the United States.

Requires employers to verify all new hires by examining either (1) a U.S. passport, or (2) a U.S. birth certificate or social security card and a driver's license, state issued I.D. card, or an alien identification document. Requires each employer to attest in writing under penalty of perjury, that he has seen the documentation mentioned above. Requires the employee to attest in writing that he is authorized to work in the U.S.

States that nothing in the bill directly or indirectly authorizes the creation of a national identification card.

Permits the President to implement a more secure verification system upon notice and approval of Congress. Directs the appropriate agencies to study the feasibility of a telephone verification system for employment eligibility.

Establishes employer sanction penalties as follows:

First offense—a civil fine of not less than $250 nor more than $2,000 per each alien involved;

Second offense—a civil fine of not less than $2,000 nor more than $5,000 per each alien involved;

Third offense—a civil fine of not less than $3,000 nor more than $10,000 per each alien involved.

Authorizes criminal penalties of up to six months imprisonment and/or $3,000 fine for "pattern or practice" violations.

Provides a six-month education period during which no enforcement actions may be taken. During the subsequent 12-month period a warning citation will be issued for first offenses.

Requires employers, referrers and recruiters to keep records and establishes a civil fine of not less than $100 and no more than $1,000 for failure to keep records.

Establishes an affirmative defense for all employers who comply in good faith with the verification procedure.

Relieves employers from verification when a state employment agency has verified worker and the worker retains a certification of such verification.

Terminates sanctions after three years if the Comptroller General has determined that sanctions have resulted in discrimination in employment or have unduly burdened employers and Congress enacts a joint resolution adopting that determination.

B. Antidiscrimination measures.

Creates the Office of Sepcial Counsel in the Justice Department for the purpose of investigation and prosecuting any charges of discrimination due to an unlawful immigration-related employment practice.

Prohibits discrimination based on citizenship or alien status if the person alleging discrimination is a U.S. citizen or permanent resident alien, refugee, kasylee or newly legalized alien, who has filed a notice of intent to become a U.S. citizen.

Exempts employers of three or fewer from coverage.

Terminates measures if employer sanctions are terminated or if Congress enacts a joint resolution to terminate.

C. Increased enfocement and service

Provides a two-year authorization for the INS to carry out its added responsibilities resulting from passage of this bill: $422 million extra in FY 1987 and $419 million extra in FY 1988. Also authorizes $12 million and $15 million for The Executive Office for Immigration Review for fiscal years 1987 and 1988 respectively, to carry out the added duties imposed by this bill. Authorizes supplemental authorization for wage and hour enforcement.

Revises criminal penalties for the unlawful transportation of aliens to the U.S.

Authorizes a contingency fund of $35 million for use in immigration emergencies.

Requires the Attorney General to establish an in-service training program and community outreach program within the INS through the establishment of community task forces.

Requires states to verify the status of non-citizens applying for public assistance and reimburses the states 100% for the implementation costs of this provision. Permits appropriate Secretaries to waive programs from coverage.

Revises the liability of international bridge owners.

Requires a search warrant for INS officers to enter outdoor agricultural operations for immigration law purposes.

II. LEGALIZATION

A. Eligible aliens

Provides temporary resident status for aliens who have continuously resided in the U.S. since before January 1, 1982 and who are not excludable.

Provides for adjustment to permanent resident status after eighteen months in temporary status if an individual can show minimal understanding of English and knowledge of history and government of the U.S. or is pursuing instruction to achieve that understanding and knowledge.

Federally funded public assistance (other than emergency medical care, aid to aged, blind, or disabled, and for serious injury or in the interest of public health) will not be available to newly legalized aliens for five years (other than "Cuban/Haitian entrants").

Provides for adjustment to permanent resident status for certain Cubans and Haitians who entered the United States prior to January 1, 1982.

B. Procedures

Provides for administrative and judicial review of a denial of an application for legalization.

Ensures confidentiality of records by prohibiting use of information contained in an application for any purpose other than determining the merits of the applications or whether fraud is involved.

C. Registry date

Updates the registry date from 1984 to January 1, 1972.

D. Assistance to States

Provides $1 billion a year for four years to state and local government for assistance for the public assistance, health, and education costs resulting from legalization.

Reimburses states for the costs of incarcerating certain aliens.

III. LEGAL IMMIGRATION

A. H-2 workers

Special procedure established for H-2 seasonal workers in agriculture:

The employer must apply to the Secretary of Labor no more than 60 days in advance of need, asking for foreign workers; employer then must attempt to recruit domestic workers;

The Secretary of Labor must provide a decision on the certification no later than 20 days in advance of need;

If the Secretary of Labor determines that a certain number of qualified U.S. workers will be available at the time needed, but at the determined time those workers are not qualified and available, an expedited procedure to determine need would be available.

H-2 agricultural workers guaranteed certain benefits such as housing and worker compensation (to be provided by the employer if not available under a state program), and travel and subsistence costs.

H-2 workers can access legal services only for representation concerning work-related matters.

B. Seasonal agricultural workers

Provides temporary resident status to aliens who have worked at least 90 days in agriculture during the period May 1, 1985 through May 1, 1986. Aliens who have worked 90 days a year for three years may adjust to permanent resident status one year after the end of the application period. Aliens who have worked 90 days a year during May, 1985 to May, 1986 may adjust to permanent resident status two years after the end of the application period.

Disqualifies workers from AFDC for five years.

Allows replenishment workers to enter as temporary residents as long as they work at least 90 days in agriculture each year for three years in the event of an agriculture labor shortage. Workers can adjust to permanent residence after three years of temporary status. Workers are disqualified from most forms of public assistance.

Terminates the replenishment worker mechanism seven years after enactment.

Establishes a Commission on Agricultural Workers.

C. Colonial quotas

Increases legal immigration ceilings for colonies to 5,000 from the present 600.

D. G-4's

Provides immigration benefits to dependents and spouses of G-4 visa holders and retired G-4 visa holders.

E. Visa Waiver Pilot Program

Establishes a nonimmigrant visa waiver pilot program for nationals of certain countries.

IV. MISCELLANEOUS

A. Putative fathers

Recognizes, for preference petitioning purposes, the relationship between a biological father and his illegitimate child.

B. Suspension of deportation

States that brief, casual and innocent trips outside the U.S. shall not be deemed to have broken an alien's continuous physical presence in the U.S. for purposes of meeting the requirements for suspension of deportation.

C. Sense of Congress

States the Sense of Congress that political prisoners from Cuba should be admitted to the United States, notwithstanding any other provision of law.

D. Nonpreference immigrants

Makes additional visas available for certain non-preference immigrants.

E. Deportation of aliens

Requires the expeditious deportation of convicted aliens and a list of facilities available to incarcerate deportable or excludable aliens.

V. REPORTS

Requires President to submit (1) three comprehensive reports on legal immigration; (2) a report on the push-pull factors causing illegal immigration; (3) two reports on the legalization program; and (4) two reports on employer sanctions.

Requires Administration to submit reports on the H-2 program every two years.

Requires Administration to submit reports on the visa waiver pilot program.

Requires the Attorney General to report to Congress on resources required to improve the capabilities of the Immigration Service.

States a Sense of Congress that Mexico should be consulted on the implementation of the legislation.

VII. COMMISSIONS

Establishes a commission for the study of international migration and cooperative economic development.

VIII. FOR SALVADORANS AND NICARAGUANS

Deletes the House provision with Statement of Managers language that "the Conferees believe that deportations should be suspended on a case-by-case basis in cases such as El Salvador where natural disasters have added other societal problems in a manner which adds significantly to the difficulties inherent in the resettlement of deportees.

Noting in this statement is intended to set a precedent for ignoring the basic standards set forth in the Refugee Act of 1980.

The Conferees strongly recommend that Congress consider and take up this issue expeditiously next Congress."

□ 1545

Mr. Speaker, I yield 3 minutes to the gentleman from Kentucky [Mr. MAZZOLI].

Mr. MAZZOLI. I thank the chairman very much.

Mr. Speaker, I would like to return the commendations to the chairman, the gentleman from New Jersey [Mr. RODINO], for his remarkable work, also the gentleman from New York [Mr. FISH] and the gentleman from California [Mr. LUNGREN].

I would like to congratulate the three Congressmen who worked on the agricultural part, Congressmen SCHUMER, BERMAN, and PANETTA, not to forget the contributions of Congressman BEILENSON, Senator PEPPER, and Congressman MOAKLEY who, working from the vantage point of the Committee on Rules, were very helpful.

Staff did yeoman work, Skip, Lynn, Gene, Peter, Bonnie, Erin, Sheryl, Judy, Margaret, Ed Grossman, the legislative counsel, did a superb job and we appreciate it.

They say that a cat has nine lives. If this bill were a cat, this is its ninth life. It has no more lives. It cannot pop up out of any more graves.

It cannot have breath breathed back into its corpse again. It is now or never, ladies and gentleme of the House; it is now or never.

As my chairman said, it is a historical moment. This is a watershed piece of legislation; historic legislation.

It will help us control the borders and at the same time doing justice and decency and equity to the people who are in this country illegally. It is not a perfect bill, but it is the least imperfect bill that we will ever have before us.

There is no other bill on the horizon which is a likely prospect for passage. We will never get the perfect bill in the world in which we live.

We therefore have to settle for something less than perfection. But this bill, in that context, is an excellent piece of legislation.

I think that its durability, its resilience, its long life, because it began 6 years ago with three major parts, employer sanctions, legalization, and some form of agricultural worker provision, and it is that way now 6 years later, three Congresses later; it seems to me that that fact more than any demonstrates how close to reality this bill really is. It is the best think that we could do under the circumstances having 535 authors working with the bill.

I do not think it will ever change if it comes back next year, the year after, 10 years from now; it will look essentially like it looks today and I would therefore urge its passage.

Ladies and gentleman of the House, your conferees kept faith with you and the votes that you cast on this bill. It has generous legalization. You sent us to conference to keep it, and we kept it. It has tough antidiscrimination provisions. You sent us to conference to keep it, and we kept it. It has legal services for H2 workers. You sent us to conference to keep it, and we kept it. It has universal application of employer sanctions. You sent us to conference to keep it, and we kept it.

Finally, it has criminal sanctions. You sent us to conference to keep it, and we kept it. This is a very good effort by your conferees. Please support our work product and pass this bill.

Mr. Speaker, we stand on the verge of culminating a task that began many years ago. That task, of course, is to reform our immigration laws—to bring some order and sense to our immigration policy by regaining control of our borders and dealing with the hard reality that many of the finest, most law-abiding residents of the United States are in an undocumented status.

On September 26, when the House voted not to consider the immigration reform bill on the floor, there were many who thought that any chance for enacting immigration reform in

the 99th Congress had vanished. But because our immigration problems will not quietly and magically disappear, because they must be addressed immediately, the legislation was revived, brought to the House floor, and was passed by a comfortable vote margin. As my distinguished chairman, the gentleman from New Jersey, noted at that time, the revival of immigration reform in the 99th Congress was nothing short of a miracle.

Over the weekend, House/Senate conferees came up with a second miracle: agreement upon a conference bill that includes tough but fair employer sanctions, and a generous but carefully defined legalization program. Furthermore, the delicately crafted agricultural provisions already approved by the House were preserved completely intact.

As I have said before, those who are looking for a perfect immigration bill will not find it here, since there can be no perfect immigration bill. This is, however, a good bill and the best we are likely to produce. It reflects the best and most careful thinking not only of the House, but also of the other body, not only of this Congress, but of previous Congresses as well. It also reflects the input and concerns of the various committees of the House that had jurisdiction over the bill. I stand before my colleagues today proud of the conference agreement we have crafted and secure in the belief that this agreement represents the best immigration reform measure Congress is ever likely to produce.

With regard to employer sanctions, the conference agreement remains essentially the program previously approved by the House. Criminal penalties for pattern or practice violations are preserved. Universal and mandatory verification of documents is similarly still required. In addition, the so-called Frank antidiscrimination program remains part of this package, but now with an additional provision that ensures that if discrimination does not result from employer sanctions Congress will have a fully informed basis for considering amendments to the program, or if necessary, terminating it.

Regarding legalization, the conference agreement preserves the House's 1982 cutoff date and ensures that legalization will begin immediately upon enactment.

Regarding legalization funding, the agreement strikes an eminently fair and sensible compromise between the House provision of full reimbursement—which the administration found unacceptable—and the Senate provision limiting the amount of available funds to $3 billion over 6 years. The agreement blends the best of each of these to create a 4 year, $4 billion program that guarantees the States that their costs will not be subject to the vagaries of the funding process.

On the question of treatment of Salvadorans and Nicaraguans, the House, faced with the virtual certainty of a Presidential veto, receded to the Senate. Nonetheless, the conferees strongly urged the Congress to consider this issue early next Congress, and for my part I pledge to my colleagues, and in particular to my distinguished colleague and friend from the Rules Committee, the gentleman from Massachusetts, that I will do everything within my power to ensure that this important question is fully and expeditiously considered in the next Congress.

Regarding legal services for H-2 workers, the agreement again strikes what I think is a very sensible compromise. Workers will have access to such services but only for the purpose of strictly defined work-related purposes. This ensures that workers will receive the protections they need but will not burden our legal services capabilities.

Finally, the bill includes more money for Border Patrol enforcement than ever before. In fact, it authorizes at least a 50-percent increase in Border Patrol officers.

Mr. Speaker, the conference was a tough and arduous process. There were no giveaways, and the House fought strenuously for each of its provisions. Some of my colleagues may be disappointed that the House did not prevail on every issue, but that is not what conferences are all about. The important point is that the essential elements of reform are absolutely preserved in this agreement. I urge my colleagues to look not at what is not in the agreement, but what is in the agreement, and to consider carefully not whether there may theoretically exist a better bill, but whether the status quo—which is clearly unacceptable and intolerable—is preferable to the legislation before us.

I urge my colleagues not to let this opportunity slip away. Support the conference agreement of S. 1200.

Mr. LUNGREN. Mr. Speaker, I rise in support of the conference report, and I yield 3 minutes to the ranking member of the full Committee on the Judiciary, the gentleman who has served his penance on this subcommittee for well over a decade, the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Speaker, after many years of discussion and debate on the urgent need for immigration reform legislation, we finally have such legislation before us today which the House and Senate conferees have agreed to.

The conference agreement of S. 1200 is the result of many hours of discussions—of give and take—by House and Senate conferees on some of the controversial issues. As you can imagine, this has been no easy task. Although it is not a perfect bill, I believe it is a good bill which deserves our strong support.

As My colleagues know, this legislation has been pending before us for three consecutive Congresses. As a member of the House Judiciary Subcommittee on Immigration I have been intimately involved in the evolution of this legislation. I would like to express my deep appreciation to all my colleagues who have devoted so much time and effort to this legislation. I think many of us who have worked on this bill, especially in the past Few weeks, have felt that there is a growing consensus on the need for immigration reform. This belief has kept us working toward a compromise even when the bill appeared doomed after the rule was defeated on the House floor 2 weeks ago.

I think my colleagues will agree with me that this kind of immigration reform bill comes none too soon for this country. As has been stated many times before, apprehensions along our southern borders have shot up dramatically in the first several months of 1986, as compared to 1985. As of September 30 of this year, the Immigration Service has apprehended 1.8 million undocumented aliens. This is almost double the amount apprehended in all of 1980, when the number of apprehensions was approximately 900,000 undocumented aliens.

The public perception that immigration is out of control is, unfortunately, a correct perception. No legislation before this Congress is of higher priority. I am hopeful that enactment of this legislation will help us regain control of our borders and avoid a future repressive public reaction that will fail to distinguish lawful immigrants and refugees from illegal aliens. The American people in the face of an illegal immigration crisis should not lose sight of the fact that immigrants have been a great source of this country's strength, and refugees have made an immense contribution to our society. But in recent years, huge numbers of illegal aliens rushing past our borders may have started to blur that understanding.

Mr. Speaker, I believe the conference report before us today contains the essential provisions needed for comprehensive immigration reform. Most of us who have been intimately involved in the debate are firmly convinced that employer sanctions and legalization provisions in this bill are necessarily intertwined. In addition, this legislation contains a needed temporary foreign worker program for agriculture that is regulated to protect the rights of American workers as well as those who participate in the program. The bill also contains funding for States to reimburse them for the costs of implementing this legislation.

Mr. Speaker, I urge my colleagues to support this conference report. This may be our last opportunity for comprehensive immigration reform before the problems at our borders precludes compassionate solutions rather than radical actions.

Mr. EDWARDS of California. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I regret that I must oppose the bill because there are some items in the bill that are very commendable such as the Legalization Program, the Frank antidiscrimination provisions and much-needed increase of resources for the INS.

However, my concerns about the bill outweigh these items. The linchpin of this bill is still employer sanctions, a totally failed concept proven ineffective whenever and wherever tried, both here and abroad.

In my view, Mr. Speaker, it is an invitation to racial discrimination.

The bill also creates unbearable burdens for our State and local governments, unbearable for if the Federal Government is not willing to bear the cost of this bill, how do we except the State and local governments to do this?

The proponents of the bill have once again lost sight of the fact that immigration is a Federal responsibility; while State and local governments have no responsibility to control the costs resulting from this legislation, the proponents of the bill have not hesitated to shift the costs to them. And to make matters worse, the bill mandates that Federal costs for SSI and Medicaid are to be deducted right off the top of the reimbursement in the bill.

So out of the possible $1 billion per year supposedly targeted for the cost of the bill to State and local governments, the Federal Government will eat up at least $250 million per year. Then because of the formula in the bill allocating the remainder, States are pitted against each other for the totally inadequate remaining funds.

I assure you there will be little left to trickle done to the local governments who are the front line bearing the cost.

For these reasons and others, Mr. Speaker, I oppose the conference report.

Mr. Speaker, I reserve the balance of my time.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. SEIBERLING]

Mr. SEIBERLING. Mr. Speaker, 16 years ago when I came to the House, the first piece of legislation I worked on was illegal immigration legislation with the same basic concepts in it as the bill before us. As the years went by, I began to think that this was the legislative equivalent of Charles Dickens' famous novel "Bleak House", in which the famous case of Jarndyce versus Jarndyce went on for decades and finally when it ended, the entire corpus had been consumed by lawyers fees, and all of the original parties were dead. I am glad to see that we are on the brink of resolving this important issue in a constructive and definitive way.

This is a desperately needed piece of legislation; it was 16 years ago, it is far more even today.

I commend the chairman, Mr. RODINO, the chairman of the subcommittee, Mr. MAZZOLI, and particularly also Mr. SCHUMER, Mr. BERMAN, Mr. LEON PANETTA, and the members of the Judiciary Committee who worked so hard to make this a possibility, and to work out the very difficult compromises that had to be made in order to get this bill finally put together.

In my view it is a good bill, we should all support it and be glad that this long controversy has been finally put to rest.

Mr. LUNGREN. Mr. Speaker, I yield 3 minutes to a distinguished member of the subcommittee, the gentleman from Florida [Mr. MCCOLLUM].

Mr. MCCOLLUM. Mr. Speaker, I would like, as a conferee from the very beginning, to clarify one portion of this. Some of my colleagues are particularly concerned about the legal services provision dealing with the H-2 temporary workers that we conferenced and came to an understanding with in this bill.

Section 305 of the conference report sets forth very specific and limited conditions under which an H-2 agricultural worker might be provided legal assistance by the Legal Services Corporation. These services may only be provided on matters concerning wages, housing, transportation, and other employment-related matters under the provisions of the specific contract under which each individual comes here to work.

The statement of managers expresses the intent of the conferees that future H-2 contracts comply with laws and regulations of the Departments of Labor and Agriculture. But this was done to express our hope that these contracts comply. The conferees specifically and intentionally avoided language that would allow legal assistance to be given outside the parameters of the specific contracts, or legal assistance to be given to sue or argue that a contract is not in compliance with law or regulation, or to sue or argue that a contract has to be rewritten, or revised, or to sue or argue that any other provisions have to be put into a contract or to sue or argue that a worker has rights or benefits under any law or regulation that is not specifically incorporated within the applicable contract.

The narrow language that is in the conference bill, as this conferee understands, is for the purpose of providing, as it states on its face, legal assistance strictly limited to the parameters of the contract in dealing with wages, housing, transportation, and other employment-related matters under the provisions of each separate contract.

I would like to ask the gentleman from California if that is his understanding of the agreement that we made in conference.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. MCCOLLUM. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

Mr. Speaker, that is my understanding of the agreement that we reached.

□ 1600

Mr. MCCOLLUM. I would like to ask the gentleman from Kentucky if I am correct in his understanding.

Mr. MAZZOLI. Mr. Speaker, if the gentleman will yield, that is my understanding. The gentleman is correct.

Mr. MCCOLLUM. Mr. Speaker, I am still very much concerned about much of what is in this bill. I would be less than honest with my colleagues if I did not tell you that there has not been any significant move off the House version on the amnesty question, which I am very strongly opposed to still to this day. Each Congress I have offered an amendment to strike that provision from this bill, because I do believe that we are going to have unexpected and unintended results from the amnesty provisions that so many have argued are necessary. I lost that point. I lost it in each Congress, this time by a very narrow margin in the House, but we nonetheless lost it.

I would also be less than honest with my colleagues if I did not tell you that I still do not like the Schumer agriculture provisions as they were modified and as they were left in this conference report.

But I am going to hold my nose and I am going to vote for this conference report. I do not blame anybody else for voting against it, mind you, but I think that the issue of employer sanctions of making it illegal to hire an illegal alien, of regaining control of our borders, of making this country free at some point in the future from the invasion that is occurring across our land borders by those who come here for jobs, is too important for me to turn the other cheek and to vote "no" in this particular case.

I do not know when we will get another opportunity if we do not pass this conference report to pass employer sanctions and to get a crack at closing the borders. So I am voting for the conference report.

Mr. EDWARDS of California. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas [Mr. GONZALEZ].

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I yield to the gentleman from Texas.

Mr. COLEMAN of Texas. Mr. Speaker, I rise in opposition to this legislation for its failure to deal with units of local government and State governments.

Mr. GONZALEZ. Mr. Speaker and colleagues, from time immemorial, as long as man has memory or written history, people have migrated or fled because of two primary reasons: one, to escape injustice; and two, to escape deprivation.

When the 12 tribes of ancient Israel fled Egypt, they certainly did not wait to get a visa. They did not sit around and wait until somebody gave them permission. They went to seek the Promise Land because they had to escape the tyranny of the Pharoah and the deprivation they were suffering in Egypt.

When the Irish fled the potato famine in 1849, including one of my ancestors, they did not wait to get a visa or for an immigration bill or sanctions or anything. They fled out of necessity.

This is what gives rise to concern today in this Congress.

Let there be no mistake about it. This bill solves some problems; that is the problem of the exploiter who will be given a 20th century version of indentured servants to work with. A sizable number; as yet to be determined number. It protects him. He is all right. He is made whole in this bill.

It does not address in any meaningful way the big pretext for this legislation, and that is the immigration problem that confronts the country.

It guarantees that those who want to exploit cheap, foreign labor on farms and ranches can continue to do so with impunity. It guarantees that those who want to discriminate on the basis of race can do so with impunity. It solves the problem of the exploiters, and that is about it.

To sweeten all of this, the report says that those who can prove that they have been here at a given magical date can become legalized through what has loosely been called an amnesty process. But many people who live in the world of the undocumented, which none of my colleagues are familiar with, closely associated with, or over a period of time, even knows the dimensions of its existence.

It guarantees that those who want to discriminate on the basis of race can do so with impunity. It solves the problems of the exploiters.

To sweeten all this the report says that folks who can prove they have lived here continuously since a magic date, can become legalized through an amnesty program. But how many people who live in the world of the undocumented will be able to produce the necessary documents? And what will those be? It is a cruel joke. It will produce a boom for those who will prey on people who need help to prove their cases; it will produce anguish for those who know they qualify but can't prove it; and it will not end the twilight existence of those who do not want to take the risks that are implicit with applying at all.

As for the cost, the bill tells the States that they can have perhaps $1 billion to help meet the education, housing, and other needs of those who are eligible for amnesty. This would amount to a pittance compared to what was allocated for Cuban refugees or Southeast Asian refugees admitted under the Refugee Act. Even what little is allocated is largely taken back, since anything spent through Medicaid or the SSI Program would be counted against the total. The amount made available is not likely even to cover more than a fraction of the real cost of adjustment.

Most important of all and most fatally, the bill fails to address in any way the real sources of the crisis that justifies its existence.

The most basic cause of the problem is the mistake made 21 years ago in the Immigration Act of 1965, which placed an unrealistic ceiling on immigration from countries within the Western Hemisphere. From that day forward, legal entry became all but impossible for the vast majority of those who sought to come here because they could find work and freedom and dignity here. All that was required until that time was the showing of good character and the offer of a good job. The quota that was imposed by the 1965 act was unrealistically low, it did not recognize the fact that our southern border is only a political—not an economic or social—boundary. The pending bill still fails to recognize that fact.

It is a fatal flaw to continue the imposition of quota limits that have no relationship to the history or economy or social reality of the world. Yet that is what this bill does. It guarantees that illegal entry will continue on a vast scale, because legal means will be available only to a fraction of those who can and who are determined find work and freedom and dignity in this country.

Further, the bill in no way redresses the economic pressures that drive people toward our borders. There is for example an economic disaster in Mexico, driving people northward just as surely as drought drove the Okies to California. But this bill in no way recognizes the need to deal with that economic problem, nor even study it. This is incredible, when we all know, beyond a shadow of a doubt, that surges of immigration is the surest index of desperation in the world, and always has been. There are a whole series of wars and political calamities in Central America, driving people by the thousands to seek refuge here. Even that is not recognized, in the tiniest way, not even the modest provisions so narrowly supported in the Moakley amendment. Further to the south there is savage repression in Chile, a savagery duplicated in other countries as well, all of which drives people toward us for shelter. But the bill does not in any way address those issues. The result is that the forces that create the problem in the first place—the 1965 immigration law, the economic and political scourges that we know about but would rather ignore—all are ignored here.

And what is the sentiment of the majority who supported this bill last week. It is clear enough: vote after vote was to deny any form of help to aliens who come here out of desperation; vote after vote was to strengthen the hand of those who would exploit those same aliens. This report, what little we are able to know of it, does nothing to solve the real problem. It solves the problems of vicious exploiters of foreign labor, it even reinvents indentured servitude. It solves the political problems of those who want to say we did something. Even so, in the long run it will have the same result as the 1965 act; it writes a law that will not and cannot work, because it ignores every lesson of history and reality.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Michigan [Mr. FORD].

Mr. FORD of Michigan. Mr. Speaker, I take this time to engage the chairman in a colloquy.

Mr. Speaker, the statement of managers that accompanies the conference report on S. 1200 contains a clerical error.

On the issue of time for compliance with the verification process, the sentence in the statement that reads "However, the conferees direct the Attorney General to develop and promulgate regulations regarding the time for compliance which address the practical problems of farmworkers and agricultural employers in satisfying the discrimination and verification requirements of this legislation" should be the last sentence on this issue. Is that not correct, Mr. Chairman?

Mr. RODINO. Yes; the further language does not reflect the agreement of the conferees.

Mr. FORD of Michigan. Mr. Speaker, I would like to yield to the gentleman from California and ask the gentleman if that is correct.

Mr. LUNGREN. The gentleman is correct. That should be the last sentence, and the further language is in error and should not be a part of the report.

Mr. LUNGREN. Mr. Speaker, I yield 1 minute to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, as the chairman of the Judiciary Committee put it, it is a miracle that this legislation is before us. It is a legislative Lazarus. I commend him, his Senate counterpart, and all the many Members who have worked so hard to bring this much-needed legislation to life—again and again.

The pieces of this bill—sanctions, legalization, enforcement, discrimination protections—all fit together. As my colleague from Massachusetts remarked during the conference, the knee bone is connected to the shin bone. But in our rush to patch this patient together and bring it out from under anesthesia, I think that we may have sewed the shin bone to the elbow.

Unlike past Congresses, when this issue was deliberated to death, in this Congress we have brought it to life largely by avoiding deliberation.

I say this not as a criticism, for I sincerely believe this is a necessary bill, and overall a good one. It is merely a statement of fact. Members should not heave a sigh of relief and believe they have solved the problems of immigration, legal and illegal, nor that this is a perfect bill.

I think we will have to revisit these issues soon. The discrimination provisions, which I believe are important, are structurally unsound. The formula for legalization assistance also needs to be examined. With regard to this formula, I am glad that the conferees agreed to the education formula proposed by my colleague, BILL GOODLING. However, my preference would have been for the higher share of education funding supported by the Education and Labor Committee. I think it is vital to the adjustment process that we provide aliens not just with legal status, but the educational tools that they will need to become full citizens in our society.

I think the conferees also erred in not accepting the Moakley amendment granting extended voluntary departure status to Salvadorans and Nicaraguans. However, I will certainly do what I can to support Mr. MOAKLEY's efforts to promote this legislation in the next Congress.

Mr. Speaker, this is a good bill, and time may prove it a great bill. But it is not a perfect bill. For today, Congress can indulge in congratulation. For tomorrow, we must begin the process of careful consideration, both of what we have done and what remains undone.

Mr. EDWARDS of California. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. ROYBAL].

Mr. ROYBAL. Mr. Speaker, I am grateful for at least the 3 minutes that have been made available for me to discuss this bill.

I listened with great interest to what the chairman of the committee had to say with regard to the bill itself. The congratulations were passed from one Member to the other for the tremendous job that has been done, but every one made some excuse for voting for, including having to hold their nose as they voted.

May I say that not everything in this bill is bad. There are some good things; but there is no doubt that most of the things are bad.

I do not think that every Member of this House knows what is in this bill. In just little conferences I had here and there, I came to the conclusion that they do not. They thought, for example, that they voted for immigration reform with sanctions, but they did not. What they voted for is a farm labor bill, a bill that is designed to provide cheap labor for the farmers and growers of this country, a bill that exempts them from sanctions, while it legalizes the men that work for them. That is one of the most important features of this bill, but one that offers no work, sanitary or health protection for the workers.

No one can point out where there is real immigration reform. Those who voted for the bill thought, for example, that the Federal Government would bear the cost. The truth of the matter is that the States are going to pay the costs.

And then my colleagues also thought that the Salvadorans and Nicaraguans who are in this country would be protected with extended voluntary departure. But they are not. The conferees took that out. It now is necessary for them to wait until next year when legislation is passed to try to protect them. What is going to happen to them between now and the time this House gets ready to pass that piece of legislation?

□ 1610

No one answers that question. My colleagues also thought that all immigrants in the future would be treated equally. The truth of the matter is that in this bill they increased the quota system for Europe by 60,000 and then refused to increase by 20,000 the quota system for this hemisphere.

That is not fair. But they never intended to be fair. You can call it reform all you want, but it is not reform. It is a self-serving bill that protects only the farmers and the growers. Then they say, the Frank amendment will prevent discrimination. The Frank amendment is not worth the paper that it is written on, for we all know that the Committee on Appropriations defunded the Civil Rights Commission because for the last 6 years they have not taken up one case, not one, in which a matter of violation of civil rights has been adjudicated in any manner.

The Frank amendment is good to have on paper but it is not going to protect those who are going to suffer the consequences of sanctions. Those that will suffer the most will be the Hispanic and Asian communities of the United States, and a yes vote will only guarantee discrimination as is written in this bill.

Mr. RODINO. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. BERMAN].

Mr. BERMAN. I thank the gentleman for yielding me this time.

Mr. Speaker, it is my understanding that the legal services language is clear on its face and contains very specific instructions in the statement of the managers that the contracts for H-2 workers not violate any provision of the Immigration and Nationality Act authorizing the H-2 Program or any regulations issued pursuant to that act.

Is that your understanding, Mr. Chairman?

Mr. RODINO. If the gentleman will yield, yes, the gentleman from California is correct. The statement on the part of the managers which was included stated that it is the intent of the conferees that contracts entered into shall not violate any provision of the Immigration and Nationality Act, authorizing the H-2 program or any regulations issued pursuant to the act.

As chairman of the House conferees I want to state that the colloquy initiated by the gentleman from Florida overreaches and contradicts the language of the conference report as well as the statement of managers.

When we provided that it was our intent that H-2A contracts "shall not violate any provision of the Immigration and Nationality Act authorizing the H-2 Program or any regulations" and went on to authorize legal services representation to secure "the rights* * *under the* * *contract," we obviously intended that such workers could use Legal Services attorneys to sue not only to enforce breaches of their contract but also, obviously, when those contracts violated the act or regulations. To hold otherwise is to deny the plain meaning of those two dictates. For it would allow an employer to offer illegal contracts that violate the law, but allow suit if, and only if, there was a breach of those—illegal—terms.

The language of the report and statement of the managers would be completely vitiated by such an interpretation. It was agreed to on this side only because we had too little time, with the haste of bringing this report to the floor in our final days, to scrutinize it closely. Now that we have, however, we reject it.

Mr. BERMAN. Mr. Speaker, 2 years ago I urged my colleagues on this floor to defeat the immigration bill for it sought to reform our immigration laws on the backs of American farmworkers. It did this by institutionalizing a system of oversupply and worker exploitation in Western agriculture that exists now in a de facto situation.

This time we have done it a different way. We have finally dealt with the asserted needs of agriculture in a fashion that protects the legal status and the rights and the dignity of farmworkers, in a way that we can all be proud of.

For that, I wish to congratulate the efforts of my colleagues, Mr. PANETTA, who always said that agriculture's desire here was not exploitation but simply to maintain its existing work force. Mr. SCHUMER, whose almost obsessive desire to see a bill had him give hundreds and hundreds of hours of work in keeping the negotiations

going. To Mr. MAZZOLI, even though he did not like the program, but supported it in the interests of getting a bill, and to the chairman of the Judiciary Committee, without whom none of the negotiations that took place would have been possible.

Mr. LUNGREN. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. MOORHEAD].

Mr. MOORHEAD. I thank the gentleman for yielding me this time.

Mr. Speaker, I rise in support of the conference report accompanying S. 1200, the Immigration Reform and Control Act of 1986. I have worked on the issue of immigration reform for a number of years and, as a member of the House Judiciary Committee, I have served on two conference committees on this issue. Both the House and the Senate have worked tirelessly on this legislation and Members representing many divergent points of view were able to come together in order to fashion a compromise bill. While the bill before us is by no means a perfect bill, it is the best bill we can get at this time.

Never before in our Nation's history have our borders been so severely tested by the huge numbers of people attempting to illegally cross them. There is already a crisis on the southern border and our Border Patrol is inadequate to meet the crisis and carry out effective border enforcement. Nearly 1.8 million illegal aliens were apprehended in fiscal year 1986. This represents a 50-percent increase over the previous fiscal year's level and by every indication the numbers are growing.

There are tremendous social and fiscal costs which many of our communities, particularly in the Southwest, must bear as a result of illegal immigration. Drug smuggling and increased criminal violence are turning our border into a war zone. More and more crimes in our border communities are attributed to illegal aliens. In addition, our social service costs are rapidly increasing, especially costs for hospitals and maternity care.

S. 1200 represents what Congress can do to begin to solve the tremendous problems we face. Employer sanctions and improved enforcement are at the heart of this bill. Another basic part of the legislation is a program of legislation for all those illegal aliens who have been here since before January 1, 1982. Despite estimates by some that only about one-third of the total illegal population will be eligible for legalization under the bill, the fact remains that significant chain migration will occur because newly legalized aliens will be able to bring in their spouses and children, and eventually their brothers and sisters and, in turn, their offspring. The numbers involved here could be staggering. As an opponent of amnesty I have voted consistently to take it out of the bill, but the House insisted by a mere seven votes to retain the provision.

Perhaps the most objectionable aspect of blanket amnesty is the fact that it penalizes those tens of thousands of potential immigrants who are waiting legally to enter our country.

There has been a compromise in the area of special agricultural workers and while the program outlined in the bill is not an ideal one, it is the best we can do if we intend to get an immigration reform bill out this year.

I am especially pleased to report that the conference agreement retains the House language, which I authored along with Congressman DREIER, on increasing the Border Patrol by 50 percent. This provision is an essential part of the bill and is critical to effective border enforcement. Under the conference agreement, the Border Patrol would be able to hire up to 50 percent more Border Patrol agents over the fiscal year 1987 through 1988 period. I have long advocated this kind of measure having first introduced similar legislation in the 96th Congress.

While there are features of the bill, including those I just mentioned, which trouble me and I am sure trouble other Members in this House, I believe we should vote to approve this conference report and get a bill to the President. Our country desperately needs to regain control over its borders. This bill will help us start that process and will provide the immediate relief on the border that we need.

Mr. EDWARDS of California. Mr. Speaker, I yield 3 minutes to the gentleman from New York [Mr. GARCIA].

Mr. GARCIA. I thank the gentleman for yielding me this time.

Mr. Speaker, just let me say to all of my colleagues who are here today that, as I said during the debate on the rule, that this is the end; Rasputin will live.

The fact of the matter is that I just want to make it clear that in kind of a crazy way I am glad that it is over; that this is it. An immigration bill is here 6 years after debate and turmoil and emotions up and down. This is the final hour.

I want to make it clear to every Member on this floor that the question of hungry people, whether they live north of us or live south of us will not deter them from coming to where they can feed their children. Our grandparents did it; our great-grandparents did it. It is not going to stop today. I want to make that very clear.

I am a product—my two sons—my grandfather who died several years back, I remember only too well, he came across the border from Brownsville and for 40 years he lived in this country always looking over this shoulder but always producing, always a taxpayer, always providing the best for his family. So for the amnesty I am grateful, but I want to make it very, very clear that this bill as it stands today is not to stop illegal immigrants from coming into the United States.

The policies that we have for our neighbors south of our border are horrendous. We have always taken a mañana attitude toward every one of those countries south of our border. This migration is different. These are not the migrants that came across through the Statue of Liberty; these migrants are walking. It is the first walking migration that this country has ever felt and it will continue. I say that because where hunger is, hunger will try and find an escape.

To my colleagues in the congressional Hispanic caucus who are voting for the bill, I just want them to know the following: They measured the bill as they saw it. They measured the amnesty against the sanctions, and we all had to make our judgments. As far as I am concerned, if they feel they made the right judgment, I am happy for them.

I hope that I can come back, as I said earlier today, and say to every Member in this Congress that I was wrong, that I was wrong, but history, I am afraid, will show that I am right. Three years from now when people who speak or sound different, who do not look the norm, are going to be pulled aside by INS inspectors and asked for identification, then we will come back and we will say, "That was a bad part of the bill."

Having said that, it is over, let us make the bill try and work, let us do everything humanly possible to get those persons who were here, who have been living here since prior to 1982, let us afford them every opportunity to become part and parcel of this great country.

Mr. RODINO. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. I thank the gentleman for yielding me this time.

Mr. Speaker, I would like to engage in a colloquy with Chairman RODINO and the gentleman from California [Mr. LUNGREN].

On page 36 of the statement of managers there is a statement clarifying the residency requirements of the special agricultural workers. As a conferee, the language as it reads does not reflect the intent of the conferees. My understanding is the the intent of the conferees is to place at least a 6-month requirement on the first group and a 3-month requirement on group 2. Is that correct?

Mr. RODINO. If the gentleman will yield, the gentleman's understanding is correct.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from California.

Mr. LUNGREN. That is my understanding.

Mr. PANETTA. I thank the gentleman for that clarification.

Mr. Speaker, we are on the threshold of enacting what I consider one of the major legislative accomplishments of the 99th Congress. I pay special tribute to all of those that have shown their leadership throughout the years and a special tribute to my friends CHUCK SCHUMER and HOWARD BERMAN who worked so long and diligently over these last 8 months on the agricultural issue.

□ 1620

The choice is a simple one for this House. The choice is protecting an existing system, where we have uncontrolled borders, employers who easily can exploit, workers who can easily be exploited, fear, death, discrimination, random raids, hiding versus a reform bill that tries to correct those concerns.

I do not know that this bill is going to work. We know that it is imperfect. Nobody can say it is going to work. But one thing is clear; the present situation is intolerable, and it must be responded to. Nobody can justify the situation as it exists today.

With leadership and with persistence and with oversight and with the same kind of courage that brought this bill to the floor, and with the same kind of oversight, this bill can succeed. That is why it should be supported by all Members.

Mr. LUNGREN. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. SHAW], a member of the full committee.

Mr. SHAW. Mr. Speaker, I rise in very strong support of the bill.

Mr. Speaker, we have heard speaker after speaker get up and say, "This is not a perfect bill." There has not been a perfect bill to come to this floor, but this bill certainly falls in the classification of making the best out of a bad situation.

I would like to speak for just one moment to the Members of Congress who voted, as I did, against amnesty. Let us take another look at what we have set up and what we are doing here.

I think that we made a strong statement when we voted against amnesty in that we did not want to reward those who have violated our laws. But you are not going to send them back. There are millions and millions of illegal aliens in this country that now will have an opportunity to start on the road toward citizenship. They will have the opportunity to come out of the shadows.

Now, you may think that is rewarding them, and I guess it is rewarding them in a way, but what is the alternative? The alternative is to have our INS people continue to labor, overwhelmed by numbers, being able only to keep up with the paperwork, and then say to them, "Go out and enforce employer sanctions."

It cannot be done. The only way we are going to be able to secure our borders is to take care of the backlog. We are not going to take care of the backlog by sending them back. That is not going to work. The only solution is what is in this bill.

It is a complex bill. It deals with not only amnesty and employer sanctions, which are the two most important parts of this billl, it also does provide for farm labor, which benefits us, the consumers. Compensation to the States: There is $1 billion in here that will go out to the States each and every year for the expense caused by amnesty. That is a fair solution; that is a fair compromise.

I think, also, one of the items that has not been mentioned in the debate today is we are doubling up the border patrol. This immigration bill says we are going to get tough with immigration laws; we are going to expedite our exclusionary process; we are going to take care of the backlog; and we are going to blunt the economic magnets that draw these people into the country illegally.

What more can we ever do with a piece of legislation than what is here?

Mr. EDWARDS of California. Mr. Speaker, I yield 2½ minutes to the gentleman from Wisconsin [Mr. SENSENBRENNER], a member of the committee.

Mr. LUNGREN. Mr. Speaker, I yield I minute additionally of my time to the gentleman from Wisconsin.

The SPEAKER pro tempore. The gentleman from Wisconsin [Mr. SENSENBRENNER] is recognized for 3½ minutes.

Mr. SENSENBRENNER. Mr. Speaker, there are four things that are terribly wrong with this bill, which are bad as public policy, and which this Nation will live to regret.

First, despite claims to the contrary, the employer sanctions in this bill are still sunsetted. Rather than having the automatic Garcia sunset of 6½ years, the legislation has a procedure that allows the Comptroller General to, after 3 years, sunset the employer sanctions, subject to validation by the Congress through a joint resolution.

The way the Kennedy sunset is worded, the Comptroller General will practically have to make that determination and employer sanctions will be gone.

Second, the House provision on amnesty was accepted, and there is no delay in amnesty to see whether employer sanctions will work. That means that any illegal alien who has been here continuously since January 1, 1982 will be able to petition for amnesty, receive amnesty, become a permanent resident alien, and eventually a citizen. Citizens have petitioning rights to bring in their relatives, and the comments that were made in opposition to amnesty by the gentleman from Florida [Mr. MCCOLLUM] last week still hold true today; literally one-third of the population of Mexico will be eligible to come into this country under this bill.

Third, the agricultural labor provisions are much too generous. The replenishment provisions are not good public policy, and in effect, we have a rolling legalization program which will bring in more aliens, qualify them for citizenship and petitioning rights, even over and above the regular legalization provisions contained in the conference report.

Finally, there is no 100 percent reimbursement to State and local governments for the expenses attendant to amnesty. I think that if we decide to change the policy relative to immigration, which is our prerogative under the Constitution, we ought to put out money where our mouth is and not saddle property-tax payers at the State and local level with literally hundreds of millions of dollars in additional education and welfare costs. Yet, this bill does precisely that.

The sum and substance of the conference report is that once sanctions expire, we will have nothing to stop the magnet drawing illegal aliens across our border. At the same time, we will have legalized millions of people and given them petitioning rights.

With permanent sanctions and no amnesty or delayed amnesty, as was contained in the bill from the other body, the jobs for the illegals will dry up, and the illegals will just find their way back home without massive deportation.

This bill does just the opposite of that and will not bring about the result of protecting our borders. I think that the Congress will live to rue the day when this legislation passed.

While I know that it is greased, I think that a contrary viewpoint has validity to it and I would hope that those who support this piece of legislation will be willing to pay for its huge costs, as well as be willing to fix up the mistake that is being made today.

Mr. EDWARDS of California. Mr. Speaker, I yield 1 minute to the distinguished gentleman from California [Mr. MINETA].

Mr. MINETA. Mr. Speaker, I rise in reluctant opposition to this conference report. The sponsors of this legislation, and the many Members who have worked on this bill have tried very hard to craft a balanced and workable product. I admire their dedication and effort.

On balance, however, the final product is not something that I can support. This conference report does not include the much needed House provision protecting El Salvadoran refugees, nor does this report contain adequate protection for State and local governments against the financial burdens that legalization will impose upon them.

But most importantly of all, Mr. Speaker, this bill's provision for employer sanctions takes us down the road toward an insidious racial discrimination.

Most Members of this House will never be asked to affirm, let alone prove their citizenship or residency. Looking and sounding American, they will never see these sanctions as an important factor in their lives.

But Mr. Speaker, no matter how many decades and generations nonwhites have been here, they will find these sanctions one more unfair and discriminatory burden to bear.

In many ways, Mr. Speaker, I would like to be able to support this bill. Among other things, it contains a long overdue increase in the colonial Hong Kong quota to 5,000 visas a year. As the original author of this provision, I am delighted to see it become law.

But Mr. Speaker, I cannot vote for a bill that will make it harder than ever for non-white Americans to be accepted for what they are: loyal Americans. No more, and no less.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Texas [Mr. BRYANT].

Mr. BRYANT. Mr. Speaker, I would like to offer my congratulations to the gentleman from New Jersey [Mr. RODINO] and the gentleman from Kentucky [Mr. MAZZOLI] for an excellent job and for biblical persistence in this very difficult matter.

Mr. Speaker, some of my closest friends in Texas, and some of my longest-term political supporters during the 4 years I have served in Congress and the 9 years in the State legislature before that, have urged me not to vote for this bill. They have strong concerns about some parts of this bill, and I understand those concerns. I identify with those concerns.

But the growing numbers of people entering this county illegally, and the growing perception that our Government does not have an effective immigration policy, has led to a rise, in my district, in many parts of Texas, and in many other parts of the country, of hostility and prejudice toward Hispanic Americans. I have witnessed this hostility increase dramatically in the 4 years I have been in Congress. It has been tearing apart my community, and many other communities as well.

If there were a better way to address this problem and reduce these tensions and hostilities, I would champion it. But there is not a better way. If there were, someone would have suggested it by now. And with every week that this problem goes unaddressed, it gets worse and the hostilities and the tensions increase.

So I have worked to bring this bill before Congress, and I have worked to make it the best bill I could. I have not succeeded at every turn. But I and others like me, some of whom have been fighting this fight much longer than I, have succeeded enough that the bill we have before us is a good, fair, effective bill, one that we can be proud to support.

The current effort to enact employer sanctions into law—to make it against the law to hire someone who is in this country illegally—began 14 years ago. Strong employer sanctions are absolutely essential to turn off the jobs magnet that encourages people to enter the United States illegally. They are the centerpiece of effective immigration control. And because of my efforts, they apply to all employers—no loopholes.

Many Americans are concerned that employer sanctions will lead to increased discrimination against Hispanics and other Americans who are legally here and entitled to work. I am very sensitive to that concern. And I have worked hard to put the maximum protections against discrimination into the bill.

The bill contains a number of strong protections against discrimination, more protections than have been included ever before, and in all likelihood more than we will be able to put in any future immigration bill if we fail to pass the bill before us today. There is universal verification, which means that employers are required to verify the legal status of all people they hire, no matter what they look like or how they talk. Employers have an affirmative defense against sanctions if they do the verification. There is also a specific provision, included in the bill for the first time, to make it clear that no employer is required to ask for any documentation other than that spelled out in the bill, and no employee is required to produce any other documentation. These two provisions prevent an employer from only verifying the status of certain people, or asking for more and more documentation from certain people, on the basis of skin color or accent.

There is the Frank amendment, the anti-discrimination amendment which establishes a special counsel in the Justice Department to investigate claims of employment-related discrimination. And there is the triggered sunset, which requires the General Accounting Office to study the implementation of employer sanctions and report to Congress after 3 years on whether the sanctions are causing widespread discrimination. If they are, then Congress is required to vote, on an expedited procedure, on sunsetting or revising them.

Many employers fear that sanctions may prove to be a burden on them. But the sanctions have been carefully designed for the minimum burden necessary for them to be effective. The bill spells out simple requirements for verification. It requires the GAO to work on an even simpler verification method using a more fraud-proof Social Security number. It imposes criminal penalties only on employers who engage in a continuous, habitual practice of knowingly hiring illegal immigrants; no inadvertent paperwork violations could give rise to criminal penalties. And even the civil sanctions could not be imposed for the first 6 months, and for the next 6 months every employer would get one warning before incurring any sanction.

The so-called Schumer agricultural guestworker compromise is deservedly one of the most controversial aspects of the bill. I would prefer to see no agricultural guestworker provision in the bill. I don't believe the growers need a special program to provide their labor force; I believe the growers should be subject to the rigors of a competitive employment market like every other industry in this country is. But it has become clear to me that the growers will end up either getting a special program in any immigration bill we pass or will use their muscle to keep us from passing one.

The Schumer compromise is the only guestworker program that very creative, dedicated, and persistent colleagues and staff members have been able to come up with that the growers will accept that does not make serfs out of people who grow our crops for us. It makes people who worked in U.S. agriculture for a major part of last year's growing season available to the growers—not as serfs who have no rights, but as temporary legal residents. If these people choose to do so, and can meet the English language, steady employment, and other legal requirements. Growers can recruit extra foreign workers under this program only if they first try their best to recruit American workers at a decent wage and decent working conditions. And the importation of foreign workers to work in America under this program would end completely after 1994. As Chairman RODINO and others have made clear, if it were not for this guestworker compromise, there would not be a bill before us today.

Many people do not believe the bill should contain a generous blanket amnesty program for people who entered the country illegally. I have opposed this concept as well. There is a legalization program in this bill; but to think of it as a blanket amnesty program is off the mark.

Except for the special agricultural guestworker compromise, no people would be eligible for legal status under the bill unless they could prove they had been in this country continuously for 6 years. Then, they would have to apply, and could only receive temporary legal status. They would have to wait another year and a half to apply for adjustment to permanent legal status, and then they must actually apply for permanent status within the next year after that. While they wait, they must remain continuously in the United States, keep a steady job, work to learn the English language and about our history and form of government, and stay out of trouble with the law.

If they are granted permanent status—a difficult step—it will be another 5 years of exemplary citizen-like behavior before they can apply to become U.S. citizens, and they will become citizens only if they are eligible. So we are not granting citizenship to anyone under this bill; we are not giving green cards to anyone under this bill. The "road to U.S. citizenship" we are allowing these people to travel is a long and difficult one, as it should be. No one will reach the end of it until he or she has been in this country for at least 11 years and has satisfied all of the requirements of citizenship. By that time, we will be assured that these people, whatever method they originally used to enter this country, will be ready for the responsibilities of citizenship.

We all know that the root cause of illegal immigration is the poor economic situation in the countries from which people come here illegally. Any effective immigration policy must ultimately address this root cause, I amended this bill to create a Commission for the Study of International Migration and Cooperative Economic Development. The Commission will study over a 3-year period and report to Congress on the ways in which we can use our international trade, investment and development laws to best help improve the conditions which lead people to immigrate here—without compromising in any way our own trade and investment policies.

Every one of us can find, if we want, something in this bill to oppose; some excuse, if you will, to vote against it. But everyone who is concerned about the rising tide of illegal immigration—the millions of jobs it has already taken from legal workers here, the cruel exploitation it has permitted of impoverished workers from other lands, the discrimination it has fostered among some of our fellow citizens, the tensions and misdirected passions it has created in almost every community of our Nation—everyone of us can and must find more in this legislation to support than to oppose.

On balance, this is a carefully crafted, balanced, tough, effective, fair bill, deserving of our support. It is one which will once again give the United States a practical, enforceable immigration policy. I urge your vote for the conference committee report.

Mr. LUNGREN. Mr. Speaker, I yield 1 minute to the gentleman from Nebraska [Mr. DAUB].

Mr. EDWARDS of California. Mr. Speaker, I yield an additional 2 minutes to the gentleman from Nebraska.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The gentleman from Nebraska [Mr. DAUB] is recognized for a total of 3 minutes.

Mr. DAUB, Mr. Speaker, it is with a great deal of dismay that I rise in opposition to the conference report on S. 1200, the Immigration Reform Act. I was honored to be appointed to the Immigration Conference Committee and envisioned that we would be able to develop a workable compromise on immigration reform.

Having said that, I want to say that for all the principal players, the principal participants in crafting this legislation and going through the 6 years that they have engaged in, I have nothing but increased esteem for each of these persons who have worked so hard and labored so long to bring this bill to the floor.

I have been a longstanding and strong advocate for immigration reform and firmly believe that we must regain control of our borders.

I do know that many of my concerns can be addressed by legislation which it is my understanding will be considered next year on legal immigration, preference limitation and fraudulent documentation. I look forward to working with Chairman MAZZOLI's subcommittee and to contributing to the needed changes in these particular areas.

I have had a chance to be involved in immigration for the better part of my adult life as an immigration lawyer and have some particular feelings about the kind of action we are here about ready to take. The final conference agreement contains not only the contentious "blanket amnesty" provisions, but the entire package of special preference for agricultural workers—a provision I liken as the "western growers buyout" provision. The general amnesty provisions retained in the final agreement are those which would bestow amnesty on all those illegal aliens who can prove by documentation that their residence existed in the United States since 1982. The Senate receded completely on their more realistic 1980 date and on their provision conditioning the granting of amnesty upon a commission report which confirmed that our borders had been secured.

Just as we indicated only 6 days ago that the question of amnesty is a question of fairness and confidence in our immigration laws, just as we consider amnesty to reward lawbreakers and perhaps set the stage for a future amnesty, then I must indicate to my colleagues that these are exactly the considerations that will be sanctioned with passage of this final conference report.

Husbands, wives, and unmarried children of immigrants from Mexico have been waiting for over 9 years to come to America. Brothers and sisters of United States citizens who are attempting to immigrate from Hong Kong have been waiting since 1974, over 12 years, to reunite with their families in our country, and with one fell swoop we are about to legalize all those who illegally crossed our borders, who have been here illegally residing and who have preempted the legal immigration of those who are trying to obey our laws. I sincerely believe that this process will cheapen the value of American citizenship, our most precious right, and this is something to which I cannot be a party.

As a strong conservative, I seldom if ever attempt to enact open-ended entitlement programs; however, I feel strongly that the conference did not legitimately outline the costs that will be incurred by the Federal Government upon enactment of the legalization program, an agreement that places a cap of $1 billion per year for each 4 years on the amount that will be reimbursed to the States.

The bill does contain strong employer sanctions and retains the Moorhead provisions calling for beefed up border control authorizations. Certainly these provisions, along with other "sweeteners" may entice many to vote for final passage of this conference report. All of the reasoning we have heard in support of the bill, coupled with the growing media sentiment for passage of a reform bill, I certainly understand. For the record, though, this is just too much to give away for the sake of enactment of a bill in 1986.

Mr. EDWARDS of California. Mr. Speaker, I yield the remainder of my time, which I believe is about 3 minutes, to the gentleman from California [Mr. MARTINEZ].

The SPEAKER pro tempore. The gentleman from California [Mr. MARTINEZ] is recognized for 3½ minutes.

Mr. MARTINEZ. Mr. Speaker, I rise today in opposition to an immigration bill that has something for everyone and nothing for anyone. It has been dressed up to bridge all sorts of interest gaps and to satisfy the powers that be, but in one task it utterly fails: giving the American people a better, more effective and more humane immigration law.

This bill proposes to give amnesty to undocumented aliens who have resided in this country since 1982. Who

are we kidding about amnesty? Aside from the requirements set out in this bill, the INS still practices over 20 principles of exclusion whereby they can decide to deport any alien instead of legalize him. And when an alien has spent a good deal of his effort while in this country trying to avoid being caught, how is he supposed to turn around and prove to the Government that he has been living in this country for all these years? He could get proof from his past employers, some of my colleagues say. My friends, when his employers have never deducted or reported his wages. And how many employers are going to testify to the Government that illegals was here before 82 and admit they broke the law and employed an undocumented alien?

This amnesty program is a farce. Six months after the bill is enacted, it gives aliens 18 months to apply for the program. Is this fair to those who apply after the 18-month deadline? Undocumented aliens in the barrio and in on the farms are not the best informed people. To notify millions of illegal immigrants about this law, and convince them that it is safe for them to apply, is going to take a lot longer than 18 months.

Legalization should be done on cases of merit, not in a blanket amnesty. The Government should determine how undocumented aliens have benefited and how they have hurt society, and adjust the numbers and qulifications for legal status accordingly. Strangely enough, the bill does this for Western European immigrants, in an attempt to reinstate numbers that were reduced in 1965. These numbers go by a tried and true preference system, which specifically takes into account the skills needed by our country and the skills these immigrants can offer. This is just and reasonable. The blanket amnesty contained in this bill is a monstrous farce. Someone who has been here 10 years may have a much more stable and productive livelihood, and may be contributing much more to society, than someone who has been here 4 years. Yet this bill requires that the two be considered for legalization under equal terms.

One of our own INS regional commissioners describes illegal immigrants in general as drug users and thieves. Would he, then, consider all of them together under a blanket amnesty? We saw the unfortunate result of such a policy during the Mariel boatlift of 1981, when our blanket acceptance of Cuban immigrants gave our country a boatload of people seeking refuge and some seeking a place to practice their criminal activity. A blanket amnesty is a quick fix, not a policy. Treating applicants like potential American citizens—on a basis of merit—is our present policy and should continue to be our policy. This bill continues this policy in the case of Europeans. Do the authors of this legislation consider European immigrants people but undocumented aliens who live in the United States cattle? Undocumented aliens are not different; they are more numerous. We should not put them under a different policy; we should provide more resources for the INS to process them under existing policy.

There is a provision in this legalization program which is particularly glaring in its shortsightedness and its injustice. That is the so-called Schumer proposal, which would give legal status to 350,000 illegal aliens who had worked for 90 days last year in perishable agriculture. It further allows for admission of so-called replenishment workers, who would be eligible for permanent resident status after working in agriculture for 3 years for at least 90 days per year. Why should we make special provisions for farmworkers but not for garment or factory workers? I assure my colleagues that there are many more American farmworkers than garment or factory workers who are displaced by illegal aliens. The only difference is that the garment industry does not have the lobby that agriculture does. This is ironic because, after the 90 days of work on the farms, where are these workers going to go for the other 9 months of the year? To the cities, where they will compete with American workers for jobs in the factories.

Another factor in this legalization program is cost. This bill places a cap of $1 billion in each of 4 years on Federal reimbursement to States for costs incurred by fulfilling the medical, educational, and administrative costs of legalization. Let me read you a telegram I received today from the Honorable Peter Shabarum, chairman of the Los Angeles County Board of Supervisors. Los Angeles County has more undocumented alien residents than any other county in the Nation. The telegram reads:

Dear Congressman Martinez: I urge that you oppose conference report on immigration reform legislation. I am concerned that the bill's legalization assistance provisions would leave most of Los Angeles County's estimated $190 million in annual costs for legalized alien health and welfare unreimbursed. The Schumer farm worker amendment makes a mockery of the amnesty date and renders the law vulnerable to abuse leading to higher Government costs. The consequences of both the Schumer amendment and the amnesty provision aggravate an already impossible physical dilemma facing the taxpayers of Los Angeles County. We firmly believe that the Federal Government should reimburse all legalization-related costs so county taxpayers would not have to bear the costs of the Federal decision to grant legal status to undocumented aliens.

Sincerely, Peter F. Schabarum, chairman, Los Angeles County Board of Supervisors.

For the first time in history, this bill institutes Federal penalties for private citizens who hire illegal aliens. This provision is latent with discrimination—if it weren't, the House and Senate would not both have agreed to attach an elaborate antidiscrimination measure to it. This country cannot countenance a law that promotes discrimination, no matter how it is dressed up. The solution is not a Frank amendment, no matter how well-intentioned, because the employer sanctions approach is fundamentally flawed. We should make work permits conditional on having a Social Security card, which cannot be obtained by anyone who is not a citizen or a legal resident. This will put the burden of enforcing the law on the Government, where it belongs, not on private employers. Not only is this unfair to private employers, but it will cause them, out of fear, to discriminate against prospective employees who are "foreign-looking." We need legislation that incorporates immigrants into American society, not reactive measures that are bound to foster discrimination and hatred.

This legislation is a bad product built on a misguided foundation. Immigration reform we need, but let us produce it according to the longer term, more enlightened principles by which our Nation has always approached this extremely important subject. I urge my colleagues to look beyond tomorrow, beyond this pressured moment, and think seriously and humanely about guiding the formation of the great country in which we live.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, listening to this debate reminds me of the old adage: "The perfect is the enemy of the good." We have produced a good bill, not a perfect bill, but we have done the best that we could.

Every nation has the responsibility and obligation to control its own borders, to do it responsibly, with compassion and fairness, and that is exactly what we have done. We have protected America and its citizens from the unreasonable flow of illegal immigration. We have protected undocumented aliens who have been here for a long time, treating them with dignity and compassion, and we have protected the civil rights and liberties of Americans in the process, particularly in light of the fact that we are requiring no national identification card in this bill, nor authorizing it.

This is not a perfect bill. It is a good bill. It deserves passage.

Mr. LUNGREN. Mr. Speaker, I yield 2 minutes to the gentleman from Washington [Mr. MORRISON].

Mr. MORRISON of Washington. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, what a difference a few days can make. It just seems like a matter of hours ago when Congressman LUNGREN was here leading the charge to defeat a rule, and thank goodness for the sake of an issue that is vitally important to this country that the gentleman from California [Mr. LUNGREN], with the leadership of the gentleman from New Jersey [Mr. RODINO], the gentleman from Kentucky [Mr. MAZZOLI], and the help of the gentleman from New York [Mr. SCHEUER], and the gentleman from California [Mr. PANETTA], and others—I must be careful with the list because I will leave some people out—that we are here today in a relatively tranquil setting, all of us agreeing that this package is not perfect, but we have it in front of us and it is an answer to a number of difficulties that have plagued this Nation now for decades.

I particularly am pleased with the farmworker provisions. I would have preferred the structured arrangement that we saw to in 1984; however, the package we have works, I believe, for all of us. It has the endorsement of all America's major farm groups, as well as farmworker organizations. That has to be a record as far as the consideration of sensitive issues such as immigration reform.

So I urge my colleagues to support this measure and commend all those parties who have been responsible for bringing this day to the House of Representatives.

Mr. LUNGREN. Mr. Speaker, I yield myself such time as I may consume.

Well, Mr. Speaker, a number of Members have put it in a number of different ways. Yesterday I told a member of the press that this is not the Sistine Chapel, but it is not a bad paint job. I guess what that means is this may not be artistic, this may not be the best thing that some of us think we could produce, but it is a workmanlike product. It is the best we can bring to the floor of the House and the Senate and hopefully to the desk of the President in this Congress and perhaps for many, many years.

Immigration reform is absolutely needed. It is needed not only in my home State of California, not only throughout the Southwest, but it is needed throughout the country because it is in fact a national issue.

The question of who shall and who shall not become citizens, who shall and who shall not be allowed into the United States and whether in fact the United States as an act of its sovereignty may determine its own borders, all of those are national issues. Those are not things that we in California or Los Angeles or Orange County can do for ourselves. We do not want to do that. The Constitution does not allow us to do that; but for far too long people in those areas have asked, "How long, how long must we wait until Congress does something about the problem?"

We have enormous costs associated with this, fiscal costs on local communities and local jurisdictions, social costs, whole costs that have not even been thought of in this Congress for many years.

We need to act. We need to act as soon as possible.

For those of you who say that we would get a better bill in 2 years, I ask, what happened when you argued that 2 years ago and 4 years ago?

For those of you who say that we need a more generous amnesty, I ask you, did you get a more generous amnesty 2 years or 4 years ago?

For those of you who say, "I don't want any amnesty at all," I ask you, do you want to have to worry about an amnesty that is even more generous next time around with a date that is brought up even further?

□ 1645

What I am suggesting is that all parties have had to compromise on this issue, as is the case most times with comprehensive legislation.

We have retained employer sanctions. It is an important part of this bill; it is an indelible part of this bill.

We have removed the automatic sunset. For those who worry that we would have an actual, real legalization but no real employer sanctions, we have taken care of that.

For those who have been concerned about the Senate provisions that we might postpone legalization for those we determine to be legalized for at least 3 years, we have removed that. You have a legalization that is actual, that is real, that will mean something to those people who have been in your community for long periods of time and become members of those communities for long periods of time—those very same people that many Members have asked our subcommittee to pass private bills on behalf of, I might add; those same people that we have received letters on behalf of in prior times when we dealt with private legislation, letters from the community leaders saying, "We know they came here illegally, but make an exception for this person, who has become a good member of our community." We have done that in a general sense in the legalization.

We have assisted enforcement, because the Border Patrol will tell you that the single thing that they have needed and asked for and been without for years is employer sanctions. "How," they say, "can we enforce a law that says that it is illegal to come here for work without proper documentation, but it is not illegal for the employer to hire that person?" We will answer the question as to those who have been exploited by those few employers—and I say that they are few, but they are nonetheless here—who have hired illegal aliens specifically so that they can exploit them. That is unfair to those workers. It is unfair to the competitors in those industries, other employers, who follow the law and are undercut in their competitiveness by the fact that those are breaking the law and taking advantage.

We have answered the question of what are we going to do about the spider holes that I find in my State, where people have burrowed into the ground; first, because they think that they cannot pay for housing; but second, because they fear the INS on the one hand, and they fear being subjected to victimization by the criminal element on the other hand—those people who have been in the dark shadows in our communities, who have been victimized by the criminal element and have not felt free to come forward to law enforcement to say that they have been victims because they fear that they will be identified as being here illegally.

Yes; we did make a special program for the agricultural problem, and the reason that we did that is because there is finally recognized to be a problem in this country. I do not think that we could have gotten a bill without recognizing that. I do not particularly like the grand outlines of this provision, but it is the best that we can do. I preferred the Wilson amendment; I have been promoting it for 8 years. It will never get on the floor. So you can either just sulk in the corner and say, "I can't get exactly what I want, and therefore, nothing will go through," or you try and work out a compromise.

This is a grand compromise. This satisfies no one entirely, but I would suggest that it does violence to no one entirely. It takes care of the legitimate needs that are recognized in this country.

We still have missionary work to do. If we pass it on this floor, we still have to make sure that it is going to be passed on the other side of the Capitol. That is going to take some work. We still have to sit down and talk with some at the other end of Pennsylvania Avenue as to why we made the compromises that we did.

I would just say, if you look at the various elements of this bill in a vacuum, you probably would not pass it. If you look at them in total and you look at them in comparison to the alternatives, I think that you cannot do anything but pass this package.

The alternatives are basically do nothing, continue with the problem that we have now, or look into the unknown and hope that we are going to do something in the next Congress or the Congress beyond that, or the Congress beyond that. If you look at the

history of Congress, immigration reform comes about if you are lucky once a generation. This is our time in this generation to do something about it. This is our time to stand up and be counted. This is our time to not just stop by and say that the status quo is appropriate.

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

Mr. LUNGREN. I am happy to yield to my friend, the gentleman from California.

Mr. ROYBAL. I appreciate the gentleman's yielding.

Mr. Speaker, I would like to have some explanation as to what constructively was done for the people who are going to work in farms. For example, you probably remember that just last year we proposed an amendment here that would have provided toilets and fresh water for people working the fields. Is that in the bill?

Mr. LUNGREN. What we have incorporated into the law are all the protections that were agreed upon by the farmworker rights groups and the agricultural groups. They are now in law, not just regulation. They will have the opportunity to have those protections that they never had before.

Mr. ROYBAL. But it is not in the bill.

Mr. LUNGREN. The fact of the matter is, if they are not legalized, they have very little ability to come forward and protect themselves. With legalization, they will have more protection, not less protection. It seems to me that if you want to do something for these people, vote for this bill.

Mr. RODINO. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. BUSTAMANTE].

Mr. BUSTAMANTE. Mr. Speaker, I rise in support of the conference report.

Mr. Speaker, I will support this imperfect bill becaue I am committed to do something about our immigration policy. There are questions whether the bill will adequatly provide for the costs this legislation will impose on States and local governments. I understand that the reimbursement provision is to ensure that States and localities will not be forced to increase taxes to pay for the costs of legalization. If the current reimbursement formula to States does not adequately cover the costs, we will have to revisit this issue to ensure that local governments will not bear the burden of this Federal provision.

The legalization provision prohibits legalized aliens from receiving federally funded benefits, and therefore places the responsibility for providing services such as acute health care on States and localities. According to the Congressional Budget Office, the cost associated with the legalization provision will amount to $5 billion. However, since no one really knows how many aliens would be eligible for legalization and how many services they would consume, our home States are liable to face a financial burden of untold proportions as a result of this change in Federal policy. I therefore urge my colleagues to join in ongoing efforts to ensure that States and local government are appropriately compensated.

Mr. RODINO. Mr. Speaker, I yield 1 minute to the gentleman from Florida [Mr. SMITH].

Mr. SMITH of Florida. I thank the gentleman for yielding time to me.

Mr. Speaker, in 1 minute, let me just say this is something that needed to be done. The American people want immigration reform. We have given them immigration reform. It is good in many respects. It falls short in some respects, but it is not over. There is going to be addressing of these problems for many years to come, but we made a good start.

We will be bringing people out of a shadow economy, people will be paying taxes, people will be coming out in the sunshine, there will not be the abuse of workers, employers will not be able to provide poor-quality jobs for people, they will not be able to oppress people, sanctions will keep a magnet from attracting these people here—all of those things we know.

We also know that there is an important issue here, and it is not amnesty. This is legalization. Everyone who was excludable yesterday will be excludable tomorrow. Someone who did not qualify for citizenship tomorrow will not qualify the day after. It is not amnesty. We are not bringing families here, only people who qualify have to apply.

And finally, may I just salute all of those who worked hard, and I would urge my colleagues to call this bill the Rodino-Simpson-Mazzoli Act of 1986.

Mr. RODINO. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Mr. Speaker, I rise in support of this historic conference agreement. It's not perfect. God knows there are things in here that I wish weren't.

But an omnibus immigration bill can't be all things for all people. What we ultimately have to ask ourselves is whether this bill, on balance, serves the national interest.

Any, in my view, the answer to that question is a resounding "yes." Illegal immigration into this country is a national crisis, and if we don't act now to regain control of our borders we may forever lose the chance.

Reject this conference report, whatever its imperfections, and there's no looking back. We will have lost a historic opportunity. Far-reaching and critically needed immigration reform will be by the boards.

I urge my colleagues to vote "yes." Put the national interest above local interests; put our future above our past; put political leadership above political posturing. Vote up this report.

Mr. RODINO. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. SCHUMER].

Mr. SCHUMER. I thank the gentleman for yielding time to me.

Mr. Speaker, to me immigration reform, this bill, has become a metaphor for governance. Can the Congress do what the Founding Fathers intended it to do? Can we legislate, in the noblest sense of the word? And in this day and age, with all the crosscutting pressures upon us, as the country becomes bigger and more diverse, it seems sometimes that we cannot. But this bill, and those like it, represent Congress at its noblest. This bill, my colleagues, is why we are here.

We are here to solve problems before they become crises, and sure as we are sitting here today, if we do nothing, our immigration problem will explode into an immigration crisis. We are here to do what America needs, despite the intense lobbying of myriads of special interests, and for sure on this bill, the special interests were out to kill it, and yet up to this point Congress stood its ground.

We are here finally to have the courage to stick our necks out and vote for an imperfect, easily criticized solution, but which we know in our hearts is far superior to doing nothing and continuing the deplorable status quo. In this way, too, on this bill, Congress has gloriously risen to the occasion.

Mr. Speaker, the passage of this bill, added to the passage of the tax reform bill, make this a historic Congress. We can all be proud to have played a part.

Mr. LOWERY of California. Mr. Speaker, it is said that good things come to those who wait.

Well, if this is true, then Californians who have been waiting 8 years for immigration reform should expect a perfect legislative package addressing this critical problem. S. 1200 is not perfect, but it does offer the best hope for a desperately needed revision in this Nation's immigration laws. Therefore, I rise in support of this conference report and urge my colleagues to vote in favor of S. 1200.

Mr. Speaker, there is no more important issue to my constituents in San Diego than control of our southern border. The illicit flow of aliens who regularly pass through our porous border is a national embarrassment and has reflected a lack of will by the Congress to protect our sovereign borders. Fortunately, S. 1200 attempts to address this most critical issue.

S. 1200 provides more lenient amnesty provisions than I would prefer. Aside from the fundamental inequity of any two-tiered legalization system, I fear these amnesty provisions will have a damaging impact on local governments who must bear the increased

costs—educational, health, and others—associated with legalization of a large number of illegal aliens. However, I do recognize that some amnesty is needed if we are to formulate a politically balanced bill and regard the amnesty provisions as acceptable. The overriding need to control our borders compels me to support this bill, and I do so with a sense of urgency and hope.

S. 1200 imposes civil and criminal penalties on those employers who knowingly hire undocumented aliens and provides additional resources for enforcement agencies. The primary reason for the influx of aliens is the prospect for gainful employment. Until and unless employers are threatened with civil and criminal penalties, there is little hope that the United States will be able to stem the flow of illegals pouring into the United States. Moreover, unless our Federal agents—the INS and Border Patrol—are given the resources necessary to control the border and efficiently process legalization petitions, the lure of successful illegal entry will drive aliens across our border. S. 1200 acts responsibly in these two important areas.

In closing, Mr. Speaker, I would like to thank this Congress for formulating a workable legislative package which addresses this most important issue. My constituents are demanding action now—not tomorrow—and the 99th Congress has risen to the task.

Mr. FRENZEL. Mr. Speaker, after a half dozen years of steady, intense work, the Congress seems to be at last poised on the brink of passage of an immigration bill.

To say it is overdue is an understatement. To say it is imperfect is also an understatement. I have voted for a number of versions of immigration reform. All of them have been flawed. Most of them have been seriously flawed.

This bill is seriously flawed, too. It still rewards successful law breaking by giving the prize of citizenship. Amnesty is a provision that insult all the law-abiding people around the world waiting patiently, and legally, for their numbers to come up.

Another flaw is the cost, $1 billion per year. That's a very heavy price to pay for the long-range potential for control of the border.

However, the need for control of illegals is growing. The problem is worsening daily. The need is great enough that I will vote for the bill in spite of its egregious faults. My vote is cast in hope. It may not work. It may work badly.

The net of it all is that Congress can't wait any longer. It must act. This bill, flawed as it is, gives some promise of helping us to control our borders. On that basis, it deserves a try.

Mr. DONNELLY. Mr. Speaker, I support the conference report on the immigration reform bill with great reluctance. It is better than no change from current law, but not much.

The House-passed immigration reform legislation contained a provision which I sponsored to make available approximately 65,000 nonpreference visas for western Europe for each of the next 5 years. The conference report provides for only 5,000 nonpreference visas for all of western Europe for each of the next 2 years. It is extremely disappointing that today, as the House considers historic immigration reform, we are unable to also resolve the problem of western European immigration.

The problem western European immigrants face today is rooted in the most recent immigration reform effort, undertaken in 1965. That legislation was intended to correct the apparent discrimination against residents of countries in southern and eastern Europe. It eliminated country-by-country quotas in favor of a single, worldwide quota of 270,000.

Postwar European prosperity slowed the demand for immigrant visas from that continent, and the authors of the legislation expected the new worldwide quota to accommodate virtually anyone who wanted to come to the United States.

Events of the last 20 years, however, have exacerbated the problem of discrimination, not eliminated it. No one predicted, in 1965, the massive wave of immigration from Asia. Attorney General Robert Kennedy told Chairman RODINO's subcommittee in 1964 that immigration for the Asian-Pacific triangle would be approximately 5,000 in the first few years, and would decline after that.

The experience of the last 20 years has been very different. Immigration from Asia and the Pacific last year was not 5,000, but rather 121,000. It accounted for 46 percent of the worldwide quota, not 2 percent as Attorney General Kennedy predicted. In addition, the huge number of immigrants who qualify for preference visas outstrips the worldwide quota, so there is now a lengthy list even for those who are supposed to be at the head of the waiting line. Would-be immigrants who do not qualify for a preference visa have not been admitted since 1978.

As a result of this policy, in effect since 1965, Europeans are being squeezed out of the immigration mix. In the 1950's, more than half of our Nation's new arrivals came from Europe. In the 1970's, the percentage declined to less than 18 percent. Last year, fewer than 8.3 percent of the immigrant visas granted under the world-wide quota went to immigrants from Europe.

My legislation, which became a provision of the House immigration reform bill, restored balance and fairness to our immigration law. It authorized approximately 65,000 new visas reserved specifically for immigrants from countries that have historically contributed to our immigrant stock, but have suffered a sharp drop in admissions in recent years.

To my great regret, the conferees failed to include this language in the conference report. The conference report provides, instead, for 5,000 additional nonpreference visas for all of western Europe for each of the next 2 years. Visas are to be directed to those countries that have had a sharp falloff in immigration since 1965, among them Italy, Ireland, Greece, and over a dozen other countries. While I concede that providing 5,000 additional visas is an improvement over current law, it is hardly an adequate solution to the sharp drop in western European immigration. Inclusion of my provision, authorizing a sufficient number of visas to redress the present imbalance, would have been appropriate for this immigration reform legislation. It is fully consistent with the goal of reestablishing control of our borders by reducing illegal immigration. I am sorry the House does not have the opportunity today to adopt my provision.

This conference report does represent, however, a substantial first step toward restoring geographic balance to the immigration mix. Further, the statement of conference managers instructs the immigration subcommittees to address the issue of legal immigration early next year, and I intend to work closely with them in that effort. I therefore support the conference report, despite the fact that it falls far short of what I hoped it would achieve, because it represents a first step toward true reform of the worldwide quota system.

Mr. McKINNEY. Mr. Speaker, after many long hours, months, and even years of debate, I am pleased that the House today passed immigration reform legislation—a monumental event. Two years ago at this time, the House and Senate passed their own versions but then the measure became deadlock during conference and time ran out on the 98th Congress. This Congress witnessed courageous resolve by many Members determined to effect immigration reform before the 99th Congress ends. Those who helped to orchestrate this measure to passage are to be commended.

Mr. Speaker, while there is wide agreement that immigration reform is necessary, there are a sufficient number of issues involved such as amnesty, employer sanctions, and foreign agriculture workers, which make reform a divisive issue. The bill that came before the floor today covered all these areas and difficult compromises were worked out.

I must admit that the bill is not perfect, containing such provisions as granting agriculture workers temporary resident status even if they worked for just 90 days on a farm. Yet the bill was daring enough to provide temporary resident status to all aliens continuously living in the United States from before 1982, to prohibit employers from knowingly hiring unauthorized aliens to work in the United States by imposing civil and criminal penalties on offenders, and to expand border-patrol personnel by 50 percent.

Mr. Speaker, I know that back home in my district in Connecticut, many of my constituents will be pleased with the passage of today's immigration reform bill. Many, however, will be disappointed with what they might consider to be a lenient amnesty program. I only want to say to these constituents that I sincerely believe the amnesty provision is essential to the reform package and is not only the fairest option for those aliens who have made this country their home, but is also the most pragmatic choice.

Not legalizing aliens would have a negative impact on the social and legal fabric of our country. Presently, aliens are being exploited as a result of fear of discovery. A subclass of people who cannot exercise their rights has been created. This leads to disrespect and disregard of the law and promotes crime—not on the part of aliens, but by those who take advantage of their situation. Those who disagree and wish to see aliens deported are not facing reality. Aliens simply cannot all be found, let alone deported. It took 8,000 man-

hours to deport just three Iranian students during the time of the Iranian hostage crisis.

Mr. Speaker, a wise psalmist once wrote that those who sow in tears shall reap rejoicing. Today we rejoice over a job hard fought and well done.

Mr. LEVINE of California. Mr. Speaker, I rise to express my deep disappointment that the provision to temporarily suspend deportation of Salvadorans and Nicaraguans was dropped by the House-Senate conference on S. 1200, the "Immigration Control and Legalization Amendments." Although this legislation contains some important reforms of our immigration laws, it would have been a significantly stronger bill had these provisions been retained.

Granting temporary asylum to Salvadoran and Nicaraguan refugees is primarily a humanitarian issue. These countries are involved in civil conflicts characterized by extreme brutality and random violence. In response to this violence refugees from El Salvador and Nicaragua are fleeing to the United States. But under our current immigration law, they are considered illegal aliens, and subject to being returned to their own countries. Our standards of justice, decency, and human rights demand that we do not return desperate and frightened people to situations of civil danger and violence.

Additionally, there are compelling legal reasons that we must halt deportation of refugees. The Geneva Conventions of 1949, the Protocols Additional to the Geneva Conventions, and customary humanitarian law require protection for Salvadoran refugees. Refugees have the right to flee from armed conflict, seek asylum, and receive at least temporary refuge. When we refuse to grant even temporary refuge, we violate our international agreements, and weaken our credibility internationally.

Allowing temporary refuge to people fleeing El Salvador and Nicaragua would give Congress the opportunity to study the issue and formulate policy, without the pressure of continued deportations. By deleting this provision, Congress is missing a key opportunity to construct a fair policy which balances humanitarian issues, international law, and U.S. immigration concerns.

Although I will support this much-needed legislation on final passage, I deeply regret that it does not contain the House-approved language to protect El Salvadorans and Nicaraguans who are fleeing the violence in their countries.

The SPEAKER pro tempore. All time has expired.

Mr. RODINO. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. GARCIA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 238, nays 173, not voting 21, as follows:

[Roll No. 469]

NOT VOTING—21

Badham	Hansen	McEwen
Breaux	Hartnett	Moore
Brooks	Jones (OK)	Nichols
Campbell	Kindness	Rudd
Conyers	Latta	St Germain
Fowler	Long	Weaver
Grotberg	Lundine	Weiss

□ 1705

The Clerk announced the following pairs:

On this vote:

Mr. St Germain for, with Mr. Brooks against.

Mr. Hansen for, with Mr. Conyers against.

Mr. WALDON changed his vote from "nay" to "yea."

Mr. CHAPPELL changed his vote from "yea" to "nay."

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. RODINO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on S. 1200 just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

PERSONAL EXPLANATION

Mr. BADHAM. Mr. Speaker, during the consideration of the conference report on the immigration and legalization amendments I was unavoidably detained in my district meeting with the Secretary of Transportation, Elizabeth Dole.

Had I been present, on Rollcall 469, I would have voted aye.

REQUEST FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 412, CORRECTING THE ENROLLMENT OF S. 1200, IMMIGRATION REFORM AND CONTROL ACT OF 1985

Mr. RODINO. Mr. Speaker, I ask unanimous consent for the immediate consideration of the concurrent resolution (H. Con. Res. 412) to make a correction in the enrollment of the bill S. 1200.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr LUNGREN. Mr. Speaker, reserving the right to object. I reserve the right to object to give the gentleman from New Jersey [Mr. RODINO] an opportunity to explain what I believe is a technical request that he has made.

Under my reservation, I yield to the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Speaker, I merely want to advise the gentleman that the purpose of the concurrent resolution is to make a correction in the enrollment to reflect a House provision which was agreed to in conference, but which the staff inadvertently omitted in the filing of the conference report, a technical error.

Mr. LUNGREN. Mr. Speaker, I thank the gentleman for his explanation, and I yield to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, as I understand it, this is just a technical correction to take care of a staff error.

Mr. LUNGREN. Staff error. That is correct, and I have been assured that is the case.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

Mr. GONZALEZ. Mr. Speaker, reserving the right to object, and I do not think I will, but could the gentleman from New Jersey [Mr. RODINO] tell us what this has reference to? What is the subject matter of that which was omitted?

I yield to the gentleman from New Jersey [Mr. RODINO].

Mr. RODINO. Mr. Speaker, it was an omission, a technical omission that was inadvertently left out when the legislative people put together the conference report which we have presented to them.

Mr. GONZALEZ. Nothing of substance?

Mr. RODINO. Well, the whole bill is of substance, but this was left out inadvertently as a technical error.

Mr. GONZALES. Well, that is what I mean; the nature of the technical amendment is really not substantial, or is it?

Mr. RODINO. Well, the amendment itself may be a portion of the bill which, when read together of course could be substantial, because it forms a part of the bill. But it was a matter that had been agreed to; and that as a result of the filing of the conference report, the legislative counsel, in filing it, left out this language.

Mr. GONZALEZ. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

□ 1715

CONFERENCE REPORT ON HOUSE JOINT RESOLUTION 738, CONTINUING APPROPRIATIONS, 1987

Mr. WHITTEN submitted the following conference report and statement on the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes:

CONFERENCE REPORT (H. REPT. 99-1005)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.J. Res. 738) "making continuing appropriations for the fiscal year 1987, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 61, 62, 63, 64, 65, 66, 67, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 95, 97, 98, 99, 100, 102, 103, 104, 105, 106, 107, 110, 111, 112, 115, 116, 121, 123, and 125.

That the House recede from its disagreement to the amendments of the Senate numbered 13, 17, 18, 20, 21, 22, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 48, 49, 50, 52, 55, 57, 58, 118, and 126, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

(a) Such amounts as may be necessary for programs, projects or activities provided for in the Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987, at a rate of operations and to the extent and in the manner provided as follows, to be effective as if it had been enacted into law as the regular appropriations Act:

An Act making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1987, and for other purposes

TITLE I—AGRICULTURAL PROGRAMS

PRODUCTION, PROCESSING AND MARKETING

OFFICE OF THE SECRETARY

For necessary expenses of the Office of the Secretary of Agriculture, including not to exceed $75,000 for employment under 5 U.S.C. 3109, $1,623,000: Provided, That not to exceed $8,000 of this amount shall be available for official reception and representation expenses, not otherwise provided for, as determined by the Secretary.

OFFICE OF THE ASSISTANT SECRETARY FOR ADMINISTRATION

For necessary expenses of the Office of the Assistant Secretary for Administration to carry out the programs funded in this Act, $455,000.

RENTAL PAYMENTS (USDA)

(INCLUDING TRANSFERS OF FUNDS)

For payment of space rental and related costs pursuant to Public Law 92-313 for programs and activities of the Department of Agriculture which are included in this Act, $48,728,000: Provided, That in the event an agency within the Department of Agriculture should require modification of space needs, the Secretary of Agriculture may transfer a share of that agency's appropriation made available by this Act to this appropriation, or may transfer a share of this appropriation to that agency's appropriation, but such transfers shall not exceed 10 per centum of the funds made available for space rental and related costs to or from this account.

BUILDING OPERATIONS AND MAINTENANCE

For the operation, maintenance, and repair of the Washington, D.C. Agriculture building complex pursuant to the delegation of authority from the Administrator of General Services authorized by 40 U.S.C. 486, $18,039,000.

ADVISORY COMMITTEES (USDA)

For necessary expenses for activities of Advisory Committees of the Department of Agriculture which are included in this Act, $1,308,000: Provided, That no other funds in this Act shall be available to the Department of Agriculture for support of activities of Advisory Committees.

DEPARTMENTAL ADMINISTRATION

(INCLUDING TRANSFERS OF FUNDS)

For Budget and Program Analysis, $3,611,000; for Personnel, Finance and Management, Operations, Information Resources Management, Advocacy and Enterprise, and Administrative Law Judges and Judicial Officer, $17,616,000; making a total of $21,227,000 for Departmental Administration to provide for necessary expenses for management support services to offices of the Department of Agriculture and for general administration and emergency preparedness of the Department of Agriculture, re-

pairs and alterations, and other miscellaneous supplies and expenses not otherwise provided for and necessary for the practical and efficient work of the Department of Agriculture, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), of which not to exceed $10,000 is for employment under 5 U.S.C. 3109: Provided, That this appropriation shall be reimbursed from applicable appropriations in this Act for travel expenses incident to the holding of hearings as required by 5 U.S.C. 551–558.

WORKING CAPITAL FUND

An amount of $5,708,000 is hereby appropriated to the Departmental Working Capital Fund to increase the Government's equity in this fund and to provide for the purchase of automated data processing, data communication, and other related equipment necessary for the provision of Departmental centralized services to the agencies.

OFFICE OF THE ASSISTANT SECRETARY FOR GOVERNMENTAL AND PUBLIC AFFAIRS

For necessary expenses of the Office of the Assistant Secretary for Governmental and Public Affairs to carry out the programs funded in this Act, $318,000.

OFFICE OF GOVERNMENTAL AND PUBLIC AFFAIRS

For necessary expenses to carry on services relating to the coordination of programs involving public affairs, and for the dissemination of agricultural information and the coordination of information, work and programs authorized by Congress in the Department, $7,293,000, of which not to exceed $10,000 shall be available for employment under 5 U.S.C. 3109, and not to exceed $2,000,000 may be used for farmers' bulletins and not fewer than two hundred thirty-two thousand two hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture) as authorized by 44 U.S.C. 1301: Provided, That in the preparation of motion pictures or exhibits by the Department, this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

For necessary expenses for liaison with the Congress on legislative matters, $465,000.

For necessary expenses for programs involving intergovernmental affairs and liaison within the executive branch, $440,000.

OFFICE OF THE INSPECTOR GENERAL

For necessary expenses of the Office of the Inspector General, including employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), $44,461,000, including such sums as may be necessary for contracting and other arrangements with public agencies and private persons pursuant to section 6(a)(8) of the Inspector General Act of 1978 (Public Law 95–452), and including a sum not to exceed $50,000 for employment under 5 U.S.C. 3109; and including a sum not to exceed $75,000 for certain confidential operational expenses including the payment of informants, to be expended under the direction of the Inspector General pursuant to Public Law 95–452 and Section 1337 of Public Law 97–98.

OFFICE OF THE GENERAL COUNSEL

For necessary expenses of the Office of the General Counsel, $17,131,000.

OFFICE OF THE ASSISTANT SECRETARY FOR ECONOMICS

For necessary expenses of the Office of the Assistant Secretary for Economics to carry out the programs funded in this Act, $448,000.

ECONOMIC RESEARCH SERVICE

For necessary expenses of the Economic Research Service in conducting economic research and service relating to agricultural production, marketing, and distribution, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627), and other laws, including economics of marketing; analyses relating to farm prices, income and population, and demand for farm products, use of resources in agriculture, adjustments, costs and returns in farming, and farm finance; research relating to the economic and marketing aspects of farmer cooperatives; and for analyses of supply and demand for farm products in foreign countries and their effect on prospects for United States exports, progress in economic development and its relation to sales of farm products, assembly and analysis of agricultural trade statistics and analysis of international financial and monetary programs and policies as they affect the competitive position of United States farm products, $43,982,000; of which not less than $200,000 shall be available for investigation, determination and finding as to the effect upon the production of food and upon the agricultural economy of any proposed action affecting such subject matter pending before the Administrator of the Environmental Protection Agency for presentation, in the public interest, before said Administrator, other agencies or before the courts: Provided, That not less than $350,000 of the funds contained in this appropriation shall be available to continue to gather statistics and conduct a special study on the price spread between the farmer and the consumer: Provided further, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225): Provided further, That not less than $145,000 of the funds contained in this appropriation shall be available for analysis of statistics and related facts on foreign production and full and complete information on methods used by other countries to move farm commodities in world trade on a competitive basis.

NATIONAL AGRICULTURAL STATISTICS SERVICE

For necessary expenses of the National Agricultural Statistics Service in conducting statistical reporting and service work, including crop and livestock estimates, statistical coordination and improvements, and marketing surveys, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621–1627) and other laws, $56,787,000: Provided, That, hereafter, no funds available to the Department of Agriculture shall be available to publish estimates of apple production for other than the commercial crop: Provided further, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $40,000 shall be available for employment under 5 U.S.C. 3109.

WORLD AGRICULTURAL OUTLOOK BOARD

For necessary expenses of the World Agricultural Outlook Board to coordinate and review all commodity and aggregate agricultural and food data used to develop outlook and situation material within the Department of Agriculture, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1622g), $1,608,000: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

OFFICE OF THE ASSISTANT SECRETARY FOR SCIENCE AND EDUCATION

For necessary salaries and expenses of the Office of the Assistant Secretary for Science and Education to administer the laws enacted by the Congress for the Agricultural Research Service, Cooperative State Research Service, Extension Service, and National Agricultural Library, $350,000.

AGRICULTURAL RESEARCH SERVICE

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to enable the Agricultural Research Service to perform agricultural research and demonstration relating to production, utilization, marketing, and distribution (not otherwise provided for), home economics or nutrition and consumer use, and for acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed $100; $497,664,000: Provided, That appropriations hereunder shall be available for temporary employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $115,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That funds appropriated herein can be used to provide financial assistance to the organizers of national and international conferences, if such conferences are in support of agency programs: Provided further, That appropriations hereunder shall be available for the operation and maintenance of aircraft and the purchase of not to exceed one for replacement only: Provided further, That uniform allowances for each uniformed employee of the Agricultural Research Service shall not be in excess of $400 annually: Provided further, That of the appropriations hereunder not less than $10,526,600 shall be available to conduct marketing research: Provided further, That appropriations hereunder shall be available pursuant to 7 U.S.C. 2250 for the construction, alteration, and repair of buildings and improvements, but unless otherwise provided the cost of constructing any one building shall not exceed $150,000, except for headhouses connecting greenhouses which shall each be limited to $500,000, and except for ten buildings to be constructed or improved at a cost not to exceed $275,000 each, and the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building or $150,000 whichever is greater: Provided further, That the limitations on alterations contained in this Act shall not apply to a total of $250,000 for facilities at Beltsville, Maryland: Provided further, That the foregoing limitations shall not apply to replacement of buildings needed to carry out the Act of April 24, 1948 (21 U.S.C. 113a): Provided further, That the limitation on purchase of land shall not apply to the purchase of land at Fresno, California, or to an option to purchase land at Florence, South Carolina, for a term of not to exceed one year: Provided further, That not to exceed $190,000 of this appropriation may be transferred to and merged with the appropriation for the Office of the Assistant Secretary for Science and Education for the scientific review of international issues involving agricultural chemicals and food additives: Provided further, That this appropriation

shall be available for transfer of all necessary equipment and germplasm to fully equip the National Small Grains Germplasm Facility in Aberdeen, Idaho.

Special fund: To provide for additional labor, subprofessional, and junior scientific help to be employed under contracts and cooperative agreements to strengthen the work at Federal research installations in the field, $2,000,000.

BUILDINGS AND FACILITIES

(INCLUDING TRANSFERS OF FUNDS)

For acquisition of land, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities and for grants to States and other eligible recipients for such purposes, as necessary to carry out the agricultural research, extension and teaching programs of the Department of Agriculture, where not otherwise provided, $37,400,000: Provided, That these funds may be transferred to such other accounts in this Act as may be appropriate to carry out these purposes: Provided further, That facilities to house Bonsai collections at the National Arboretum may be constructed with funds accepted under the provisions of Public Law 94-129 (20 U.S.C. 195) and the limitation on construction contained in the Act of August 24, 1912 (40 U.S.C. 68) shall not apply to the construction of such facilities.

COOPERATIVE STATE RESEARCH SERVICE

For payments to agricultural experiment stations, for cooperative forestry and other research, for facilities, and for other expenses, including $148,792,000 to carry into effect the provisions of the Hatch Act approved March 2, 1887, as amended by the Act approved August 11, 1955 (7 U.S.C. 361a-361i), and further amended by Public Law 92-318 approved June 23, 1972, and further amended by Public Law 93-471 approved October 26, 1974, including administration by the United States Department of Agriculture, and penalty mail costs of agricultural experiment stations under section 6 of the Hatch Act of 1887, as amended, and payments under section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.); $12,412,000 for grants for cooperative forestry research under the Act approved October 10, 1962 (16 U.S.C. 582a—582a-7), as amended by Public Law 92-318 approved June 23, 1972, including administrative expenses, and payments under section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.); $22,320,000 for payments to the 1890 land-grant colleges, including Tuskegee University, for research under section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (Public Law 95-113), as amended, including administration by the United States Department of Agriculture, and penalty mail costs of the 1890 land-grant colleges, including Tuskegee University; $28,037,000 for contracts and grants for agricultural research under the Act of August 4, 1965, as amended (7 U.S.C. 450i); $40,651,000 for competitive research grants, including administrative expenses; $5,476,000 for the support of animal health and disease programs authorized by section 1433 of Public Law 95-113, including administrative expenses; $20,368,000 for grants for research and for construction of facilities to conduct research pursuant to the Critical Agricultural Materials Act of 1984 (7 U.S.C. 178) and section 1472 of the Food and Agriculture Act of 1977, as amended (7 U.S.C. 3318), to remain available until expended; $475,000 for rangeland research grants as authorized by subtitle M of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended; $9,508,000 for grants to upgrade 1890 land-grant college research facilities as authorized by section 1433 of Public Law 97-98, as amended, to remain available until expended; $4,754,000 for higher education strengthening grants under section 1417(a) of Public Law 95-113, as amended (7 U.S.C. 3152(a)); $3,000,000 for grants as authorized by section 1475 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977; $2,000,000 for grants as authorized by section 1411 of Public Law 99-198, to remain available until expended; and $2,630,000 for necessary expenses of Cooperative State Research Service activities, including coordination and program leadership for higher education work of the Department, administration of payments to State agricultural experiment stations, funds for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 for employment under 5 U.S.C. 3109; in all, $300,573,000.

EXTENSION SERVICE

(INCLUDING TRANSFERS OF FUNDS)

Payments to States, Puerto Rico, Guam, the Virgin Islands, Micronesia, and American Samoa: For payments for cooperative agricultural extension work under the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, the Act of October 5, 1962 (7 U.S.C. 341-349), section 506 of the Act of June 23, 1972, and the Act of September 29, 1977 (7 U.S.C. 341-349), as amended, and section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.), to be distributed under sections 3(b) and 3(c) of said Act, for retirement and employees' compensation costs for extension agents and for costs of penalty mail for cooperative extension agents and State extension directors, $229,713,000; payments for the nutrition and family education program for low-income areas under section 3(d) of the Act, $57,635,000, of which $38,627,000 shall be derived by transfer from the appropriation "Food Stamp Program" and merged with this appropriation; payments for the urban gardening program under section 3(d) of the Act, $3,329,000; payments for the pest management program under section 3(d) of the Act, $7,164,000; payments for the farm safety program under section 3(d) of the Act, $970,000; payments for the pesticide impact assessment program under section 3(d) of the Act, $1,633,000; payments for a financial management assistance program under section 3(d) of the Act and section 1440 of Public Law 99-198, $3,277,000; payments for an integrated reproductive management program under section 3(d) of the Act, $47,000; payments for the rural development centers under section 3(d) of the Act, $689,000; payments for extension work under section 209(c) of Public Law 93-471, $935,000; payments for carrying out the provisions of the Renewable Resource Extension Act of 1978, $2,378,000; for special grants for financially stressed farmers and dislocated farmers as authorized by section 1440 of Public Law 99-198, $1,500,000; payments for extension work by the colleges receiving the benefits of the second Morrill Act (7 U.S.C. 321-326, 328) and Tuskegee University, $16,877,000; in all, $326,147,000; of which not less than $79,400,000 is for Home Economics: Provided, That funds hereby appropriated pursuant to section 3(c) of the Act of June 26, 1953, and section 506 of the Act of June 23, 1972, as amended, shall not be paid to any State, Puerto Rico, Guam, or the Virgin Islands, Micronesia, and American Samoa prior to availability of an equal sum from non-Federal sources for expenditure during the current fiscal year.

Federal administration and coordination: For administration of the Smith-Lever Act, as amended by the Act of June 26, 1953, the Act of August 11, 1955, the Act of October 5, 1962, section 506 of the Act of June 23, 1972, section 209(d) of Public Law 93-471, and the Act of September 29, 1977 (7 U.S.C. 341-349), as amended, and section 1361(c) of the Act of October 3, 1980 (7 U.S.C. 301n.), and to coordinate and provide program leadership for the extension work of the Department and the several States and insular possessions, $6,025,000; of which not less than $2,300,000 is for Home Economics.

NATIONAL AGRICULTURAL LIBRARY

For necessary expenses of the National Agricultural Library, $10,936,000: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $35,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That not to exceed $575,000 shall be available pursuant to 7 U.S.C. 2250 for the alteration and repair of buildings and improvements.

OFFICE OF THE ASSISTANT SECRETARY FOR MARKETING AND INSPECTION SERVICES

For necessary salaries and expenses of the Office of the Assistant Secretary for Marketing and Inspection Services to administer programs under the laws enacted by the Congress for the Animal and Plant Health Inspection Service, Food Safety and Inspection Service, Federal Grain Inspection Service, Agricultural Cooperative Service, Agricultural Marketing Service (including Office of Transportation) and Packers and Stockyards Administration, $327,000.

ANIMAL AND PLANT HEALTH INSPECTION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For expenses, not otherwise provided for, including those pursuant to the Act of February 28, 1947, as amended (21 U.S.C. 114b-c), necessary to prevent, control, and eradicate pests and plant and animal diseases; to carry out inspection, quarantine, and regulatory activities; to discharge the authorities of the Secretary of Agriculture under the Act of March 2, 1931 (46 Stat. 1468; 7 U.S.C. 426-426b); and to protect the environment, as authorized by law, $300,967,000; of which $10,000,000 shall be available for the control of outbreaks of insects, plant diseases and animal diseases to the extent necessary to meet emergency conditions: Provided, That $1,000,000 of the funds for control of the fire ant shall be placed in reserve for matching purposes with States which may come into the program: Provided further, That no funds shall be used to formulate or administer a brucellosis eradication program for the current fiscal year that does not require minimum matching by the States of at least 40 per centum: Provided further, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $40,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That this appropriation shall be available for the operation and maintenance of aircraft and the purchase of not to exceed two, of which one shall be for replacement only: Provided further, That, in addition, in emergencies

which threaten any segment of the agricultural production industry of this country, the Secretary may transfer from other appropriations or funds available to the agencies or corporations of the Department such sums as he may deem necessary, to be available only in such emergencies for the arrest and eradication of contagious or infectious diseases or pests of animals, poultry, or plants, and for expenses in accordance with the Act of February 28, 1947, as amended, and section 102 of the Act of September 21, 1944, as amended, and any unexpended balances of funds transferred for such emergency purposes in the next preceding fiscal year shall be merged with such transferred amounts.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities, as authorized by 7 U.S.C. 2250, and acquisition of land as authorized by 7 U.S.C. 428a, $2,246,000.

FOOD SAFETY AND INSPECTION SERVICE

For necessary expenses to carry on services authorized by the Federal Meat Inspection Act, as amended, and the Poultry Products Inspection Act, as amended, $361,400,000: Provided, That this appropriation shall be available for field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $75,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

FEDERAL GRAIN INSPECTION SERVICE

SALARIES AND EXPENSES

For necessary expenses to carry out the provisions of the United States Grain Standards Act, as amended, and the standardization activities related to grain under the Agricultural Marketing Act of 1946, as amended, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $20,000 for employment under 5 U.S.C. 3109, $6,697,000: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building: Provided further, That none of the funds provided by this Act may be used to pay the salaries of any person or persons who require, or who authorize payments from fee-supported funds to any person or persons who require, nonexport, nonterminal interior elevators to maintain records not involving official inspection or official weighing in the United States under Public Law 94-582 other than those necessary to fulfill the purposes of such Act.

INSPECTION AND WEIGHING SERVICES

LIMITATION ON INSPECTION AND WEIGHING SERVICE EXPENSES

Not to exceed $36,829,000 (from fees collected) shall be obligated during the current fiscal year for Inspection and Weighing Services.

AGRICULTURAL COOPERATIVE SERVICE

For necessary expenses to carry out the Cooperative Marketing Act of July 2, 1926 (7 U.S.C. 451-457), and for activities relating to the marketing aspects of cooperatives, including economic research and analysis and the application of economic research findings, as authorized by the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627), and for activities with institutions or organizations throughout the world concerning the development and operation of agricultural cooperatives (7 U.S.C. 3291), $4,469,000; of which $99,000 shall be available for a field office in Hawaii: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $15,000 shall be available for employment under 5 U.S.C. 3109.

AGRICULTURAL MARKETING SERVICE

MARKETING SERVICES

For necessary expenses to carry on services related to consumer protection, agricultural marketing and distribution and regulatory programs as authorized by law, and for administration and coordination of payments to States; including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $70,000 for employment under 5 U.S.C. 3109, $30,945,000; of which not less than $1,501,000 shall be available for the Wholesale Market Development Program for the design and development of wholesale and farmer market facilities for the major metropolitan areas of the country: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed $28,164,000 (from fees collected) shall be obligated during the current fiscal year for administrative expenses.

FUNDS FOR STRENGTHENING MARKETS, INCOME, AND SUPPLY (SECTION 32)

(INCLUDING TRANSFERS OF FUNDS)

Funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c) shall be used only for commodity program expenses as authorized therein, and other related operating expenses, except for: (1) transfers to the Department of Commerce as authorized by the Fish and Wildlife Act of August 8, 1956; (2) transfers otherwise provided in this Act; and (3) not more than $7,147,000 for formulation and administration of Marketing Agreements and Orders pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and the Agricultural Act of 1961.

PAYMENTS TO STATES AND POSSESSIONS

For payments to departments of agriculture, bureaus and departments of markets, and similar agencies for marketing activities under section 204(b) of the Agricultural Marketing Act of 1946 (7 U.S.C. 1623(b)), $942,000.

OFFICE OF TRANSPORTATION

For necessary expenses to carry on services related to agricultural transportation programs as authorized by law; including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $20,000 for employment under 5 U.S.C. 3109, $2,340,000: Provided, That this appropriation shall be available pursuant to law (7 U.S.C. 2250) for the alteration and repair of buildings and improvements, but, unless otherwise provided, the cost of altering any one building during the fiscal year shall not exceed 10 per centum of the current replacement value of the building.

PACKERS AND STOCKYARDS ADMINISTRATION

For necessary expenses for administration of the Packers and Stockyards Act, as authorized by law, and for certifying procedures used to protect purchasers of farm products, including field employment pursuant to section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $5,000 for employment under 5 U.S.C. 3109, $8,945,000.

FARM INCOME STABILIZATION

OFFICE OF THE UNDER SECRETARY FOR INTERNATIONAL AFFAIRS AND COMMODITY PROGRAMS

For necessary salaries and expenses of the Office of the Under Secretary for International Affairs and Commodity Programs to administer the laws enacted by Congress for the Agricultural Stabilization and Conservation Service, Office of International Cooperation and Development, Foreign Agricultural Service, and the Commodity Credit Corporation, $473,000.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary administrative expenses of the Agricultural Stabilization and Conservation Service, including expenses to formulate and carry out programs authorized by title III of the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1301-1393); the Agricultural Act of 1949, as amended (7 U.S.C. 1421 et seq.); sections 7 to 15, 16(a), 16(f), and 17 of the Soil Conservation and Domestic Allotment Act, as amended and supplemented (16 U.S.C. 590g-590o, 590p(a), 590p(f), and 590q); sections 1001 to 1004, 1006 to 1008, and 1010 of the Agricultural Act of 1970 as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1501 to 1504, 1506 to 1508, and 1510); the Water Bank Act, as amended (16 U.S.C. 1301-1311); the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101); sections 202 and 205 of title II of the Colorado River Basin Salinity Control Act of 1974, as amended; sections 401, 402, and 404 to 406 of the Agricultural Credit Act of 1978 (16 U.S.C. 2201 to 2205); the United States Warehouse Act, as amended (7 U.S.C. 241-273); and laws pertaining to the Commodity Credit Corporation, not to exceed $491,856,000, to be derived by transfer from the Commodity Credit Corporation fund: Provided, That other funds made available to the Agricultural Stabilization and Conservation Service for authorized activities may be advanced to and merged with this account: Provided further, That these funds shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $100,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That no part of the funds made available under this Act shall be used (1) to influence the vote in any referendum; (2) to influence agricultural legislation, except as permitted in 18 U.S.C. 1913; or (3) for salaries or other expenses of members of county and community committees established pursuant to section 8(b) of the Soil Conservation and Domestic Allotment Act, as amended, for engaging in any activities other than advisory and supervisory duties and delegated program functions prescribed in administrative regulations.

DAIRY INDEMNITY PROGRAM

For necessary expenses involved in making indemnity payments to dairy farmers for milk or cows producing such milk and manufacturers of dairy products who have been directed to remove their milk or dairy products from commercial markets because it contained residues of chemicals registered and approved for use by the Federal Government, and in making indemnity payments for milk, or cows producing such milk, at a fair market value to any dairy farmer who is directed to remove his milk from commercial markets because of (1) the presence of products of nuclear radiation or fallout if such contamination is not due to the fault of the farmer, or (2) residues of chemicals or toxic substances not included under the first sentence of the Act of August 13, 1968, as amended (7 U.S.C. 450j), if such chemicals or toxic substances were not used in a manner contrary to applicable regulations or labeling instructions provided at the time of use and the contamination is not due to the fault of the farmer, $95,000: Provided, That none of the funds contained in this Act shall be used to make indemnity payments to any farmer whose milk was removed from commercial markets as a result of his willful failure to follow procedures prescribed by the Federal Government.

CORPORATIONS

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for such corporation or agency, except as hereinafter provided:

FEDERAL CROP INSURANCE CORPORATION

ADMINISTRATIVE AND OPERATING EXPENSES

For administrative and operating expenses, as authorized by the Federal Crop Insurance Act, as amended (7 U.S.C. 1516), $209,568,000: Provided, That not to exceed $700 shall be available for official reception and representation expenses, as authorized by 7 U.S.C. 1506(i).

FEDERAL CROP INSURANCE CORPORATION FUND

For payments as authorized by section 508(b) of the Federal Crop Insurance Act, as amended, $135,743,000.

COMMODITY CREDIT CORPORATION

REIMBURSEMENT FOR NET REALIZED LOSSES

To reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, pursuant to the Act of August 17, 1961 (15 U.S.C. 713a-11, 713a-12), $16,808,806,000, and in addition $3,000,000,000 which shall be available only to the extent an official budget request is transmitted to the Congress, such funds to be available, together with other resources available to the Corporation, to finance the Corporation's programs and activities during fiscal year 1987: Provided, That of the foregoing amount, not to exceed the following amounts shall be available for the following programs: export guaranteed loan claims, $683,350,000; conservation reserve program, $700,000,000; export enhancement program, $667,000,000; Federal crop insurance program, $375,000,000; targeted export assistance program, $325,000,000; storage facility loan program under section 4(h) of the Commodity Credit Corporation Charter Act, $100,000,000; and interest payments to the United States Treasury, $1,932,000,000.

SHORT-TERM EXPORT CREDIT

The Commodity Credit Corporation shall make available not less than $5,000,000,000 in credit guarantees under its export credit guarantee program for short-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 1125(b) of the Food Security Act of 1985 (Public Law 99-198).

INTERMEDIATE EXPORT CREDIT

The Commodity Credit Corporation shall make available not less than $500,000,000 in credit guarantees under its export guarantee program for intermediate-term credit extended to finance the export sales of United States agricultural commodities and the products thereof, as authorized by section 1131(3)(B) of the Food Security Act of 1985 (Public Law 99-198).

GENERAL SALES MANAGER

(INCLUDING TRANSFERS OF FUNDS)

Not to exceed $6,027,000 may be transferred from the Commodity Credit Corporation funds to support the General Sales Manager who shall work to expand and strengthen sales of United States commodities (including those of the Corporation) in world markets pursuant to existing authority (including that contained in the Corporation's charter), and that such funds shall be used by the General Sales Manager to carry out the above activities. The General Sales Manager shall report directly to the Board of Directors of the Corporation of which the Secretary of Agriculture is a member. The General Sales Manager shall obtain, assimilate, and analyze all available information on developments related to private sales, as well as those funded by the Corporation, including grade and quality as sold and as delivered, including information relating to the effectiveness of greater reliance by the General Sales Manager upon loan guarantees as contrasted to direct loans for financing commercial export sales of agricultural commodities out of private stocks on credit terms, as provided in titles I and II of the Agricultural Trade Act of 1978, Public Law 95-501, and shall submit quarterly reports to the appropriate committees of Congress concerning such developments.

TITLE II—RURAL DEVELOPMENT PROGRAMS

RURAL DEVELOPMENT ASSISTANCE

OFFICE OF THE UNDER SECRETARY FOR SMALL COMMUNITY AND RURAL DEVELOPMENT

For necessary salaries and expenses of the Office of the Under Secretary for Small Community and Rural Development to administer programs under the laws enacted by the Congress for the Farmers Home Administration, Rural Electrification Administration, Federal Crop Insurance Corporation, and rural development activities of the Department of Agriculture, $394,000.

FARMERS HOME ADMINISTRATION

RURAL HOUSING INSURANCE FUND

From funds in the Rural Housing Insurance Fund, and for insured loans as authorized by title V of the Housing Act of 1949, as amended, $2,033,093,000, of which not less than $2,032,519,000 shall be for subsidized interest loans to low-income borrowers, as determined by the Secretary, and for subsequent loans to existing borrowers or to purchasers under assumption agreements or credit sales; and not to exceed $10,000,000 to enter into collection and servicing contracts pursuant to the provisions of section 3(f)(3) of the Federal Claims Act of 1966 (31 U.S.C. 3718).

For rental assistance agreements entered into or renewed pursuant to the authority under section 521(a)(2) of the Housing Act of 1949, as amended, total new obligations shall not exceed $160,310,000 to be added to and merged with the authority provided for this purpose in prior fiscal years: Provided, That of this amount, not to exceed $28,413,000 is available for additional units financed by section 515 of the Housing Act of 1949, as amended, and not less than $5,082,000 is for additional units financed under sections 514 and 516 of the Housing Act of 1949: Provided further, That agreements entered into or renewed during fiscal year 1987 shall be funded for a five-year period, although the life of any such agreement may be extended to fully utilize amounts obligated: Provided further, That agreements entered into or renewed during fiscal years 1984, 1985, and 1986, may also be extended beyond five years to fully utilize amounts obligated.

For an additional amount to reimburse the Rural Housing Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of title V of the Housing Act of 1949, as amended (42 U.S.C. 1483, 1487(e), and 1490a(c)), including $2,247,000 as authorized by section 521(c) of the Act, $2,296,283,000. For an additional amount as authorized by section 521(c) of the Act such sums as may be necessary to reimburse the fund to carry out a rental assistance program under section 521(a)(2) of the Housing Act of 1949, as amended.

SELF-HELP HOUSING LAND DEVELOPMENT FUND

For direct loans pursuant to section 523(b)(1)(B) of the Housing Act of 1949, as amended (42 U.S.C. 1490c), $500,000 shall be available from funds in the Self-Help Housing Land Development Fund.

AGRICULTURAL CREDIT INSURANCE FUND

For direct and guaranteed loans as authorized by 7 U.S.C. 1928-1929, to be available from funds in the Agricultural Credit Insurance Fund, as follows: farm ownership loans, $400,000,000 of which $325,000,000 shall be guaranteed loans; $14,000,000 for water development, use, and conservation loans of which $3,000,000 shall be guaranteed loans; operating loans, $3,595,000,000 of which $2,170,000,000 shall be guaranteed loans; Indian tribe land acquisition loans as authorized by 25 U.S.C. 488, $2,000,000; and for emergency insured and guaranteed loans, $695,000,000 to meet the needs resulting from natural disasters.

For an additional amount to reimburse the Agricultural Credit Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1988(a)), $1,723,403,000.

RURAL DEVELOPMENT INSURANCE FUND

For direct and guaranteed loans as authorized by 7 U.S.C. 1928 and 86 Stat. 661-664, to be available from funds in the Rural Development Insurance Fund, as follows: insured water and sewer facility loans, $330,380,000; guaranteed industrial development loans, $95,700,000; and insured community facility loans, $95,700,000.

For an additional amount to reimburse the Rural Development Insurance Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Con-

solidated Farm and Rural Development Act, as amended (7 U.S.C. 1988(a)), $656,645,000.

RURAL WATER AND WASTE DISPOSAL GRANTS

For grants pursuant to sections 306(a)(2) and 306(a)(6) of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1926), $109,395,000, to remain available until expended, pursuant to section 306(d) of the above Act.

VERY LOW-INCOME HOUSING REPAIR GRANTS

For grants to the very low-income elderly for essential repairs to dwellings pursuant to section 504 of the Housing Act of 1949, as amended, $12,500,000.

RURAL HOUSING FOR DOMESTIC FARM LABOR

For financial assistance to eligible nonprofit organizations for housing for domestic farm labor, pursuant to section 516 of the Housing Act of 1949, as amended (42 U.S.C. 1486), $9,513,000.

MUTUAL AND SELF-HELP HOUSING

For grants and contracts pursuant to section 523(b)(1)(A) of the Housing Act of 1949 (42 U.S.C. 1490c), $8,000,000.

RURAL COMMUNITY FIRE PROTECTION GRANTS

For grants pursuant to section 7 of the Cooperative Forestry Assistance Act of 1978 (Public Law 95-313), $3,091,000 to fund up to 50 per centum of the cost of organizing, training, and equipping rural volunteer fire departments.

COMPENSATION FOR CONSTRUCTION DEFECTS

For compensation for construction defects as authorized by section 509(c) of the Housing Act of 1949, as amended, $713,000.

RURAL HOUSING PRESERVATION GRANTS

For grants for rural housing preservation as authorized by section 552 of the Housing and Urban-Rural Recovery Act of 1983 (Public Law 98-181), $19,140,000.

SALARIES AND EXPENSES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of the Farmers Home Administration, not otherwise provided for, in administering the programs authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1921-1995), as amended; title V of the Housing Act of 1949, as amended (42 U.S.C. 1471-1490h); the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U.S.C. 440-444), for administering the loan program authorized by title III A of the Economic Opportunity Act of 1964 (Public Law 88-452 approved August 20, 1964), as amended, and such other programs which Farmers Home Administration has the responsibility for administering, $386,867,000, together with not more than $3,000,000 of the charges collected in connection with the insurance of loans as authorized by section 309(e) of the Consolidated Farm and Rural Development Act, as amended, and section 517(i) of the Housing Act of 1949, as amended, or in connection with charges made on borrowers under section 502(a) of the Housing Act of 1949, as amended: Provided, That, in addition, not to exceed $1,000,000 of the funds available for the various programs administered by this agency may be transferred to this appropriation for temporary field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), to meet unusual or heavy workload increases: Provided further, That not to exceed $500,000 of this appropriation may be used for employment under 5 U.S.C. 3109: Provided further, That not to exceed $2,047,000 of this appropriation shall be available for contracting with the National Rural Water Association or other equally qualified national organization for a circuit rider program to provide technical assistance for rural water systems: Provided further, That, in addition to any other authority that the Secretary may have to defer principal and interest and forego foreclosure, the Secretary may permit, at the request of the borrower, the deferral of principal and interest on any outstanding loan made, insured, or held by the Secretary under this title, or under the provisions of any other law administered by the Farmers Home Administration, and may forego foreclosure of any such loan, for such period as the Secretary deems necessary upon a showing by the borrower that due to circumstances beyond the borrower's control, the borrower is temporarily unable to continue making payments of such principal and interest when due without unduly impairing the standard of living of the borrower. The Secretary may permit interest that accrues during the deferral period on any loan deferred under this section to bear no interest during or after such period: Provided further, That, if the security instrument securing such loan is foreclosed, such interest as is included in the purchase price at such foreclosure shall become part of the principal and draw interest from the date of foreclosure at the rate prescribed by law.

RURAL ELECTRIFICATION ADMINISTRATION

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), as follows:

RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND LOAN AUTHORIZATIONS

Insured loans pursuant to the authority of section 305 of the Rural Electrification Act of 1936, as amended (7 U.S.C. 935), shall be made as follows: rural electrification loans, not less than $622,050,000 nor more than $933,075,000; and rural telephone loans, not less than $239,250,000 nor more than $311,025,000; to remain available until expended: Provided, That loans made pursuant to section 306 of that Act are in addition to these amounts but during 1987 total commitments to guarantee loans pursuant to section 306 shall be not less than $933,075,000 nor more than $2,100,615,000 of contingent liability for total loan principal: Provided further, That as a condition of approval of insured electric loans during fiscal year 1987, borrowers shall obtain concurrent supplemental financing in accordance with the applicable criteria and ratios in effect as of July 15, 1982: Provided further, That no funds appropriated in this Act may be used to deny or reduce loans or loan advances based upon a borrower's level of general funds.

REIMBURSEMENT TO THE RURAL ELECTRIFICATION AND TELEPHONE REVOLVING FUND

For an additional amount to reimburse the rural electrification and telephone revolving fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in carrying out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), $20,000,000.

RURAL TELEPHONE BANK

For the purchase of Class A stock of the Rural Telephone Bank, $28,710,000, to remain available until expended (7 U.S.C. 901-950(b)).

The Rural Telephone Bank is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to such corporation in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out its authorized programs for the current fiscal year. During 1987, and within the resources and authority available, gross obligations for the principal amount of direct loans shall be not less than $177,045,000 nor more than $210,540,000.

RURAL COMMUNICATION DEVELOPMENT FUND

To reimburse the Rural Communication Development Fund for interest subsidies and losses sustained in prior years, but not previously reimbursed, in making Community Antenna Television loans and loan guarantees under sections 306 and 310B of the Consolidated Farm and Rural Development Act, as amended, $1,591,000.

SALARIES AND EXPENSES

For administrative expenses to carry out the provisions of the Rural Electrification Act of 1936, as amended (7 U.S.C. 901-950(b)), and to administer the loan and loan guarantee programs for Community Antenna Television facilities as authorized by the Consolidated Farm and Rural Development Act (7 U.S.C. 1921-1995), and for which commitments were made prior to fiscal year 1987, including not to exceed $7,000 for financial and credit reports, funds for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $103,000 for employment under 5 U.S.C. 3109, $29,447,000.

CONSERVATION

OFFICE OF THE ASSISTANT SECRETARY FOR NATURAL RESOURCES AND ENVIRONMENT

For necessary salaries and expenses of the Office of the Assistant Secretary for Natural Resources and Environment to administer the laws enacted by the Congress for the Forest Service and the Soil Conservation Service, $363,000.

SOIL CONSERVATION SERVICE

CONSERVATION OPERATIONS

For necessary expenses for carrying out the provisions of the Act of April 27, 1935 (16 U.S.C. 590a-590f) including preparation of conservation plans and establishment of measures to conserve soil and water (including farm irrigation and land drainage and such special measures for soil and water management as may be necessary to prevent floods and the siltation of reservoirs and to control agricultural related pollutants); operation of conservation plant materials centers; classification and mapping of soil; dissemination of information; acquisition of lands by donation, exchange, or purchase at a nominal cost not to exceed $100; purchase and erection or alteration or improvement of permanent and temporary buildings; and operation and maintenance of aircraft, $367,043,000 of which not less than $4,870,000 is for snow survey and water forecasting and not less than $4,408,000 is for operation and establishment of the plant materials centers: Provided, That of the foregoing amounts not less than $293,400,000 is for personnel compensation and benefits: Provided further, That the cost of any permanent building, purchased, erected, or as improved, exclusive of the cost of constructing a water supply or sanitary system and connecting the same to any such building and with the exception of buildings acquired in conjunction with land being purchased for other purposes, shall not exceed $10,000, except for one building to be constructed at a cost not to exceed $100,000 and eight buildings to be constructed or improved at a

cost not to exceed $50,000 per building and except that alterations or improvements to other existing permanent buildings costing $5,000 or more may be made in any fiscal year in an amount not to exceed $2,000 per building: Provided further, That when buildings or other structures are erected on non-Federal land that the right to use such land is obtained as provided in 7 U.S.C. 2250a: Provided further, That no part of this appropriation may be expended for soil and water conservation operations under the Act of April 27, 1935 (16 U.S.C. 590a–590f) in demonstration projects: Provided further, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225) and not to exceed $25,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That qualified local engineers may be temporarily employed at per diem rates to perform the technical planning work of the Service: Provided further, That none of the funds in this Act shall be used for the purpose of consolidating equipment, personnel, or services of the Soil Conservation Service's national technical centers in Portland, Oregon; Lincoln, Nebraska; Chester, Pennsylvania; and Fort Worth, Texas into a single national technical center.

RIVER BASIN SURVEYS AND INVESTIGATIONS

For necessary expenses to conduct research, investigations, and surveys of the watersheds of rivers and other waterways, in accordance with section 6 of the Watershed Protection and Flood Prevention Act approved August 4, 1954, as amended (16 U.S.C. 1006–1009), $11,819,000: Provided, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $60,000 shall be available for employment under 5 U.S.C. 3109.

WATERSHED PLANNING

For necessary expenses for small watershed investigations and planning, in accordance with the Watershed Protection and Flood Prevention Act, as amended (16 U.S.C. 1001–1008), $8,480,000: Provided, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $50,000 shall be available for employment under 5 U.S.C. 3109.

WATERSHED AND FLOOD PREVENTION OPERATIONS

For necessary expenses to carry out preventive measures, including but not limited to research, engineering operations, methods of cultivation, the growing of vegetation, rehabilitation of existing works and changes in use of land, in accordance with the Watershed Protection and Flood Prevention Act approved August 4, 1954, as amended (16 U.S.C. 1001–1005, 1007–1009), the provisions of the Act of April 27, 1935 (16 U.S.C. 590a–f), and in accordance with the provisions of laws relating to the activities of the Department, $165,885,000 (of which $26,271,000 shall be available for the watersheds authorized under the Flood Control Act approved June 22, 1936 (33 U.S.C. 701, 16 U.S.C. 1006a), as amended and supplemented): Provided, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $4,755,000 shall be available for emergency measures as provided by sections 403–405 of the Agricultural Credit Act of 1978 (16 U.S.C. 2203–2205), and not to exceed $200,000 shall be available for employment under 5 U.S.C. 3109: Provided further, That $7,949,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (7 U.S.C. 1931): Provided further, That not to exceed $1,000,000 of this appropriation is available to carry out the purposes of the Endangered Species Act of 1973 (Public Law 93–205), as amended, including cooperative efforts as contemplated by that Act to relocate endangered or threatened species to other suitable habitats as may be necessary to expedite project construction.

RESOURCE CONSERVATION AND DEVELOPMENT

For necessary expenses in planning and carrying out projects for resource conservation and development and for sound land use pursuant to the provisions of section 32(e) of title III of the Bankhead-Jones Farm Tenant Act, as amended (7 U.S.C. 1010–1011; 76 Stat. 607), and the provisions of the Act of April 27, 1935 (16 U.S.C. 590a–f), and the provisions of the Agriculture and Food Act of 1981 (16 U.S.C. 3451–3461), $25,020,000: Provided, That $1,207,000 in loans may be insured, or made to be sold and insured, under the Agricultural Credit Insurance Fund of the Farmers Home Administration (7 U.S.C. 1931): Provided further, That this appropriation shall be available for field employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $50,000 shall be available for employment under 5 U.S.C. 3109.

GREAT PLAINS CONSERVATION PROGRAM

For necessary expenses to carry into effect a program of conservation in the Great Plains area, pursuant to section 16(b) of the Soil Conservation and Domestic Allotment Act, as added by the Act of August 7, 1956, as amended (16 U.S.C. 590p(b)), $20,474,000, to remain available until expended.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

AGRICULTURAL CONSERVATION PROGRAM

For necessary expenses to carry into effect the program authorized in sections 7 to 15, 16(a), 16(f), and 17 of the Soil Conservation and Domestic Allotment Act approved February 29, 1936, as amended and supplemented (16 U.S.C. 590g–590o, 590p(a), 590p(f), and 590q), and sections 1001–1004, 1006–1008, and 1010 of the Agricultural Act of 1970, as added by the Agriculture and Consumer Protection Act of 1973 (16 U.S.C. 1501–1504, 1506–1508, and 1510), and including not to exceed $15,000 for the preparation and display of exhibits, including such displays at State, interstate, and international fairs within the United States, $176,935,000, to remain available until expended for agreements, excluding administration but including technical assistance and related expenses, except that no participant in the Agricultural Conservation Program shall receive more than $3,500 per year, except where the participants from two or more farms or ranches join to carry out approved practices designed to conserve or improve the agricultural resources of the community, or where a participant has a long-term agreement, in which case the total payment shall not exceed the annual payment limitation multiplied by the number of years of the agreement: Provided, That no portion of the funds for the current year's program may be utilized to provide financial or technical assistance for drainage on wetlands now designated as Wetlands Types 3 (III) through 20 (XX) in United States Department of the Interior, Fish and Wildlife Circular 39, Wetlands of the United States, 1956: Provided further, That such amounts shall be available for the purchase of seeds, fertilizers, lime, trees, or any other conservation materials, or any soil-terracing services, and making grants thereof to agricultural producers to aid them in carrying out approved farming practices as authorized by the Soil Conservation and Domestic Allotment Act, as amended, as determined and recommended by the county committees, approved by the State committees and the Secretary, under programs provided for herein: Provided further, That such assistance will not be used for carrying out measures and practices that are primarily production-oriented or that have little or no conservation or pollution abatement benefits: Provided further, That not to exceed 5 per centum of the allocation for the current year's program for any county may, on the recommendation of such county committee and approval of the State committee, be withheld and allotted to the Soil Conservation Service for services of its technicians in formulating and carrying out the Agricultural Conservation Program in the participating counties, and shall not be utilized by the Soil Conservation Service for any purpose other than technical and other assistance in such counties, and in addition, on the recommendation of such county committee and approval of the State committee, not to exceed 1 per centum may be made available to any other Federal, State, or local public agency for the same purpose and under the same conditions: Provided further, That for the current year's program $2,500,000 shall be available for technical assistance in formulating and carrying out rural environmental practices: Provided further, That no part of any funds available to the Department, or any bureau, office, corporation, or other agency constituting a part of such Department, shall be used in the current fiscal year for the payment of salary or travel expenses of any person who has been convicted of violating the Act entitled "An Act to prevent pernicious political activities" approved August 2, 1939, as amended, or who has been found in accordance with the provisions of title 18 U.S.C. 1913 to have violated or attempted to violate such section which prohibits the use of Federal appropriations for the payment of personal services or other expenses designed to influence in any manner a Member of Congress to favor or oppose any legislation or appropriation by Congress except upon request of any Member or through the proper official channels.

FORESTRY INCENTIVES PROGRAM

For necessary expenses, not otherwise provided for, to carry out the program of forestry incentives, as authorized in the Cooperative Forestry Assistance Act of 1978 (16 U.S.C. 2101), including technical assistance and related expenses, $11,891,000, to remain available until expended, as authorized by that Act.

WATER BANK PROGRAM

For necessary expenses to carry into effect the provisions of the Water Bank Act (16 U.S.C. 1301–1311), $8,371,000, to remain available until expended.

COLORADO RIVER BASIN SALINITY CONTROL PROGRAM

For necessary expenses for carrying out the purposes of section 202 of title II of the Colorado River Basin Salinity Control Act, as amended (43 U.S.C. 1592), to be used to reduce salinity in the Colorado River and to enhance the supply and quality of water available for use in the United States and

the Republic of Mexico, $3,804,000, for investigations and surveys, for technical assistance in developing conservation practices and in the preparation of salinity control plans, for the establishment of on-farm irrigation management systems, including related lateral improvement measures, for making cost-share payments to agricultural landowners and operators, Indian tribes, irrigation districts and associations, local governmental and nongovernmental entities, and other landowners to aid them in carrying out approved conservation practices as determined and recommended by the county committees, approved by the State committees and the Secretary, and for associated costs of program planning, information and education, and program monitoring and evaluation: Provided, That the Soil Conservation Service shall provide technical assistance and the Agricultural Stabilization and Conservation Service shall provide administrative services for the program, including but not limited to, the negotiation and administration of agreements and the disbursement of payments: Provided further, That such program shall be coordinated with the regular Agricultural Conservation Program and with research programs of other agencies.

TITLE III—DOMESTIC FOOD PROGRAMS

OFFICE OF THE ASSISTANT SECRETARY FOR FOOD AND CONSUMER SERVICES

For necessary salaries and expenses of the Office of the Assistant Secretary for Food and Consumer Services to administer the laws enacted by the Congress for the Food and Nutrition Service and the Human Nutrition Information Service, $330,000.

FOOD AND NUTRITION SERVICE

CHILD NUTRITION PROGRAMS

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses to carry out the National School Lunch Act (42 U.S.C. 1751-1761, 1766 and 1769b) and the applicable provisions other than sections 3 and 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1773-1785, and 1788-1789); $4,233,617,000, to remain available through September 30, 1988, of which $937,680,000 is hereby appropriated and $3,295,937,000 shall be derived by transfer from funds available under section 32 of the Act of August 24, 1935 (7 U.S.C. 612c): Provided, That, of funds provided herein, $775,281,000 shall be available only to the extent an official budget request is transmitted to the Congress: Provided further, That funds appropriated for the purpose of section 7 of the Child Nutrition Act of 1966 shall be allocated among the States but the distribution of such funds to an individual State is contingent upon that State's agreement to participate in studies and surveys of programs authorized under the National School Lunch Act and the Child Nutrition Act of 1966, when such studies and surveys have been directed by the Congress and requested by the Secretary of Agriculture: Provided further, That if the Secretary of Agriculture determines that a State's administration of any program under the National School Lunch Act or the Child Nutrition Act of 1966 (other than section 17), or the regulations issued pursuant to these Acts, is seriously deficient, and the State fails to correct the deficiency within a specified period of time, the Secretary may withhold from the State some or all of the funds allocated to the State under section 7 of the Child Nutrition Act of 1966 and under section 13(k)(1) of the National School Lunch Act; upon a subsequent determination by the Secretary that the programs are operated in an acceptable manner some or all of the funds withheld may be allocated: Provided further, That if the funds available for nutrition education and training grants authorized under section 19 of the Child Nutrition Act of 1966, as amended, require a ratable reduction in those grants, the minimum grant for each State shall be $50,000: Provided further, That only final reimbursement claims for service of meals, supplements, and milk submitted to State agencies by eligible schools, summer camps, institutions, and service institutions within sixty days following the month for which the reimbursement is claimed shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act for meals, supplements, and milk served during any month only if the final program operations report for such month is submitted to the Department within ninety days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary.

SPECIAL MILK PROGRAM

For necessary expenses, to carry out the special milk program, as authorized by section 3 of the Child Nutrition Act of 1966 (42 U.S.C. 1772), $14,869,000, to remain available through September 30, 1988: Provided, That only final reimbursement claims for milk submitted to State agencies within sixty days following the month for which the reimbursement is claimed shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act only if the final program operations report for such month is submitted to the Department within ninety days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary.

FEEDING PROGRAM FOR WOMEN, INFANTS AND CHILDREN (WIC)

For necessary expenses to carry out the special supplemental food program as authorized by section 17 of the Child Nutrition Act of 1966 (42 U.S.C. 1786), $1,663,497,000, to remain available through September 30, 1988: Provided, That none of the funds provided herein shall be used to issue interim or final regulations before May 1, 1987, to modify the formula used during fiscal year 1986 to divide funds among State agencies under section 17(i) of such Act to carry out such program, or to implement such regulations before October 1, 1987.

COMMODITY SUPPLEMENTAL FOOD PROGRAM

For necessary expenses to carry out the commodity supplemental food program as authorized by section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c (note)), including not less than $2,950,000 for the projects in Detroit, New Orleans, and Des Moines, $41,497,000: Provided, That funds provided herein shall remain available through September 30, 1988: Provided further, That none of these funds shall be available to reimburse the Commodity Credit Corporation for commodities donated to the program.

FOOD STAMP PROGRAM

For necessary expenses to carry out the Food Stamp Act (7 U.S.C. 2011-2027, 2029), $12,684,665,000: Provided, That funds provided herein shall remain available through September 30, 1987, in accordance with section 18(a) of the Food Stamp Act: Provided further, That up to 5 per centum of the foregoing amount may be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such times as may become necessary to carry out program operations: Provided further, That funds provided herein shall be expended in accordance with section 16 of the Food Stamp Act: Provided further, That this appropriation shall be subject to any work registration or workfare requirements as may be required by law: Provided further, That $345,000,000 of the funds provided herein shall be available only to the extent necessary after the Secretary has employed the regulatory and administrative methods available to him under the law to curtail fraud, waste and abuse in the program: Provided further, That $852,750,000 of the foregoing amount shall be available for Nutrition Assistance for Puerto Rico as authorized by 7 U.S.C. 2028.

food donations programs for selected groups

For necessary expenses to carry out section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c (note)) and section 4(b) of the Food Stamp Act (7 U.S.C. 2013), $193,589,000.

temporary emergency food assistance program

For necessary expenses to carry out the Temporary Emergency Food Assistance Act of 1983, as amended, $50,000,000: Provided, That, in accordance with section 202 of Public Law 98-92, these funds shall be available only if the Secretary determines the existence of excess commodities.

FOOD PROGRAM ADMINISTRATION

For necessary administrative expenses of the Domestic Food Programs funded under this Act, $82,578,000; of which $5,000,000 shall be available only for simplifying procedures, reducing overhead costs, tightening regulations, improving food stamp coupon handling, and assistance in the prevention, identification and prosecution of fraud and other violations of law: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), and not to exceed $150,000 shall be available for employment under 5 U.S.C. 3109.

HUMAN NUTRITION INFORMATION SERVICE

For necessary expenses to enable the Human Nutrition Information Service to perform applied research and demonstrations relating to human nutrition and consumer use and economics of food utilization, $6,876,000: Provided, That this appropriation shall be available for employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225).

TITLE IV—INTERNATIONAL PROGRAMS

FOREIGN AGRICULTURAL SERVICE

For necessary expenses of the Foreign Agricultural Service, including carrying out title VI of the Agricultural Act of 1954, as amended (7 U.S.C. 1761-1768), market development activities abroad, and for enabling the Secretary to coordinate and integrate activities of the Department in connection with foreign agricultural work, including not to exceed $110,000 for representation allowances and for expenses pursuant to section 8 of the Act approved August 3, 1956 (7 U.S.C. 1766), $81,109,000: Provided, That not less than $255,000 of this appropriation shall be available to obtain statistics and related facts on foreign production and full and complete information on methods used by

other countries to move farm commodities in world trade on a competitive basis.

PUBLIC LAW 480

(INCLUDING TRANSFERS OF FUNDS)

For expenses during the current fiscal year, not otherwise recoverable, and unrecovered prior years' costs, including interest thereon, under the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701-1715, 1721-1726, 1727-1727f, 1731-1736g), as follows: (1) financing the sale of agricultural commodities for convertible foreign currencies and for dollars on credit terms pursuant to titles I and III of said Act, or for convertible foreign currency for use under 7 U.S.C. 1708, and for furnishing commodities to carry out the Food for Progress Act of 1985, not more than $834,727,000, of which $454,727,000 is hereby appropriated and the balance derived from proceeds from sales of foreign currencies and dollar loan repayments, repayments on long-term credit sales and carryover balances, and (2) commodities supplied in connection with dispositions abroad, pursuant to title II of said Act, not more than $628,344,000, of which $628,344,000 is hereby appropriated: Provided, That not to exceed 15 per centum of the funds made available to carry out any title of this paragraph may be used to carry out any other title of this paragraph.

OFFICE OF INTERNATIONAL COOPERATION AND DEVELOPMENT

For necessary expenses of the Office of International Cooperation and Development to coordinate, plan, and direct activities involving international development, technical assistance and training, and international scientific and technical cooperation in the Department of Agriculture, including those authorized by the Food and Agriculture Act of 1977 (7 U.S.C. 3291), $5,035,000; and the Office may utilize advances of funds, or reimburse this appropriation for expenditures made on behalf of Federal agencies, public and private organizations and institutions under agreements executed pursuant to the agricultural food production assistance programs (7 U.S.C. 1736) and the foreign assistance programs of the International Development Cooperation Administration (22 U.S.C. 2392).

SCIENTIFIC ACTIVITIES OVERSEAS

(FOREIGN CURRENCY PROGRAM)

For payments in foreign currencies owed to or owned by the United States for market development research authorized by section 104(b)(1) and for agricultural and forestry research and other functions related thereto authorized by section 104(b)(3) of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1704 (b)(1), (3)), $2,500,000: Provided, That this appropriation shall be available, in addition to other appropriations for these purposes, for payments in the foregoing currencies: Provided further, That funds appropriated herein shall be used for payments in such foreign currencies as the Department determines are needed and can be used most effectively to carry out the purposes of this paragraph: Provided further, That not to exceed $25,000 of this appropriation shall be available for payments in foreign currencies for expenses of employment pursuant to the second sentence of section 706(a) of the Organic Act of 1944 (7 U.S.C. 2225), as amended by 5 U.S.C. 3109.

TITLE V—RELATED AGENCIES

FOOD AND DRUG ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Food and Drug Administration; for rental of special purpose space in the District of Columbia or elsewhere; and for miscellaneous and emergency expenses of enforcement activities, authorized and approved by the Secretary and to be accounted for solely on the Secretary's certificate, not to exceed $25,000; $411,803,000: Provided, That none of these funds shall be used to develop, establish, or operate any program of user fees authorized by 31 U.S.C. 9701: Provided further, That of the sums provided herein, not to exceed $1,000,000 shall remain available until expended, and shall become available only to the extent necessary to meet unanticipated costs of emergency activities not provided for in budget estimates and after maximum absorption of such costs within the remainder of the account has been achieved.

BUILDINGS AND FACILITIES

For plans, construction, repair, improvement, extension, alteration, and purchase of fixed equipment or facilities of or used by the Food and Drug Administration, where not otherwise provided, $1,879,000.

RENTAL PAYMENTS (FDA)

(INCLUDING TRANSFERS OF FUNDS)

For payment of space rental and related costs pursuant to Public Law 92-313 for programs and activities of the Food and Drug Administration which are included in this Act, $24,627,000: Provided, That in the event the Food and Drug Administration should require modification of space needs, a share of the salaries and expenses appropriation may be transferred to this appropriation, or a share of this appropriation may be transferred to the salaries and expenses appropriation, but such transfers shall not exceed 10 per centum of the funds made available for Rental Payments (FDA) to or from this account.

COMMODITY FUTURES TRADING COMMISSION

For necessary expenses to carry out the provisions of the Commodity Exchange Act, as amended (7 U.S.C. 1 et seq.), including the purchase and hire of passenger motor vehicles; the rental of space (to include multiple year leases) in the District of Columbia and elsewhere; and not to exceed $25,000 for employment under 5 U.S.C. 3109; $29,761,000; including not to exceed $700 for official reception and representation expenses.

FARM CREDIT ADMINISTRATION

LIMITATION ON REVOLVING FUND FOR ADMINISTRATIVE EXPENSES

Not to exceed $39,420,000 (from assessments collected from farm credit system banks) shall be obligated during the current fiscal year for administrative expenses as authorized under 12 U.S.C. 2249.

TITLE VI—GENERAL PROVISIONS

SEC. 601. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive Order issued pursuant to existing law.

SEC. 602. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department of Agriculture for the fiscal year 1987 under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed seven hundred thirty-four (734) passenger motor vehicles, of which seven hundred twenty-six (726) shall be for replacement only, and for the hire of such vehicles.

SEC. 603. Funds in this Act available to the Department of Agriculture shall be available for uniforms or allowances as authorized by law (5 U.S.C. 5901-5902).

SEC. 604. Not less than $1,500,000 of the appropriations of the Department of Agriculture in this Act for research and service work authorized by the Acts of August 14, 1946, July 28, 1954, and September 6, 1958 (7 U.S.C. 427, 1621-1629; 42 U.S.C. 1891-1893), shall be available for contracting in accordance with said Acts.

SEC. 605. No part of the funds contained in this Act may be used to make production or other payments to a person, persons, or corporations upon a final finding by court of competent jurisdiction that such party is guilty of growing, cultivating, harvesting, processing or storing marihuana, or other such prohibited drug-producing plants on any part of lands owned or controlled by such persons or corporations.

SEC. 606. Advances of money to chiefs of field parties from any appropriation in this Act for the Department of Agriculture may be made by authority of the Secretary of Agriculture.

SEC. 607. The cumulative total of transfers to the Working Capital Fund for the purpose of accumulating growth capital for data services and National Finance Center operations shall not exceed $2,000,000: Provided, That no funds in this Act appropriated to an agency of the Department shall be transferred to the Working Capital Fund without the approval of the agency administrator.

SEC. 608. New obligational authority provided for the following appropriation items in this Act shall remain available until expended: Public Law 480; Mutual and Self-Help Housing; Watershed and Flood Prevention Operations; Resource Conservation and Development; Colorado River Basin Salinity Control Program; Animal and Plant Health Inspection Service, Buildings and Facilities; Agricultural Stabilization and Conservation Service Salaries and Expenses funds made available to county committees; the Federal Crop Insurance Corporation Fund; Rural Housing for Domestic Farm Labor; Agricultural Research Service, Buildings and Facilities; Scientific Activities Overseas (Foreign Currency Program); Dairy Indemnity Program; $5,000,000 for the grasshopper and Mormon cricket control program, Animal and Plant Health Inspection Service; $2,852,000 for higher education training grants under section 1417(a)(3)(B) of Public Law 95-113, as amended (7 U.S.C. 3152(a)(3)(B)); and Buildings and Facilities, Food and Drug Administration.

SEC. 609. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 610. Not to exceed $50,000 of the appropriation available to the Department of Agriculture in this Act shall be available to provide appropriate orientation and language training pursuant to Public Law 94-449.

SEC. 611. Notwithstanding any other provision of law, employees of the agencies of the Department of Agriculture, including employees of the Agricultural Stabilization and Conservation county committees, may be utilized to provide part-time and inter-

mittent assistance to other agencies of the Department, without reimbursement, during periods when they are not otherwise fully utilized, and ceilings on full-time equivalent staff years established for or by the Department of Agriculture shall exclude overtime as well as staff years expended as a result of carrying out programs associated with natural disasters, such as forest fires, droughts, floods, and other acts of God.

SEC. 612. Funds provided by this Act for personnel compensation and benefits shall be available for obligation for that purpose only.

Sec. 613. No part of any appropriation contained in this Act shall be expended by any executive agency, as referred to in the Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.), pursuant to any obligation for services by contract, unless such executive agency has awarded and entered into such contract as provided by law.

SEC. 614. None of the funds appropriated or otherwise made available by this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States.

SEC. 615. Certificates of beneficial ownership sold by the Farmers Home Administration in connection with the Agricultural Credit Insurance Fund, Rural Housing Insurance Fund, and the Rural Development Insurance Fund shall be not less than 65 per centum of the value of the loans closed during the fiscal year.

SEC. 616. No funds appropriated by this Act may be used to pay negotiated indirect cost rates on cooperative agreements or similar arrangements between the United States Department of Agriculture and nonprofit institutions in excess of 10 per centum of the total direct cost of the agreement when the purpose of such cooperative arrangements is to carry out programs of mutual interest between the two parties. This does not preclude appropriate payment of indirect costs on grants and contracts with such institutions when such indirect costs are computed on a similar basis for all agencies for which appropriations are provided in this Act.

SEC. 617. None of the funds in this Act shall be used to carry out any activity related to phasing out the Resource Conservation and Development Program.

SEC. 618. None of the funds in this Act shall be used to prevent or interfere with the right and obligation of the Commodity Credit Corporation to sell surplus agricultural commodities in world trade at competitive prices as authorized by law.

SEC. 619. Notwithstanding any other provision of this Act, commodities acquired by the Department in connection with Commodity Credit Corporation and section 32 price support operations may be used, as authorized by law (15 U.S.C. 714c and 7 U.S.C. 612c), to provide commodities to individuals in cases of hardship as determined by the Secretary of Agriculture.

SEC. 620. During fiscal year 1987, notwithstanding any other provision of law, no funds may be paid out of the Treasury of the United States or out of any fund of a Government corporation to any private individual or corporation in satisfaction of any assurance agreement or payment guarantee or other form of loan guarantee entered into by any agency or corporation of the United States Government with respect to loans made and credits extended to the Polish People's Republic, unless the Polish People's Republic has been declared to be in default of its debt to such individual or corporation or unless the President has provided a monthly written report to the Speaker of the House of Representatives and the President of the Senate explaining the manner in which the national interest of the United States has been served by any payments during the previous month under loan guarantee or credit assurance agreement with respect to loans made or credits extended to the Polish People's Republic in the absence of a declaration of default.

SEC. 621. None of the funds in this Act shall be available to reimburse the General Services Administration for payment of space rental and related costs in excess of the amounts specified in this Act.

SEC. 622. In fiscal year 1987, the Secretary of Agriculture shall initiate construction on not less than twenty new projects under the Watershed Protection and Flood Prevention Act (Public Law 566) and not less than five new projects under the Flood Control Act (Public Law 534).

SEC. 623. Funds provided by this Act may be used for translation of publications of the Department of Agriculture into foreign languages when determined by the Secretary to be in the public interest.

SEC. 624. None of the funds appropriated by this or any other Act may be used to relocate the Hawaii State Office of the Farmers Home Administration from Hilo, Hawaii, to Honolulu, Hawaii.

SEC. 625. Provisions of law prohibiting or restricting personal services contracts shall not apply to veterinarians employed by the Department to take animal blood samples, test and vaccinate animals, and perform branding and tagging activities on a fee-for-service basis.

SEC. 626. None of the funds provided in this Act may be used to reduce programs by establishing an end-of-year employment ceiling on full-time equivalent staff years below the level set herein for the following agencies: Farmers Home Administration, 12,675; Agricultural Stabilization and Conservation Service, 2,550; and Soil Conservation Service, 14,177.

SEC. 627. Funds provided in this Act may be used for one-year contracts which are to be performed in two fiscal years so long as the total amount for such contracts is obligated in the year for which the funds are appropriated.

SEC. 628. Funds appropriated by this Act shall be applied only to the objects for which appropriations were made except as otherwise provided by law, as required by 31 U.S.C. 1301.

SEC. 629. None of the funds in this Act shall be available to restrict the authority of the Commodity Credit Corporation to lease space for its own use or to lease space on behalf of other agencies of the Department of Agriculture when such space will be jointly occupied.

SEC. 630. All funds appropriated for this fiscal year and all funds appropriated hereafter by this or any other Act that are determined to be part of the "extramural budget" of the Department of Agriculture for any fiscal year for purposes of meeting the requirements of section 9 of the Small Business Act (15 U.S.C. 638), as amended by the Small Business Innovation Development Act of 1982, Public Law 97-219, shall be available for contracts, grants or cooperative agreements with small business concerns for any purpose in furtherance of the small business innovation research program. Such funds may be transferred for such purpose from one appropriation to another or to a single account.

SEC. 631. None of the funds provided in this Act may be expended to release information acquired from any handler under the Agricultural Marketing Agreement Act of 1937, as amended: Provided, That this provision shall not prohibit the release of information to other Federal agencies for enforcement purposes: Provided further, That this provision shall not prohibit the release of aggregate statistical data used in formulating regulations pursuant to the Agricultural Marketing Agreement Act of 1937, as amended: Provided further, That this provision shall not prohibit the release of information submitted by milk handlers.

SEC. 632. Unless otherwise provided in this Act, none of the funds appropriated in this Act may be used by the Farmers Home Administration to employ or otherwise contract with private debt collection agencies to collect delinquent payments from Farmers Home Administration borrowers.

SEC. 633. (A) Disaster Assistance to meet needs resulting from drought in the southeastern states, floods and excessive moisture in Michigan and Oklahoma and other natural disasters in such other states as may be determined by the President.

SOIL CONSERVATION SERVICE

WATERSHED AND FLOOD PREVENTION OPERATIONS

For an additional amount, for emergency measures under title IV of the Agricultural Credit Act of 1978 (16 U.S.C. 2201-2205), $10,000,000 to remain available until expended.

AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE

EMERGENCY CONSERVATION PROGRAM

For an additional amount, for necessary expenses to carry out the program authorized under title IV of the Agricultural Credit Act of 1978 (16 U.S.C. 2201-2205), $10,000,000 to remain available until expended.

EMERGENCY ASSISTANCE TO AGRICULTURAL PRODUCERS

As authorized by existing law, and within the funding levels provided by this Act, for disasters occurring in 1986, the Secretary of Agriculture shall, in the case of any farmer or rancher suffering a major loss from such disaster, direct the Administrator of the Farmers Home Administration to, under such rules and regulations as the Secretary may determine as long as the objective of enabling farmers to stay in business is carried out:

(1) Refinance existing debt at the lowest allowable interest rate and such term as will give the borrower a reasonable chance to repay;

(2) Provide loans for financing 1987 crop production;

(3) Stretch out loan payments over a period of years, and base such payments on regaining our normal fair share of world markets; and

(4) Coordinate disaster assistance programs with the Administrator of the Small Business Administration to assure that all individuals affected by natural disasters are provided with the appropriate financial assistance.

(B) Within the funds made available by this section, the Secretary of Agriculture shall:

(a)(1) As soon as practicable, but not later than forty-five days after the date of application by an eligible producer, make available to eligible producers for losses of pro-

duction due to drought, excessive heat, floods, hail or excessive moisture in 1986 payments determined in accordance with this subsection.

(2) An eligible producer shall be a producer of the 1986 crop of wheat, feed grains, upland cotton, rice, soybeans, sugar beets, sugar cane or peanuts who—

(A) is eligible to receive price support under section 107D, 105C, 103A, 101A, 201 or 108B of the Agricultural Act of 1949 (7 U.S.C. 1445b-3, 1444e, 1444-1, 1446, or 1445c-2); and

(B) is in a county in which producers are eligible to receive disaster emergency loans under section 321 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961) as the result of drought, excessive heat, floods, hail or excessive moisture which occurred in 1986.

(3) Payments made available to each eligible producer shall not exceed $100,000 for all crops (without regard to other limitations in farm program payments) and shall be determined for each crop of such commodities by multiplying—

(A) the payment rate; by

(B) the loss of production of the eligible producer.

(4)(A) Except for sugar beets and sugar cane, the payment rate shall be equal to the level of price support established for the crop of the commodity for the farm.

(B) For purposes of determining the payment rate for sugar beets and sugar cane, the Secretary shall establish a payment rate which is fair and reasonable in relation to the level of price support which is established for the 1986 crop of sugar beets and sugar cane.

(5)(A) The loss of production of the eligible producer shall be the quantity of wheat, feed grains, cotton, rice, soybeans, sugar beets and sugar cane or peanuts that eligible producers on a farm are unable to harvest due to reduced yields or are prevented from planting to such commodity or other nonconserving crops due to drought, excessive heat, floods, hail or excessive moisture in 1986. Such loss of production of the eligible producer for each such crop shall be the difference between—

(i) The result determined by multiplying (I) 50 per centum of the farm program payment yield established for the crop of the commodity, by (II) the sum of the acreage of such crop planted to harvest and the acreage for which prevented planted credit is approved by the Secretary; and

(ii) The actual production on the farm of such crop of the commodity if such quantity is less than the quantity determined in accordance with clause (i).

(B) The sum of the acreage determined in accordance with paragraph (5)(A)(i)(II) shall not exceed—

(i) with respect to wheat, feed grains, upland cotton, or rice, the 1986 permitted acreage determined for such crop of the commodity; and

(ii) with respect to soybeans, peanuts, sugar beets and sugar cane, the acreage so affected but not to exceed the acreage planted in the immediately preceding year to soybeans or peanuts, respectively, for harvest including any acreage that the producer was prevented from planting to such commodity or to other nonconserving crops in lieu of soybeans or peanuts because of drought, excessive moisture, flood, hail, or other natural disaster, or other condition beyond the control of the producer.

(6) Payments determined in accordance with paragraph (3) with respect to any producer with crop insurance shall be reduced to the extent the amount determined by adding the total amount of crop insurance indemnity payments (gross indemnity less premium paid) received by the producer for the loss of production of each crop of such commodities on the farm and the payment determined in accordance with paragraphs (3) through (5) exceeds the amount determined by multiplying—

(A)(i) the quantity determined by multiplying 100 percent of the farm program payment yield established for each crop of such commodities by (ii) the sum of the acreage of each such crop planted to harvest and the acreage for which prevented planted credit is approved by the Secretary (the total not to exceed the quantity determined in accordance with subparagraph (5)(B)); by

(B) the payment rate for each crop of the commodity.

(7) The total amount of payments made under paragraph (3) to producers on a farm with respect to each crop of such commodities and the total amount of price support loans and purchases (and program benefits for sugar beets and sugar cane) made with respect to such crop on such farm may not exceed the amount determined by multiplying—

(A) The farm program payment yield for the crop of the commodity; by

(B) The sum of (i) the acreage of the crop of the commodity planted for harvest and (ii) the acreage for which prevented planted credit is approved by the Secretary, but for each such crop such sum shall not exceed the quantity determined in accordance with subparagraph (5)(B); by

(C) The payment rate for each crop of the commodity.

(8)(A) For purposes of determining the farm program payment yield, the Secretary shall use the 1986 farm program payment yield established for the crop of the commodity or, if such data is not available, a yield determined by the Secretary to be fair and equitable.

(B) Notwithstanding any other provision of this subsection—

(i) a loss of production of quota peanuts from a farm as otherwise determined under paragraph (5) shall be reduced by the quantity of peanut poundage quota which was the basis of such anticipated production which has been transferred from the farm; and

(ii) payments made under this subsection shall be taken into account whether the lost production for which the loss of production is claimed was a loss of production of quota or additional peanuts and the payment rate shall be established accordingly. Further, notwithstanding any other provision of law, the amount of undermarketings of quota peanuts from a farm for the 1986 crop that may otherwise be claimed under section 358 of the Agricultural Adjustment Act of 1938 for purposes of future quota increases shall be reduced by the quantity of lost production of such peanuts for which payment has been received under this subsection.

(9) The disaster payments required by this section shall be made in the form of generic, negotiable commodity certificates redeemable from stocks of commodities held by the Commodity Credit Corporation.

(b)(1) notwithstanding any other provision of this section for the 1986 crop year, the Secretary of Agriculture shall utilize certificates redeemable from stocks of commodities held by the Commodity Credit Corporation, for the purpose of making disaster payments to producers of nonprogram crops, in counties in which producers became eligible subsequent to July 1, 1986, to receive disaster emergency loans under section 321 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1961) as the result of drought, excessive heat, flood, hail, or excessive moisture, and

(2) the Secretary of Agriculture shall make such payments (not to exceed $100,000 to any individual producer) if the Secretary determines that—

(A) the producer has suffered a substantial loss of production due to drought, excessive heat, flood, hail, or excessive moisture, and

(B) such loss has created an economic emergency for the producer to the extent that additional assistance must be made available to alleviate such economic emergency, and

(c) Within 30 days following the enactment of this Act the Secretary of Agriculture shall issue such rules and regulations as the Secretary determines necessary to carry out the program authorized by subsections (a) and (b) of this section. Such regulations shall provide that the term "nonprogram crops" shall include all crops insured directly or indirectly by the Federal Crop Insurance Corporation for crop year 1986, and in addition—

(1) the term shall include other commercial crops for which such insurance was not available for purchase or, if available, was not purchased by such by producers for crop year 1986, if—

(A) in accordance with rules and regulations issued by the Secretary of Agriculture, the producer of such crop(s) provides satisfactory evidence of actual crop yield for at least one of the immediately preceding 3 crop years: Provided, That in the event such data does not exist for any of the three preceding crop years the Secretary shall use county average crop yield data; and

(B) that the producer of such crop(s) also provides satisfactory evidence of 1986 crop year losses resulting from dought, excessive heat, flood, excessive moisture, or hail exceeding 50 per centum of the crop yield established in subparagraph (A) of this paragraph, and

(2) that payments made available to producers of such crops shall be based upon the average market prices received by producers of such crops, as determined by the Secretary.

(d)(1) The Secretary shall carry out the program authorized by this proviso through the Commodity Credit Corporation.

(2) Applications for payments made in accordance with this proviso must be filed by January 31, 1987.

(3) Payments made by the Secretary of Agriculture to eligible producers under this section shall be made as soon as practicable but not later than 45 days following the producer's application.

(e)(1) The Secretary of Agriculture shall reduce the amount of funds available for emergency insured and guaranteed loans to meet the needs resulting from natural disasters from funds in the Agricultural Credit Insurance Fund by $400,000,000.

(2) For purposes of making payments in accordance with this proviso, there is transferred to the Commodity Credit Corporation $400,000,000 from funds in the Agricultural Credit Insurance Fund.

SEC. 634. Notwithstanding any other provision of law, including section 502(c)(2) of the Housing Act of 1949 (42 U.S.C. 1471 et seq.), none of the funds appropriated under this or any other Act shall be used prior to June 30, 1987 to accept prepayment of any

loan made under section 515 of the Housing Act of 1949, unless such loan was made at least twenty years prior to the date of prepayment or, for loans made before December 21, 1979, the Secretary makes a determination that a supply of adequate, comparable housing is available in the community, or that prepayment of such loans will not result in a substantial increase in rents to tenants in residence upon date of prepayment or displacement of such tenants.

SEC. 635. The Secretary of Agriculture may transfer surplus agricultural commodities from inventory to the Department of Defense for use in complementing support provided by the Department of Defense to the Tenth International Pan American Games to be held in Indianapolis, Indiana.

SEC. 636. The Food Security Act of 1985 is amended by inserting at the end thereof the following new sentence: "Effective for each of the 1987 through 1990 crops, the Secretary may not deny a person status as a separate person solely on the ground that a family member cosigns for, or makes a loan to, such person and leases, loans, or gives such person equipment, land or labor, if such family members were organized as separate units prior to December 31, 1985.".

SEC. 637. Section 106A(d)(1)(A) of the Agricultural Act of 1949 is amended by—

(1) striking out the parenthetical phrase in clause (i);

(2) inserting "and" at the end of clause (i);

(3) striking out clause (ii); and,

(4) redesignating clause (iii) as clause (ii).

SEC. 638. (a) Clause (B) of the last sentence of section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by striking out "for the excess shelter expense deduction contained in clause (2)" and inserting in lieu thereof "contained in clause (1)".

(b)(1) Except as provided in paragraphs (2) and (3), the amendment made by subsection (a) shall become effective 30 days after the date of enactment of this Act.

(2) Except as provided in paragraph (3), the amendment made by subsection (a) shall not apply to an allotment issued to any eligible household under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.) for any month beginning before the effective date of this subsection.

(3) If a State elected before the date of enactment of this Act to compute household income in accordance with section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) (as amended by subsection (a)), the amendment made by subsection (a) shall become effective on May 1, 1986.

SEC. 639. Section 108B(4)(A) of the Agricultural Act of 1949 (7 U.S.C. 1445c-2(4)(A)) is amended by inserting after "additional peanuts" the following: "(other than net gain on additional peanuts in separate type pools established under paragraph (3)(B)(i) for Valencia peanuts produced in New Mexico)".

SEC. 640. Section 623B(b)(2) of the Community Economic Development Act of 1981 is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision of law, any Utah or Ohio local public body to which a loan was made after December 31, 1982, from the Rural Development Loan Fund may, at the discretion of such local public body and with the approval of the Secretary of Health and Human Services, transfer such loan to a nonprofit corporation designated by such body to serve as an intermediate borrower and to carry out the purposes of the loan."

SEC. 641. (a) Section 1323(a)(1) of the Food Security Act of 1985 is amended by striking out "September 30, 1986," and inserting in lieu thereof "September 30, 1987,", and

(b) Section 1323(a) is further amended by adding at the end thereof a new subsection—

"(5) Notwithstanding any provision to the contrary of subsection (4) above, the $20,000,000 which was available pursuant to subsection (4) shall continue to be available and shall be used by the Secretary prior to September 30, 1987, to guarantee loans for the national rural development and finance program and shall remain available until expended.".

and,

(c) Section 1323(b)(1) of such Act is amended by striking out "September 30, 1986," and inserting in lieu thereof "September 30, 1987,", and inserting the words "made or to be" after the word "guarantees". Provided further, That such grant funds may be used by such corporation to provide technical assistance and financial assistance, including capitalizing revolving loan programs, pursuant to the Act.

SEC. 642. During fiscal year 1987, the Commodity Credit Corporation shall use $500,000 worth of surplus agricultural commodities owned by the Corporation in establishing and carrying out a research and development program on external combustion engines under section 4(m) of the Commodity Credit Corporation Charter Act. In addition to any sales required under any other Act, the Secretary of Agriculture, under such terms as the Secretary may prescribe, shall sell notes and other obligations held in the Rural Development Insurance Fund established under section 309A of the Consolidated Farm and Rural Development Act in such amounts as to realize net proceeds to the Government of not less than $500,000.

SEC. 643. Section 1231 of the Food Security Act of 1985 is amended by adding at the end thereof the following new subsection:

"(f) For purposes of this subtitle, alfalfa and other multi-year grasses and legumes in a rotation practice, as approved by the Secretary, shall be considered agricultural commodities.".

SEC. 644. Paragraph (16) of section 103(h) of the Agricultural Act of 1949 (7 U.S.C. 1444(h)(16)) is amended to read as follows:

"(16)(A) Notwithstanding any other provision of law, except as provided in subparagraph (B), compliance on a farm with the terms and conditions of any other commodity program may not be required as a condition of eligibility for loans or payments under this subsection.

"(B) In the case of each of the 1989 and 1990 crops of extra long staple cotton, the Secretary may require that, as a condition of eligibility of producers for loans or payments under this subsection, the acreage planted for harvest on the farm to any other commodity for which an acreage limitation program is in effect shall not exceed the crop acreage base established for the farm for that commodity.

"(C) Notwithstanding any other provision of law, in the case of each of the 1987 and 1988 crops of extra long staple cotton, compliance with the terms and conditions of the program authorized by this subsection may not be required as a condition of eligibility for loans, purchases, or payments under any other commodity program.".

SEC. 645. The fifth paragraph of section 8(b) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)) (as amended by section 3 of Public Law 99-253 (100 Stat. 36)) is amended—

(1) by inserting after the third sentence the following new sentence: "Notwithstanding the preceding sentence, there may be 1 local administrative area in any county for which there had been established less than 3 local administrative areas as of December 23, 1985."; and

(2) in the sixth sentence (as it existed before the amendment made by paragraph (1)), by striking out ": Provided," and all that follows through the period and inserting in lieu thereof a period.

SEC. 646. (1) It is the sense of the Senate that the Secretary of Agriculture should make available not less than $10,000,000 worth of flour and cornmeal using the wheat and cornstocks of the Commodity Credit Corporation. Such flour and cornmeal shall be in addition to the traditional level of assistance made available under section 1114 of the Agriculture and Food Act of 1981, section 416(a) of the Agricultural Act of 1949, section 4 of the Agriculture and Consumer Protection Act of 1973, and any other provision of law administered by the Secretary.

(2)(a) During the three-year period beginning with the fiscal year ending September 30, 1987, through the fiscal year ending September 30, 1989, the Secretary of Agriculture shall make available to PVO's and cooperatives and to governments a total of at least 500,000 metric tons of wheat, 500,000 metric tons of soybeans, and 50 million pounds of dairy products under paragraph (11)(B) of section 416(b) of the Agricultural Act of 1949, notwithstanding paragraph (11)(c) of section 416(b) of such Act.

(b) Commodities made available under this section during any fiscal year shall be—

(1) subject to the agreement of recipient nations—

(A) to acquire through commercial arrangements agricultural commodities directly or by private purchases during the fiscal year in an amount equal to 105 percent of the average amount of such agricultural commodities acquired through commercial arrangements during the 3 preceding years.

(B) to permit the sale of commodities furnished under this section in the recipient nation and to use the local currency generated from such sales—

(i) by PVO's and cooperatives to carry out approved programs of assistance in the recipient nation;

(ii) to operate lending programs in the manner provided for in section 108 of Public Law 480; and

(iii) to reimburse the United States in dollars for costs incurred in furnishing such commodities, including transportation and processing, during the same fiscal year in which such costs were incurred. Reimbursements under this paragraph may be made in local currencies generated from the sale of the commodities under this paragraph if they are used to pay expenses of the United States in the recipient nation.

(2) No greater than such amounts as is requested by recipient nations.

(c) To the extent practicable, commodities made available under this section shall be furnished in equal quantities during each of these fiscal years.

(d) It is the sense of Congress that commodities provided for in this subsection be made available to PVO's and cooperatives operating in the Republic of the Philippines, and the government of the Philippines.

(3)(a) During the three-year period beginning with the fiscal year ending September 30, 1987, through the fiscal year ending September 30, 1989, the Secretary of Agriculture shall make available to the friendly countries, under paragraph (b)(11)(A) of section

416 of the Agricultural Act of 1949, at least 500,000 metric tons of wheat and 45 million pounds of dairy products, notwithstanding paragraph (11)(c) of section 416(b) of such Act.

(b) Commodities made available to a nation under this section during any fiscal year shall be—

(1) subject to the agreement of the Nation—

(A) to acquire through commercial arrangements agricultural commodities directly or by private purchases during the fiscal year in an amount equal to 105 percent of the average amount of such agricultural commodities acquired through commercial arrangements during the preceding three years.

(B) to sell any commodities furnished under this section within the nation and to use the local currencies generated from such sales to (i) establish and carry out lending programs in such nations in the manner provided for in section 108 of the Agricultural Trade Development and Assistance Act of 1954 and (ii) reimburse the United States in dollars for costs incurred in furnishing such commodities, including transportation and processing, in the same fiscal year in which such costs were incurred. Reimbursements under this paragraph may be made in local currencies generated from the sale of the commodities under paragraph (2) if they are used to pay expenses of the United States in the recipient Nation.

(2) No greater than such amounts as is requested by such governments.

(c) To the extent practicable, commodities made available under this section shall be furnished in equal quantities during each of the three fiscal years.

(d) For purposes of this section, the term "friendly countries" shall have the same meaning as that term has under the Agricultural Trade Development and Assistance Act of 1954.

(e) It is the sense of Congress that commodities provided for in this subsection be made available to the Philippines and friendly countries of Africa.

(4)(a) During the three-year period beginning with the fiscal year ending September 30, 1987, through the fiscal year ending September 30, 1989, the Secretary of Agriculture shall make available to PVO's cooperatives and governments, 460,000 metric tons of wheat, 137 million pounds of dairy products, and 180,000 metric tons of soybeans; under paragraph (11)(B) of section 416(b) of the Agricultural Act of 1949, notwithstanding paragraph (11)(C) of section 416(b) of such Act.

(b) Commodities made available to a nation, or PVO's and cooperatives operating in such nation, under this section during any fiscal year shall be—

(1) subject to the agreement of the nation—

(A) to acquire through commercial arrangements agricultural commodities directly or by private purchases during the fiscal year in an amount equal to 105 percent of the average amount of such agricultural commodities acquired through commercial arrangements during the preceding three years;

(B) to permit the sale of commodities furnished under this section within the nation and to use the local currencies generated from such sales (i) by PVO's and cooperatives to carry out approved programs of assistance in the country and (ii) to operate lending programs in the manner provided for in section 108 of Public Law 480; and

(C) to reimburse the United States in dollars for costs incurred in furnishing such commodities, including transportation and processing, in the same fiscal year in which such costs were incurred. Reimbursements under this paragraph may be made in local currencies generated from the sale of the commodities under paragraph (2) if they are used to pay expenses of the United States in the recipient nation.

(2) No greater than such amounts as is requested by such government.

(c) To the extent practicable, commodities made available under this section shall be furnished in equal quantities during each of the three fiscal years.

(d) For purposes of this section, the term "friendly countries" shall have the same meaning as that term has under the Agricultural Trade Development and Assistance Act of 1954.

(e) It is the sense of Congress that of the commodities made available under this subsection—

(1) 400,000 metric tons of wheat, 80 million pounds of dairy products and 180,000 metric tons of soybeans be made available to Nigeria;

(2) 1 million metric tons of wheat be made available to friendly countries in Africa, other than Nigeria;

(3) 30,000 metric tons of soybeans, and 50 million pounds of dairy products be made available to India; and

(4) 60,000 metric tons of wheat and 7 million pounds of dairy products be made available to Bangladesh.

This Act may be cited as the "Agriculture, Rural Development, and Related Agencies Appropriations Act, 1987".

And the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

(b) Such amounts as may be necessary for programs, projects or activities provided for in the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 1987, at a rate of operations and to the extent and in the manner provided as follows, to be effective as if it had been enacted into law as the regular appropriations Act:

An Act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1987, and for other purposes

TITLE I—DEPARTMENT OF COMMERCE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the general administration of the Department of Commerce, including not to exceed $2,000 for official entertainment, $36,300,000.

BUREAU OF THE CENSUS

SALARIES AND EXPENSES

For expenses necessary for collecting, compiling, analyzing, preparing, and publishing statistics, provided for by law, $90,780,000.

PERIODIC CENSUSES AND PROGRAMS

For expenses necessary to collect and publish statistics for periodic censuses and programs provided for by law, $172,000,000, to remain available until expended.

ECONOMIC AND STATISTICAL ANALYSIS

SALARIES AND EXPENSES

For necessary expenses, as authorized by law, of economic and statistical analysis programs, $30,000,000.

ECONOMIC DEVELOPMENT ADMINISTRATION

ECONOMIC DEVELOPMENT ASSISTANCE PROGRAMS

For economic development assistance as provided by the Public Works and Economic Development Act of 1965, as amended, and Public Law 91-304, and such laws that were in effect immediately before September 30, 1982, $180,443,000 of which $250,000 shall be obligated for the Center for International Trade Development at Oklahoma State University: Provided, That during fiscal year 1987 total commitments to guarantee loans shall not exceed $150,000,000 of contingent liability for loan principal: Provided further, That none of the funds appropriated or otherwise made available under this heading may be used directly or indirectly for attorneys' or consultants' fees in connection with securing grants and contracts made by the Economic Development Administration: Provided further, That notwithstanding any provision of title I of the Local Public Works Capital Development and Investment Act of 1976, as amended (Public Law 94-369), or any other provision of law to the contrary, any funds authorized and appropriated under title I of such Act, as amended, in any fiscal year for projects in New York, New York, but obligated as of December 19, 1985 and not disbursed, shall remain available for obligation and expenditure through March 31, 1988 for any authorized project in New York, New York, until title I of such Act, as amended, or for any project in New York, New York, determined to be eligible under title I of the Public Works and Economic Development Act of 1965, as amended, if the total amount of such funds is not finally determined by October 15, 1986: Provided further, That notwithstanding any other provision of law or a contract to the contrary, the SEDA-COG Joint Rail Authority, Lewisburg, Pennsylvania, may sell any portion of the real property that was acquired in part with proceeds of a grant from the Economic Development Administration (grant number 01-19-02563) and may retain all of the proceeds of any such sale so long as the proceeds are used for purposes which meet the criteria of and are approved by the Economic Development Administration: Provided further, That notwithstanding any other provision of law or regulation, including title I of the Public Works and Economic Development Act of 1965, as amended, and OMB Circular A-102 Attachment N, the Administrator of the Economic Development Administration is hereby directed to release, without any further requirement or delay, the funds previously appropriated in Public Law 99-190 to Lexington County, South Carolina, as a direct grant: Provided further, That in addition to funds made available pursuant to Public Law 99-190 for infrastructure projects and economic development activities at the site of the General Motors plant in the city of South Gate, California, such amounts as may be necessary shall be available for this purpose such that the total amount of funds available shall not exceed $431,012: Provided further, That in addition to funds made available pursuant to Public Law 99-190 for infrastructure projects and related economic development activities at the Jasper Industrial Park in Jasper, Alabama, such amounts as may be necessary

shall be available for this purpose such that the total amount of funds available shall not exceed $470,224.

SALARIES AND EXPENSES

For necessary expenses of administering the economic development assistance programs as provided for by law, $25,000,000: Provided, That these funds may be used to monitor projects approved pursuant to title I of the Public Works Employment Act of 1976, as amended, title II of the Trade Act of 1974, as amended, and the Community Emergency Drought Relief Act of 1977. Notwithstanding any other provision of this Act or any other law, funds appropriated in this paragraph shall be used to fill and maintain forty-nine permanent positions designated as Economic Development Representatives out of the total number of permanent positions funded in the Salaries and Expenses account of the Economic Development Administration for fiscal year 1987.

REGIONAL DEVELOPMENT PROGRAM

REGIONAL DEVELOPMENT PROGRAMS

(RESCISSION)

Of the funds available for Regional Development Program, "Regional Development Programs", $1,576,000 are rescinded.

INTERNATIONAL TRADE ADMINISTRATION

OPERATIONS AND ADMINISTRATION

(INCLUDING RESCISSION)

For necessary expenses for international trade activities of the Department of Commerce, including trade promotional activities abroad without regard to the provisions of law set forth in 44 U.S.C. 3702 and 3703; full medical coverage for dependent members of immediate families of employees stationed overseas; employment of Americans and aliens by contract for services abroad; rental of space abroad for periods not exceeding ten years, and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; payment of tort claims, in the manner authorized in the first paragraph of 28 U.S.C. 2672 when such claims arise in foreign countries; not to exceed $253,000 for official representation expenses abroad; awards of compensation to informers under the Export Administration Act of 1979, and as authorized by 22 U.S.C. 401(b); purchase of passenger motor vehicles for official use abroad and motor vehicles for law enforcement use with special requirement vehicles eligible for purchase without regard to any price limitation otherwise established by law; $197,500,000, to remain available until expended, of which $6,785,000 is for the Office of Textiles and Apparels, including $3,349,000 for a grant to the Tailored Clothing Technology Corporation and, of which $3,500,000 is for a grant for support costs for a new materials center in Ames, Iowa: Provided, That the provisions of the first sentence of section 105(f) and all of section 108(c) of the Mutual Educational and Cultural Exchange Act of 1961 (22 U.S.C. 2455(f) and 2458(c)) shall apply in carrying out these activities: Provided further, That none of the funds appropriated herein may be used for activities associated with conferences, trade shows, expositions, and/or seminars which feature or convey the advantages of relocating U.S. industries, manufacturing and/or assembly plants, or companies, in a foreign country.

Of available funds under this head provided for direct loans in Public Law 98-411 and Public Law 99-180, $8,100,000 are rescinded.

MINORITY BUSINESS DEVELOPMENT AGENCY

MINORITY BUSINESS DEVELOPMENT

For necessary expenses of the Department of Commerce in fostering, promoting, and developing minority business enterprise, including expenses of grants, contracts, and other agreements with public or private organizations, $39,675,000, of which $26,080,000 shall remain available until expended: Provided, That not to exceed $13,595,000 shall be available for program management for fiscal year 1987: Provided further, That none of the funds appropriated in this paragraph or in this title for the Department of Commerce shall be available to reimburse the fund established by 15 U.S.C. 1521 on account of the performance of a program, project, or activity, nor shall such fund be available for the performance of a program, project, or activity, which had not been performed as a central service pursuant to 15 U.S.C. 1521 before July 1, 1982, unless the Appropriations Committees of both Houses of Congress are notified fifteen days in advance of such action in accordance with the Committees' reprogramming procedures.

UNITED STATES TRAVEL AND TOURISM ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the United States Travel and Tourism Administration including travel and tourism promotional activities abroad for travel to the United States and its possessions without regard to the provisions of law set forth in 44 U.S.C. 3702 and 3703; and carrying out the provisions of the 1981 Tourism Policy Act; and including employment of American citizens and aliens by contract for services abroad; rental of space abroad for periods not exceeding five years, and expenses of alteration, repair, or improvement; purchase or construction of temporary demountable exhibition structures for use abroad; advance of funds under contracts abroad; payment of tort claims in the manner authorized in the first paragraph of 28 U.S.C. 2672, when such claims arise in foreign countries; and not to exceed $8,000 for representation expenses abroad; $11,500,000.

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

OPERATIONS, RESEARCH, AND FACILITIES

(INCLUDING TRANSFERS OF FUNDS)

For necessary expenses of activities authorized by law for the National Oceanic and Atmospheric Administration, including acquisition, maintenance, operation, and hire of aircraft; 399 commissioned officers on the active list; construction of facilities, including initial equipment; alteration, modernization, and relocation of facilities; and acquisition of land for facilities; $1,038,588,000, to remain available until expended, of which $27,500,000 shall be available only for commercialization of the land remote sensing satellite system subject to the approval of the House and Senate Committees on Appropriations pursuant to section 607 of this Act; and in addition, $29,000,000 shall be derived from the Airport and Airways Trust Fund; and in addition, $51,800,000 shall be derived by transfer from the Fund entitled "Promote and Develop Fishery Products and Research Pertaining to American Fisheries"; and in addition, $9,673,000 shall be derived by transfer from the Coastal Energy Impact Fund; and in addition, $1,800,000 shall be derived by transfer from the Fisheries Loan Fund: Provided, That grants to States pursuant to section 306 and section 306(a) of the Coastal Zone Management Act, as amended, shall not exceed $2,000,000 and shall not be less than $450,000: Provided further, That of the funds appropriated in this paragraph, necessary funds shall be used to fill and maintain a staff of three persons, as National Oceanic and Atmospheric Administration personnel, to work on contracts and purchase orders at the National Data Buoy Center in Bay St. Louis, Mississippi, and report to the Director of the National Data Buoy Center in the same manner and extent that such procurement functions were performed at Bay St. Louis prior to June 26, 1983, except that they may provide procurement assistance to other Department of Commerce activities pursuant to ordinary interagency agreements. Where practicable, these positions shall be filled by the employees who performed such functions prior to June 26, 1983.

FISHERMEN'S CONTINGENCY FUND

For carrying out the provisions of title IV of Public Law 95-372, not to exceed $750,000, to be derived from receipts collected pursuant to that Act, to remain available until expended.

FOREIGN FISHING OBSERVER FUND

For expenses necessary to carry out the provisions of the Atlantic Tunas Convention Act of 1975, as amended (Public Law 96-339), the Magnuson Fishery Conservation and Management Act of 1976, as amended (Public Law 94-265), and the American Fisheries Promotion Act (Public Law 96-561), there are appropriated from the fees imposed under the foreign fishery observer program authorized by these Acts, not to exceed $2,000,000, to remain available until expended.

FISHERMEN'S GUARANTY FUND

For expenses necessary to carry out the provisions of the Fishermen's Protective Act of 1967, as amended, $1,800,000 to be derived from the receipts collected pursuant to that Act, to remain available until expended.

PATENT AND TRADEMARK OFFICE

SALARIES AND EXPENSES

For necessary expenses of the Patent and Trademark Office, including defense of suits instituted against the Commissioner of Patents and Trademarks, $98,000,000 and, in addition, such fees as shall be collected pursuant to 15 U.S.C. 1113 and 35 U.S.C. 41 and 376, to remain available until expended.

NATIONAL BUREAU OF STANDARDS

SCIENTIFIC AND TECHNICAL RESEARCH AND SERVICES

For necessary expenses of the National Bureau of Standards, $122,000,000 to remain available until expended, of which not to exceed $2,144,000 may be transferred to the "Working Capital Fund".

NATIONAL TELECOMMUNICATIONS AND INFORMATION ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses, as provided for by law of the National Telecommunications and Information Administration, $13,000,000 of which $700,000 shall remain available until expended.

PUBLIC TELECOMMUNICATIONS FACILITIES, PLANNING AND CONSTRUCTION

For grants authorized by section 392 of the Communications Act of 1934, as amended, $20,500,000 to remain available until expended: Provided, That not to exceed $1,200,000 shall be available for program

management as authorized by section 391 of the Communications Act of 1934, as amended: Provided further, That notwithstanding the provisions of section 391 of the Communications Act of 1934, as amended, the prior year unobligated balances may be made available for grants for projects for which applications have been submitted and approved during any fiscal year.

GENERAL PROVISIONS—DEPARTMENT OF COMMERCE

SEC. 101. During the current fiscal year, applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (15 U.S.C. 1514), to the extent and in the manner prescribed by said Act, and, notwithstanding 31 U.S.C. 3324, may be used for advance payments not otherwise authorized only upon the certification of officials designated by the Secretary that such payments are in the public interest.

SEC. 102. During the current fiscal year, appropriations to the Department of Commerce which are available for salaries and expenses shall be available for hire of passenger motor vehicles; services as authorized by 5 U.S.C. 3109; and uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902).

SEC. 103. No funds in this title shall be used to sell to private interests, except with the consent of the borrower, or contract with private interests to sell or administer, any loans made under the Public Works and Economic Development Act of 1965 or any loans made under section 254 of the Trade Act of 1974.

SEC. 104. During the current fiscal year, the National Bureau of Standards is authorized to accept contributions of funds, to remain available until expended, from any public or private source to construct a facility for cold neutron research on materials, notwithstanding the limitations contained in 15 U.S.C. 278d.

This title may be cited as the "Department of Commerce Appropriation Act, 1987".

TITLE II—DEPARTMENT OF JUSTICE

GENERAL ADMINISTRATION

SALARIES AND EXPENSES

For expenses necessary for the administration of the Department of Justice, $67,000,000: Provided, That none of the funds in this Act shall be used for positions for the Departmental Leadership offices of the Department of Justice in excess of 56.

UNITED STATES PAROLE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the United States Parole Commission, as authorized by law, $10,300,000.

LEGAL ACTIVITIES

SALARIES AND EXPENSES, GENERAL LEGAL ACTIVITIES

For expenses necessary for the legal activities of the Department of Justice, not otherwise provided for, including not to exceed $20,000 for expenses of collecting evidence, to be expended under the direction of the Attorney General and accounted for solely on his certificate; and rent of private or Government-owned space in the District of Columbia; $208,934,000, of which not to exceed $6,000,000 for litigation support contracts shall remain available until September 30, 1988: Provided, That of the funds available in this appropriation, $1,537,000 shall be available for office automation systems for the legal divisions covered by this appropriation, and for the United States Attorneys and the Antitrust Division, to remain available until expended: Provided further, That of the funds appropriated to the Department of Justice in title II of this Act, not to exceed $1,000,000, may be transferred to this appropriation to pay expenses related to the activities of any Independent Counsel appointed pursuant to 28 U.S.C. 591, et seq., upon notification by the Attorney General to the Committees on Appropriations of the House of Representatives and the Senate and approval under said Committees' policies concerning the reprogramming of funds contained in section 607 of this Act.

SALARIES AND EXPENSES, ANTITRUST DIVISION

For expenses necessary for the enforcement of antitrust and kindred laws, $43,000,000.

SALARIES AND EXPENSES, UNITED STATES ATTORNEYS

For necessary expenses of the Offices of the United States Attorneys, $320,000,000.

SALARIES AND EXPENSES, OVERSIGHT OF BANKRUPTCY CASES

For necessary expenses of the bankruptcy trustees, $11,500,000. Effective immediately before November 10, 1986, section 408(c) of the Act of November 6, 1978 (Public Law 95-598; 92 Stat. 2687), is amended by striking out "November 10, 1986" and inserting in lieu thereof "September 30, 1987".

SALARIES AND EXPENSES, FOREIGN CLAIMS SETTLEMENT COMMISSION

For expenses necessary to carry out the activities of the Foreign Claims Settlement Commission, including services as authorized by 5 U.S.C. 3109; allowances and benefits similar to those allowed under the Foreign Service Act of 1980 as determined by the Commission; expenses of packing, shipping, and storing personal effects of personnel assigned abroad; rental or lease, for such periods as may be necessary, of office space and living quarters of personnel assigned abroad; maintenance, improvement, and repair of properties rented or leased abroad, and furnishing fuel, water, and utilities for such properties; insurance on official motor vehicles abroad; advances of funds abroad; advances or reimbursements to other Government agencies for use of their facilities and services in carrying out the functions of the Commission; hire of motor vehicles for field use only; and employment of aliens; $564,000.

SALARIES AND EXPENSES, UNITED STATES MARSHALS SERVICE

For necessary expenses of the United States Marshals Service; including acquisition, lease, maintenance, and operation of vehicles and aircraft, $142,000,000.

SUPPORT OF UNITED STATES PRISONERS

For support of United States prisoners in non-Federal institutions, $50,000,000; and in addition, $5,000,000 shall be available under the Cooperative Agreement Program until expended for the purposes of renovating, constructing, and equipping State and local correctional facilities: Provided, That amounts made available for constructing any local correctional facility shall not exceed the cost of constructing space for the average Federal prisoner population to be housed in the facility, or in other facilities in the same correctional system, as projected by the Attorney General: Provided further, That following agreement on or completion of any Federally assisted correctional facility construction, the availability of the space acquired for Federal prisoners with these Federal funds shall be assured and the per diem rate charged for housing Federal prisoners in the assured space shall not exceed operating costs for the period of time specified in the cooperative agreement: Provided further, That funds earmarked for the support of United States prisoners in non-Federal institutions in the Department of Justice Appropriations Acts, 1984 and 1985 that remain unobligated at the end of fiscal year 1986, are restored effective immediately before September 30, 1986, for the purpose of liquidating any 1986 obligations for that activity that cannot be funded from 1986 appropriations.

FEES AND EXPENSES OF WITNESSES

For expenses, mileage, compensation, and per diems of witnesses and for per diems in lieu of subsistence, as authorized by law, including advances; $52,187,000, to remain available until expended, of which not to exceed $1,350,000 may be made available for planning, construction, renovation, maintenance, remodeling, and repair of buildings and the purchase of equipment incident thereto for protected witness safesites.

SALARIES AND EXPENSES, COMMUNITY RELATIONS SERVICE

For necessary expenses of the Community Relations Service, established by title X of the Civil Rights Act of 1964, $29,637,000 of which $23,266,000 shall remain available until expended to make payments in advance for grants, contracts and reimbursable agreements and other expenses necessary under section 501(c) of the Refugee Education Assistance Act of 1980 (Public Law 96-422; 94 Stat. 1809) for the processing, care, maintenance, security, transportation and reception and placement in the United States of Cuban and Haitian entrants: Provided, That notwithstanding section 501(e)(2)(B) of the Refugee Education Assistance Act of 1980 (Public Law 96-422; 94 Stat. 1810), funds may be expended for assistance with respect to Cuban and Haitian entrants as authorized under section 501(c) of such Act.

FEDERAL BUREAU OF INVESTIGATION

SALARIES AND EXPENSES

For expenses necessary for detection, investigation, and prosecution of crimes against the United States; including purchase for police-type use of not to exceed one thousand five hundred seventy-nine passenger motor vehicles of which one thousand four hundred fifty will be for replacement only, without regard to the general purchase price limitation for the current fiscal year, and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; and not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; $1,260,000,000, of which not to exceed $10,000,000 for automated data processing and telecommunications and $1,000,000 for undercover operations shall remain available until September 30, 1988; of which $3,000,000 for research related to investigative activities shall remain available until expended; and of which not to exceed $500,000 is authorized to be made available for making payments or advances for expenses arising out of contractual or reimbursable agreements with State and local law enforcement agencies while engaged in cooperative activities related to terrorism: Provided, That notwithstanding the provisions of title 31 U.S.C. 3302, the Director of the Federal Bureau of Investigation may es-

tablish and collect fees to process fingerprint identification records for noncriminal employment and licensing purposes, and credit not more than $15,500,000 of such fees to this appropriation to be used for salaries and other expenses incurred in providing these services: Provided further, That not to exceed $45,000 shall be available for official reception and representation expenses: Provided further, That $13,800,000 for the expansion and renovation of the New York field office shall remain available until expended.

DRUG ENFORCEMENT ADMINISTRATION

SALARIES AND EXPENSES

For necessary expenses of the Drug Enforcement Administration, including not to exceed $70,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General, and to be accounted for solely on his certificate; purchase of not to exceed five hundred seventy-five passenger motor vehicles of which four hundred eighty-nine are for replacement only for police-type use without regard to the general purchase price limitation for the current fiscal year; and acquisition, lease, maintenance, and operation of aircraft; $412,000,000 of which not to exceed $1,200,000 for research shall remain available until expended and not to exceed $1,700,000 for purchase of evidence and payments for information shall remain available until September 30, 1988: Provided, That $140,000 shall only be available for the establishment and operation of an office in Hilo, Hawaii: Provided further, That notwithstanding section 1345 of title 31, United States Code, funds made available to the Drug Enforcement Administration in any fiscal year may be used for travel, transportation, and subsistence expenses of State, county, and local law enforcement officers attending conferences, meetings, and training courses at the FBI Academy, Quantico, Virginia.

CONSTRUCTION

For necessary expenses of the Drug Enforcement Administration for planning, construction, renovation, maintenance, remodeling, and repair of buildings and the purchase of equipment incident thereto for an all source intelligence center, $7,500,000, to remain available until expended: Provided, That such funds shall be available for obligation upon submission by the Attorney General to the Committees on Appropriations no later than July 1, 1987, of a reprogramming request in accordance with section 607 of this Act which sets forth specific details for the use of such funds.

IMMIGRATION AND NATURALIZATION SERVICE

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary for the administration and enforcement of the laws relating to immigration, naturalization, and alien registration, including not to exceed $50,000 to meet unforeseen emergencies of a confidential character, to be expended under the direction of the Attorney General and accounted for solely on his certificate; purchase for police-type use (not to exceed four hundred ninety, all of which shall be for replacement only) and hire of passenger motor vehicles; acquisition, lease, maintenance and operation of aircraft; and research related to immigration enforcement; $593,000,000, of which not to exceed $400,000 for research shall remain available until expended: Provided, That none of the funds available to the Immigration and Naturalization Service shall be available for administrative expenses to pay any employee overtime pay in an amount in excess of $25,000 except in such instances when the Commissioner makes a determination that this restriction is impossible to implement: Provided further, That uniforms may be purchased without regard to the general purchase price limitation for the current fiscal year: Provided further, That no funds appropriated in this Act may be used to implement Immigration and Naturalization Service reorganization proposals which would have the purpose of or would result in the closing of the Northern Regional Office of the Immigration and Naturalization Service at Fort Snelling, Minnesota: Provided further, That effective immediately before September 30, 1986, $3,385,000 made available for "Construction" for the Immigration and Naturalization Service in Public Law 99-88 shall be available for the Immigration and Naturalization Service, "Salaries and Expenses".

FEDERAL PRISON SYSTEM

SALARIES AND EXPENSES

For expenses necessary for the administration, operation, and maintenance of Federal penal and correctional institutions, including purchase (not to exceed forty of which thirty are for replacement only) and hire of law enforcement and passenger motor vehicles; $598,807,000: Provided, That there may be transferred to the Health Resources and Services Administration such amounts as may be necessary, in the discretion of the Attorney General, for direct expenditures by that Administration for medical relief for inmates of Federal penal and correctional institutions: Provided further, That uniforms may be purchased without regard to the general purchase price limitation for the current fiscal year.

NATIONAL INSTITUTE OF CORRECTIONS

For carrying out the provisions of sections 4351-4353 of title 18, United States Code, which established a National Institute of Corrections, $9,000,000, to remain available until expended.

BUILDINGS AND FACILITIES

For planning, acquisition of sites and construction of new facilities; purchase and acquisition of facilities and remodeling and equipping of such facilities for penal and correctional use, including all necessary expenses incident thereto, by contract or force account; and constructing, remodeling, and equipping necessary buildings and facilities at existing penal and correctional institutions, including all necessary expenses incident thereto, by contract or force account, $122,511,000, to remain available until expended: Provided, That labor of United States prisoners may be used for work performed under this appropriation.

FEDERAL PRISON INDUSTRIES, INCORPORATED

The Federal Prison Industries, Incorporated, is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available, and in accord with the law, and to make such contracts and commitments, without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation, including purchase of not to exceed five (for replacement only) and hire of passenger motor vehicles.

LIMITATION ON ADMINISTRATIVE AND VOCATIONAL EXPENSES, FEDERAL PRISON INDUSTRIES, INCORPORATED

Not to exceed $2,157,000 of the funds of the corporation shall be available for its administrative expenses, and not to exceed $7,208,000 for the expenses of vocational training of prisoners, both amounts to be available for services as authorized by 5 U.S.C. 3109, and to be computed on an accrual basis to be determined in accordance with the corporation's prescribed accounting system in effect on July 1, 1946, and such amounts shall be exclusive of depreciation, payment of claims, and expenditures which the said accounting system requires to be capitalized or charged to cost of commodities acquired or produced, including selling and shipping expenses, and expenses in connection with acquisition, construction, operation, maintenance, improvement, protection, or disposition of facilities and other property belonging to the corporation or in which it has an interest.

OFFICE OF JUSTICE PROGRAMS

JUSTICE ASSISTANCE

For grants, contracts, cooperative agreements, and other assistance authorized by the Justice Assistance Act of 1984, Runaway Youth and Missing Children Act Amendments of 1984, and the Missing Children Assistance Act including salaries and expenses in connection therewith, $115,368,000 and of the unobligated funds previously appropriated for the Juvenile Justice and Delinquency Prevention Act, other than funds subject to provisions of sections 222(b), 223(d), and 228(e) of title II of such Act, $3,500,000 shall be made available for programs authorized under parts D and E of the Justice Assistance Act of 1984, all funds appropriated herein to remain available until expended; and for grants, contracts, cooperative agreements, and other assistance authorized by title II of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended, including salaries and expenses in connection therewith, $70,282,000 to remain available until expended. In addition, $5,000,000 for the purpose of making grants to States for their expenses by reason of Mariel Cubans having to be incarcerated in State facilities for terms requiring incarceration for the full period October 1, 1986 through September 30, 1987, following their conviction of a felony committed after having been paroled into the United States by the Attorney General: Provided, That within thirty days of enactment of this Act the Attorney General shall announce in the Federal Register that this appropriation will be made available to the States whose Governors certify by February 1, 1987, a listing of names of such Mariel Cubans incarcerated in their respective facilities: Provided further, That the Attorney General, not later than April 1, 1987, will complete his review of the certified listings of such incarcerated Mariel Cubans, and make grants to the States on the basis that the certified number of such incarcerated persons in a State bears to the total certified number of such incarcerated persons: Provided further, That the amount of reimbursements per prisoner per annum shall not exceed $12,000. Not to exceed $64,000,000 shall be obligated during fiscal year 1987 for victim compensation and assistance programs, notwithstanding section 1402, 1403, or 1404 of the Victims of Crime Act of 1984 (Public Law 98-473).

GENERAL PROVISIONS—DEPARTMENT OF JUSTICE

SEC. 201. A total of not to exceed $75,000 from funds appropriated to the Department of Justice in this title shall be available for official reception and representation expenses in accordance with distributions, procedures, and regulations established by the Attorney General.

SEC. 202. Notwithstanding any other provision of law or this Act, materials produced by convict labor may be used in the construction of any highways or portion of highways located on Federal-aid systems, as described in section 103 of title 23, United States Code.

SEC. 203. Appropriations for "Salaries and expenses, General Administration", "Salaries and expenses, United States Marshals Service", "Salaries and expenses, Federal Bureau of Investigation", "Salaries and expenses, Drug Enforcement Administration", "Salaries and expenses, Immigration and Naturalization Service", and "Salaries and expenses, Federal Prison System", shall be available for uniforms and allowances therefor as authorized by law (5 U.S.C. 5901-5902).

SEC. 204. (a) Subject to subsection (b) of this section, authorities contained in Public Law 96-132, "The Department of Justice Appropriation Authorization Act, Fiscal Year 1980", shall remain in effect until the termination date of this Act or until the effective date of a Department of Justice Appropriation Authorization Act, whichever is earlier.

(b)(1) With respect to any undercover investigative operation of the Federal Bureau of Investigation or the Drug Enforcement Administration which is necessary for the detection and prosecution of crimes against the United States or for the collection of foreign intelligence or counter-intelligence—

(A) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1987, may be used for purchasing property, buildings, and other facilities, and for leasing space, within the United States, the District of Columbia, and the territories and possessions of the United States, without regard to section 1341 of title 31 of the United States Code, section 3732(a) of the Revised Statutes (41 U.S.C. 11(a)), section 305 of the Act of June 30, 1949 (63 Stat. 396; 41 U.S.C. 255), the third undesignated paragraph under the heading "Miscellaneous" of the Act of March 3, 1877 (19 Stat. 370; 40 U.S.C. 34), section 3324 of title 31 of the United States Code, section 3741 of the Revised Statutes (41 U.S.C. 22), and subsections (a) and (c) of section 304 of the Federal Property and Administrative Service Act of 1949 (63 Stat. 395; 41 U.S.C. 254 (a) and (c)),

(B) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1987, may be used to establish or to acquire proprietary corporations or business entities as part of an undercover investigative operation, and to operate such corporations or business entities on a commercial basis, without regard to section 9102 of title 31 of the United States Code,

(C) sums authorized to be appropriated for the Federal Bureau of Investigation and for the Drug Enforcement Administration, for fiscal year 1987, and the proceeds from such undercover operation, may be deposited in banks or other financial institutions, without regard to section 648 of title 18 of the United States Code and section 3302 of title 31 of the United States Code, and

(D) proceeds from such undercover operation may be used to offset necessary and reasonable expenses incurred in such operation, without regard to section 3302 of title 31 of the United States Code,

only, in operations designed to detect and prosecute crimes against the United States, upon the written certification of the Director of the Federal Bureau of Investigation (or, if designated by the Director, a member of the Undercover Operations Review Committee established by the Attorney General in the Attorney General's Guidelines on Federal Bureau of Investigation Undercover Operations, as in effect on July 1, 1983) or the Administrator of the Drug Enforcement Administration, as the case may be, and the Attorney General (or, with respect to Federal Bureau of Investigation undercover operations, if designated by the Attorney General, a member of such Review Committee), that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation. If the undercover operation is designed to collect foreign intelligence or counterintelligence, the certification that any action authorized by subparagraph (A), (B), (C), or (D) is necessary for the conduct of such undercover operation shall be by the Director of the Federal Bureau of Investigation (or, if designated by the Director, the Assistant Director, Intelligence Division) and the Attorney General (or, if designated by the Attorney General, the Counsel for Intelligence Policy). Such certification shall continue in effect for the duration of such undercover operation, without regard to fiscal years.

(2) As soon as the proceeds from an undercover investigative operation with respect to which an action is authorized and carried out under subparagraphs (C) and (D) of subsection (a) are no longer necessary for the conduct of such operation, such proceeds or the balance of such proceeds remaining at the time shall be deposited in the Treasury of the United States as miscellaneous receipts.

(3) If a corporation or business entity established or acquired as part of an undercover operation under subparagraph (B) of paragraph (1) with a net value of over $50,000 is to be liquidated, sold, or otherwise disposed of, the Federal Bureau of Investigation or the Drug Enforcement Administration, as much in advance as the Director or the Administrator, or the designee of the Director or the Administrator, determines is practicable, shall report the circumstances to the Attorney General and the Comptroller General. The proceeds of the liquidation, sale, or other disposition, after obligations are met, shall be deposited in the Treasury of the United States as miscellaneous receipts.

(4)(A) The Federal Bureau of Investigation or the Drug Enforcement Administration, as the case may be, shall conduct a detailed financial audit of each undercover investigative operation which is closed in fiscal year 1987—

(i) submit the results of such audit in writing to the Attorney General, and

(ii) not later than 180 days after such undercover operation is closed, submit a report to the Congress concerning such audit.

(B) The Federal Bureau of Investigation and the Drug Enforcement Administration shall each also submit a report annually to the Congress specifying as to their respective undercover investigative operations—

(i) the number, by programs, of undercover investigative operations pending as of the end of the one-year period for which such report is submitted,

(ii) the number, by programs, of undercover investigative operations commenced in the one-year period preceding the period for which such report is submitted, and

(iii) the number, by programs, of undercover investigative operations closed in the one-year period preceding the period for which such report is submitted and, with respect to each such closed undercover operation, the results obtained. With respect to each such closed undercover operation which involves any of the sensitive circumstances specified in the Attorney General's Guidelines on Federal Bureau of Investigation Undercover Operations, such report shall contain a detailed description of the operation and related matters, including information pertaining to—

(I) the results,

(II) any civil claims, and

(III) identification of such sensitive circumstances involved, that arose at any time during the course of such undercover operation.

(5) For purposes of paragraph (4)—

(A) the term "closed" refers to the earliest point in time at which—

(i) all criminal proceedings (other than appeals) are concluded, or

(ii) covert activities are concluded, whichever, occurs later,

(B) the term "employees" means employees, as defined in section 2105 of title 5 of the United States Code, of the Federal Bureau of Investigation, and

(C) the terms "undercover investigative operation" and "undercover operation" means any undercover investigative operation of the Federal Bureau of Investigation or the Drug Enforcement Administration (other than a foreign counterintelligence undercover investigative operation)—

(i) in which—

(I) the gross receipts (excluding interest earned) exceed $50,000, or

(II) expenditures (other than expenditures for salaries of employees) exceed $150,000, and

(ii) which is exempt from section 3302 or 9102 of title 31 of the United States Code,

except that clauses (i) and (ii) shall not apply with respect to the report required under subparagraph (B) of such paragraph.

SEC. 205. Section 286 of the Immigration and Nationality Act of 1952 (8 U.S.C. 1356) is amended by inserting after subsection (c) the following new subsections:

"(d) SCHEDULE OF FEES.—In addition to any other fee authorized by law, the Attorney General shall charge and collect $5 per individual for the immigration inspection of each passenger arriving at a port of entry in the United States, or for the preinspection of a passenger in a place outside of the United States prior to such arrival, aboard a commercial aircraft or commercial vessel.

"(e) LIMITATIONS ON FEES.—(1) No fee shall be charged under subsection (d) for immigration inspection or preinspection provided in connection with the arrival of any passenger whose journey originated in the following:

"(A) Canada,

"(B) Mexico,

"(C) a territory or possession of the United States, or

"(D) any adjacent island (within the meaning of section 101(b)(5) of this title).

"(2) No fee may be charged under subsection (d) with respect to the arrival of any passenger—

"(A) who is in transit to a destination outside the United States, and

"(B) for whom immigration inspection services are not provided.

"(f) COLLECTION.—(1) Each person that issues a document or ticket to an individual for transportation by a commercial vessel or commercial aircraft into the United States shall—

"(A) collect from that individual the fee charged under subsection (d) at the time the document or ticket is issued; and

"(B) identify on that document or ticket the fee charged under subsection (d) as a Federal inspection fee.

"(2) If—

"(A) a document or ticket for transportation of a passenger into the United States is issued in a foreign country; and

"(B) the fee charged under subsection (d) is not collected at the time such document or ticket is issued;

the person providing transportation to such passenger shall collect such fee at the time such passenger departs from the United States and shall provide such passenger a receipt for the payment of such fee.

"(3) The person who collects fees under paragraph (1) or (2) shall remit those fees to the Attorney General at any time before the date that is thirty-one days after the close of the calendar quarter in which the fees are collected. Regulations issued by the Attorney General under this subsection with respect to the collection of the fees charged under subsection (d) and the remittance of such fees to the Treasury of the United States shall be consistent with the regulations issued by the Secretary of the Treasury for the collection and remittance of the taxes imposed by subchapter C of chapter 33 of the Internal Revenue Code of 1954, but only to the extent the regulations issued with respect to such taxes do not conflict with the provisions of this section.

"(g) PROVISION OF IMMIGRATION INSPECTION AND PREINSPECTION SERVICES.—Notwithstanding section 1353(a) of this title, or any other provision of law, the immigration services required to be provided to passengers upon arrival in the United States on scheduled airline flights shall be adequately provided when needed and at no cost (other than the fees imposed under subsection (d)) to airlines and airline passengers at:

"(1) immigration serviced airports, and

"(2) places located outside of the United States at which an immigration officer is stationed for the purpose of providing such immigration services.

"(h) DISPOSITION OF RECEIPTS.—(1)(A) All of the fees collected under subsection (d) shall be deposited in a separate account within the general fund of the Treasury of the United States. Such account shall be known as the 'Immigration User Fee Account.' At the end of each 2-year period, beginning with the creation of this account, the Attorney General, following a public rulemaking with opportunity for notice and comment, shall submit a report to the Congress concerning the status of the account, including any balances therein, and recommend any adjustment in the prescribed fee that may be required to ensure that the receipts collected from the fee charged for the succeeding two years equal, as closely as possible, the cost of providing these services.

"(B) Notwithstanding any other provisions of law, all fines, penalties, liquidated damages or expenses collected pursuant to sections 271 and 273 of this title shall be deposited in the 'Immigration User Fee Account.'

"(2)(A) The Secretary of the Treasury shall refund out of the Immigration User Fee Account to any appropriation the amount paid out of such appropriation for expenses incurred by the Attorney General in providing immigration inspection and preinspection services for commercial aircraft or vessels and:

"(i) providing overtime immigration inspection services for commercial aircraft or vessels;

"(ii) administration of debt recovery, including the establishment and operation of a national collections office;

"(iii) expansion, operation and maintenance of information systems for nonimmigrant control and debt collection;

"(iv) detection of fraudulent documents used by passengers traveling to the United States;

"(v) providing detention and deportation services for excludable aliens arriving on commercial aircraft and vessels.

"(B) The amounts which are required to be refunded under subparagraph (A) shall be refunded at least quarterly on the basis of estimates made by the Attorney General of the expenses referred to in subparagraph (A). Proper adjustments shall be made in the amounts subsequently refunded under subparagraph (A) to the extent prior estimates were in excess of, or less than, the amount required to be refunded under subparagraph (A).

"(i) Notwithstanding any other provision of law, the Attorney General is authorized to receive reimbursement from the owner, operator, or agent of a private or commercial aircraft or vessel, or from any airport or seaport authority for expenses incurred by the Attorney General in providing immigration inspection services which are rendered at the request of such person or authority (including the salary and expenses of individuals employed by the Attorney General to provide such immigration inspection services). The Attorney General's authority to receive such reimbursement shall terminate immediately upon the provision for such services by appropriation.

"(j) REGULATIONS.—The Attorney General may prescribe such rules and regulations as may be necessary to carry out the provisions of this section.

"(k) ADVISORY COMMITTEE.—In accordance with the provisions of the Federal Advisory Committee Act, the Attorney General shall establish an advisory committee, whose membership shall consist of representatives from the airline and other transportation industries who may be subject to any fee or charge authorized by law or proposed by the Immigration and Naturalization Service for the purpose of covering expenses incurred by the Immigration and Naturalization Service. The advisory committee shall meet on a periodic basis and shall advise the Attorney General on issues related to the performance of the inspectional services of the Immigration and Naturalization Service. This advice shall include, but not be limited to, such issues as the time periods during which such services should be performed, the proper number and deployment of inspection officers, the level of fees, and the appropriateness of any proposed fee. The Attorney General shall give substantial consideration to the views of the advisory committee in the exercise of his duties.

"(l) EFFECTIVE DATES.—(1) The provisions of this section and the amendments made by this section, shall apply with respect to immigration inspection services rendered after November 30, 1986.

"(2) Fees may be charged under subsection (d) only with respect to immigration inspection services rendered in regard to arriving passengers using transportation for which documents or tickets were issued after November 30, 1986.".

SEC. 206. Section 232 (8 U.S.C. 1222) is amended by striking "on board the vessel or at the airport" and all that follows through "as circumstances may require or justify," and inserting in lieu thereof "by the Attorney General", and section 233 (8 U.S.C. 1223) is repealed.

SEC. 207. Section 1203 of title I of the Omnibus Crime Control and Safe Streets Act of 1968 (42 U.S.C. 3796(b)) is amended—

(1) in subsection (3) by striking the semicolon at the end thereof and inserting in lieu thereof "and an officially recognized or designated public employee member of a rescue squad or ambulance crew who was responding to a fire, rescue or police emergency;"; and

(2) in subsection (7) by striking all after the words "law enforcement officer" and inserting ", a firefighter, or rescue squad or ambulance crew.".

SEC. 208. (a) None of the funds appropriated or otherwise made available in this title may be available for the performance of any pre-inspection activities by the Immigration and Naturalization Service (1) at Shannon International Airport in Ireland or (2) at Gander Airport in Newfoundland.

(b) The General Accounting Office shall conduct a comprehensive analysis of the trial pre-inspection program conducted by the Immigration and Naturalization Service at Shannon International Airport from July 1, 1986 to October 31, 1986, and shall issue a report to Congress by April 30, 1987. The report shall include an evaluation of the economic impact on American airports and of whether pre-inspection is a cost-effective means of facilitating international air travel and enhancing law enforcement.

SEC. 209. None of the funds appropriated by this title shall be available to pay for an abortion, except where the life of the mother would be endangered if the fetus were carried to term or in the case of rape: Provided, That should this prohibition be declared unconstitutional by a court of competent jurisdiction, this section shall be null and void.

SEC. 210. The Director of the Federal Bureau of Investigation and the Administrator of the Drug Enforcement Administration shall not establish and collect fees to provide training to State and local law enforcement officers at the F.B.I. National Academy. Any fees collected for training of State and local law enforcement officers, which occurred at the National Academy on or after October 1, 1986, shall be reimbursed to the appropriate official or agency. In addition, the Director of the National Institute of Corrections shall not establish and collect fees to provide training to State and local officers which was not provided on a reimbursable basis prior to October 1, 1986.

This title may be cited as the "Department of Justice Appropriation Act, 1987".

TITLE III—DEPARTMENT OF STATE

ADMINISTRATION OF FOREIGN AFFAIRS

SALARIES AND EXPENSES

For necessary expenses of the Department of State and the Foreign Service, not otherwise provided for, including obligations of the United States abroad pursuant to treaties, international agreements, and binational contracts (including obligations assumed in Germany on or after June 5, 1945), expenses authorized by section 9 of the Act of August 31, 1964, as amended (31 U.S.C. 3721), and section 2 of the State Department

Basic Authorities Act of 1956, as amended (22 U.S.C. 2669); telecommunications; not to exceed $4,000,000 for expenses necessary for the Inspector General of the Department of State, pursuant to the Inspector General Act of 1978; expenses necessary to provide maximum physical security in Government-owned and leased properties and vehicles abroad; permanent representation to certain international organizations in which the United States participates pursuant to treaties, conventions, or specific Acts of Congress; acquisition by exchange or purchase of vehicles as authorized by law, except that special requirement vehicles may be purchased without regard to any price limitation otherwise established by law; $1,527,000,000.

REPRESENTATION ALLOWANCES

For representation allowances as authorized by section 905 of the Foreign Service Act of 1980, as amended (22 U.S.C. 4085), and for representation by United States missions to the United Nations and the Organization of American States, $4,460,000.

PROTECTION OF FOREIGN MISSIONS AND OFFICIALS

For expenses, not otherwise provided, to enable the Secretary of State to provide for extraordinary protective services in accordance with the provisions of section 214 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4314), and to provide for the protection of foreign missions in accordance with the provisions of 3 U.S.C. 208, $9,100,000.

ACQUISITION AND MAINTENANCE OF BUILDINGS ABROAD

For necessary expenses for carrying out the Foreign Service Buildings Act of 1926, as amended (22 U.S.C. 292–300), $440,000,000, of which $15,000,000 shall become available for expenditure on October 1, 1987, to remain available until expended: Provided, That the funds appropriated in this paragraph shall be available subject to the approval of the House and Senate Committees on Appropriations under said Committees' policies concerning the reprogramming of funds contained in House Report 99–669: Provided further, That balances of previous appropriations for "Acquisition, operation, and maintenance of buildings abroad" shall be transferred to and merged with this appropriation: Provided further, That up to $1,000,000 shall be available for transfer under the Economy Act to the Director of the National Bureau of Standards for the purpose of conducting an independent analysis of the new United States embassy office building being constructed in Moscow: Provided further, That a report including this analysis, an assessment of the current structure and recommendations and cost estimates for correcting any structural flaws or construction defects shall be transmitted by the Director of the National Bureau of Standards to the Speaker of the House of Representatives and the President of the Senate no later than April 15, 1987: Provided further, That beginning on February 1, 1987, the Secretary of State shall report every six months to the Speaker of the House of Representatives and the President of the Senate on any failures during the past six months by Soviet agencies to perform obligations to United States diplomats or United States missions to the Soviet Union and the actions undertaken by the Department of State to redress these failures.

EMERGENCIES IN THE DIPLOMATIC AND CONSULAR SERVICE

For expenses necessary to enable the Secretary of State to meet unforeseen emergencies arising in the Diplomatic and Consular Service to be expended pursuant to the requirement of 31 U.S.C. 3526(e), $4,000,000.

PAYMENT TO THE AMERICAN INSTITUTE IN TAIWAN

For necessary expenses to carry out the Taiwan Relations Act, Public Law 96–8 (93 Stat. 14), $9,379,000.

PAYMENT TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY FUND

For payment to the Foreign Service Retirement and Disability Fund, as authorized by law, $127,398,000.

INTERNATIONAL ORGANIZATIONS AND CONFERENCES

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

For expenses, not otherwise provided for, necessary to meet annual obligations of membership in international multilateral organizations, pursuant to treaties, conventions, or specific Acts of Congress, $385,000,000, of which $130,000,000, to remain available until expended, shall become available for expenditure on October 1, 1987: Provided, That none of the funds appropriated in this paragraph shall be available for a United States contribution to an international organization for the United States share of interest costs made known to the United States Government by such organization for loans incurred on or after October 1, 1984, through external borrowings.

CONTRIBUTIONS FOR INTERNATIONAL PEACEKEEPING ACTIVITIES

For payments, not otherwise provided for, by the United States for expenses of the United Nations peacekeeping forces, $29,400,000.

INTERNATIONAL CONFERENCES AND CONTINGENCIES

For necessary expenses authorized by section 5 of the State Department Basic Authorities Act of 1956, contributions for the United States share of general expenses of international organizations and representation to such organizations, and personal services without regard to civil service and classification laws, $5,460,000, to remain available until expended, of which not to exceed $200,000 may be expended for representation as authorized by law.

INTERNATIONAL COMMISSIONS

For necessary expenses, not otherwise provided for, to meet obligations of the United States arising under treaties, conventions, or specific Acts of Congress, as follows:

INTERNATIONAL BOUNDARY AND WATER COMMISSION, UNITED STATES AND MEXICO

For necessary expenses for the United States Section of the United States and Mexico International Boundary and Water Commission, and to comply with laws applicable to the United States Section; and leasing of private property to remove therefrom sand, gravel, stone, and other materials, without regard to section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); as follows:

SALARIES AND EXPENSES

For salaries and expenses, not otherwise provided for, including preliminary surveys, $10,800,000: Provided, That expenditures for the Rio Grande bank protection project shall be subject to the provisions and conditions contained in the appropriation for said project as provided by the Act approved April 25, 1945 (59 Stat. 89): Provided further, That the Anzalduas diversion dam shall not be operated for irrigation or water supply purposes in the United States unless suitable arrangements have been made with the prospective water users for repayment to the Government of such portions of the cost of said dam as shall have been allocated to such purposes by the Secretary of State: Provided further, That not to exceed $500,000 of the amount appropriated in this paragraph shall be available to reimburse the city of San Diego, in the State of California, for expenses incurred in treating domestic sewage received from the city of Tijuana, in the State of Baja California, Mexico.

CONSTRUCTION

(INCLUDING TRANSFER OF FUNDS)

For detailed plan preparation and construction of authorized projects, to remain available until expended, $3,900,000: Provided, That activities for the New River Project may be financed from these funds or from carry over balances under the heading, "International Boundary and Water Commission, United States and Mexico, Construction".

AMERICAN SECTIONS, INTERNATIONAL COMMISSIONS

For necessary expenses, not otherwise provided for, including not to exceed $6,000 for representation, $3,700,000; for the International Joint Commission, including salaries and expenses of the Commissioners on the part of the United States who shall serve at the pleasure of the President; salaries of employees appointed by the Commissioners on the part of the United States with the approval solely of the Secretary of State; travel expenses and compensation of witnesses; and the International Boundary Commission, for necessary expenses, not otherwise provided for, including expenses required by awards to the Alaskan Boundary Tribunal and existing treaties between the United States and Canada or Great Britain.

INTERNATIONAL FISHERIES COMMISSIONS

For necessary expenses for international fisheries commissions, not otherwise provided for, $10,800,000: Provided, That the United States share of such expenses may be advanced to the respective commissions.

OTHER

UNITED STATES BILATERAL SCIENCE AND TECHNOLOGY AGREEMENTS

For expenses, not otherwise provided for, to enable the United States to participate in programs of scientific and technological cooperation with Yugoslavia, $1,900,000, to remain available until expended.

PAYMENT TO THE ASIA FOUNDATION

For a grant to the Asia Foundation, $8,800,000, to remain available until expended.

SOVIET-EAST EUROPEAN RESEARCH AND TRAINING

For expenses not otherwise provided to enable the Secretary of State to reimburse private firms and American institutions of higher education for research contracts and graduate training for development and maintenance of knowledge about the Soviet Union and Eastern European countries, $4,600,000.

GENERAL PROVISIONS—DEPARTMENT OF STATE

SEC. 301. Funds appropriated under this title shall be available, except as otherwise provided, for allowances and differentials as authorized by subchapter 59 of 5 U.S.C.; for services as authorized by 5 U.S.C. 3109; and hire of passenger or freight transportation.

SEC. 302. The Secretary of State shall report to the appropriate Committees of the Congress on the obligation of funds provided for diplomatic security and related expenses every thirty days from the date of enactment of this Act.

This title may be cited as the "Department of State Appropriation Act, 1987".

TITLE IV—THE JUDICIARY

SUPREME COURT OF THE UNITED STATES

SALARIES AND EXPENSES

For expenses necessary for the operation of the Supreme Court, as required by law, excluding care of the building and grounds, including purchase, or hire, driving, maintenance and operation of an automobile for the Chief Justice and not to exceed $10,000 for the purpose of transporting Associate Justices, hire of passenger motor vehicles; not to exceed $10,000 for official reception and representation expenses; and for miscellaneous expenses, to be expended as the Chief Justice may approve; $14,600,000.

CARE OF THE BUILDING AND GROUNDS

For such expenditures as may be necessary to enable the Architect of the Capitol to carry out the duties imposed upon him by the Act approved May 7, 1934 (40 U.S.C. 13a-13b), including improvements, maintenance, repairs, equipment, supplies, materials, and appurtenances; special clothing for workmen; and personal and other services (including temporary labor without regard to the Classification and Retirement Acts, as amended), and for snow removal by hire of men and equipment or under contract, and for security installations both without compliance with section 3709 of the Revised Statutes, as amended (41 U.S.C. 5); $2,279,000, of which $375,000 shall remain available until expended.

UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT

SALARIES AND EXPENSES

For salaries of the chief judge, judges, and other officers and employees, and for all necessary expenses of the court, $6,800,000.

UNITED STATES COURT OF INTERNATIONAL TRADE

SALARIES AND EXPENSES

For salaries of the chief judge and eight judges; salaries of the officers and employees of the court; services as authorized by 5 U.S.C. 3109; and necessary expenses of the court, including exchange of books and traveling expenses, as may be approved by the court; $7,000,000: Provided, That travel expenses of judges of the Court of International Trade shall be paid upon written certificate of the judge.

COURTS OF APPEALS, DISTRICT COURTS, AND OTHER JUDICIAL SERVICES

SALARIES AND EXPENSES

For the salaries of circuit and district judges (including judges of the territorial courts of the United States), justices and judges retired from office or from regular active service, judges of the Claims Court, bankruptcy judges, magistrates, and all other officers and employees of the Federal Judiciary not otherwise specifically provided for, and all necessary expenses of the courts, including the purchase of firearms and ammunition, $929,500,000, of which not to exceed $160,000,000 shall be available for payment of charges for space and facilities: Provided, That the number of staff attorneys to be appointed in each of the courts of appeals shall not exceed the ratio of one attorney for each authorized judgeship, exclusive of the seven attorneys assigned preargument conference duties.

DEFENDER SERVICES

For the operation of Federal Public Defender and Community Defender organizations, the compensation and reimbursement of expenses of attorneys appointed to represent persons under the Criminal Justice Act of 1964, as amended, the compensation (in accordance with Criminal Justice Act maximums) and reimbursement of expenses of attorneys appointed to assist the court in criminal cases where the defendant has waived representation by counsel, and the compensation of attorneys appointed to represent jurors in civil actions for the protection of their employment, as authorized by law; $68,378,000, to remain available until expended.

FEES OF JURORS AND COMMISSIONERS

For fees and expenses and refreshments of jurors; compensation of jury commissioners; and compensation of commissioners appointed in condemnation cases pursuant to Rule 71A(h) of the Federal Rules of Civil Procedure; $44,635,000, to remain available until expended: Provided, That the compensation of land commissioners shall not exceed the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code.

COURT SECURITY

For necessary expenses, not otherwise provided for, incident to the procurement, installation, and maintenance of security equipment and protective services for the United States Courts in courtrooms and adjacent areas, including building ingress-egress control, inspection of packages, directed security patrols, and other similar activities; $36,000,000, to be expended directly or transferred to the United States Marshals Service which shall be responsible for administering elements of the Judicial Security Program consistent with standards or guidelines agreed to by the Director of the Administrative Office of the United States Courts and the Attorney General.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

SALARIES AND EXPENSES

For necessary expenses of the Administrative Office of the United States Courts, including travel, advertising, hire of a passenger motor vehicle, and rent in the District of Columbia and elsewhere, $29,500,000, of which an amount not to exceed $5,000 is authorized for official reception and representation expenses.

FEDERAL JUDICIAL CENTER

SALARIES AND EXPENSES

For necessary expenses of the Federal Judicial Center, as authorized by Public Law 90-219, $9,600,000.

BICENTENNIAL EXPENSES, THE JUDICIARY

BICENTENNIAL ACTIVITIES

(INCLUDING TRANSFER OF FUNDS)

For expenses to be incurred by the Judiciary for the observance of the Bicentennial of the Constitution of the United States, $1,000,000, to remain available until expended. Funds appropriated under this heading in The Judiciary Appropriation Act, 1976, shall also be available for this purpose.

UNITED STATES SENTENCING COMMISSION

SALARIES AND EXPENSES

For the salaries and expenses necessary to carry out the provisions of chapter 58 of title 28, United States Code, $5,800,000.

GENERAL PROVISIONS—THE JUDICIARY

SEC. 401. Appropriations and authorizations made in this title which are available for salaries and expenses shall be available for services as authorized by 5 U.S.C. 3109.

SEC. 402. Appropriations made in this title shall be available for salaries and expenses of the Temporary Emergency Court of Appeals authorized by Public Law 92-210 and the Special Court established under the Regional Rail Reorganization Act of 1973, Public Law 93-236.

SEC. 403. The position of Trustee Coordinator in the Bankruptcy Courts of the United States shall not be limited to persons with formal legal training.

SEC. 404. Notwithstanding any other provision of law, the Administrative Office of the United States Courts, or any other agency or instrumentality of the United States, is prohibited from restricting solely to staff of the Clerks of the United States Bankruptcy Courts the issuance of notices to creditors and other interested parties. The Administrative Office shall permit and encourage the preparation and mailing of such notices to be performed by or at the expense of the debtors, trustees or such other interested parties as the Court may direct and approve. The Administrator of the United States Courts shall make appropriate provisions for the use of and accounting for any postage required pursuant to such directives. The provisions of this paragraph shall terminate on October 1, 1987.

SEC. 405. Such fees as shall be collected for the preparation and mailing of notices in bankruptcy cases as prescribed by the Judicial Conference of the United States pursuant to 28 U.S.C. 1930(b) shall be deposited to the "Courts of Appeals, District Courts, and Other Judicial Services, Salaries and Expenses" appropriation to be used for salaries and other expenses incurred in providing these services.

SEC. 406. Pursuant to section 140 of Public Law 97-92, during fiscal year 1987, justices and judges of the United States shall receive the same percentage increase in salary accorded to employees paid under the General Schedule (pursuant to 5 U.S.C. 5305).

SEC. 407. (a) Section 1914(a) of title 28, United States Code, is amended by striking out "$60" and inserting in lieu thereof "$120".

(b) Section 1930(a)(1) of title 28, United States Code, is amended by striking out "$60" and inserting in lieu thereof "$90".

(c) Chapter 123 of title 28, United States Code, is amended by adding at the end thereof the following:

"§ 1931. Disposition of filing fees

"The following portion of moneys paid to the clerk of court as filing fees under this chapter shall be deposited into a special fund of the Treasury to be available to offset funds appropriated for the operation and maintenance of the courts of the United States as provided in annual appropriation Acts:

"Under section 1914(a), $60.".

(d) The table of section headings preceding chapter 123 of title 28, United States Code, is amended by adding at the end thereof the following:

"1931. Disposition of filing fees.".

This title may be cited as "The Judiciary Appropriation Act, 1987".

TITLE V—RELATED AGENCIES

DEPARTMENT OF TRANSPORTATION

MARITIME ADMINISTRATION

OPERATING-DIFFERENTIAL SUBSIDIES
(LIQUIDATION OF CONTRACT AUTHORITY)

For the payment of obligations incurred for operating-differential subsidies as authorized by the Merchant Marine Act, 1936, as amended, $320,000,000, to remain available until expended.

RESEARCH AND DEVELOPMENT

For necessary expenses for research and development activities, as authorized by law, $3,500,000, to remain available until expended.

OPERATIONS AND TRAINING

For necessary expenses of operations and training activities authorized by law, $64,000,000, to remain available until expended: Provided, That reimbursements may be made to this appropriation from receipts to the "Federal Ship Financing Fund" for administrative expenses in support of that program.

GENERAL PROVISIONS—MARITIME ADMINISTRATION

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: Provided, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts.

ARMS CONTROL AND DISARMAMENT AGENCY

ARMS CONTROL AND DISARMAMENT ACTIVITIES

For necessary expenses, not otherwise provided for, for arms control and disarmament activities, including not to exceed $48,000 for official reception and representation expenses, authorized by the Act of September 26, 1961, as amended (22 U.S.C. 2551 et seq.), $29,000,000.

BOARD FOR INTERNATIONAL BROADCASTING

GRANTS AND EXPENSES

For expenses of the Board for International Broadcasting, including grants to RFE/RL, Inc., $140,000,000, of which not to exceed $52,000 may be made available for official reception and representation expenses, and of which $15,000,000, to remain available until expended, shall become available for expenditure on October 1, 1987.

CHRISTOPHER COLUMBUS QUINCENTENARY JUBILEE COMMISSION

SALARIES AND EXPENSES

For the necessary expenses of the Christopher Columbus Quincentenary Jubilee Commission, $220,000, to remain available until November 15, 1992.

COMMISSION ON THE BICENTENNIAL OF THE UNITED STATES CONSTITUTION

SALARIES AND EXPENSES

For necessary expenses of the Commission on the Bicentennial of the United States Constitution authorized by Public Law 98-101 (97 Stat. 719-723), $13,200,000, to remain available until expended, of which $3,700,000 is for carrying out the provisions of Public Law 99-194, including $2,700,000 for implementation of the National Bicentennial Competition on the Constitution and the Bill of Rights and $1,000,000 for educational programs about the Constitution and the Bill of Rights below the university level as authorized by such Act.

COMMISSION ON CIVIL RIGHTS

SALARIES AND EXPENSES

For necessary expenses of the Commission on Civil Rights, including hire of passenger motor vehicles, $7,500,000, of which $2,000,000 is for regional offices and $700,000 is for civil rights monitoring activities: Provided, That not to exceed $20,000 may be used to employ consultants: Provided further, That not to exceed $185,000 may be used to employ temporary or special needs appointees: Provided further, That none of the funds shall be used to employ in excess of four full-time individuals under Schedule C of the Excepted Service, exclusive of one special assistant for each Commissioner whose compensation shall not exceed the equivalent of 150 billable days at the daily rate of a level 11 salary under the General Schedule: Provided further, That not to exceed $40,000 shall be available for new, continuing or modifications of contracts for performance of mission-related external services: Provided further, That none of the funds shall be used to reimburse Commissioners for more than 75 billable days, with the exception of the Chairman who is permitted 125 billable days.

COMMISSION ON SECURITY AND COOPERATION IN EUROPE

SALARIES AND EXPENSES

For necessary expenses of the Commission on Security and Cooperation in Europe, as authorized by Public Law 94-304, $526,000 to remain available until expended: Provided, That not to exceed $6,000 of such amount shall be available for official reception and representation expenses.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Equal Employment Opportunity Commission as authorized by title VII of the Civil Rights Act of 1964, as amended (29 U.S.C. 206(d) and 621-634), including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; not to exceed $20,000,000 for payments to State and local enforcement agencies for services to the Commission pursuant to title VII of the Civil Rights Act, as amended, and sections 6 and 14 of the Age Discrimination in Employment Act; $165,000,000.

FEDERAL COMMUNICATIONS COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Communications Commission, as authorized by law, including uniforms and allowances therefor, as authorized by law (5 U.S.C. 5901-02); not to exceed $700,000 for land and structures; not to exceed $200,000 for improvement and care of grounds and repair to buildings; not to exceed $3,000 for official reception and representation expenses; purchase (not to exceed ten) and hire of motor vehicles; special counsel fees; and services as authorized by 5 U.S.C. 3109; $95,000,000, of which not to exceed $300,000 of the foregoing amount shall remain available until September 30, 1988, for research and policy studies: Provided, That notwithstanding any other provision of law, the Federal Communications Commission, during fiscal year 1987, may recover the costs incurred to assess and collect charges authorized by section 5002 of Public Law 99-272 from receipts generated by such charges: Provided further, That none of the funds appropriated to the Federal Communications Commission by this Act may be used to diminish the number of VHF channel assignments reserved for noncommercial educational television stations in the Television Table of Assignments (section 73.606 of title 47, Code of Federal Regulations): Provided further, That funds appropriated to the Federal Communications Commission by this Act shall be used to consider alternative means of administration and enforcement of the Fairness Doctrine and to report to the Congress by September 30, 1987.

FEDERAL MARITIME COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Maritime Commission, including services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and uniforms or allowances therefor, as authorized by 5 U.S.C. 5901-02; $11,600,000: Provided, That not to exceed $1,500 shall be available for official reception and representation expenses.

FEDERAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Federal Trade Commission, including uniforms or allowances therefor, as authorized by 5 U.S.C. 5901-5902; services as authorized by 5 U.S.C. 3109; hire of passenger motor vehicles; and not to exceed $2,000 for official reception and representation expenses; the sum of $65,000,000: Provided, That the funds appropriated in this paragraph are subject to the limitations and provisions of sections 10(a) and 10(c) (notwithstanding section 10(e)), 11(b), 18, and 20 of the Federal Trade Commission Improvements Act of 1980 (Public Law 96-252; 94 Stat. 374): Provided further, That (a) The Federal Trade Commission shall submit to the Committee on Commerce, Science, and Transportation of the Senate, to the Committee on Energy and Commerce of the House of Representatives and to the Appropriations Committees of the Senate and House of Representatives the information specified in subsection (b) of this section every 6 months during fiscal year 1987. A report containing such information shall be submitted when the Commission submits its annual report to the Congress during such fiscal year, and such report may be included in the annual report. A separate report containing such information shall be submitted 6 months after the date of submission of any such annual report. Each such report shall contain such information for the period since the last submission under this section.

(b) Each such report shall list and describe, with respect to instances in which predatory pricing practices have been suspected or alleged—

(1) each complaint made, orally or in writing, to the offices of the Commission;

(2) each preliminary investigation opened or closed at the Commission;

(3) each formal investigation opened or closed at the Commission;

(4) each recommendation for the issuance of a complaint forwarded by the staff to the Commission;

(5) each complaint issued by the Commission;

(6) each opinion and order entered by the Commission;

(7) each consent agreement accepted provisionally or finally by the Commission;

(8) each request for modification of an outstanding Commission order filed with the Commission;

(9) each recommendation by staff pertaining to a request for modification of an outstanding Commission order; and

(10) each disposition by the Commission of a request for modification of an outstanding Commission order.

Such report shall include copies of all such consent agreements and complaints executed by the Commission referred to in such report. Where a matter has been closed or terminated, the report shall include a statement of the reasons for that disposition. The descriptions required under this subsection shall be as complete as possible but shall not reveal the identity of persons or companies complained about or those subject to investigation that have not otherwise been made public. The report shall include any evaluation by the Commission of the potential impacts of predatory pricing upon businesses (including small businesses.)

INTERNATIONAL TRADE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the International Trade Commission, including hire of passenger motor vehicles and services as authorized by 5 U.S.C. 3109, and not to exceed $2,500 for official reception and representation expenses, $33,900,000 of which $4,000,000 shall remain available until expended for expenses related to relocation of the Commission.

JAPAN-UNITED STATES FRIENDSHIP COMMISSION

JAPAN-UNITED STATES FRIENDSHIP TRUST FUND

For expenses of the Japan-United States Friendship Commission as authorized by Public Law 94-118, as amended, from the interest earned on the Japan-United States Friendship Trust Fund, $1,408,000, to remain available until expended; and an amount of Japanese currency not to exceed the equivalent of $1,200,000 based on exchange rates at the time of payment of such amounts, to remain available until expended: Provided, That not to exceed a total of $2,500 of such amounts shall be available for official reception and representation expenses.

LEGAL SERVICES CORPORATION

PAYMENT TO THE LEGAL SERVICES CORPORATION

For payment to the Legal Services Corporation to carry out the purposes of the Legal Services Corporation Act of 1974, as amended, $305,500,000 of which $261,293,672 is for basic field programs, $7,022,000 is for Native American programs, $9,698,000 is for migrant programs, $1,339,800 is for program development and law school clinics, $1,000,000 is for supplemental field programs, $623,964 is for regional training centers, $376,036 is for training development and technical assistance, $7,528,218 is for national support, $7,842,866 is for state support, $865,000 is for the Clearinghouse, $510,444 is for computer assisted legal research grants, and $7,400,000 is for Corporation management and administration: Provided, That none of the funds appropriated in this paragraph shall be expended for any purpose prohibited or limited by or contrary to any of the provisions of Public Law 99-180 and section 112 of Public Law 99-190: Provided further, That the funds distributed to each grantee funded in fiscal year 1987 pursuant to the number of poor people determined by the Bureau of the Census to be within its geographical area shall be distributed in the following order:

(1) grants from the Legal Services Corporation and contracts entered into with the Legal Services Corporation under section 1006(a)(1) shall be maintained in fiscal year 1987 at not less than 1 percent more than the annual level at which each grantee and contractor was funded in fiscal year 1986 or $8.30 per poor person within its geographical area under the 1980 Census, whichever is greater; and

(2) each such grantee shall be increased by an equal percentage of the amount by which such grantee's funding, including the increase under the first priority above, falls below $14.56 per poor person within its geographical area under the 1980 census:

Provided further, That if a Presidential Order pursuant to section 252 of Public Law 99-177 is issued for fiscal year 1987, funds provided to each grantee covered by the second proviso shall be reduced by the percentage specified in the Presidential Order: Provided further, That if funds become available because a national support center has been defunded or denied refunding pursuant to section 1011(2) of the Legal Services Corporation Act, as amended by this Act, such funds may be transferred to basic field programs, to be distributed in the manner specified by this paragraph, if the Appropriations Committees of both Houses of Congress have been notified pursuant to section 607 of this Act: Provided further, That none of the funds appropriated by this Act may be used to implement or enforce the regulations issued by the Legal Services Corporation regarding legislative and administrative advocacy (45 CFR part 1612) printed for final publication in the "Federal Register" on May 31, 1984, (49 FR 22651) and on August 1, 1986 (51 FR 27539).

MARINE MAMMAL COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Marine Mammal Commission as authorized by title II of Public Law 92-522, as amended, $900,000.

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

SALARIES AND EXPENSES

For necessary expenses of the Office of the United States Trade Representative, including the hire of passenger motor vehicles and the employment of experts and consultants as authorized by 5 U.S.C. 3109, $13,300,000: Provided, That not to exceed $59,000 shall be available for official reception and representation expenses.

SECURITIES AND EXCHANGE COMMISSION

SALARIES AND EXPENSES

For necessary expenses of the Securities and Exchange Commission, including services as authorized by 5 U.S.C. 3109, and not to exceed $3,000 for official reception and representation expenses, $110,500,000, of which not to exceed $10,000 may be used toward funding a permanent secretariat for the International Association of Securities Commissioners.

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses, not otherwise provided for, of the Small Business Administration, including purchase of one motor vehicle for replacement only, and hire of passenger motor vehicles and not to exceed $2,500 for official reception and representation expenses, $162,000,000; and for grants for Small Business Development Centers as authorized by section 21(a) of the Small Business Act, as amended, $35,000,000: Provided, That notwithstanding any other provision of law, the Small Business Administration is authorized to recognize all costs incurred prior to December 16, 1980, by a small business development center at the University of Georgia in pursuit of the purposes of the small business development center program as allowable costs chargeable to a fiscal year 1981 cooperative agreement, provided such costs were incurred subsequent to October 1, 1979, and have not been reimbursed from non-Federal sources. In addition, $92,000,000 for disaster loan-making activities, including loan servicing, shall be transferred to this appropriation from the "Disaster Loan Fund".

REVOLVING FUNDS

The Small Business Administration is hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to its revolving funds, and in accord with the law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the current fiscal year for the "Disaster Loan Fund", the "Business Loan and Investment Fund", the "Lease Guarantees Revolving Fund", the "Pollution Control Equipment Contract Guarantees Revolving Fund", and the "Surety Bond Guarantees Revolving Fund".

BUSINESS LOAN AND INVESTMENT FUND

For additional capital for the "Business Loan and Investment Fund", $164,000,000, to remain available without fiscal year limitation; and for additional capital for new direct loan obligations to be incurred by the "Business Loan and Investment Fund", $97,000,000, to remain available without fiscal year limitation.

SURETY BOND GUARANTEES REVOLVING FUND

For additional capital for the "Surety Bond Guarantees Revolving Fund", authorized by the Small Business Investment Act, as amended, $9,497,000, to remain available without fiscal year limitation.

POLLUTION CONTROL EQUIPMENT CONTRACT GUARANTEE REVOLVING FUND

For additional capital for the "Pollution control equipment contract guarantee revolving fund" authorized by the Small Business Investment Act, as amended, $14,245,000, to remain available without fiscal year limitation.

STATE JUSTICE INSTITUTE

SALARIES AND EXPENSES

For necessary expenses of the State Justice Institute, as authorized by Public Law 98-620, $7,200,000 to remain available until expended.

UNITED STATES INFORMATION AGENCY

SALARIES AND EXPENSES

For expenses, not otherwise provided for, necessary to enable the United States Infor-

mation Agency, as authorized by Reorganization Plan No. 2 of 1977, the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 et seq.), and the United States Information and Educational Exchange Act of 1948, as amended (22 U.S.C. 1431 et seq.), to carry out international communication, educational and cultural activities, including employment, without regard to civil service and classification laws, of persons on a temporary basis (not to exceed $270,000, of which $250,000 is to facilitate United States participation in international expositions abroad); expenses authorized by the Foreign Service Act of 1980 (22 U.S.C. 3901 et seq.), living quarters as authorized by 5 U.S.C. 5912, and allowances as authorized by 5 U.S.C. 5921–5928 and 22 U.S.C. 287e–1; and entertainment, including official receptions, within the United States, not to exceed $20,000; $570,000,000, none of which shall be restricted from use for the purposes appropriated herein: Provided, That not to exceed $1,000,000 may be used for representation abroad: Provided further, That not to exceed $15,558,000 of the amounts allocated by the United States Information Agency to carry out section 102(a)(3) of the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2452(a)(3)), shall remain available until expended: Provided further, That receipts not to exceed $1,000,000 may be credited to this appropriation from fees or other payments received from or in connection with English-teaching programs as authorized by section 810 of the United States Information and Educational Exchange Act of 1948, as amended: Provided further, That not to exceed $2,750,000 shall be available for the Office of Inspector General.

EDUCATIONAL AND CULTURAL EXCHANGE PROGRAMS

For expenses of Fulbright, International Visitor, Humphrey Fellowship and Congress-Bundestag Exchange Programs, as authorized by Reorganization Plan No. 2 of 1977 and the Mutual Educational and Cultural Exchange Act, as amended (22 U.S.C. 2451 et seq.), $135,270,000, of which $24,270,000, to remain available until expended, shall be available for expenditure on October 1, 1987. For the Private Sector Exchange Programs, $9,730,000 of which $730,000, to remain available until expended, shall be available for expenditure on October 1, 1987, and of which $1,500,000, to remain available until expended, is for the Eisenhower Exchange Fellowship Program notwithstanding section 209 of Public Law 99–93.

RADIO CONSTRUCTION

For an additional amount for the purchase, rent, construction, and improvement of facilities for radio transmission and reception and purchase and installation of necessary equipment for radio transmission and reception, $46,000,000, to remain available until expended: Provided, That not to exceed $12,000,000 of these funds shall be available for construction of facilities for Radio In the American Sector: Provided further, That such amounts as may be necessary shall be available until expended for contingent termination or cancellation costs: Provided further, That the Funds appropriated in this paragraph shall be available for expenditure on October 1, 1987.

RADIO BROADCASTING TO CUBA

For an additional amount, necessary to enable the United States Information Agency to carry out the Radio Broadcasting to Cuba Act (providing for the Radio Marti program or Cuba Service of the Voice of America), including the purchase, rent, construction, and improvement of facilities for radio transmission and reception and purchase and installation of necessary equipment for radio transmission and reception, $11,250,000, to remain available until expended.

EAST-WEST CENTER

To enable the Director of the United States Information Agency to provide for carrying out the provisions of the Center for Cultural and Technical Interchange Between East and West Act of 1960, by grant to any appropriate recipient in the State of Hawaii, $20,000,000: Provided, That none of the funds appropriated herein shall be used to pay any salary, or to enter into any contract providing for the payment thereof, in excess of the highest rate authorized in the General Schedule of the Classification Act of 1949, as amended.

NATIONAL ENDOWMENT FOR DEMOCRACY

For grants made by the United States Information Agency to the National Endowment for Democracy as authorized by the National Endowment for Democracy Act, $15,000,000.

ADMINISTRATIVE PROVISION—UNITED STATES INFORMATION AGENCY

Funds appropriated under this title to the United States Information Agency shall be available notwithstanding the provisions of sections 203, 204, 205, and 210(c) of the Foreign Relations Authorization Act, Fiscal Years 1986 and 1987 (Public Law 99–93).

TITLE VI—GENERAL PROVISIONS

SEC. 601. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 602. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 603. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 604. If any provision of this Act or the application of such provision to any person or circumstances shall be held invalid, the remainder of the Act and the application of such provision to persons or circumstances other than those as to which it is held invalid shall not be affected thereby.

SEC. 605. None of the funds appropriated in titles II and V of this Act may be used for any activity to alter the per se prohibition on resale price maintenance in effect under Federal antitrust laws: Provided, That nothing in this provision shall prohibit any employee of a department or agency for which funds are provided in titles II and V of this Act from presenting testimony on this matter before appropriate committees of the House and Senate.

SEC. 606. None of the funds appropriated by this Act to the Legal Services Corporation may be used by the Corporation or any recipient to participate in any litigation with respect to abortion, except where the life of the mother would be endangered if the fetus were carried to term.

SEC. 607. (a) None of the funds provided under this Act shall be available for obligation or expenditure through a reprogramming of funds which: (1) creates new programs; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates an office or employees; (5) reorganizes offices, programs, or activities; or (6) contracts out any functions or activities presently performed by Federal employees; unless the Appropriations Committees of both Houses of Congress are notified fifteen days in advance of such reprogramming of funds.

(b) None of the funds provided under this Act shall be available for obligation or expenditure for activities, programs, or projects through a reprogramming of funds in excess of $250,000 or 10 per centum, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 per centum funding for any existing program, project, or activity, or numbers of personnel by 10 per centum as approved by Congress; or (3) results from any general savings from a reduction in personnel which would result in a change in existing programs, activities, or projects as approved by Congress, unless the Appropriations Committees of both Houses of Congress are notified fifteen days in advance of such reprogramming of funds.

SEC. 608. (a) Notwithstanding any provision of chapter 11 of title 11, United States Code, the trustee shall pay benefits until May 15, 1987 to retired former employees under a plan, fund, or program maintained or established by the debtor prior to filing a petition (through the purchase of insurance or otherwise) for the purpose of providing medical, surgical, or hospital care benefits, or benefits in the event of sickness, accident, disability, or death.

(b) This section is effective with respect to cases commenced under chapter 11, of title 11, United States Code, in which a plan for reorganization has not been confirmed by the court and in which any such benefit is still being paid on October 2, 1986, and in cases that become subject to chapter 11, title 11, United States Code, after October 2, 1986.

(c) This section shall not apply during any period in which a case is subject to chapter 7, title 11, United States Code.

TITLE VII—CHILD ABUSE VICTIMS' RIGHTS ACT OF 1986

SHORT TITLE

SEC. 701. This title may be cited as the "Child Abuse Victims' Rights Act of 1986".

FINDINGS

SEC. 702. The Congress finds that—

(1) child exploitation has become a multimillion dollar industry, infiltrated and operated by elements of organized crime, and by a nationwide network of individuals openly advertising their desire to exploit children;

(2) Congress has recognized the physiological, psychological, and emotional harm caused by the production, distribution, and display of child pornography by strengthening laws prescribing such activity;

(3) the Federal Government lacks sufficient enforcement tools to combat concerted efforts to exploit children prescribed by Federal law, and exploitation victims lack effective remedies under Federal law; and

(4) current rules of evidence, criminal procedure, and civil procedure and other courtroom and investigative procedures inhibit the participation of child victims as witnesses and damage their credibility when

they do testify, impairing the prosecution of child exploitation offenses.

CIVIL REMEDY FOR PERSONAL INJURY

SEC. 703. (a) Chapter 110 of part I of title 18, United States Code, is amended by redesignating section 2255 as section 2256, and by inserting after section 2254 the following:

"§ 2255. Civil remedy for personal injuries

"(a) Any minor who is a victim of a violation of section 2251 or 2252 of this title and who suffers personal injury as a result of such violation may sue in any appropriate United States District Court and shall recover the actual damages such minor sustains and the cost of the suit, including a reasonable attorney's fee. Any minor as described in the preceding sentence shall be deemed to have sustained damages of no less than $50,000 in value.

"(b) Any action commenced under this section shall be barred unless the complaint is filed within six years after the right of action first accrues or in the case of a person under a legal disability, not later than three years after the disability.".

(b) The table of sections for chapter 110 of part I of title 18, United States Code, is amended by striking out the item relating to section 2255 and inserting in lieu thereof the following:

"2255. Civil remedy for personal injuries.
"2256. Definitions for chapter.".

MINIMUM SENTENCE FOR REPEAT OFFENDERS

SEC. 704. (a) Section 2251(c) of title 18, United States Code, is amended by striking out "or imprisoned not less than two years" and inserting in lieu thereof "or imprisoned not less than five years".

(b) Section 2252(b) of title 18, United States Code, is amended by striking out "or imprisoned not less than two years" and inserting in lieu thereof "or imprisoned not less than five years".

ATTORNEY GENERAL REPORT

SEC. 705. (a) Within one year after the date of enactment of this title, the Attorney General shall submit a report to Congress detailing possible changes in the Federal Rules of Evidence, the Federal Rules of Criminal Procedure, the Federal Rules of Civil Procedure, and other Federal courtroom, prosecutorial, and investigative procedures which would facilitate the participation of child witnesses in cases involving child abuse and sexual exploitation.

(b) In preparing the report, the Attorney General shall consider, but not be limited to, such changes as—

(1) use of closed-circuit cameras, two-way mirrors, and other out-of-court statements;

(2) judicial discretion to circumscribe use of harassing, overly complex, and confusing questions against child witnesses;

(3) use of videotape in investigations to reduce repetitions of interviews;

(4) streamlining investigative procedures; and

(5) improved training of prosecutorial and investigative staff in special problems of child witnesses, including handicapped children.

TITLE VIII

JAMES MADISON MEMORIAL FELLOWSHIP

SHORT TITLE

SEC. 801. This title may be cited as the "James Madison Memorial Fellowship Act".

PURPOSE

SEC. 802. It is the purpose of this title to establish the James Madison Fellowship Program which is designed to encourage graduate study of the American Constitution, its roots, its formation, its principles, and its development.

FOUNDATION

SEC. 803. (a) In order to commemorate the bicentennial of the Constitution, there is established, as an independent establishment of the executive branch, the James Madison Memorial Fellowship Foundation.

(b)(1) The Foundation shall be subject to the supervision and direction of a Board of Trustees. The Board shall be composed of thirteen members, as follows:

(A) Two Members of the Senate, of different political parties, shall be appointed by the President upon the recommendation of the President pro tempore of the Senate, in consultation with the Majority Leader and Minority Leader of the Senate.

(B) Two Members of the House of Representatives, of different political parties, shall be appointed by the President upon the recommendation of the Speaker of the House, in consultation with the Minority Leader of the House of Representatives.

(C) Two members of the Federal judiciary shall be appointed by the President upon the recommendation of the Chief Justice of the United States.

(D) Six members, not more than three of whom shall be of the same political party, shall be appointed by the President with the advice and consent of the Senate, of whom one shall be a chief executive officer of a State, two shall be members of the general public, and three shall be members of the academic community, appointed upon the recommendation of the Librarian of Congress.

(E) The Secretary of Education or his designate shall serve ex officio as a member of the Board, but shall not be eligible to serve as Chairman.

(2) The term of office of each member of the Board shall be six years; except that (A) the members first taking office shall serve as designated by the President, four for terms of two years, five for terms of four years, and four for terms of six years, and (B) any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed, and shall be appointed in the same manner as the original appointment for that vacancy was made. This provision shall not apply to members ex officio.

(c) Members of the Board shall elect from the members of the Board a Chairman and such other officers as may be necessary to carry out the duties of the Foundation.

(d) Members of the Board shall serve without pay, but shall be entitled to reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of their duties.

FELLOWSHIP RECIPIENTS

SEC. 804. (a) The Foundation is authorized to award fellowships to outstanding students and teachers who will pursue graduate study leading to the degree of Master of Arts in teaching or other apporpriate masters degree for teachers, with a major in social studies or American history. Each recipient must take at least twelve semester hours, or its equivalent in topics directly related to the Constitution of the United States, as determined by the Board.

(b)(1) James Madison fellowships shall be awarded to individuals who are, or who desire to become, social studies and American history teachers in accordance with paragraphs (2) and (3).

(2) Junior fellowships shall be awarded to graduate students who are about to complete or have recently completed their undergraduate course of study, and plan to begin graduate work on a relatively full-time basis.

(3) Senior fellowships shall be awarded to experienced teachers who wish to undertake work for a graudate degree on a part-time basis during summers or in evening programs.

PERIOD FOR AWARD

SEC. 805. Junior fellowships shall be granted for such periods as the Foundation may prescribe but not to exceed two academic years. Senior fellowship shall be granted for such periods as the Foundation may prescribe, but not to exceed five calendar years.

RECIPIENT'S CHOICE OF INSTITUTION

SEC. 806. Fellowship recipients may attend any institution of higher education in the United States with an accredited graduate program which offers courses of study or training which emphasize the origins of the Constitution of the United States, its principles, its development, and its comparison with other forms of government, as determined according to criteria established by the Foundation.

RECIPIENT'S ELIGIBILITY

SEC. 807. Each student awarded a fellowship under this title shall demonstrate the potential, and a serious intention, to follow a career of educating students in secondary schools. Each institution of higher education at which such a student is in attendance shall make reasonable efforts to encourage such a student to meet the objectives of this section.

Each student receiving a Fellowship under this Act shall enter into an agreement under which the recipient shall:

(a) within a 5-year period after completing the education for which the fellowship was awarded, teach on a full-time basis students in secondary school for a period of not less than one year for each year for which assistance was received;

(b) repay all of the Fellowship assistance received plus interest at the rate of 6% per annum and, if applicable, reasonable collection fees for each school year for which assistance was received for which such recipient failed to teach as provided in paragraph (a); and

(c) not be considered to be in violation of the agreement entered into during any period during which the recipient:

(1) is pursuing a full-time course of study related to the field of teaching at an eligible institution;

(2) is serving, not in excess of 3 years, as a member of the armed services of the United States;

(3) is temporarily totally disabled for a period of time not to exceed 3 years as established by sworn affidavit of a qualified physician;

(4) is unable to secure employment for a period not to exceed 12 months by reason of the care required by a spouse who is disabled;

(5) is seeking and unable to find full-time employment for a single period not to exceed 12 months; or

(6) is seeking and unable to find full-time employment as a teacher.

SELECTION OF FELLOWSHIP RECIPIENTS

SEC. 808. (a) Madison Fellows shall be selected for their academic achievements and their potential to become secondary school teachers of social studies and American history.

(b)(1) The Foundation is authorized, either directly or by contract, to provide for the conduct of a nationwide competition for

the selection of fellowship recipients. Each applicant must have a demonstrated interest in pursuing a course of study which emphasizes the Constitution, its principles, and its history, and have a demonstrated record of willingness to devote themselves to civil responsibility.

(2) Each application shall be accompanied by an essay explaining the importance of the study of the Constitution both to the applicant's career aspirations and contributions to public service, and to citizenship generally in a constitutional regime.

(3)(A) Each application shall include a description of a program of study for the graduate program, designating the courses to be taken, and the proposed Master's thesis, where appropriate.

(B) For the purpose of this paragraph, the Board of Trustees of the Foundation shall establish general criteria for programs in constitutional studies.

(c) The Foundation shall adopt selection procedures which shall assure that at least one Madison Fellow shall be selected each year from each State, the District of Columbia, and the Commonwealth of Puerto Rico, and considered as a single entity, Guam, the Virgin Islands, American Samoa, the Trust Territories of the Pacific Islands, and the Commonwealth of the Northern Marianas in which there are at least two resident applicants who meet the minimum criteria established by the Foundation; and, if sufficient funding is available, to invite applications from scholars overseas for study in the United States.

AMOUNT OF FELLOWSHIPS

SEC. 809. Each student awarded a fellowship shall receive a stipend which shall not exceed the cost to the student for tuition, fees, books, room and board, or $12,000, whichever is less, for each academic year of study.

FELLOWSHIP CONDITIONS

SEC. 810. (a) A student awarded a Madison Fellowship shall continue to receive payments only during such periods as the Foundation finds that the student is maintaining satisfactory progress in an approved program of study or research. Recipients of junior fellowships shall devote essentially full time to their program of study.

(b) The Foundation is authorized to require reports from any fellowship recipient containing such information, in such form, and to be filed at such times as the Foundation determines to be necessary. Such reports shall be accompanied by a certificate from an appropriate official at the institution of higher education, approved by the Foundation, stating that such student is making satisfactory progress in a program of study or research, with such exceptions as the Foundation may establish.

JAMES MADISON MEMORIAL FELLOWSHIP TRUST FUND

SEC. 811. (a)(1) There shall be established in the Treasury of the United States a trust fund consisting of appropriations and amounts contributed by the Foundation for the Commemoration of the Constitution an other private sources to be available, in accordance with the provisions of this title, to carry out the provisions of this title.

(2) No funds in the Trust Fund may be available for fellowships until the contributions from private sources are equal to $10,000,000.

(b) It shall be the duty of the Secretary of the Treasury to invest in full the amounts appropriated and contributed to the fund. Such investments may be made only in interest-bearing obligations of the United States or in obligations guaranteed as to both principal and interest by the United States. For such purpose, such obligations may be acquired (1) on original issue at the issue price, or (2) by purchase of outstanding obligations at the market price. The purposes for which obligations of the United States may be issued under the Second Liberty Bond Act, as amended, are hereby extended to authorize the issuance at par of special obligations exclusively to the fund. Such special obligations shall bear interest at a rate equal to the average rate of interest, computed as to the end of the calendar month next preceding the date of such issue, borne by all marketable interest-bearing obligations of the United States then forming a part of the public debt; except that where such average rate is not a multiple of one-eighth of 1 per centum, the rate of interest of such special obligations shall be the multiple of one-eighth of 1 per centum next lower than such average rate. Such special obligations shall be issued only if the Secretary determines that the purchase of other obligations of the United States, or of obligations guaranteed as to both principal and interest by the United States or original issue at the market price, is not in the public interest.

(c) Any obligations acquired by the fund (except special obligations issued exclusively to the fund) may be sold by the Secretary at the market price, and such special obligations may be redeemed at par plus accrued interest.

(d) The interest on, and the proceeds from, the sale or redemption of any obligations held in the fund shall be credited to and form a part of the fund.

EXPENDITURES AND AUDIT

SEC. 812. (a) The Secretary of the Treasury is authorized to pay to the Foundation from the interest and earnings of the fund such sums as the Board determines are necessary and appropriate to enable the Foundation to carry out the provisions of this title.

(b) The activities of the Foundation under this title may be audited by the General Accounting Office under such rules and regulations as may be prescribed by the Comptroller General of the United States. The representatives of the General Accounting Office shall have access to all books, accounts, records, reports, and files and all other papers, things, or property belonging to or in use by the Foundation, pertaining to such activities and necessary to facilitate the audit.

EXECUTIVE SECRETARY OF FOUNDATION

SEC. 813. (a) There shall be an Executive Secretary of the Foundation who shall be appointed by the Board. The Executive Secretary shall be the chief executive officer of the Foundation and shall carry out the functions of the Foundation subject to the supervision and direction of the Board.

(b) The Executive Secretary of the Foundation shall be compensated at the rate specified for employees placed in grade GS-18 of the General Schedule set forth in section 5332 of title 5.

ADMINISTRATIVE PROVISIONS

Sec. 814. (a) The Foundation is authorized—

(1) to appoint and fix the compensation of such personnel as may be necessary to carry out the provisions of this chapter, except that in no case shall employees other than the Executive Secretary be compensated at a rate to exceed the rate provided for employees in grade GS-15 of the General Schedule set forth in section 5332 of title 5;

(2) to procure temporary and intermittent services of such experts and consultants as are necessary to the extent authorized by section 3109 of title 5, but at rates not to exceed the rate specified at the time of such service for grade GS-18 in section 5332 of such title;

(3) to prescribe such regulations as it deems necessary governing the manner in which its functions shall be carried out;

(4) to receive money and other property donated, bequeathed, or devised, without condition or restriction other than it be used for the purposes of the Foundation; and to use, sell, or otherwise dispose of such property for the purpose of carrying out its functions;

(5) to accept and utilize the services of voluntary and noncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of title 5;

(6) to enter into contracts, grants, or other arrangements, or modifications thereof, to carry out the provisions of this chapter, and such contracts or modifications thereof may, with the concurrence of two-thirds of the members of the Board, be entered into without performance or other bonds, and without regard to section 5 of title 41;

(7) to make advances, progress, and other payments which the Board deems necessary under this chapter without regard to the provisions of section 529 of title 31;

(8) to rent office space;

(9) to conduct programs in addition to or in conjunction with the Fellowship program which shall further the Foundation's purpose of encouraging research and study of constitutionalism in America; and

(10) to make other necessary expenditures.

(b) The foundation shall submit to the President and to the Congress an annual report of its operations under this chapter.

DEFINITIONS

SEC. 815. As used in this title—

(1) the term "Board" means the Board of Trustees of the James Madison Memorial Fellowship Foundation;

(2) the term "Foundation" means the James Madison Memorial Fellowship Foundation;

(3) the term "institution of higher education" has the same meaning given that term by section 1201(a) of the Higher Education Act of 1965; and

(4) the term "secondary school" has the same meaning given that term by section 1201(d) of the Higher Education Act of 1965.

APPROPRIATIONS

SEC. 816. There are appropriated to the James Madison Memorial Trust Fund $20,000,000 to carry out the provisions of this title, $10,000,000 of which shall be available on November 1, 1987, and to remain available until expended; and $10,000,000 of which shall be available on November 1, 1988, and to remain available until expended.

CONSTITUTIONAL LAW RESOURCE CENTERS

SEC. 817. (a) It is the purpose of this section to establish four centers where nationally recognized distinguished experts in Constitutional law will produce, on a periodic basis, articles of current interest relating to the Constitution of the United States which are suitable for use by James Madison scholars, educational institutions, law school reviews, bar associations, and the news media.

(b) In order to encourage recipient universities to provide such a continuing service, four endowments shall be established with funds from appropriations provided herein

and such other amounts as may be contributed from other sources.

(c) The income from each endowment shall be used to help support a chair for a Professor of Constitutional law. Each endowment shall be held in trust with the income from the portion provided herein used exclusively to contribute toward the salary and related costs of the professor filling the chair and for services directly related to the support of such professor such as secretarial and research services. The recipient university shall from sources other than that portion of the endowment funded herein furnish the office, classroom and related services suitable to such a member of the faculty.

The professor holding each chair shall file a copy of such articles with the Library of Congress, which shall make them available to libraries in the usual manner and the recipient of the endowment shall also make a copy available upon request by accredited educational institutions, bar associations, and general news media without royalty or charge other than the costs associated with printing or reprinting, handling and distribution.

(d) That portion of each endowment provided by this Act and any accumulations attributable to such grant shall be invested by the recipient university in interest bearing obligations of the United States or in obligations guaranteed both as to principal and interest by the United States and shall be subject to audit by the General Accounting Office for the sole purpose of determining that such funds are accounted for or have been used as provided herein. If a grantee university elects to discontinue such chair and support services, the corpus of the endowment attributable to the Federal grant shall revert to the Treasury of the United States.

(e) The application for the grant for an endowment shall require only such information and supporting material as is reasonably necessary to assure that the funds will be used for the purposes described herein. Acceptance of the grant by each university shall constitute an agreement and obligation of that university to fulfill the obligations set forth in this section.

(f) The grants for each endowment shall be for $800,000 and shall be offered to Howard University School of Law in Washington, D.C., Drake University School of Law in Des Moines, Iowa, the University of Akron School of Law in Akron, Ohio, and the University of South Carolina School of Law at Columbia, South Carolina.

SEC. 818. There is hereby appropriated to each recipient University named above or to the trustee of the fund designated by the President of the University the sum of $800,000 to carry out the provisions of section 817, to be available on November 1, 1987, and to remain available until expended.

This Act may be cited as the "Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation Act, 1987".

And the Senate agree to the same.

Amendment numbered 3:

That the House receded from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following:

(c) Such amounts as may be necessary for programs, projects or activities provided for in the Department of Defense Appropriations Act, 1987, at a rate of operations and to the extent and in the manner provided as follows, to be effective as if it had been enacted into law as the regular appropriations Act:

An Act making appropriations for the Department of Defense for the fiscal year ending September 30, 1987, and for other purposes

TITLE I

MILITARY PERSONNEL

MILITARY PERSONNEL, ARMY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Army on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund; $22,353,990,000.

MILITARY PERSONNEL, NAVY

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Navy on active duty (except members of the Reserve provided for elsewhere), midshipmen, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund; $17,104,850,000.

MILITARY PERSONNEL, MARINE CORPS

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Marine Corps on active duty (except members of the Reserve provided for elsewhere); and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund; $5,266,053,000.

MILITARY PERSONNEL, AIR FORCE

For pay, allowances, individual clothing, subsistence, interest on deposits, gratuities, permanent change of station travel (including all expenses thereof for organizational movements), and expenses of temporary duty travel between permanent duty stations, for members of the Air Force on active duty (except members of reserve components provided for elsewhere), cadets, and aviation cadets; and for payments pursuant to section 156 of Public Law 97-377, as amended (42 U.S.C. 402 note), and to the Department of Defense Military Retirement Fund; $18,940,731,000.

RESERVE PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army Reserve on active duty under sections 265, 3019, and 3033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $2,323,210,000.

RESERVE PERSONNEL, NAVY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Navy Reserve on active duty under section 265 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $1,464,453,000.

RESERVE PERSONNEL, MARINE CORPS

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Marine Corps Reserve on active duty under section 265 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty, and for members of the Marine Corps platoon leaders class, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $303,968,000.

RESERVE PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air Force Reserve on active duty under sections 265, 8019, and 8033 of title 10, United States Code, or while serving on active duty under section 672(d) of title 10, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing reserve training, or while performing drills or equivalent duty or other duty, and for members of the Air Reserve Officers' Training Corps, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $629,200,000.

NATIONAL GUARD PERSONNEL, ARMY

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Army National Guard while on duty under section 265, 3033, or 3496 of title 10 or section 708 of title 32, United States Code, or while serving on duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $3,323,145,000.

NATIONAL GUARD PERSONNEL, AIR FORCE

For pay, allowances, clothing, subsistence, gratuities, travel, and related expenses for personnel of the Air National Guard on duty

under section 265, 8033, or 8496 of title 10 or section 708 of title 32, United States Code, or while serving on duty under section 672(d) of title 10 or section 502(f) of title 32, United States Code, in connection with performing duty specified in section 678(a) of title 10, United States Code, or while undergoing training, or while performing drills or equivalent duty or other duty, and expenses authorized by section 2131 of title 10, United States Code, as authorized by law; and for payments to the Department of Defense Military Retirement Fund; $1,027,778,000.

TITLE II

OPERATION AND MAINTENANCE

OPERATION AND MAINTENANCE, ARMY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Army, as authorized by law; and not to exceed $15,664,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Army, and payments may be made on his certificate of necessity for confidential military purposes; $20,022,399,000, of which not less than $1,705,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, NAVY

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Navy and the Marine Corps, as authorized by law; and not to exceed $3,919,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Navy, and payments may be made on his certificate of necessity for confidential military purposes; $22,939,674,000, of which not less than $795,000,000 shall be available only for the maintenance of real property facilities, and of which $75,000,000 shall be available only to reimburse United States Coast Guard Operating Expenses for operations and training relating to the Coast Guard defense, military readiness and drug enforcement missions: Provided, That of the total amount of this appropriation made available for the alteration, overhaul, and repair of naval vessels, not more than $3,415,000,000 shall be available for the performance of such work in Navy shipyards: Provided further, That from the amounts of this appropriation for the alteration, overhaul and repair of naval vessels and aircraft, funds shall be available to acquire the alteration, overhaul and repair by competition between public and private shipyards and air rework facilities. The Navy shall certify that successful bids include comparable estimates of all direct and indirect costs for both public and private shipyards and air rework facilities. Competitions shall not be subject to section 502 of the Department of Defense Authorization Act, 1981, as amended, section 307 of the fiscal year 1985 Department of Defense Authorization Act, or Office of Management and Budget Circular A-76: Provided further, That funds herein provided shall be available for payments in support of the LEASAT program in accordance with the terms of the Aide Memoire, dated January 5, 1981: Provided further, That of the funds appropriated herein, not to exceed $5,080,000 shall be available for a grant to the Battleship Texas Advisory Board of the State of Texas for the restoration of the Battleship Texas.

OPERATION AND MAINTENANCE, MARINE CORPS

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Marine Corps, as authorized by law; $1,793,750,000, of which not less than $280,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR FORCE

For expenses, not otherwise provided for, necessary for the operation and maintenance of the Air Force, as authorized by law, including the lease and associated maintenance of replacement aircraft for the CT-39 aircraft to the same extent and manner as authorized for service contracts by section 2306(g), title 10, United States Code; and not to exceed $6,171,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of the Air Force, and payments may be made on his certificate of necessity for confidential military purposes; $18,636,816,000, of which not less than $1,650,000,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, DEFENSE AGENCIES

For expenses, not otherwise provided for, necessary for the operation and maintenance of activities and agencies of the Department of Defense (other than the military departments), as authorized by law; $7,978,674,000: Provided, That not to exceed $10,904,000 can be used for emergencies and extraordinary expenses, to be expended on the approval or authority of the Secretary of Defense, and payments may be made on his certificate of necessity for confidential military purposes: Provided further, That $372,000 is available to the Office of Economic Adjustment for making community planning assistance grants pursuant to section 2391 of title 10, United States Code, and joint community/military planning assistance grants for mitigation of operational impacts from encroachment: Provided further, That not less than $116,465,000 shall be available only for the maintenance of real property facilities: Provided further, That $1,500,000 shall be transferred to the Department of Commerce, International Trade Administration, "Operations and administration", for export administration activities.

OPERATION AND MAINTENANCE, ARMY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Army Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $769,966,000, of which not less than $38,336,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, NAVY RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Navy Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $884,097,000, of which not less than $37,248,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, MARINE CORPS RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Marine Corps Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $63,875,000, of which not less than $3,146,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR FORCE RESERVE

For expenses, not otherwise provided for, necessary for the operation and maintenance, including training, organization, and administration, of the Air Force Reserve; repair of facilities and equipment; hire of passenger motor vehicles; travel and transportation; care of the dead; recruiting; procurement of services, supplies, and equipment; and communications; $911,200,000, of which not less than $22,969,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, ARMY NATIONAL GUARD

For expenses of training, organizing, and administering the Army National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, and repairs to structures and facilities; hire of passenger motor vehicles; personnel services in the National Guard Bureau; travel expenses (other than mileage), as authorized by law for Army personnel on active duty, for Army National Guard division, regimental, and battalion commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; supplying and equipping the Army National Guard as authorized by law; and expenses of repair, modification, maintenance, and issue of supplies and equipment (including aircraft); $1,734,447,000, of which not less than $56,300,000 shall be available only for the maintenance of real property facilities.

OPERATION AND MAINTENANCE, AIR NATIONAL GUARD

For operation and maintenance of the Air National Guard, including medical and hospital treatment and related expenses in non-Federal hospitals; maintenance, operation, repair, and other necessary expenses of facilities for the training and administration of the Air National Guard, including repair of facilities, maintenance, operation, and modification of aircraft; transportation of things; hire of passenger motor vehicles; supplies, materials, and equipment, as authorized by law for the Air National Guard; and expenses incident to the maintenance and use of supplies, materials, and equipment, including such as may be furnished from stocks under the control of agencies of the Department of Defense; travel expenses (other than mileage) on the same basis as authorized by law for Air National Guard personnel on active Federal duty, for Air National Guard commanders while inspecting units in compliance with National Guard regulations when specifically authorized by the Chief, National Guard Bureau; $1,755,658,000, of which not less than $41,000,000 shall be available only for the maintenance of real property facilities.

NATIONAL BOARD FOR THE PROMOTION OF RIFLE PRACTICE, ARMY

For the necessary expenses and personnel services (other than pay and non-travel related allowances of members of the Armed Forces of the United States, except for members of the Reserve components thereof called or ordered to active duty to provide

support for the national matches) in accordance with law, for construction, equipment, and maintenance of rifle ranges; the instruction of citizens in marksmanship; the promotion of rifle practice; the conduct of the national matches; the issuance of ammunition under the authority of title 10, United States Code, sections 4308 and 4311; and the travel of rifle teams, military personnel, and individuals attending regional, national, and international competitions; not to exceed $4,316,000, of which not to exceed $7,500 shall be available for incidental expenses of the National Board: Provided, That competitors at national matches under title 10, United States Code, section 4312, may be paid subsistence and travel allowances in excess of the amounts provided under title 10, United States Code, section 4313.

CLAIMS, DEFENSE

For payment, not otherwise provided for, of claims authorized by law to be paid by the Department of Defense (except for civil functions), including claims for damages arising under training contracts with carriers, and repayment of amounts determined by the Secretary concerned, or officers designated by him, to have been erroneously collected from military and civilian personnel of the Department of Defense, or from States, territories, or the District of Columbia, or members of the National Guard units thereof; $144,400,000: Provided, That section 4 of chapter III of Public Law 99-349 is amended by adding before the period at the end thereof the following: "without a determination of legal liability based on an act or omission of an agent or employee of the Federal Government": Provided further, That the Secretary of the Navy is authorized and directed to pay from previously authorized and appropriated funds not to exceed $10,000,000 to reimburse upon verification, the business entity responsible for performance of construction of the Norfolk Navy Steam Plant for losses incurred by said entity arising out of construction according to drawings reviewed and approved by the Navy and issued or released for construction in said performance.

COURT OF MILITARY APPEALS, DEFENSE

For salaries and expenses necessary for the United States Court of Military Appeals; $3,200,000, and not to exceed $1,500 can be used for official representation purposes.

TENTH INTERNATIONAL PAN AMERICAN GAMES

For logistical support and personnel services (other than pay and non-travel related allowances of members of the Armed Forces of the United States, except for members of the Reserve components thereof called or ordered to active duty to provide support for the Tenth International Pan American Games) provided by any component of the Department of Defense to the Tenth International Pan American Games; $15,000,000.

ENVIRONMENTAL RESTORATION, DEFENSE

(INCLUDING TRANSFER OF FUNDS)

For the Department of Defense; $375,900,000, to remain available until transferred: Provided, That the Secretary of Defense shall, upon determining that such funds are required for environmental restoration, reduction and recycling of hazardous waste, research and development associated with hazardous wastes and removal of unsafe buildings and debris of the Department of Defense, or for similar purposes (including programs and operations at sites formerly used by the Department of Defense), transfer the funds made available by this appropriation to other appropriations made available to the Department of Defense as the Secretary may designate, to be merged with and to be available for the same purposes and for the same time period as the appropriations of funds to which transferred: Provided further, That upon a determination that all or part of the funds transferred pursuant to this provision are not necessary for the purposes provided herein, such amounts may be transferred back to this appropriation.

HUMANITARIAN ASSISTANCE

(INCLUDING TRANSFER OF FUNDS)

For transportation for humanitarian relief for refugees of Afghanistan, acquisition of transportation assets to assist in the distribution of such relief, and distribution of excess nonlethal supplies for worldwide humanitarian relief, as authorized by law; $10,000,000: Provided, That not more than $2,500,000 may be transferred to the Secretary of State to provide for necessary expenses related to the transportation of humanitarian relief: Provided further, That of the funds provided under "Operation and Maintenance, Air Force" in Public Law 99-190, $7,000,000 shall remain available for obligation until September 30, 1987, for nonlethal aid to Afghanistan.

TITLE III

PROCUREMENT

AIRCRAFT PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,762,750,000, to remain available for obligation until September 30, 1989.

MISSILE PROCUREMENT, ARMY

For construction, procurement, production, modification, and modernization of missiles, equipment, including ordnance, ground handling equipment, spare parts, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,206,800,000, to remain available for obligation until September 30, 1989.

PROCUREMENT OF WEAPONS AND TRACKED COMBAT VEHICLES, ARMY

For construction, procurement, production, and modification of weapons and tracked combat vehicles, equipment, including ordnance, spare parts and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $3,804,300,000, to remain available for obligation until September 30, 1989: Provided, That none of these funds may be used for the noncompetitive procurement of the M249 Squad Automatic Weapon.

PROCUREMENT OF AMMUNITION, ARMY

For construction, procurement, production, and modification of ammunition, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including ammunition facilities authorized in military construction authorization Acts or authorized by section 2854, title 10, United States Code, and the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $2,087,150,000, to remain available for obligation until September 30, 1989.

OTHER PROCUREMENT, ARMY

For construction, procurement, production, and modification of vehicles, including tactical, support, and nontracked combat vehicles; the purchase of not to exceed two hundred and ninety passenger motor vehicles for replacement only; communications and electronic equipment; other support equipment; spare parts, ordnance, and accessories therefor; specialized equipment and training devices; expansion of public and private plants, including the land necessary therefor, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes; $5,118,752,000, to remain available for obligation until September 30, 1989.

AIRCRAFT PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of aircraft, equipment, including ordnance, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway; $9,794,262,000, to remain available for obligation until September 30, 1989: Provided, That four P-3C aircraft shall be for the Navy Reserve.

WEAPONS PROCUREMENT, NAVY

For construction, procurement, production, modification, and modernization of missiles, torpedoes, other weapons, and related support equipment including spare parts, and accessories therefor; expansion of

public and private plants, including the land necessary therefor, and such lands and interest therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, as follows:

Poseidon, $3,974,000;
TRIDENT I, $4,739,000;
TRIDENT II, $1,362,439,000;
UGM-73A Poseidon Modifications, $95,000;
Support equipment and facilities, $3,790,000;
Tomahawk, $723,800,000;
AIM/RIM-7 F/M Sparrow, $269,394,000;
AIM-9L/M Sidewinder, $35,800,000;
AIM-54A/C Phoenix, $267,272,000;
AIM-54A/C Phoenix advance procurement, $20,000,000;
AGM-84A Harpoon, $123,000,000;
AGM-88A HARM, $256,682,000;
SM-2 MR, $478,611,000;
SM-2 ER, $217,017,000;
RAM, $40,000,000;
Stinger, $39,740,000;
Sidearm, $22,858,000;
Laser Maverick, $165,691,000;
IIR Maverick, $35,200,000;
Aerial targets, $96,000,000;
Drones and decoys, $36,136,000;
Other missile support, $22,017,000;
Modification of missiles, $13,692,000;
Support equipment and facilities, $74,803,000;
Ordnance support equipment, $79,192,000;
MK-48 ADCAP torpedo program, $254,770,000;
MK-46 torpedo program, $97,861,000;
MK-50 torpedo program, $68,137,000;
Antisubmarine rocket (ASROC) program, $13,597,000;
Vertical launched ASROC, $74,289,000;
Modification of torpedoes, $97,705,000;
Torpedo support equipment program, $52,610,000;
MK-15 close-in weapons system program, $105,606,000;
MK-75 gun mount program, $14,875,000;
MK-19 machine gun program, $632,000;
25mm gun mount, $3,919,000;
Small arms and weapons, $10,082,000;
Modification of guns and gun mounts, $57,215,000;
Guns and gun mounts support equipment program, $873,000;
Spares and repair parts, $150,734,000;

In all: $5,290,847,000, to remain available for obligation until September 30, 1989: Provided, That within the total amount appropriated, the subdivisions within this appropriation shall be reduced by $104,000,000.

SHIPBUILDING AND CONVERSION, NAVY

For expenses necessary for the construction, acquisition, or conversion of vessels as authorized by law, including armor and armament thereof, plant equipment, appliances, and machine tools and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; procurement of critical, long leadtime components and designs for vessels to be constructed or converted in the future; and expansion of public and private plants, including land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title, as follows:

TRIDENT ballistic missile submarine program, $1,446,400,000;
SSN-688 attack submarine program, $2,250,800,000;
SSN-21 attack submarine program, $375,000,000;
Aircraft carrier service life extension program, $83,500,000;
CG-47 cruiser program, $2,725,500,000;
DDG-51 destroyer program, $1,750,100,000;
LHD-1 amphibious assault ship program, $35,000,000;
T-AO fleet oiler program, $259,000,000;
AO conversion program, $40,000,000;
T-AGOS ocean surveillance ship program, $228,000,000;
AOE fast combat support ship program, $499,000,000;
Oceanographic research ship program, $33,000,000;
Strategic sealift program, $77,800,000;
T-ACS auxiliary crane ship program, $61,100,000;
For craft, outfitting, and post delivery, $470,789,000;

In all: $10,210,989,000, to remain available for obligation until September 30, 1991: Provided, That within the total amount appropriated, the subdivisions within this appropriation shall be reduced by $124,000,000: Provided further, That additional obligations may be incurred after September 30, 1991, for engineering services, tests, evaluations, and other such budgeted work that must be performed in the final stage of ship construction; and each Shipbuilding and Conversion, Navy, appropriation that is currently available for such obligations may also hereafter be so obligated after the date of its expiration: Provided further, That none of the funds herein provided for the construction or conversion of any naval vessel to be constructed in shipyards in the United States shall be expended in foreign shipyards for the construction of major components of the hull or superstructure of such vessel: Provided further, That none of the funds herein provided shall be used for the construction of any naval vessel in foreign shipyards.

OTHER PROCUREMENT, NAVY

For procurement, production, and modernization of support equipment and materials not otherwise provided for, Navy ordnance and ammunition (except ordnance for new aircraft, new ships, and ships authorized for conversion); the purchase of not to exceed five hundred and ninety-nine passenger motor vehicles of which five hundred and seventy-four shall be for replacement only; expansion of public and private plants, including the land necessary therefor, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; and procurement and installation of equipment, appliances, and machine tools in public and private plants; reserve plant and Government and contractor-owned equipment layaway, as follows:

Ship support equipment, $1,037,619,000;
Communications and electronics equipment, $2,006,277,000;
Aviation support equipment, $788,366,000;
Ordnance support equipment, $1,245,355,000;
Civil engineering support equipment, $209,041,000;
Supply support equipment, $71,823,000;
Personnel and command support equipment, $502,498,000;
Spares and repair parts, $293,692,000;

In all: $6,033,371,000, to remain available for obligation until September 30, 1989: Provided, That within the total amount appropriated, the subdivisions within this appropriation shall be reduced by $121,300,000.

COASTAL DEFENSE AUGMENTATION

For the augmentation of United States Coast Guard inventories to meet national security requirements; $200,000,000, to remain available until expended: Provided, That these funds shall be for the procurement by the Department of Defense of vessels, aircraft, and equipment and for modernization of existing Coast Guard assets, which assets are to be made available to the Coast Guard for operation and maintenance.

PROCUREMENT, MARINE CORPS

For expenses necessary for the procurement, manufacture, and modification of missiles, armament, ammunition, military equipment, spare parts, and accessories therefor; plant equipment, appliances, and machine tools, and installation thereof in public and private plants; reserve plant and Government and contractor-owned equipment layaway; vehicles for the Marine Corps, including purchase of not to exceed sixty-four passenger motor vehicles for replacement only; and expansion of public and private plants, including land necessary therefor, and such lands, and interests therein, may be acquired and construction prosecuted thereon prior to approval of title; $1,465,215,000, to remain available for obligation until September 30, 1989.

AIRCRAFT PROCUREMENT, AIR FORCE

For construction, procurement, and modification of aircraft and equipment, including armor and armament, specialized ground handling equipment, and training devices, spare parts, and accessories therefor; specialized equipment; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $17,131,281,000, to remain available for obligation until September 30, 1989: Provided, That none of the funds in this Act may be obligated on B-1B bomber production contracts if such contracts would cause the production portion of the Air Force's $20,500,000,000 estimate for the B-1B bomber baseline costs expressed in fiscal year 1981 constant dollars to be exceeded: Provided further, That notwithstanding the provisions of section 9032 of this Act (A) the Secretary of the Air Force may award a multiyear contract that employs economic order quantity procurement for the purchase of Air Defense Aircraft in accordance with section 2306(h) of title 10, United States Code, without prior notice to Congress if the results of the competitive source selection demonstrate that (1) a multiyear contract will yield significant savings over the amount that would have resulted under an annual contract with the selected offeror; and (2) those savings have a positive present value; (B) the cancellation ceiling associated with the first year of a multiyear contract under subsection (A) may be carried as an unfunded contingent liability subject to section 2306(h)(5) of title 10, United States Code: Provided further, That $151,000,000 is available only for production of T-46A air-

craft and related costs: Provided further, That $170,100,000 provided in fiscal year 1986 under this heading is available only for the production of T-46A aircraft and related costs: Provided further, That none of the funds provided in this or any prior Act may be used for the T-46A airframe production contract which existed on October 1, 1986 for other than lot one production: Provided further, That (1) the maximum program production cost for the T-46A aircraft program is $3,100,000,000 (in fiscal year 1986 dollars), based upon procurement of 650 aircraft. The maximum production unit cost for such program is $4,800,000 (in fiscal year 1986 dollars). The program production cost and production unit cost for such program determined for the purposes of this proviso shall be determined without regard to amounts for initial spares. (2) If during any fiscal year, after fiscal year 1987, the maximum program production cost or production unit cost for procurement of 650 aircraft is exceeded, the Secretary of the Air Force may not procure any T-46A aircraft during a later fiscal year no earlier than fiscal year 1989 until the Secretary has conducted a competition for procurement of that aircraft.

MISSILE PROCUREMENT, AIR FORCE

For construction, procurement, and modification of missiles, spacecraft, rockets, and related equipment, including spare parts and accessories therefor, ground handling equipment, and training devices; expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; and other expenses necessary for the foregoing purposes including rents and transportation of things; $7,446,718,000, to remain available for obligation until September 30, 1989: Provided, That no funds may be obligated or expended for Lot 1 low-rate production of the Advanced Medium Range Air-to-Air Missile, with the exception of long-lead procurement, until this missile has demonstrated, in flight test, the capability to successfully engage a minimum of two targets with two missiles on the same intercept in an electronic countermeasure environment after the missiles have been launched: Provided further, That funds made available for a portion of the MX missile program by the appropriation "Missile Procurement, Air Force, 1985/1987" and prior year funds referred to in that appropriation, shall remain available for the period originally appropriated for the purchase of the first 33 MX missiles of the MX missile program.

OTHER PROCUREMENT, AIR FORCE

For procurement and modification of equipment (including ground guidance and electronic control equipment, and ground electronic and communication equipment), and supplies, materials, and spare parts therefor, not otherwise provided for; for the purchase of not to exceed seven hundred and forty-seven passenger motor vehicles of which six hundred and fifty-nine shall be for replacement only; and expansion of public and private plants, Government-owned equipment and installation thereof in such plants, erection of structures, and acquisition of land, for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon, prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; $9,254,941,000, to remain available for obligation until September 30, 1989.

NATIONAL GUARD AND RESERVE EQUIPMENT

For procurement of aircraft, missiles, tracked combat vehicles, ammunition, other weapons, and other procurement for the reserve components of the Armed Forces, as follows:

Army Reserve, $90,000,000;
Army National Guard, $146,000,000;
Air National Guard, $50,000,000;
Navy Reserve, $61,000,000;
Marine Corps Reserve, $60,000,000;
Air Force Reserve, $150,000,000;

In all: $557,000,000, to remain available for obligation until September 30, 1989.

PROCUREMENT, DEFENSE AGENCIES

For expenses of activities and agencies of the Department of Defense (other than the military departments) necessary for procurement, production, and modification of equipment, supplies, materials, and spare parts therefor, not otherwise provided for; the purchase of not to exceed seven hundred and seventy-nine passenger motor vehicles of which two hundred and fifty-nine shall be for replacement only; expansion of public and private plants, equipment, and installation thereof in such plants, erection of structures, and acquisition of land for the foregoing purposes, and such lands and interests therein, may be acquired, and construction prosecuted thereon prior to approval of title; reserve plant and Government and contractor-owned equipment layaway; $1,498,256,000, to remain available for obligation until September 30, 1989.

DEFENSE PRODUCTION ACT PURCHASES

For purchases or commitments to purchase metals, minerals, or other materials by the Department of Defense pursuant to section 303 of the Defense Production Act of 1950, as amended (50 U.S.C. App. 2093); $13,000,000, to remain available for obligation until September 30, 1989.

TITLE IV

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, ARMY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $4,556,076,000, to remain available for obligation until September 30, 1988.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, NAVY

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $9,326,418,000, to remain available for obligation until September 30, 1988; of the total amount available for obligation $173,525,000 is available only for full-scale development of the MK-50 Advanced Lightweight Torpedo Program, $39,704,000 is available only for the Low Cost Anti-Radiation Seeker Program, and $3,000,000 is available only for the Aircrew Impact Injury Prevention Project: Provided, That the funds available for the V-22 Osprey Program shall not be subject to obligational limitations set forth in a National Defense Authorization Act for fiscal year 1987: Provided further, That funds made available for the Surface ASW Systems Improvement Program shall not be obligated or expended until a Joint Resources Management Board Milestone II decision and a Secretary of Defense Decision Memorandum have approved the initiation of full-scale engineering development: Provided further, That $1,800,000 shall be made available for research and development and related equipment for the Institute for Technology Development, as a grant, for the National Center for Physical Acoustics.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, AIR FORCE

For expenses necessary for basic and applied scientific research, development, test, and evaluation, including maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $15,062,783,000, to remain available for obligation until September 30, 1988; of the total amount available for obligation $17,375,000 is available only for the Low Cost Seeker Program.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION, DEFENSE AGENCIES

(INCLUDING TRANSFER OF FUNDS)

For expenses of activities and agencies of the Department of Defense (other than the military departments), necessary for basic and applied scientific research, development, test, and evaluation; advanced research projects as may be designated and determined by the Secretary of Defense, pursuant to law; maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law; $6,742,091,000, to remain available for obligation until September 30, 1988: Provided, That such amounts as may be determined by the Secretary of Defense to have been made available in other appropriations available to the Department of Defense during the current fiscal year for programs related to advanced research may be transferred to and merged with this appropriation to be available for the same purposes and time period: Provided further, That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to carry out the purposes of advanced research to those appropriations for military functions under the Department of Defense which are being utilized for related programs to be merged with and to be available for the same time period as the appropriation to which transferred: Provided further, That $200,000,000 is available to the Secretary of Defense only for the Conventional Defense Initiatives (CDI) program, which shall include conventional defense initiatives and conventional applications of the technologies developed under the Strategic Defense Initiative (SDI): Provided further, That such funds shall be under the control and management of the Secretary of Defense, who, with the concurrence of the Joint Chiefs of Staff, shall develop a plan for the utilization of emerging technologies for conventional applications including such technologies applicable from the Strategic Defense Initative: Provided further, That not more than $100,000,000 of these funds shall be obligated or expended until the Secretary of Defense identifies the specific technology development efforts to be drawn from SDI, and the conventional defense applications for which they will be utilized. None of the restricted funds shall be obligated or expended until 15 days after the Secretary of Defense provides such notification to Congress,

but not earlier than July 1, 1987: Provided further, That no portion of the $200,000,000 made available to the Secretary of Defense be applied to any program, project, or activity in support of the Strategic Defense Initiative: Provided further, That $55,000,000 of funds made available for the National Aerospace Plane (NASP) Program may not be obligated or expended until the Secretary of Defense certifies that the Department of Defense and the National Aeronautics and Space Administration (NASA) have negotiated revised funding arrangements for NASP development which significantly increase NASA investment as a percentage of total NASP research, development, test and evaluation costs and which incorporate mandatory industry investment out of private capital.

DEVELOPMENTAL TEST AND EVALUATION, DEFENSE

For expenses, not otherwise provided for, of independent activities of the Deputy Under Secretary of Defense, Developmental Test and Evaluation in the direction and supervision of developmental test and evaluation, including performance of joint developmental testing and evaluation; and administrative expenses in connection therewith; $105,546,000, to remain available for obligation until September 30, 1988.

OPERATIONAL TEST AND EVALUATION, DEFENSE

For expenses, not otherwise provided for, necessary for the independent activities of the Director, Operational Test and Evaluation in the direction and supervision of operational test and evaluation, including initial operational test and evaluation which is conducted prior to, and in support of, production decisions; joint operational testing and evaluation; and administrative expenses in connection therewith; $11,300,000, to remain available for obligation until September 30, 1988.

TITLE V

SPECIAL FOREIGN CURRENCY PROGRAM

For payment in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States for expenses in carrying out programs of the Department of Defense, as authorized by law; $3,500,000, to remain available for obligation until September 30, 1988: Provided, That this appropriation shall be available in addition to other appropriations to such Department, for payments in the foregoing currencies.

TITLE VI

REVOLVING AND MANAGEMENT FUNDS

ARMY STOCK FUND

For the Army stock fund; $110,100,000.

NAVY STOCK FUND

For the Navy stock fund; $352,570,000.

MARINE CORPS STOCK FUND

For the Marine Corps stock fund; $822,000.

AIR FORCE STOCK FUND

For the Air Force stock fund; $139,980,000.

DEFENSE STOCK FUND

For the Defense stock fund; $47,200,000.

TITLE VII

CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE

For expenses, not otherwise provided for, necessary for the destruction of the United States stockpile of lethal chemical agents and munitions in accordance with the provisions of section 1412 of the Department of Defense Authorization Act, 1986; $118,700,000, of which $59,900,000 shall remain available for obligation until September 30, 1987, $9,600,000 shall remain available for obligation until September 30, 1988, and $49,200,000 shall remain available for obligation until September 30, 1989.

TITLE VIII

RELATED AGENCIES

CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM FUND

For payment to the Central Intelligence Agency Retirement and Disability System Fund, to maintain proper funding level for continuing the operation of the Central Intelligence Agency Retirement and Disability System; $125,800,000.

INTELLIGENCE COMMUNITY STAFF

For necessary expenses of the Intelligence Community Staff; $21,738,000.

THE BARRY GOLDWATER SCHOLARSHIP AND EXCELLENCE IN EDUCATION FUND

For payment to the Barry Goldwater Scholarship and Excellence in Education Fund in the Department of the Treasury, pursuant to section 5104 of the National Defense Authorization Act for Fiscal Year 1987 (S. 2638) as passed the Senate on August 9, 1986, as if said section had been enacted into law; $40,000,000, to remain available until expended.

THE HENRY M. JACKSON FOUNDATION

For payment to the Henry M. Jackson Foundation, a direct and unrestricted grant, including any interest or earnings therefrom, to support the purposes of the Foundation, its on-going educational and public services programs and to serve as a memorial to the late Senator Henry M. Jackson; $10,000,000: Provided, That, notwithstanding any other provision of law or of this Act, the Secretary of Defense is hereby authorized and directed to make the grant authorized by this section to the Henry M. Jackson Foundation, and such grant shall be transferred to the Foundation by January 1, 1987.

TITLE IX

GENERAL PROVISIONS

SEC. 9001. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to section 3109 of title 5, United States Code, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

SEC. 9002. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress.

SEC. 9003. During the current fiscal year, the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force, respectively, if they should deem it advantageous to the national defense, and if in their opinions the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 3109 of title 5, United States Code, under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty stations and return as may be authorized by law: Provided, That such contracts may be renewed annually.

SEC. 9004. During the current fiscal year, provisions of law prohibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 9005. The Secretary of Defense and each purchasing and contracting agency of the Department of Defense shall assist American small and minority-owned business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by increasing, to an optimum level, the resources and number of personnel jointly assigned to promoting both small and minority business involvement in purchases financed with funds appropriated herein, and by making available or causing to be made available to such businesses, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by assisting small and minority business concerns to participate equitably as subcontractors on contracts financed with funds appropriated herein, and by otherwise advocating and providing small and minority business opportunities to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 9006. No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

SEC. 9007. No part of the appropriations in this Act shall be available for any expense of operating aircraft under the jurisdiction of the armed forces for the purpose of proficiency flying, as defined in Department of Defense Directive 1340.4, except in accordance with regulations prescribed by the Secretary of Defense. Such regulations (1) may not require such flying except that required to maintain proficiency in anticipation of a member's assignment to combat operations and (2) such flying may not be permitted in cases of members who have been assigned to a course of instruction of ninety days or more.

SEC. 9008. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in any one shipment having a net weight in excess of eighteen thousand pounds.

SEC. 9009. No more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year: Provided, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps, or the National Board for the Promotion of Rifle Practice, Army, or to the appropriations provided in this Act for Claims, Defense.

SEC. 9010. During the current fiscal year the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

In addition to the foregoing, agencies of the Department of Defense may accept real property, services, and commodities from

foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and such agencies may use the same for the support of the United States forces in such areas, without specific appropriations therefor: Provided, That the foregoing authority shall not be available for the conversion of heating plants from coal to oil at defense facilities in Europe: Provided further, That within thirty days after the end of each quarter the Secretary of Defense shall render to Congress and to the Office of Management and Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. 9011. No part of any appropriation contained in this Act, except for small purchases in amounts not exceeding $10,000 shall be available for the procurement of any article of food, clothing, cotton, woven silk or woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles), or specialty metals including stainless steel flatware, or hand or measuring tools, not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, woven silk and woven silk blends, spun silk yarn for cartridge cloth, synthetic fabric or coated synthetic fabric, wool, or specialty metals including stainless steel flatware, grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters, and emergency procurements or procurements of perishable foods by establishments located outside the United States for the personnel attached thereto: Provided, That nothing herein shall preclude the procurement of specialty metals or chemical warfare protective clothing produced outside the United States or its possessions when such procurement is necessary to comply with agreements with foreign governments requiring the United States to purchase supplies from foreign sources for the purposes of offsetting sales made by the United States Government or United States firms under approved programs serving defense requirements or where such procurement is necessary in furtherance of the standardization and interoperability of equipment requirements within NATO so long as such agreements with foreign governments comply, where applicable, with the requirements of section 36 of the Arms Export Control Act and with section 2457 of title 10, United States Code: Provided further, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: Provided further, That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a formally advertised competitive bid basis to the lowest responsible bidder.

SEC. 9012. During the current fiscal year, appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by section 5901 of title 5, United States Code.

SEC. 9013. Funds provided in this Act for legislative liaison activities of the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense shall not exceed $13,900,000 for the current fiscal year: Provided, That this amount shall be available for apportionment to the Department of the Army, the Department of the Navy, the Department of the Air Force, and the Office of the Secretary of Defense as determined by the Secretary of Defense: Provided further, That costs for military retired pay accrual shall be included within this limitation.

SEC. 9014. Of the funds made available by this Act for the services of the Military Airlift Command, $100,000,000 shall be available only for procurement of commercial transportation service from carriers participating in the civil reserve air fleet program; and the Secretary of Defense shall utilize the services of such carriers which qualify as small businesses to the fullest extent found practicable: Provided, That the Secretary of Defense shall specify in such procurement, performance characteristics for aircraft to be used based upon modern aircraft operated by the civil reserve air fleet.

(TRANSFER OF FUNDS)

SEC. 9015. Upon determination by the Secretary of Defense that such action is necessary in the national interest, he may, with the approval of the Office of Management and Budget, transfer not to exceed $1,100,000,000 of working capital funds of the Department of Defense or funds made available in this Act to the Department of Defense for military functions (except military construction) between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: Provided, That such authority to transfer may not be used unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which funds are requested has been denied by Congress: Provided further, That the Secretary of Defense shall notify the Congress promptly of all transfers made pursuant to this authority.

(TRANSFER OF FUNDS)

SEC. 9016. During the current fiscal year, cash balances in working capital funds of the Department of Defense established pursuant to section 2208 of title 10, United States Code, may be maintained in only such amounts as are necessary at any time for cash disbursements to be made from such funds: Provided, That transfers may be made between such funds in such amounts as may be determined by the Secretary of Defense, with the approval of the Office of Management and Budget, except that transfers between a stock fund account and an industrial fund account may not be made unless the Secretary of Defense has notified the Congress of the proposed transfer. Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure war reserve material inventory, unless the Secretary of Defense has notified the Congress prior to any such obligation.

SEC. 9017. None of the funds available to the Department of Defense shall be utilized for the conversion of heating plants from coal to oil at defense facilities in Europe.

SEC. 9018. No part of the funds in this Act shall be available to prepare or present a request to the Committees on Appropriations for reprogramming of funds, unless for higher priority items, based on unforeseen military requirements, than those for which originally appropriated and in no case where the item for which reprogramming is requested has been denied by the Congress.

SEC. 9019. None of the funds contained in this Act available for the Civilian Health and Medical Program of the Uniformed Services under the provisions of section 1079(a) of title 10, United States Code, shall be available for reimbursement of any physician or other authorized individual provider of medical care in excess of the eightieth percentile of the customary charges made for similar services in the same locality where the medical care was furnished, as determined for physicians in accordance with section 1079(h) of title 10, United States Code.

SEC. 9020. No appropriation contained in this Act may be used to pay for the cost of public affairs activities of the Department of Defense in excess of $43,900,000: Provided, That costs for military retired pay accrual shall be included within this limitation.

SEC. 9021. None of the funds provided in this Act shall be available for the planning or execution of programs which utilize amounts credited to Department of Defense appropriations or funds pursuant to the provisions of section 37(a) of the Arms Export Control Act representing payment for the actual value of defense articles specified in section 21(a)(1)(A) of that Act: Provided, That such amounts shall be credited to the Special Defense Acquisition Fund, as authorized by law, or, to the extent not so credited shall be deposited in the Treasury as miscellaneous receipts as provided in section 3302(b) of title 31, United States Code.

SEC. 9022. No appropriation contained in this Act shall be available to fund any costs of a Senior Reserve Officers' Training Corps unit—except to complete training of personnel enrolled in Military Science 4—which in its junior year class (Military Science 3) has for the four preceding academic years, and as of September 30, 1983, enrolled less than (a) seventeen students where the institution prescribes a four-year or a combination four- and two-year program; or (b) twelve students where the institution prescribes a two-year program: Provided, That, notwithstanding the foregoing limitation, funds shall be available to maintain one Senior Reserve Officers' Training Corps unit in each State and at each State-operated maritime academy: Provided further, That units under the consortium system shall be considered as a single unit for purposes of evaluation of productivity under this provision: Provided further, That enrollment standards contained in Department of Defense Directive 1215.8 for Senior Reserve Officers' Training Corps units, as revised during fiscal year 1981, may be used to determine compliance with this provision, in lieu of the standards cited above.

SEC. 9023. None of the funds appropriated by this Act for programs of the Central Intelligence Agency shall remain available for obligation beyond the current fiscal year, except for funds appropriated for the Reserve for Contingencies, which shall remain available until September 30, 1988.

SEC. 9024. None of the funds appropriated by this Act may be used to support more than 9,901 full-time and 2,603 part-time

military personnel assigned to or used in the support of Morale, Welfare, and Recreation activities as described in Department of Defense Instruction 7000.12 and its enclosures, dated September 4, 1980.

SEC. 9025. All obligations incurred in anticipation of the appropriations and authority provided in this Act are hereby ratified and confirmed if otherwise in accordance with the provisions of this Act.

SEC. 9026. None of the funds appropriated by this Act or heretofore appropriated by any other Act shall be obligated or expended for the payment of anticipatory possession compensation claims to the Federal Republic of Germany other than claims listed in the 1973 agreement (commonly referred to as the Global Agreement) between the United States and the Federal Republic of Germany.

SEC. 9027. During the current fiscal year the Department of Defense may enter into contracts to recover indebtedness to the United States pursuant to section 3718 of title 31, United States Code.

SEC. 9028. None of the funds appropriated by this Act shall be available for a contract for studies, analyses, or consulting services entered into without competition on the basis of an unsolicited proposal unless the head of the activity responsible for the procurement determines:

(a) as a result of thorough technical evaluation, only one source is found fully qualified to perform the proposed work, or

(b) the purpose of the contract is to explore an unsolicited proposal which offers significant scientific or technological promise, represents the product of original thinking, and was submitted in confidence by one source, or

(c) where the purpose of the contract is to take advantage of unique and significant industrial accomplishment by a specific concern, or to insure that a new product or idea of a specific concern is given financial support:

Provided, That this limitation shall not apply to contracts in an amount of less than $25,000, contracts related to improvements of equipment that is in development or production, or contracts as to which a civilian official of the Department of Defense, who has been confirmed by the Senate, determines that the award of such contract is in the interest of the national defense.

SEC. 9029. None of the funds appropriated by this Act shall be available to provide medical care in the United States on an inpatient basis to foreign military and diplomatic personnel or their dependents unless the Department of Defense is reimbursed for the costs of providing such care: Provided, That reimbursements for medical care covered by this section shall be credited to the appropriations against which charges have been made for providing such care, except that inpatient medical care may be provided in the United States without cost to military personnel and their dependents from a foreign country if comparable care is made available to a comparable number of United States military personnel in that foreign country.

SEC. 9030. None of the funds appropriated by this Act shall be obligated for the second career training program authorized by Public Law 96-347.

SEC. 9031. None of the funds appropriated or otherwise made available in this Act shall be obligated or expended for salaries or expenses during the current fiscal year for the purposes of demilitarization of surplus nonautomatic firearms less than .50 caliber.

SEC. 9032. None of the funds provided in this Act shall be available to initiate (1) a multiyear contract that employs economic order quantity procurement in excess of $20,000,000 in any one year of the contract or that includes an unfunded contingent liability in excess of $20,000,000, or (2) a contract for advance procurement leading to a multiyear contract that employs economic order quantity procurement in excess of $20,000,000 in any one year, unless the Committees on Appropriations and Armed Services of the Senate and House of Representatives have been notified at least thirty days in advance of the proposed contract award: Provided, That no part of any appropriation contained in this Act shall be available to initiate a multiyear contract for which the economic order quantity advance procurement is not funded at least to the limits of the Government's liability: Provided further, That no part of any appropriation contained in this Act shall be available to initiate multiyear procurement contracts for any systems or component thereof if the value of the multiyear contract would exceed $500,000,000 unless specifically provided in this Act: Provided further, That the execution of multiyear authority shall require the use of a present value analysis to determine lowest cost compared to an annual procurement. Funds appropriated in title III of this Act may be used for multiyear procurement contracts as follows:

UH-60/EH-60 airframe;

Patriot missile system;

Stinger missile system; and

Defense support program.

SEC. 9033. None of the funds appropriated by this Act which are available for payment of travel allowances for per diem in lieu of subsistence to enlisted personnel shall be used to pay such an allowance to any enlisted member in an amount that is more than the amount of per diem in lieu of subsistence that the enlisted member is otherwise entitled to receive minus the basic allowance for subsistence, or pro rata portion of such allowance, that the enlisted member is entitled to receive during any day, or portion of a day, that the enlisted member is also entitled to be paid a per diem in lieu of subsistence.

SEC. 9034. None of the funds appropriated by this Act shall be available to approve a request for waiver of the costs otherwise required to be recovered under the provisions of section 21(e)(1)(C) of the Arms Export Control Act unless the Committees on Appropriations have been notified in advance of the proposed waiver.

SEC. 9035. In the administration of the provisions of chapter 13 of title 38, United States Code, Michael J. Smith, pilot of the space shuttle, Challenger, shall be deemed to have held the grade of captain, United States Navy, at the time of his death on January 28, 1986, while so serving as pilot of such space shuttle.

SEC. 9036. (a) None of the funds in this Act may be used to transfer any article of military equipment or data related to the manufacture of such equipment to a foreign country prior to the approval in writing of such transfer by the Secretary of the military service involved.

(b) TECHNICAL DATA PACKAGES FOR PRODUCTION OF LARGE-CALIBER CANNON.—(1) Chapter 433 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception

"(a) GENERAL RULE.—Funds appropriated to the Department of Defense may not be used—

"(1) to transfer to a foreign country a technical data package for a defense item being manufactured or developed in an arsenal; or

"(2) to assist a foreign country in producing such a defense item.

"(b) EXCEPTION.—The Secretary of the Army may use funds appropriated to the Department of Defense to transfer a technical data package, or to provide assistance, described in subsection (a) if—

"(1) the transfer or provision of assistance is to a friendly foreign country (as determined by the Secretary of Defense in consultation with the Secretary of State);

"(2) the Secretary of the Army determines that such action—

"(A) would have a clear benefit to the preservation of the production base for the production of cannon at the arsenal concerned; and

"(B) would not transfer technology (including production techniques) considered unique to the arsenal concerned; and

"(3) the Secretary of Defense enters into an agreement with the country concerned described in subsection (c).

"(c) COPRODUCTION AGREEMENTS.—An agreement under this subsection shall be in the form of a Government-to-Government Memorandum of Understanding and shall include provisions that—

"(1) prescribe the content of the technical data package or assistance to be transferred to the foreign country participating in the agreement;

"(2) require that production by the participating foreign country of the defense item to which the technical data package or assistance relates be shared with the arsenal concerned;

"(3) subject to such exceptions as may be approved under subsection (d), prohibit transfer by the participating foreign country to a third party or country of—

"(A) any defense article, technical data package, technology, or assistance provided by the United States under the agreement; and

"(B) any defense article produced by the participating foreign country under the agreement; and

"(4) require the Secretary of Defense to monitor compliance with the agreement and the participating foreign country to report periodically to the Secretary of Defense concerning the agreement.

"(d) TRANSFERS TO THIRD PARTIES.—A transfer described in subsection (b)(3) may be made if—

"(1) the defense article, technical data package, or technology to be transferred is a product of a cooperative research and development program in which the United States and the participating foreign country were partners; or

"(2) the President—

"(A) complies with all requirements of section 3(d) of the Arms Export Control Act (22 U.S.C. 2753(d)) with respect to such transfer; and

"(B) certifies to Congress, before the transfer, that the transfer would provide a clear benefit to the production base of the United States for large-caliber cannon.

"(e) NOTICE AND REPORTS TO CONGRESS.—(1) The Secretary of the Army shall submit

to Congress a notice of each agreement entered into under this section.

"(2) The Secretary shall submit to Congress a semiannual report on the operation of this section and of agreements entered into under this section.

"(f) ARSENAL DEFINED.—In this section, the term 'arsenal' means a Government-owned, Government-operated defense plant that manufactures large-caliber cannon.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"4542. Technical data packages for large-caliber cannon: prohibition on transfers to foreign countries; exception.".

(c) EFFECTIVE DATE.—Section 4542 of title 10, United States Code, as added by subsection (b), shall apply with respect to funds appropriated for fiscal years after fiscal year 1986.

(TRANSFER OF FUNDS)

SEC. 9037. None of the funds appropriated in this Act may be made available through transfer, reprogramming, or other means for any intelligence or special activity different from that previously justified to the Congress unless the Director of Central Intelligence or the Secretary of Defense has notified the House and Senate Appropriations Committees of the intent to make such funds available for such activity.

SEC. 9038. None of the funds available to the Department of Defense during the current fiscal year shall be used by the Secretary of a military department to purchase coal or coke from foreign nations for use at United States defense facilities in Europe when coal from the United States is available.

SEC. 9039. None of the funds available to the Department of Defense shall be available for the procurement of manual typewriters which were manufactured by facilities located within states which are Signatories to the Warsaw Pact.

SEC. 9040. None of the funds appropriated by this Act may be used to appoint or compensate more than 39 individuals in the Department of Defense in positions in the Executive Schedule (as provided in sections 5312-5316 of title 5, United States Code).

SEC. 9041. None of the funds appropriated by this Act shall be available to convert a position in support of the Army Reserve, Air Force Reserve, Army National Guard, and Air National Guard occupied by, or programmed to be occupied by, a (civilian) military technician to a position to be held by a person in an active Guard or Reserve status if that conversion would reduce the total number of positions occupied by, or programmed to be occupied by, (civilian) military technicians of the component concerned, below 67,557: Provided, That none of the funds appropriated by this Act shall be available to support more than 45,098 positions in support of the Army Reserve, Army National Guard or Air National Guard occupied by, or programmed to be occupied by, persons in an active Guard or Reserve status: Provided further, That none of the funds appropriated by this Act may be used to include (civilian) military technicians in computing civilian personnel ceilings, including statutory or administratively imposed ceilings, on activities in support of the Army Reserve, Air Force Reserve, Army National Guard or Air National Guard.

SEC. 9042. (a) The provisions of section 138(c)(2) of title 10, United States Code, shall not apply with respect to fiscal year 1987 or with respect to the appropriation of funds for that year.

(b) During fiscal year 1987, the civilian personnel of the Department of Defense may not be managed on the basis of any end-strength, and the management of such personnel during that fiscal year shall not be subject to any constraint or limitation (known as an end-strength) on the number of such personnel who may be employed on the last day of such fiscal year.

(c) The fiscal year 1988 budget request for the Department of Defense as well as all justification material and other documentation supporting the fiscal year 1988 Department of Defense budget request shall be prepared and submitted to the Congress as if subsections (a) and (b) of this provision were effective with regard to fiscal year 1988.

SEC. 9043. Notwithstanding any other provision of law, none of the funds made available by this Act shall be used by the Department to exceed, outside the fifty States of the United States and the District of Columbia, the aggregate civilian workyear totals in fiscal year 1986 for both direct hire and indirect hire employees including foreign national employees: Provided, That workyears shall be applied as defined in the Federal Personnel Manual Supplement 298-2, Book IV.

(TRANSFER OF FUNDS)

SEC. 9044. Appropriations or funds available to the Department of Defense during the current fiscal year may be transferred to appropriations provided in this Act for research, development, test, and evaluation to the extent necessary to meet increased pay costs authorized by or pursuant to law, to be merged with and to be available for the same purposes, and the same time period, as the appropriation to which transferred.

SEC. 9045. None of the funds available to the Central Intelligence Agency, the Department of Defense, or any other agency or entity of the United States involved in intelligence activities may be obligated or expended during fiscal year 1987 to provide funds, materiel, or other assistance to the Nicaraguan democratic resistance unless in accordance with the terms and conditions specified by section 106 of the Intelligence Authorization Act for fiscal year 1987.

(RESCISSION)

SEC. 9046. The following funds are hereby rescinded from the following accounts in the specified amounts:

Aircraft procurement, Army, 1985/1987	$15,600,000
Aircraft procurement, Army, 1986/1988	$78,800,000
Missile procurement, Army, 1985/1987	$32,800,000
Missile procurement, Army, 1986/1988	$66,800,000
Procurement of weapons and tracked combat vehicles, Army, 1985/1987	$25,100,000
Procurement of weapons and tracked combat vehicles, Army, 1986/1988	$188,200,000
Procurement of ammunition, Army, 1985/1987	$33,000,000
Procurement of ammunition, Army, 1986/1988	$39,562,000
Other procurement, Army, 1985/1987	$45,400,000
Other procurement, Army, 1986/1988	$133,300,000
Aircraft procurement, Navy, 1985/1987	$170,700,000
Aircraft procurement, Navy, 1986/1988	$408,200,000
Weapons procurement, Navy, 1985/1987	$59,500,000
Weapons procurement, Navy, 1986/1988	$185,100,000
Shipbuilding and conversion, Navy, 1983/1987	$338,500,000
Shipbuilding and conversion, Navy, 1984/1988	$53,000,000
Shipbuilding and conversion, Navy, 1985/1989	$141,100,000
Shipbuilding and conversion, Navy, 1986/1990	$737,900,000
Other procurement, Navy, 1985/1987	$18,434,000
Other procurement, Navy, 1986/1988	$214,769,000
Procurement, Marine Corps, 1985/1987	$7,100,000
Procurement, Marine Corps, 1986/1988	$19,400,000
Aircraft procurement, Air Force, 1985/1987	$513,300,000
Aircraft procurement, Air Force, 1986/1988	$619,500,000
Missile procurement, Air Force, 1985/1987	$41,600,000
Missile procurement, Air Force, 1986/1988	$629,700,000
Other procurement, Air Force, 1985/1987	$68,611,000
Other procurement, Air Force, 1986/1988	$122,900,000
Research, development, test and evaluation, Army, 1986/1987	$45,523,000
Research, development, test and evaluation, Navy, 1986/1987	$54,878,000
Research, development, test and evaluation, Air Force, 1986/1987	$167,000,000
Research, development, test and evaluation, Defense Agencies, 1986/1987	$48,400,000
Director of developmental test and evaluation, Defense, 1986/1987	$200,000

(TRANSFER OF FUNDS)

SEC. 9047. In addition to any other transfer authority contained in this Act, amounts from working capital funds may be transferred to the Operation and Maintenance appropriations contained in this Act to be merged with and to be available for the same purposes and for the same time period as the appropriation to which transferred: Provided, That such transfers shall not exceed $755,300,000 for Operation and Maintenance, Army; $2,341,400,000 for Operation and Maintenance, Navy; $29,200,000 for Operation and Maintenance, Marine Corps; $1,864,100,000 for Operation and Maintenance, Air Force; $40,600,000 for Operation and Maintenance, Defense Agencies; $14,526,000 for Operation and Maintenance, Army Reserve; $66,500,000 for Operation and Maintenance, Navy Reserve; $800,000 for Operation and Maintenance, Marine Corps Reserve; $63,000,000 for Operation and Maintenance, Air Force Reserve; $31,874,000 for Operation and Maintenance, Army National Guard; and $176,700,000 for Operation and Maintenance, Air National Guard.

SEC. 9048. None of the funds made available by this Act shall be used in any way for the leasing to non-Federal agencies in the United States aircraft or vehicles owned or operated by the Department of Defense when suitable aircraft or vehicles are commercial-

ly available in the private sector: Provided, That nothing in this section shall affect authorized and established procedures for the sale of surplus aircraft or vehicles: Provided further, That nothing in this section shall prohibit the leasing of helicopters authorized by section 1463 of the Department of Defense Authorization Act of 1986.

SEC. 9049. None of the funds made available by this Act shall be used in any way, directly or indirectly, to influence congressional action on any legislation or appropriation matters pending before the Congress.

SEC. 9050. No funds available to the Department of Defense during the current fiscal year may be used to enter into any contract with a term of eighteen months or more or to extend or renew any contract for a term of eighteen months or more, for any vessel, aircraft or vehicles, through a lease, charter, or similar agreement without previously having been submitted to the Committees on Appropriations of the House of Representatives and the Senate in the budgetary process. Further, any contractual agreement which imposes an estimated termination liability (excluding the estimated value of the leased item at the time of termination) on the Government exceeding 50 per centum of the original purchase value of the vessel, aircraft, or vehicle must have specific authority in an appropriation Act for the obligation of 10 per centum of such termination liability.

SEC. 9051. None of the funds made available by this Act shall be available to operate in excess of 247 commissaries in the contiguous United States.

SEC. 9052. None of the funds provided in this Act shall be used to procure aircraft ejection seats manufactured in any foreign nation that does not permit United States manufacturers to compete for ejection seat procurement requirements in that foreign nation. This limitation shall apply only to ejection seats procured for installation on aircraft produced or assembled in the United States.

SEC. 9053. No more than $174,598,000 of the funds appropriated by this Act shall be available for the payment of unemployment compensation benefits.

SEC. 9054. None of the funds appropriated by this Act shall be obligated for the pay of any individual who is initially employed after the date of enactment of this Act as a technician in the administration and training of the Army Reserve and the maintenance and repair of supplies issued to the Army Reserve unless such individual is also a military member of the Army Reserve troop program unit that he or she is employed to support. Those technicians employed by the Army Reserve in areas other than Army Reserve troop program units need only be members of the Selected Reserve.

SEC. 9055. None of the funds appropriated by this Act shall be used to purchase dogs or cats or otherwise fund the use of dogs or cats for the purpose of training Department of Defense students or other personnel in surgical or other medical treatment of wounds produced by any type of weapon: Provided, That the standards of such training with respect to the treatment of animals shall adhere to the Federal Animal Welfare Law and to those prevailing in the civilian medical community.

SEC. 9056. None of the funds made available by this Act shall be used to initiate full-scale engineering development of any major defense acquisition program until the Secretary of Defense has provided to the Committees on Appropriations of the House and Senate—

(a) a certification that the system or subsystem being developed will be procured in quantities that are not sufficient to warrant development of two or more production sources, or

(b) a plan for the development of two or more sources for the production of the system or subsystem being developed.

SEC. 9057. None of the funds available to the Department of Defense may be used for the floating storage of petroleum or petroleum products except in vessels of or belonging to the United States.

SEC. 9058. Of the funds made available to the Department of the Air Force in this Act, not less than $5,000,000 shall be available for the Civil Air Patrol.

SEC. 9059. Funds available to the Department of Defense may be used by the Department of Defense for the use of helicopters and motorized equipment at Defense installations for removal of feral burros and horses.

(TRANSFER OF FUNDS)

SEC. 9060. Not to exceed $100,000,000 may be transferred from the appropriation "Operation and Maintenance, Defense Agencies" to operation and maintenance appropriations under the military departments in connection with demonstration projects authorized by section 1092 of title 10, United States Code: Provided, That the Secretary of Defense shall promptly notify the Congress of any such transfer of funds under this provision: Provided further, That the authority to make transfers pursuant to this section is in addition to the authority to make transfers under other provisions of this Act.

SEC. 9061. None of the funds appropriated by this Act shall be available to compensate foreign selling costs as described in Federal Acquisition Regulation 31.205-38(b) as in effect on April 1, 1984.

SEC. 9062. Of the funds appropriated for the operation and maintenance of the Armed Forces, obligations may be incurred for humanitarian and civic assistance costs incidental to authorized operations, and these obligations shall be reported to Congress on September 30, 1987: Provided, That funds available for operation and maintenance shall be available for providing humanitarian and similar assistance by using Civic Action Teams in the Trust Territories of the Pacific Islands and freely associated states of Micronesia, pursuant to the Compact of Free Association as authorized by Public Law 99-239.

SEC. 9063. Notwithstanding any other provision of law, the Secretaries of the Army and Air Force may authorize the retention in an active status until age sixty of any officer who would otherwise be removed from an active status and who is employed as a National Guard or Reserve technician in a position in which active status in a reserve component of the Army or Air Force is required as a condition of that employment.

SEC. 9064. None of the funds appropriated by this Act may be obligated or expended for the purposes delineated in section 1002(e)(2) of the Department of Defense Authorization Act, 1985, without the prior notification to the Committees on Appropriations of the House of Representatives and the Senate.

SEC. 9065. It is the sense of the Congress that the Secretary of Defense should formulate and carry out a program under which contracts awarded by the Department of Defense in fiscal year 1987 would, to the maximum extent practicable and consistent with existing law, be awarded to contractors who agree to carry out such contracts in labor surplus areas (as defined and identified by the Department of Labor).

SEC. 9066. It is the sense of the Congress that competition, which is necessary to enhance innovation, effectiveness, and efficiency, and which has served our Nation so well in other spheres of political and economic endeavor, should be expanded and increased in the provision of our national defense.

SEC. 9067. None of the funds appropriated by this Act shall be available to pay a dislocation allowance pursuant to section 407 of title 37, United States Code, in excess of one month's basic allowance for quarters.

SEC. 9068. None of the funds available to the Department of Defense shall be obligated or expended to contract out any activity currently performed by the Defense Personnel Support Center in Philadelphia, Pennsylvania: Provided, That this provision shall not apply after notification to the Committees on Appropriations of the House of Representatives and the Senate of the results of the cost analysis of contracting out any such activity.

SEC. 9069. Notwithstanding any other provision of law, each contract awarded by the Department of Defense in fiscal year 1987 for construction or services to be performed in whole or in part in a State which is not contiguous with another State and has an unemployment rate in excess of the national average rate of unemployment as determined by the Secretary of Labor shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in such State that is not contiguous with another State, individuals who are residents of such State and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills: Provided, That the Secretary of Defense may waive the requirements of this section in the interest of national security.

SEC. 9070. None of the funds appropriated by this Act shall be used to make contributions to the Department of Defense Education Benefits Fund pursuant to section 2006(g) of title 10, United States Code, representing the normal cost for future benefits under section 1415(c) of title 38, United States Code, for any member of the armed services who, on or after the date of enactment of this Act, receives an enlistment bonus under section 308a or 308f of title 37, United States Code; nor shall any amounts representing the normal cost of such future benefits be transferred from the Fund by the Secretary of the Treasury to the Administrator of Veterans' Affairs pursuant to section 2006(d) of title 10, United States Code; nor shall the Administrator pay such benefits to any such member.

SEC. 9071. Notwithstanding any other provision of this Act, no funds appropriated by this Act shall be expended for the research, development, test, evaluation or procurement for integration of a nuclear warhead into the Joint Tactical Missile System (JTACMS).

SEC. 9072. So far as may be practicable, Indian labor shall be employed, and purchases of the products of Indian industry may be made in open market in the discretion of the Secretary of Defense: Provided, That the products must meet pre-set contract specifications.

SEC. 9073. Section 615 of S. 2638, as passed by the Senate on August 9, 1986, shall be deemed to be enacted into law as fully as if

set forth herein: Provided, That the test authority provided for in section 618 of Public Law 99-145 and section 8083 of Public Law 99-190 shall remain in effect until such time as the system provided for in this section is implemented for both Department of Defense military and civilian employees.

SEC. 9074. Notwithstanding any other provision of law, during fiscal year 1987, the Department of Defense is to conduct a pilot test project of providing home health care to dependents entitled to health care under section 1076 of title 10, United States Code: Provided, That such care is medically necessary or appropriate, more cost effective than to continue paying for otherwise authorized CHAMPUS benefits in medical facilities, and the beneficiary is not covered for such care under any other public or private health insurance plan.

SEC. 9075. Not more than $2,506,389,000 of the funds appropriated by this Act may be expended for permanent change of station travel (including all expenses of such travel for organizational movements): Provided, That assignments for temporary duty may not be increased in order to circumvent this limitation: Provided further, That this limitation may be exceeded only upon a determination and notification to the Congress by the Secretary of Defense that such action is necessary to meet national security requirements.

SEC. 9076. Funds appropriated in this Act shall be available for the payment of not more than 75 percent of the charges of a postsecondary educational institution for the tuition or expenses of an officer in the Ready Reserve of the Army National Guard or Army Reserve for education or training during his off-duty periods, except that no part of the charges may be paid unless the officer agrees to remain a member of the Ready Reserve for at least four years after completion of such training or education.

SEC. 9077. Notwithstanding any other provision of law, none of the funds appropriated by this Act shall be available to pay more than 50 percent of an amount paid to any person under section 308 of title 37, United States Code, in a lump sum.

SEC. 9078. None of the funds appropriated by this Act shall be available to convert to contractor performance an activity or function of the Department of Defense that, on or after the date of enactment of this Act, is performed by more than ten Department of Defense civilian employees until a most efficient and cost-effective organization analysis is completed on such activity or function and certification of the analysis is made to the Committees on Appropriations of the House of Representatives and the Senate.

(TRANSFER OF FUNDS)

SEC. 9079. Upon a determination by the Secretary of Defense that such action will result in a more economical acquisition of automatic data processing equipment, funds provided in this Act under one appropriation account for the lease or purchase of such equipment may be transferred through the Automatic Data Processing Equipment Management Fund to another appropriation account in this Act for the lease or purchase of automatic data processing equipment to be merged with and to be available for the same purposes, and for the same time period, as the appropriation to which transferred: Provided, That within thirty days after the end of each quarter the Secretary of Defense shall report transfers made under this section to the Committees on Appropriations of the Senate and the House of Representatives: Provided further, That the authority to transfer funds under this section shall be in addition to any other transfer authority contained in this Act.

SEC. 9080. Appropriations available to the Department of Defense during the current fiscal year shall be available, under such regulations as the Secretary of Defense may deem appropriate, to exchange or furnish mapping, charting, and geodetic data, supplies or services to a foreign country pursuant to an agreement for the production or exchange of mapping, charting, and geodetic data.

SEC. 9081. None of the funds appropriated in this Act may be obligated or expended for procurement of C-12 aircraft unless such aircraft are procured through competitive procedures (as defined in section 2302(2) of title 10, United States Code), which shall be restricted to turboprop aircraft.

SEC. 9082. None of the funds in this Act may be obligated for procurement of 120mm mortars or 120mm mortar ammunition manufactured outside of the United States: Provided, That this limitation shall not apply to procurement of such mortars or ammunition required for testing, evaluation, type classification or equipping the Army's Ninth Infantry Division (Motorized).

SEC. 9083. Appropriations made available to the Department of Defense by this Act may be used at sites formerly used by the Department of Defense for removal of unsafe buildings or debris of the Department of Defense: Provided, That such removal must be completed before the property is released from Federal Government control, other than property conveyed to State or local government entities or native corporations.

SEC. 9084. Within the funds made available under title II of this Act, the military departments may use such funds as necessary, but not to exceed $4,700,000, to carry out the provisions of section 430 of title 37, United States Code.

SEC. 9085. None of the funds available to the Department of the Navy may be used to enter into any contract for the overhaul, repair, or maintenance of any naval vessel on the West Coast of the United States which includes charges for interport differential as an evaluation factor for award.

SEC. 9086. Notwithstanding section 213(b) of the Joint Chiefs of Staff Reorganization Act of 1985 or any other provision of law, none of the funds in this or any other Act may be used to alter the command structure for military forces in Alaska.

SEC. 9087. None of the funds appropriated in this Act may be obligated or expended to carry out a program to paint any naval vessel with paint known as organotin or with any other paint containing the chemical compound tributyltin until such time as the Environmental Protection Agency certifies to the Department of Defense that whatever toxicity as generated by organotin paints as included in Navy specifications does not pose an unacceptable hazard to the marine environment: Provided, That the Navy may use these funds to paint aluminum-hulled craft as necessary, and, in addition, the Navy may paint no more than fifteen steel-hulled ships to conduct research as described in the "Navy Organotin Program Plan for Two Case Study Harbors".

SEC. 9088. No funds appropriated under this Act for the Strategic Defense Initiative Program shall be earmarked by any agency of the United States Government or any contractor exclusively for contracts with non-United States contractors, subcontractors, or vendors, or exclusively for consortia containing non-United States contractors, subcontractors, or vendors, prior to source selection in order to meet a specific quota or allocation of funds to any allied nation. Furthermore, it is the sense of the Congress that, whenever possible, the Secretary of Defense and others should attempt to award Strategic Defense Initiative contracts to United States contractors, subcontractors, and vendors unless such awards would degrade the likely results obtained from such contracts: Provided, That allied nations should be encouraged to participate in the Strategic Defense Initiative research effort on a competitive basis and be awarded contracts on the basis of technical merit.

SEC. 9089. The Secretary of Defense may only procure ammunition containing a depleted uranium penetrator component if the procurement of such component is done competitively and procured from at least two sources in the existing production base for such component.

SEC. 9090. None of the funds appropriated by this Act shall be used for the support of any nonappropriated fund activity of the Department of Defense that procures malt beverages and wine with nonappropriated funds for resale (including such alcoholic beverages sold by the drink) on a military installation located in the United States, unless such malt beverages and wine are procured in that State, or in the case of the District of Columbia, within the District of Columbia, in which the military installation is located: Provided, That in a case in which a military installation is located in more than one State, purchases may be made in any State in which the installation is located: Provided further, That such local procurement requirements for malt beverages and wine shall apply to all alcoholic beverages for military installations in states which are not contiguous with another state: Provided further, That alcoholic beverages other than wine and malt beverages in contiguous states and the District of Columbia shall be procured from the most competitive source, price and other factors considered.

SEC. 9091. Notwithstanding any other provision of law, funds available in this Act shall be available to the Defense Logistics Agency to grant civilian employees participating in productivity-based incentive award programs paid administrative time off in lieu of cash payment as compensation for increased productivity.

(TRANSFER OF FUNDS)

SEC. 9092. No later than September 30, 1987, unobligated balances and appropriations made available to the Department of Defense for fiscal year 1983 that expired for obligation on September 30, 1985, may be transferred into the appropriation "Foreign Currency Fluctuations, Defense" to be merged with and available for the same time period and the same purposes as the appropriation to which transferred: Provided, That any transfer made pursuant to any use of the authority provided by this provision shall be limited so that the amount in the appropriation "Foreign Currency Fluctuations, Defense" does not exceed $970,000,000 at the time such a transfer is made.

SEC. 9093. None of the funds appropriated in this Act to the Department of the Army may be obligated for depot maintenance of equipment unless such funds provide for civilian personnel strengths at the Army depots performing communications—electronics depot maintenance at an amount above the strengths assigned to those depots

on September 30, 1985: Provided, That the foregoing limitations shall not apply to civilian personnel who perform caretaker-type functions at these installations: Provided further, That nothing in this provision shall cause undue reductions of other Army depots, as determined by the Secretary of the Army.

(TRANSFER OF FUNDS)

SEC. 9094. In addition to the amounts appropriated or otherwise made available in this Act, $1,911,000,000 shall be available for military and civilian pay raises as authorized by law: Provided, That such amounts shall be transferred and merged with "Military Personnel" and "Operation and Maintenance" appropriations accounts as applicable and that such transfer authority shall be in addition to that provided elsewhere in this Act: Provided further, That such sums as may be necessary for authorized pay raise costs in excess of this appropriation shall be accommodated within the levels appropriated in this Act.

SEC. 9095. None of the funds appropriated by this Act shall be available to pay a variable housing allowance under section 403a of title 37, United States Code, with respect to an area at rates that are greater than the rates in effect for that area on August 1, 1986.

SEC. 9096. (a) None of the funds appropriated or made available by this Act shall be used to enter into a contract for the performance by contractor personnel of functions that on the date of enactment of this Act are performed by employees of the Department of Defense at the Crane Army Ammunition Activity, Crane, Indiana, or the McAlester Army Ammunition Plant, McAlester, Oklahoma.

(b) The prohibition in subsection (a) does not apply to a contract (or the renewal of a contract) for the performance of a function that on the date of the enactment of this Act is already under contract for performance by contractor personnel.

SEC. 9097. None of the funds appropriated by this Act shall be available to pay temporary lodging expenses pursuant to section 404a(a) of title 37, United States Code: Provided, That during fiscal year 1987, this provision shall not apply to those military personnel with dependents in grades E-4 and below.

SEC. 9098. None of the funds appropriated or made available by this Act may be obligated for acquisition of major automated information systems which have not successfully completed oversight reviews required by Defense Department regulations: Provided, That none of the funds appropriated or made available by this Act may be obligated on Composite Health Care System acquisition contracts if such contracts would cause the total life cycle cost estimate of $1,100,000,000 expressed in fiscal year 1986 constant dollars to be exceeded.

SEC. 9099. The Secretary of Defense shall take such action as may be necessary to implement at the earliest practicable date and with funds provided for such purpose by section 8110 of the Department of Defense Appropriations Act, 1986 (as contained in section 101(b) of Public Law 99-190; 99 Stat. 1222), the program proposed by the Department of Defense in a letter dated August 30, 1985, from the Assistant Secretary of Defense for Acquisition and Logistics to rehabilitate and convert current steam generating plants at defense facilities in the United States to coal burning facilities in order to achieve a coal consumption target of 1,600,000 short tons of coal per year (including at least 300,000 short tons of anthracite coal) above current consumption levels at Department of Defense facilities in the United States by fiscal year 1994: Provided, That such action shall be subject to the use of only the most cost effective fuel system in the construction of new plants or the conversion of existing plants: Provided further, That during fiscal year 1987, the amount of anthracite coal purchased by the Department shall be at least 300,000 short tons: Provided further, That the funds identified in section 8110 of Public Law 99-190 shall continue to be made available until expended to be used on a non-reimbursable basis for the administrative costs of this program.

SEC. 9100. Notwithstanding any other provision of law, the Department of Defense or the General Services Administration, whichever agency has jurisdiction, custody, and control shall convey at no cost real property described in "Department of the Army Final Report of Excess, NAN-85-3A, Hancock Field, New York," to Onondaga County, New York, for aviation and related industrial activities. This conveyance should be accomplished as soon as possible, but no later than ninety days after enactment of this Act.

SEC. 9101. No naval vessel or any vessel owned and operated by the Department of Defense homeported in the United States may be overhauled, repaired, or maintained in a foreign owned and operated shipyard located outside of the United States, except for voyage repairs.

SEC. 9102. After September 30, 1987, no appropriated funds may be used to support revenue generating Morale, Welfare and Recreation activities located in large metropolitan areas, as defined by Department of Defense regulation, of the fifty United States.

SEC. 9103. (1) Chapter 19 of title 37, United States Code, is amended by adding at the end the following new section:

"§ 1013. Payment date for pay and allowances

"(a) Amounts of basic pay, basic allowance for quarters, basic allowance for subsistence, and other payments of military compensation (other than travel and transportation allowances and separation allowances) shall be paid on the first day of the month beginning after the month during which the right to such compensation accrues.

"(b) Subsection (a) does not preclude one payment in midmonth for any element of compensation and does not affect any authority to make advance payments of pay and allowances.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"1013. Payment date for pay and allowances.".

(3) Section 1466(a)(2) of title 10, United States Code, is amended by striking out "paid" and inserting in lieu thereof "accrued".

(4) Section 1013 of title 37, United States Code, as added by subsection (a), and the amendment made by subsection (b) shall take effect on September 1, 1987.

SEC. 9104. For the current fiscal year, the minimum requirement for the amount of payments received in a fiscal year by working capital funds for industrial-type activities to be used for the acquisition of capital equipment for such activities shall be equal to the minimum required percentage for fiscal year 1986.

SEC. 9105. None of the funds appropriated under this or any other Act for the Department of Defense shall be available to make progress payments at a percentage higher than 5 percentage points below the rate in use on the effective date of this Act (except for contracts under solicitation before the effective date of this Act and except for shipbuilding, military construction and architect-engineering contracts if the Secretary of Defense certifies to Congress that an exclusion is justified for these activities) for (a) contracts which provide for progress payments based either on the percentage of work accomplished or on the contractors' costs under fixed-price type contracts and (b) modifications to existing contracts for additional supplies or services not contemplated by the existing contracts, unless a higher percentage is approved by the head of the contracting activity or designee based on demonstrated financial need: Provided, That for solicitations issued after the effective date of this Act, which require price negotiation, contracts may only be awarded if such negotiation is based on new profit calculation procedures which provide for increased emphasis on facilities capital employed and contractor risk and which procedures do not provide an explicit fixed rate for working capital and which do not include profit based on specific individual elements of contract costs: Provided further, That no contractor may be reimbursed directly under a contract awarded 90 days after the effective date of this Act, where the purchase of additional quantities of like items is contemplated in subsequent years, for more than 50 percent of the full acquisition cost of production special tooling and production special test equipment as a direct cost unless (a) such special equipment is to be used solely for final production acceptance test or (b) additional reimbursement that is in the best interest of the Government is approved in advance by the Service Secretary for programs reported on Selected Acquisition Reports or approved by an Assistant Service Secretary for all other programs: Provided further, That the contract may provide that if such a contract is terminated for any reason that does not reflect a failure of the contractor to perform, the contractor shall be entitled to be paid by the United States for the cost of any special tooling and special test equipment which has not been fully amortized and the United States may elect to take title to such special tooling and special test equipment.

SEC. 9106. (a) The Secretary of the Navy (hereinafter in this section referred to as the "Secretary") is authorized to convey to the Philadelphia Municipal Authority, a State authority, (hereinafter in this section referred to as the "PMA"), all right, title, and interest of the United States in and to approximately 29 acres of land located in the United States Naval Base, Philadelphia, Pennsylvania, together with any improvements thereon.

(b) The exact acreage and legal description of the lands to be conveyed under this section shall be determined by surveys that are satisfactory to the Secretary. The cost of any such survey shall be borne by the PMA.

(c) In consideration for any conveyance authorized under subsection (a), the PMA shall pay to the United States an amount equal to the fair market value of the property to be conveyed (as determined by the Secretary).

(d) The Secretary may require such additional terms and conditions with respect to the conveyance under this section as he con-

siders appropriate to protect the interests of the United States.

(e) In addition to the authority provided in subsection (a) and pursuant to section 2394 of title 10, United States Code, the Secretary, upon his determination that there is an economic advantage to the Navy, is authorized to enter into a long-term contract with the PMA for the purchase of steam generated from a facility to be constructed upon the land authorized to be conveyed herein.

SEC. 9107. Authority for reimbursement provided pursuant to section 3 of Public Law 96-357 (10 U.S.C. 7572 note) is hereby extended through September 30, 1987, at an amount not to exceed $1,657,000.

SEC. 9108. Notwithstanding any other provision of law, appropriations available in this Act may be used for the procurement, product improvement and modification of the Copperhead and five-inch guided projectiles, without regard to whether or not a second production source program or contract has been established for those programs, provided that the Secretary of Defense determines that such expenditures are in the interest of the Government of the United States.

SEC. 9109. (a) IN GENERAL.—The Administrator of General Services shall release to the Virginia Port Authority, an instrumentality of the Commonwealth of Virginia, all residuary rights of use held by the United States in three warehouses located in the city of Norfolk, Virginia, within the area operated as a public port facility and known as the Norfolk International Terminals.

(b) TIME LIMITATION; COMPENSATION.—The Administrator of General Services shall execute such documents and take such other actions as may be necessary to release, within one hundred and eighty days after the date of the enactment of this Act, the rights referred to in subsection (a). The release shall be made without any compensation in addition to compensation paid to the United States for such warehouses and other facilities by the city of Norfolk, Virginia, in 1968.

SEC. 9110. (a) IN GENERAL.—During fiscal year 1987 and during each of the six succeeding fiscal years, the Administrator of General Services shall obtain bids from domestic producers of high carbon ferrochromium and of high carbon ferromanganese and award contracts for the conversion of chromium and manganese ores held in the National Defense Stockpile into high carbon ferrochromium and high carbon ferromanganese, respectively.

(b) STOCKPILE GOALS.—(1) Contracts awarded under subsection (a) shall provide for the addition of not less than 53,500 short tons of high carbon ferrochromium and 67,500 short tons of high carbon ferromanganese to the National Defense Stockpile in each of the fiscal years referred to in the preceding sentence.

(2) If, in any fiscal year referred to in subsection (a), the minimum quantity of high carbon ferrochromium or high carbon ferromanganese to be added to the National Defense Stockpile, as prescribed in paragraph (1), is not met, the quantity of such material to be added to such stockpile in the succeeding fiscal year shall be increased by the quantity of the deficiency.

(c) SEVEN-YEAR MINIMUM QUANTITIES.—The total quantities of high carbon ferrochromium and high carbon ferromanganese to be added to the National Defense Stockpile over the seven fiscal years referred to in subsection (a) shall be as follows:

(1) High carbon ferrochromium, 374,000 short tons.

(2) High carbon ferromanganese, 472,000 short tons.

(d) In this section, the term "National Defense Stockpile" means the stockpile provided for in section 4 of the Strategic and Critical Materials Stockpiling Act (50 U.S.C. 98c).

SEC. 9111. None of the funds appropriated or made available by this Act shall be used to implement or enforce the rule proposed on May 7, 1986 (51 Fed. Reg. 16988-16991), or section 8.304-91 of the Air Force FAR Supplement issued on June 24, 1985.

SEC. 9112. (a) It is the sense of Congress that—

(1) the capabilities inherent in the technologies associated with the Advanced Technology Bomber Program and the Advanced Cruise Missile Program are a critical national security asset for maintaining an adequate and credible deterrent posture;

(2) such technologies and programs should be developed as rapidly as feasible in order to produce and deploy advanced systems which will complicate the military planning of the Soviet Union and as a consequence enhance the deterrent posture of the United States;

(3) such technologies and programs should be funded at the levels authorized in this Act; and

(4) all the funds appropriated for such programs should be fully used for such programs.

(b) None of the funds appropriated in this Act to carry out the Advanced Technology Bomber Program or the Advanced Cruise Missile Program may be used for any other purpose.

(c) None of the funds appropriated in this or any other Act may be used for research, development, demonstration, procurement or any other purpose related to B-1B bombers beyond the 100 such bombers previously authorized.

SEC. 9113. (a) Not later than October 14, 1986, the Chairman of the Joint Chiefs of Staff of the Armed Forces of the United States shall submit to Congress a report, in both classified and unclassified versions, containing a detailed assessment, including the individual views of each of the Chiefs, of the military impacts on the national security of the United States, of the possible military responses of the Soviet Union to an American decision to no longer comply with major provisions of existing strategic offensive arms limitation agreements, including the central numerical sublimits on strategic nuclear delivery vehicles contained in the SALT II accord. This assessment shall concentrate on possible Soviet military responses during the period between fiscal year 1987 and fiscal year 1996, inclusive, and shall address, among other considerations, the following:

(1) the impact on the ability of United States strategic forces to accomplish their nuclear deterrent mission, including the impacts on the survivability of United States strategic forces and on the ability of United States strategic forces to achieve required damage expectancies against Soviet targets, of any expansion of Soviet military capabilities undertaken in response to a United States decision to abandon compliance with existing strategic offensive arms agreements;

(2) the additional cost to the United States, above currently projected military expenditures for those periods for which such budget projections are available, of research, development, production, deployment, and annual operations and support for any additional strategic forces required to counter any expansion in Soviet military capabilities undertaken in response to a United States decision to abandon compliance with existing strategic offensive arms agreements;

(3) under average annual real growth projections in defense spending of 0 percent, 1 percent, 2 percent, and 3 percent, the percent of the annual defense budget in each year between fiscal year 1987 and fiscal year 1996 which would be consumed by increased United States strategic forces needed to counter the Soviet force expansions;

(4) the military impacts on United States national security of the diversion of the funds identified in subsection (a)(2) away from nonstrategic defense programs and to strategic programs to counter expanded Soviet strategic capabilities, including the military impacts of such a diversion on the ability of United States conventional forces to meet the Nation's specific non-nuclear defense commitments as a member of the North Atlantic Treaty Organization, and under the 1960 Treaty of Mutual Cooperation and Security with Japan;

(5) in addition, this report shall address the military implications for the United States of determined Soviet violations of offensive arms control agreements.

(b) Notwithstanding any other provision of law, none of the funds authorized or appropriated by this or any other Act may be obligated or expended, directly or indirectly, by the Organization of the Joint Chiefs of Staff for prospective studies and analyses to be accomplished by individual civilian contractors or civilian contractor entities, after October 14, 1986, if the report mandated in subsection (a) has not been received by the Congress; and

(c) The prohibition contained in subsection (b) on the obligation or expenditure of funds after October 14, 1986, shall cease to have effect upon the receipt by Congress of the report mandated in subsection (a).

SEC. 9114. Subsection (b) of section 223 of the Department of Defense Authorization Act, 1986 (Public Law 99-145; 99 Stat. 613) is amended—

(1) by designating the matter after the subsection caption as paragraph (1); and

(2) by adding at the end the following:

"(2) The report required by paragraph (1) shall include the following information:

"(A) The cost goals or cost objectives—

"(i) for the production and deployment of a Strategic Defense Initiative System; and

"(ii) for the individual components of such system,

determined on the basis of capabilities expected to be developed in the future.

"(B) The estimated costs of—

"(i) the production and deployment of the Strategic Defense Initiative System; and

"(ii) the production and deployment of the individual components of such system,

determined on the basis of prices in effect and capabilities in existence at the time of the preparation of the report.".

SEC. 9115. (a) ASSISTANT SECRETARY OF DEFENSE.—Section 136(b) of title 10, United States Code (as amended by section 106 of the Goldwater-Nichols Department of Defense Reorganization Act of 1986), is amended by adding at the end the following new paragraph:

"(4) One of the Assistant Secretaries shall be the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict. He shall have as his principal duty the overall supervision (including oversight of policy and resources) of special operations

activities (as defined in section 167(j) of this title) and low intensity conflict activities of the Department of Defense.".

(b) UNIFIED COMBATANT COMMAND.—(1) Chapter 6 of such title (as added by section 211 of the Goldwater-Nichols Department of Defense Reorganization Act of 1986) is amended by adding at the end the following new section:

"§ 167. Unified combatant command for special operations forces

"(a) ESTABLISHMENT.—With the advice and assistance of the Chairman of the Joint Chiefs of Staff, the President, through the Secretary of Defense, shall establish under section 161 of this title a unified combatant command for special operations forces (hereinafter in this section referred to as the 'special operations command'). The principal function of the command is to prepare special operations forces to carry out assigned missions.

"(b) ASSIGNMENT OF FORCES.—Unless otherwise directed by the Secretary of Defense, all active and reserve special operations forces of the armed forces stationed in the United States shall be assigned to the special operations command.

"(c) GRADE OF COMMANDER.—The commander of the special operations command shall hold the grade of general or, in the case of an officer of the Navy, admiral while serving in that position, without vacating his permanent grade. The commander of such command shall be appointed to that grade by the President, by and with the advice and consent of the Senate, for service in that position.

"(d) COMMAND OF ACTIVITY OR MISSION.—(1) Unless otherwise directed by the President or the Secretary of Defense, a special operations activity or mission shall be conducted under the command of the commander of the unified combatant command in whose geographic area the activity or mission is to be conducted.

"(2) The commander of the special operations command shall exercise command of a selected special operations mission if directed to do so by the President or the Secretary of Defense.

"(e) AUTHORITY OF COMBATANT COMMANDER.—(1) In addition to the authority prescribed in section 164(c) of this title, the commander of the special operations command shall be responsible for, and shall have the authority to conduct, all affairs of such command relating to special operations activities, including the following functions:

"(A) Developing strategy, doctrine, and tactics.

"(B) Training assigned forces.

"(C) Conducting specialized courses of instruction for commissioned and noncommissioned officers.

"(D) Validating requirements.

"(E) Establishing priorities for requirements.

"(F) Ensuring combat readiness.

"(G) Developing and acquiring special operations-peculiar equipment and acquiring special operations-peculiar material, supplies, and services.

"(H) Ensuring the interoperability of equipment and forces.

"(I) Formulating and submitting requirements for intelligence support.

"(J) Monitoring the promotions, assignments, retention, training, and professional military education of special operations forces officers.

"(2) The commander of such command shall be responsible for monitoring the preparedness of special operations forces assigned to other unified combatant commands to carry out assigned missions.

"(f) BUDGET.—In addition to the activities of a combatant command for which funding may be requested under section 166(b) of this title, the budget proposal of the special operations command shall include requests for funding for—

"(1) development and acquisition of special operations-peculiar equipment; and

"(2) acquisition of other material, supplies, or services that are peculiar to special operations activities.

"(g) INTELLIGENCE AND SPECIAL ACTIVITIES.—This section does not constitute authority to conduct any activity which, if carried out as an intelligence activity by the Department of Defense, would require—

"(1) a finding under section 662 of the Foreign Assistance Act of 1961 (22 U.S.C. 2422); or

"(2) a notice to the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives under section 501(a)(1) of the National Security Act of 1947 (50 U.S.C. 413).

"(h) REGULATIONS.—The Secretary of Defense shall prescribe regulations for the activities of the special operations command. Such regulations shall include authorization for the commander of such command to provide for operational security of special operations forces and activities.

"(i) IDENTIFICATION OF SPECIAL OPERATIONS FORCES.—(1) Subject to paragraph (2), for the purposes of this section special operations forces are those forces of the armed forces that—

"(A) are identified as core forces or as augmenting forces in the Joint Chiefs of Staff Joint Strategic Capabilities Plan, Annex E, dated December 17, 1985;

"(B) are described in the Terms of Reference and Conceptual Operations Plan for the Joint Special Operations Command, as in effect on April 1, 1986; or

"(C) are designated as special operations forces by the Secretary of Defense.

"(2) The Secretary of Defense, after consulting with the Chairman of the Joint Chiefs of Staff and the commander of the special operations command, may direct that any force included within the description in paragraph (1)(A) or (1)(B) shall not be considered as a special operations force for the purposes of this section.

"(j) SPECIAL OPERATIONS ACTIVITIES.—For purposes of this section, special operations activities include each of the following insofar as it relates to special operations:

"(1) Direct action.

"(2) Strategic reconnaissance.

"(3) Unconventional warfare.

"(4) Foreign internal defense.

"(5) Civil affairs.

"(6) Psychological operations.

"(7) Counterterrorism.

"(8) Humanitarian assistance.

"(9) Theater search and rescue.

"(10) Such other activities as may be specified by the President or the Secretary of Defense.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"167. Unified combatant command for special operations forces.".

(c) MAJOR FORCE PROGRAM CATEGORY.—The Secretary of Defense shall create for the special operations forces a major force program category for the Five-Year Defense Plan of the Department of Defense. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict, with the advice and assistance of the commander of the special operations command, shall provide overall supervision of the preparation and justification of program recommendations and budget proposals to be included in such major force program category.

(d) PROGRAM AND BUDGET EXECUTION.—To the extent that there is authority to revise programs and budgets approved by Congress for special operations forces, such authority may be exercised only by the Secretary of Defense, after consulting with the commander of the special operations command.

(e) GRADE FOR COMMANDERS OF CERTAIN AREA SPECIAL OPERATIONS COMMANDS.—The commander of the special operations command of the United States European Command, the United States Pacific Command, and any other unified combatant command that the Secretary of Defense may designate for the purposes of this section shall be of general or flag officer grade.

(f) BOARD FOR LOW INTENSITY CONFLICT.—Section 101 of the National Security Act of 1947 (50 U.S.C. 402) is amended by adding at the end the following new subsection:

"(f) The President shall establish within the National Security Council a board to be known as the 'Board for Low Intensity Conflict'. The principal function of the board shall be to coordinate the policies of the United States for low intensity conflict.".

(g) DEPUTY ASSISTANT TO THE PRESIDENT FOR NATIONAL SECURITY AFFAIRS FOR LOW INTENSITY CONFLICT.—It is the sense of Congress that the President should designate within the Executive Office of the President a Deputy Assistant to the President for National Security Affairs to be the Deputy Assistant for Low Intensity Conflict.

(h) REPORTS.—(1) Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress a report on the plans of the Secretary for implementation of this section, including a description of the progress made on such implementation.

(2) Not later than one year after the date of the enactment of this Act, the President shall transmit to Congress a report on the capabilities of the United States to conduct special operations and low intensity conflicts. The report shall include a description of the following:

(A) Deficiencies in such capabilities.

(B) Actions being taken throughout the executive branch to correct such deficiencies.

(C) The principal low intensity conflict threats to the interests of the United States.

(D) The actions taken and to be taken to implement this section.

(i) EFFECTIVE DATE.—Section 167 of title 10, United States Code (as added by subsection (b)), shall be implemented not later than 180 days after the date of the enactment of this Act.

(j) FUNDING FOR FISCAL YEAR 1987.—The Secretary of Defense may spend unobligated funds appropriated to the Department of Defense for fiscal years before fiscal year 1987 in such sums as necessary in order to carry out this section and section 167 of title 10, United States Code (as added by subsection (b)), during fiscal year 1987.

SEC. 9116. (a) The Secretary of Defense shall award to a United States firm a contract pursuant to a solicitation issued on or after the date of enactment of this Act under the Department of Defense overseas fuel procurement programs that would otherwise be

awarded to a foreign firm if such United States firm—

(1) has a crude oil refining capacity of not more than 75,000 barrels a day;

(2) participates in the Department of Defense overseas fuel procurement program;

(3) agrees to the contract on the terms proposed by the foreign firm to which the contract would otherwise be awarded; and

(4) does not use processing agreements in order to fulfill the contract.

(b) This provision shall not apply if the total cost of supplies offered by the United States firm, including transportation as specified in the solicitation, would exceed the total evaluated cost to the government if the contract were awarded to the foreign firm.

(c) This provision shall not supersede any status of forces agreement and shall not apply to acquisitions subject to the Agreement on Government Procurement of 1979 and the Trade Agreements Act of 1979 (19 U.S.C. 2501-2582) and including acquisitions from countries designated under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et seq.).

(d) For purposes of this section, the term "United States firm" means a corporation, partnership, association, joint stock company, business trust, unincorporated organization, or sole proprietorship which has its principal place of business in the United States, or which is organized under the laws of a State of the United States or a territory, possession, or commonwealth of the United States.

SEC. 9117. (a) None of the funds appropriated in this Act may be available for any country if the President determines that the government of such country is failing to take adequate measures to prevent narcotic drugs or other controlled substances cultivated or produced or processed illicitly, in whole or in part, in such country, or transported through such country, from being sold illegally within the jurisdiction of such country to United States personnel or their dependents, or from being smuggled into the United States. Such prohibition shall continue in force until the President determines and reports to the Congress in writing that—

(1) the government of such country has prepared and committed itself to a plan presented to the Secretary of State that would eliminate the cause or basis for the application to such country of the prohibition contained in the first sentence; and

(2) the government of such country has taken appropriate law enforcement measures to implement the plan presented to the Secretary of State.

(b) The provisions of subsection (a) shall not apply in the case of any country with respect to which the President determines that the application of the provisions of such subsection would be inconsistent with the national security interests of the United States.

SEC. 9118. (a) None of the funds made available by this Act to the Department of Defense may be used to procure the Federal Supply Classes of machine tools set forth in subsection (b) of this section, for use in any government-owned facility or property under control of the Department of Defense, which machine tools were not manufactured in the United States or Canada.

(b) The procurement restrictions contained in subsection (a) shall apply to Federal Supply Classes of metalworking machinery in categories numbered 3408, 3410-3419, 3426, 3433, 3441-3443, 3446, 3448, 3449, 3460, and 3461.

(c) When adequate domestic supplies of the classifications of machine tools identified in subsection (b) are not available to meet Department of Defense requirements on a timely basis, the procurement restrictions contained in subsection (a) may be waived on a case by case basis by the Secretary of the Service Branch responsible for the procurement.

(d) Subsection (a) shall not apply to contracts which are binding as of the date of enactment of this Act.

SEC. 9119. (a) Notwithstanding sections 2394(b) and 2690 of title 10, United States Code, the Secretary of the Army may use funds appropriated for the construction and operation of the Louisiana Army Ammunition Plant for the provision and operation of energy production facilities at such plant.

(b) Funds available to the Secretary of the Army under subsection (a) may be obligated without seeking third party contracts for the financing and construction of heating and power plants.

SEC. 9120. Of the funds appropriated by this Act, $8,100,000 shall be made available to the Department of Defense in order to implement the recommendations of its Security Review Commission concerning personnel and industrial security programs: Provided, That the Department shall submit a reprogramming notification identifying funds for this purpose.

SEC. 9121. No funds shall be expended for implementation of the Department of Defense Federal Acquisition Regulation Supplement; Cargo Preference, published as proposed regulations on July 28, 1986, at page 27016 of volume 51, numbered 144 of the Federal Register.

SEC. 9122. Section 672 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(f) The consent of a Governor described in subsections (b) and (d) may not be withheld (in whole or in part) with regard to active duty outside the United States, its territories, and its possessions, because of any objection to the location, purpose, type, or schedule of such active duty.".

SEC. 9123. (a)(1) Notwithstanding any other provision of law, except as provided in paragraph (1) or (2), the Secretary of the Navy shall reimburse Valerie S. Ford of Richmond, Virginia, for the expenses she incurred for her travel and the travel of her two dependent children and the transportation of her household goods in moving herself and her children from Makakilo, Hawaii, to Richmond, Virginia, in May, 1984.

(2) The Secretary of the Navy may not make the reimbursement authorized in paragraph (1) unless, within one year after the date of enactment of this Act, the Secretary receives from Valerie S. Ford such application for reimbursement and documentation of expenses as the Secretary considers appropriate.

(3) The amount paid to Valerie S. Ford pursuant to paragraph (1) may not exceed the amount that would have been payable for the travel and transportation referred to in such paragraph if the travel and transportation had been timely and a proper and timely application had been submitted in the case of the said Valerie S. Ford as provided by law or applicable regulations.

(b) No part of any amount reimbursed pursuant to subsection (a) of this section in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with such reimbursement, and the same shall be unlawful, any contract to the contrary notwithstanding. Violation of the provisions of this section is a misdemeanor punishable by a fine not to exceed $1,000.

SEC. 9124. From existing funds the Secretary of Defense shall take additional steps for further development of planning, research, and facilities for physical acoustics and related matters and shall develop facilities for advanced microelectronics design research and development including but not restricted to military components replacement and the Mapped Array Differential Equation Machine.

SEC. 9125. Notwithstanding any other provision of law, appropriations available to the Department of Defense during the current fiscal year shall be available to make payments to a hospital that obtains 12 percent or more of its operating funds from contributions and that limits the care it provides to the treatment of heart and lung conditions: Provided, That payment may not be denied for a claim for otherwise reimbursable services submitted under a plan contracted for under sections 1079(a) and 1086(a) of title 10, United States Code, solely on the basis that such hospital does not impose a legal obligation, including a patient cost share or deductible, on its patients to pay for such services.

SEC. 9126. Notwithstanding the provisions of subsection 502(a)(1) of the National Security Act of 1947, funds appropriated by this Act may be obligated and expended for particular intelligence activities contained in this Act: Provided, That the funds appropriated or made available by this Act may be obligated and expended for the particular activities contained in this Act should the enactment of a National Defense Authorization Act for fiscal year 1987 fail to occur and this Act shall then be considered to provide the authorization and appropriation authority necessary to obligate and expend the funds provided herein.

SEC. 9127. Notwithstanding any other provision of law, where an error of the magnitude of four or greater in a financial ratio is made in the evaluation of an application for extension made by any firm in accordance with C.F.R. Section 124.1—(1)(f)(4)(i) (effective January 1, 1986), the maximum extension shall be granted.

SEC. 9128. None of the funds provided by this Act may be used to pay the salaries of any person or persons who authorize the transfer of unobligated and deobligated appropriations into the Reserve for Contingencies of the Central Intelligence Agency.

SEC. 9129. Of the funds appropriated in this Act for the procurement of P-3C aircraft, the Secretary of the Navy may carry out Navy obligations under the classified Maritime Surveillance Agreement of 1986: Provided, That two of the P-3C aircraft to be procured may be used to implement United States obligations under such classified agreement.

SEC. 9130. Funds appropriated by this Act for construction projects of the Central Intelligence Agency, which are transferred to another Agency for execution, shall remain available until expended.

SEC. 9131. Section 642 of S. 2638, as passed by the Senate on August 9, 1986, shall be deemed to be enacted into law as fully as if set forth herein: Provided, That the total amount herein appropriated for "Military Personnel" appropriations accounts shall be reduced by $350,000,000.

SEC. 9132. During the current fiscal year, the Department of Defense shall conduct a

new competition for 9mm handguns, with procurement starting in fiscal year 1988 in parallel with the current contract.

SEC. 9133. Funds appropriated to the Department of Defense during fiscal year 1987, or otherwise available for obligation during fiscal year 1987, shall be available for obligation notwithstanding any provisions contained in any Act authorizing appropriations for the Department of Defense for fiscal year 1987, heretofore or hereafter enacted, that would otherwise limit obligations of the aggregate amount that may be obligated at the appropriation account level, appropriations subdivision level, or appropriation budget activity level, unless a subsequently enacted provision expressly and specifically references this provision and directly amends or repeals this provision.

SEC. 9134. (a) Notwithstanding any other provision of this Joint Resolution, none of the funds appropriated in this or any other Act shall be used to sell, lease, transfer, or otherwise dispose of any portion of the approximately twenty-six acres of Fort DeRussy, Hawaii, lying southwest of Kalia Road, which includes the Hale Koa Hotel, the Armed Forces Recreation Center, and beachfront area.

(b) Notwithstanding any other provision of this Joint Resolution, to include section 509 of the Department of the Treasury, Postal Service, and General Government Appropriations Act as contained in this Joint Resolution, or any other provision of the law, including section 809 of the Military Construction Authorization Act, 1968, section 807(d) of the Military Construction Authorization Act, 1984, or any other provision of an annual Appropriation Act restricting use of funds for the sale, lease, rental, or excessing of Fort DeRussy, Hawaii, any right or interest of the United States in the remaining forty-five acres of Fort DeRussy, Hawaii, lying northeast of Kalia Road, which comprises the three United States Army Reserve Centers and miscellaneous facilities, may not be sold, leased, or transferred in accordance with Federal laws and Department of Defense regulations governing the disposal of Defense installations prior to August 1, 1987: Provided, That no such sale, lease, transfer, or other disposition proposed by the Secretary of the Army after August 1, 1987 shall occur until 60 legislative days after notification of the proposed action to the Committees on Armed Services and Appropriations of the House of Representatives and Senate.

(c) The exact acreage and legal descriptions of the property addressed by this section shall be determined by surveys which are satisfactory to the Secretary of the Army.

SEC. 9135. None of the funds appropriated or otherwise made available by this or any other Act may be obligated or expended during fiscal year 1987 for, or in connection with, a Strategic Defense Initiative Institute unless—

(1) obligation or expenditure of funds for such purpose is specifically authorized by law in an Act other than this Act; and

(2) funds are specifically appropriated for such purpose in an Act other than this Act.

For purposes of this section, a Strategic Defense Initiative Institute is a Federally Funded Research and Development Center intended to lend technical support to the Strategic Defense Initiative Organization, as described in the Federal Register on March 18, 1986, April 24, 1986, and May 21, 1986.

SEC. 9136. (a) The Secretary of Defense shall conduct through the Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) a demonstration project on the treatment of alcoholism designed to compare the use of chemical aversion therapy with the use of other treatments. The Secretary shall submit to the Committees on Appropriations and Armed Services of the Senate and House of Representatives a report describing the proposed conduct of the demonstration project not later than November 1, 1986. The Secretary shall implement the demonstration project not later than February 1, 1987. At the conclusion of the demonstration project, the Secretary shall submit to such committees a report on the results of the project: Provided, That the demonstration project shall be conducted at only one location: Provided further, That coverage for chemical aversion therapy under this demonstration project is extended to those beneficiaries referred for such treatment by a physician, psychiatrist or psychologist recognized as an authorized provider under CHAMPUS.

(b) Until the report required by subsection (a) on the results of the demonstration project is submitted, the Secretary of Defense shall ensure that coverage of beneficiaries under section 1079(a) or 1086(a) of title 10, United States Code, shall continue under the provisions of subsection (a).

SEC. 900. SHORT TITLE

This title may be cited as the "Defense Acquisition Improvement Act of 1986".

PART A—MANAGEMENT OF THE ACQUISITION PROCESS

SEC. 901. DUTIES AND PRECEDENCE OF UNDER SECRETARY OF DEFENSE FOR ACQUISITION.

Section 133 of title 10, United States Code (as redesignated by section 101(a) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)), is amended to read as follows:

"§ 133. Under Secretary of Defense for Acquisition

"(a) There is an Under Secretary of Defense for Acquisition, appointed from civilian life by the President, by and with the advice and consent of the Senate. The Under Secretary shall be appointed from among persons who have an extensive management background in the private sector.

"(b) Subject to the authority, direction, and control of the Secretary of Defense, the Under Secretary of Defense for Acquisition shall perform such duties and exercise such powers relating to acquisition as the Secretary of Defense may prescribe, including—

"(1) supervising Department of Defense acquisition;

"(2) establishing policies for acquisition (including procurement, research and development, logistics, developmental testing, and contract administration) for all elements of the Department of Defense;

"(3) establishing policies of the Department of Defense for maintenance of the defense industrial base of the United States; and

"(4) the authority to direct the Secretaries of the military departments and the heads of all other elements of the Department of Defense with regard to matters for which the Under Secretary has responsibility.

"(c) The Under Secretary—

"(1) is the senior procurement executive for the Department of Defense for the purposes of section 16(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 414(3));

"(2) is the Defense Acquisition Executive for purposes of regulations and procedures of the Department providing for a Defense Acquisition Executive; and

"(3) to the extent directed by the Secretary, exercises overall supervision of all personnel (civilian and military) in the Office of the Secretary of Defense with regard to matters for which the Under Secretary has responsibility, unless otherwise provided by law.

"(d)(1) The Under Secretary shall prescribe policies to ensure that audit and oversight of contractor activities are coordinated and carried out in a manner to prevent duplication by different elements of the Department.

"(2) In carrying out this subsection, the Under Secretary shall consult with the Inspector General of the Department of Defense.

"(3) Nothing in this subsection shall affect the authority of the Inspector General of the Department of Defense to establish audit policy for the Department of Defense under the Inspector General Act of 1978 and otherwise to carry out the functions of the Inspector General under that Act.

"(e)(1) With regard to all matters for which he has responsibility by law or by direction of the Secretary of Defense, the Under Secretary of Defense for Acquisition takes precedence in the Department of Defense after the Secretary of Defense and the Deputy Secretary of Defense.

"(2) With regard to all matters other than matters for which he has responsibility by law or by direction of the Secretary of Defense, the Under Secretary takes precedence in the Department of Defense after the Secretary of Defense, the Deputy Secretary of Defense, and the Secretaries of the military departments.".

SEC. 902. ESTABLISHMENT OF POSITION OF DEPUTY UNDER SECRETARY OF DEFENSE FOR ACQUISITION.

(a) ESTABLISHMENT OF POSITION.—(1) Chapter 4 of title 10, United States Code (as amended by title I of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)), is amended by inserting after section 133 the following new section:

"§ 133a. Deputy Under Secretary of Defense for Acquisition

"(a) There is a Deputy Under Secretary of Defense for Acquisition, appointed from civilian life by the President, by and with the advice and consent of the Senate.

"(b) The Deputy Under Secretary of Defense for Acquisition shall assist the Under Secretary of Defense for Acquisition in the performance of his duties. The Deputy Under Secretary shall act for, and exercise the powers of, the Under Secretary when the Under Secretary is absent or disabled.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 133 the following new item:

"133a. Deputy Under Secretary of Defense for Acquisition.".

(b) PAY GRADE.—Section 5314 of title 5, United States Code, is amended by adding at the end the following:

"Deputy Under Secretary of Defense for Acquisition.".

SEC. 903. OTHER SENIOR CIVILIAN ACQUISITION OFFICIALS.

(a) PRECEDENCE OF UNDER SECRETARY FOR POLICY.—Section 134 of title 10, United State Code (as designated by section 105 of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)), is amended by inserting "the Under Secretary of Defense for Acquisition," in subsection (c) after "Deputy Secretary of Defense,".

(b) FUNCTIONS AND GRADE OF DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING.—(1) Section 135 of title 10, United States Code (as amended by section 105 of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)), is amended—

(A) by striking out subsection (b) and inserting in lieu thereof the following:

"(b) Except as otherwise prescribed by the Secretary of Defense, the Director of Defense Research and Engineering shall perform such duties relating to research and engineering as the Under Secretary of Defense for Acquisition may prescribe."; and

(B) by striking out subsection (c).

(2)(A) Section 5314 of title 5, United States Code, is amended by striking out "Director of Defense Research and Engineering.".

(B) Section 5315 of such title is amended by adding at the end the following:

"Director of Defense Research and Engineering.".

(c) INDEPENDENCE AND STAFF OF DIRECTOR OF OPERATIONAL TEST AND EVALUATION.—Section 138 of title 10, United States Code (as redesignated by section 101(a), of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)) is amended—

(1) by inserting "and the Under Secretary of Defense for Acquisition" after "Secretary of Defense" in the first sentence of subsection (b);

(2) by inserting "and the Under Secretary of Defense for Acquisition" after "Secretary of Defense" in subsection (b)(2);

(3) by inserting ", to the Under Secretary of Defense for Acquisition," in subsection (b)(5) after "Secretary of Defense";

(4) by inserting ", to the Under Secretary of Defense for Acquisition," in subsection (c) after "Secretary of Defense" the first place such term appears;

(5) by inserting "personally" in the first sentence of subsection (d) after "Secretary of Defense";

(6) by inserting ", the Under Secretary of Defense for Acquisition," in the second sentence of subsection (g)(1) after "Secretary of Defense"; and

(7) by adding at the end the following new subsection:

"(i) The Director shall have sufficient professional staff of military and civilian personnel to enable the Director to carry out the duties and responsibilities of the Director prescribed by law.".

(d) DIRECTOR OF OFFICE OF SMALL AND DISADVANTAGED BUSINESS UTILIZATION.—Section 15(k)(3) of the Small Business Act (15 U.S.C. 644(k)(3)) is amended by inserting ", except that in the case of the Department of Defense the Director of the Office of Small and Disadvantaged Business Utilization shall be responsible to, and report directly to, the Under Secretary of Defense for Acquisition".

(e) CONFORMING AMENDMENT FOR ARMED FORCES POLICY COUNCIL MEMBERSHIP.—Section 171(a) of title 10, United States Code is amended—

(1) by redesignating paragraphs (3) through (11) as paragraphs (4), (5), (6), (7), (9), (10), (11), (12), and (13), respectively;

(2) by inserting after paragraph (2) the following new paragraph (3):

"(3) the Under Secretary of Defense for Acquisition;"; and

(3) by striking out paragraph (7) (as so redesignated) and inserting in lieu thereof the following:

"(7) the Under Secretary of Defense for Policy;

"(8) the Deputy Under Secretary of Defense for Acquisition;".

SEC. 904. ENHANCED PROGRAM STABILITY FOR MAJOR DEFENSE ACQUISITION PROGRAMS.

(a) PROGRAM STABILITY.—(1) Chapter 144 of title 10, United States Code, is amended by adding after section 2434 (as redesignated by section 101(a) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)) the following new section:

"§ 2435. Enhanced program stability

"(a) BASELINE DESCRIPTION REQUIREMENT.—(1) The Secretary of a military department shall establish a baseline description for a major defense acquisition program under the jurisdiction of such Secretary—

"(A) before such program enters full-scale engineering development; and

"(B) before such program enters full-rate production.

"(2) A baseline description required under paragraph (1) shall include the following:

"(A) In the case of the full-scale development stage—

"(i) a description of the performance goals for the weapons system to be acquired under the program;

"(ii) a description of the technical characteristics and configuration of such system;

"(iii) total development costs for such stage by fiscal year; and

"(iv) the schedule of development milestones.

"(B) In the case of the production stage—

"(i) a description of the performance of the weapons system to be acquired under the program;

"(ii) a description of the technical characteristics and configuration of such system

"(iii) number of end items by fiscal year;

"(iv) the schedule of development milestones;

"(v) testing;

"(vi) initial training;

"(vii) initial provisioning; and

"(viii) total procurement costs for such stage (including the cost of all elements included in the baseline description) by fiscal year, which may not exceed the amount of the independent cost estimate for that program submitted to the Secretary of Defense under section 2434 of this title.

"(b) PROGRAM DEVIATION REPORTS.—(1) The program manager of a major defense acquisition program shall immediately submit a program deviation report for such program to the Secretary of the military department concerned and to the senior procurement executive of such military department (designated pursuant to section 16(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 414(3))) if such manager determines at any time during the full-scale engineering development stage or the production stage that there is reasonable cause to believe that—

"(A) the total cost of completion of the program will be more than the amount specified in the baseline description established under subsection (a) for such stage;

"(B) any milestone specified in such baseline description will not be completed as scheduled; or

"(C) the system to be acquired under the program will not fulfill the description of performance, technical characteristics, or configuration specified in such baseline description.

"(2) The Secretary of the military department concerned shall, with respect to any major defense acquisition program for which a program deviation report is received under paragraph (1)—

"(A) establish a review panel to review such program; and

"(B) submit a report containing the program deviation report and the results of such review to the Under Secretary of Defense for Acquisition before the end of the 45-day period beginning on the date that the program deviation report is submitted under paragraph (1).

"(c) DEFINITION.—In this section, the term 'major defense acquisition program' has the meaning given that term in section 2432(a)(1) of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2434 the following new item:

"2435. Enhanced program stability.".

(b) EFFECTIVE DATE.—Section 2435 of title 10, United States Code (as added by subsection (a)(1)), shall apply to major defense acquisition programs that enter full-scale engineering development or full-rate production after the date of the enactment of this Act.

SEC. 905. DEFENSE ENTERPRISE PROGRAMS.

(a) IN GENERAL.—(1) Chapter 144 of title 10, United States Code, is amended by adding after section 2435 (as added by section 904) the following new section:

"§ 2436. Defense enterprise programs

"(a) IN GENERAL.—The Secretary of Defense shall conduct, through the Secretaries of the military departments, a program with respect to increasing the efficiency of the management structure of defense acquisition programs by reducing the number of officials through whom a program manager reports to the senior procurement executive of the military department concerned.

"(b) DESIGNATION OF PARTICIPATING PROGRAMS.—The Secretary of a military department may designate any defense acquisition program under the jurisdiction of the Secretary to participate in the program described in subsection (a). A program designated under this subsection shall be known as a 'defense enterprise program'.

"(c) GUIDELINES.—The Secretary of Defense shall issue guidelines governing the management of defense enterprise programs. Such guidelines shall include the following requirements:

"(1) The Secretary concerned shall designate a program executive officer for each program.

"(2) The program manager for each program shall report with respect to such program directly, without intervening review or approval, to the program executive officer for the program.

"(3) The program executive officer for a program shall report with respect to such program directly, without intervening review or approval, to the senior procurement executive of the military department concerned designated pursuant to section 16(3) of the Office of Federal Procurement Policy Act (41 U.S.C. 414(3)).

"(4) The program executive officer to whom a defense enterprise program manager reports shall evaluate the job performance of such manager on an annual basis. In conducting an evaluation under this paragraph, a program executive officer shall consider the extent to which the manager has achieved the objectives of the program for which the manager is responsible, including quality, timeliness, and cost objectives.

"(5) The manager of a defense enterprise program shall be authorized staff positions for a technical staff, including experts in business management, contracting, auditing, engineering, testing, and logistics.

"(d) APPLICABLE RULES AND REGULATIONS.—(1) Except as specified by the senior procurement executive of the military department concerned, a defense enterprise program shall not be subject to any regulation, policy, directive, or administrative rule or guideline relating to the acquisition activities of the Department of Defense other than the Federal Acquisition Regulation and the Department of Defense supplement to the Federal Acquisition Regulation.

"(2) Paragraph (1) shall not be construed to limit or modify the application of Federal legislation relating to the acquisition activities of the Department of Defense.

"(3) In this subsection the term 'Federal Acquisition Regulation' has the meaning given such term in section 2320(a)(4) of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2435 (as added by section 904) the following new item:

"2436. Defense enterprise programs.".

(b) The Secretary of each military department shall designate for fiscal year 1988 not less than three defense acquisition programs under the jurisdiction of the Secretary to participate in the program described in section 2436(a) of title 10, United States Code (as added by subsection (a)(1)).

SEC. 906. MILESTONE AUTHORIZATION OF DEFENSE ENTERPRISE PROGRAMS.

(a) IN GENERAL.—(1) Chapter 144 of title 10, United States Code, is amended by adding after section 2436 (as inserted by section 905) the following new section:

"§ 2437. Defense enterprise programs: milestone authorization

"(a) DESIGNATION OF PARTICIPATING PROGRAMS.—(1) The Secretary of Defense may designate defense enterprise programs in each military department (as designated by the Secretary of the military department under section 2436 of this title) to be considered for milestone authorization under subsection (b).

"(2) The Secretary may designate a defense enterprise program under paragraph (1) only if the program—

"(A) is ready to proceed into the full-scale engineering development stage or the full-rate production stage; or

"(B) is in either of such stages.

"(b) SUBMISSION OF BASELINE DESCRIPTIONS.—Not later than the end of the 90-day period beginning on the date that a defense enterprise program is designated under subsection (a), the Secretary of Defense shall—

"(1) in the case of a program that is subject to section 2435(a) of this title, submit to the Committees on Armed Services of the Senate and House of Representatives the baseline description for the program required to be submitted under such section;

"(2) in the case of a program that is not subject to such section—

"(A) establish a baseline description that meets the requirements of such section; and

"(B) submit the baseline description to such committees; and

"(3) request from Congress the authority to obligate funds in a single amount sufficient to carry out the stage for which the baseline description is submitted.

"(c) MILESTONE AUTHORIZATION.—Congress shall authorize funds for the full-scale engineering development stage or the full-rate production stage of a program designated by the Secretary of Defense under subsection (a) in a single amount sufficient to carry out that stage, but not for a period in excess of five years, if such program is approved by Congress to—

"(1) proceed into or complete the full-scale engineering development stage; or

"(2) proceed into or complete the full-rate production stage.

"(d) PROGRAM DEVIATIONS.—(1) If the Secretary of Defense receives a program deviation report under section 2435(b) of this title with respect to a defense enterprise program for which funds are authorized under subsection (b)—

"(A) the Secretary of Defense shall notify the Committees on Armed Services of the Senate and House of Representatives of the receipt of such report before the end of the 15-day period beginning on the date on which the Secretary receives such report; and

"(B) except as provided in paragraph (2), after the end of the 45-day period beginning on the date on which the Secretary of Defense receives such report, the Secretary concerned may not obligate amounts appropriated or otherwise made available to the Department of Defense for purposes of carrying out the program.

"(2) Paragraph (1)(B) does not apply if the Secretary of Defense notifies Congress that the Secretary intends to—

"(A) convene a board to formally review the program; and

"(B) submit to Congress a revised baseline description for the program and the recommendations of the board convened under subparagraph (A) concurrent with the submission by the President of the budget for the next fiscal year under section 1105(a) of title 31.

"(3) The Secretary concerned may not obligate, for the purpose of carrying out a program described in paragraph (1) for which a program deviation report is received, amounts appropriated or otherwise made available to the Department of Defense for the fiscal year following the fiscal year during which the program deviation report was received unless such amounts are authorized to be appropriated after the date on which such report was received.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2436 (as inserted by section 905) the following new item:

"2437. Defense enterprise programs: milestone authorization.".

(b) INITIAL DESIGNATION OF PARTICIPATING PROGRAMS.—The Secretary of Defense shall designate for fiscal year 1988 not less than three defense enterprise programs to be considered for milestone authorization under subsection (b). The Secretary shall make such designations as part of the budget submission of the Department of Defense for such fiscal year.

SEC. 907. PREFERENCE FOR NONDEVELOPMENTAL ITEMS.

(a) IN GENERAL.—(1) Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section:

"§ 2325. Preference for nondevelopmental items

"(a) PREFERENCE.—The Secretary of Defense shall ensure that, to the maximum extent practicable—

"(1) requirements of the Department of Defense with respect to a procurement of supplies are stated in terms of—

"(A) functions to be performed;

"(B) performance required; or

"(C) essential physical characteristics;

"(2) such requirements are defined so that nondevelopmental items may be procured to fulfill such requirements; and

"(3) such requirements are fulfilled through the procurement of nondevelopmental items.

"(b) IMPLEMENTATION.—The Secretary of Defense shall carry out this section through the Under Secretary of Defense for Acquisition, who shall have responsibility for its effective implementation.

"(c) REGULATIONS.—The Secretary of Defense shall prescribe regulations to carry out this section.

"(d) DEFINITION.—In this section, the term 'nondevelopmental item' means—

"(1) any item of supply that is available in the commercial marketplace;

"(2) any previously-developed item of supply that is in use by a department or agency of the United States, a State or local government, or a foreign government with which the United States has a mutual defense cooperation agreement;

"(3) any item of supply described in paragraph (1) or (2) that requires only minor modification in order to meet the requirements of the procuring agency; or

"(4) any item of supply that is currently being produced that does not meet the requirements of paragraph (1), (2), or (3) solely because the item—

"(A) is not yet in use; or

"(B) is not yet available in the commercial marketplace.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end the following new item:

"2325. Preference for nondevelopmental items.".

(3) The Secretary of Defense shall prescribe regulations as required by section 2325(c) of title 10, United States Code (as added by subsection (a)(1)), before the end of the 180-day period beginning on the date of the enactment of this Act.

(b) REMOVAL OF IMPEDIMENTS TO ACQUISITION OF NONDEVELOPMENTAL ITEMS.—(1) The Secretary of Defense shall submit to the Committees on Armed Services of the Senate and House of Representatives a report—

(A) identifying actions taken, including training of personnel and changes in regulations and procurement procedures, to implement the requirements of section 2325 of title 10, United States Code (as added by subsection (a)(1));

(B) identifying all statutes and regulations that are determined by the Secretary to impede the acquisition of nondevelopmental items by the Department of Defense; and

(C) recommending any legislation that the Secretary considers necessary or appropriate to promote maximum procurement of nondevelopmental items to fulfill the supply requirements of the Department of Defense.

(2) The Secretary shall take appropriate steps to remove any impediments identified by the Secretary under paragraph (1)(A) that are under the jurisdiction of the Secretary.

(3) The report required by paragraph (1) shall be submitted before the end of the one-year period beginning on the date of the enactment of this Act.

(c) EVALUATION BY COMPTROLLER GENERAL.—(1) The Comptroller General shall conduct an independent evaluation of the actions taken by the Secretary of Defense to carry out the requirements of section 2325 of title 10, United States Code (as added by subsection (a)(1)).

(2) The Comptroller General shall submit to the Committees on Armed Services of the Senate and House of Representatives a report on the evaluation required by paragraph (1). Such report shall include—

(A) an analysis of the effectiveness of the actions taken by the Secretary to carry out the requirements of section 2325 of title 10,

United States Code (as added by subsection (a)(1));

(B) a description of any programs conducted to notify acquisition personnel of the Department of Defense of the requirements of such section and to train such personnel in the appropriate procedures for carrying out such section;

(C) a description of each law, regulation, and procedure which prevents or restricts maximum practicable use of nondevelopmental items to fulfill the supply requirements of the Department of Defense; and

(D) such recommendations for additional legislation as the Comptroller General considers necessary or appropriate to promote maximum procurement of nondevelopmental items to fulfill the supply requirements of the Department of Defense.

(3) The report required by paragraph (2) shall be submitted before the end of the two-year period beginning on the date of the enactment of this Act.

(d) DEFINITION.—For the purposes of subsections (b) and (c), the term "nondevelopmental items" has the meaning given such term in section 2325(d) of title 10, United States Code (as added by subsection (a)(1)).

SEC. 908. REQUIREMENTS RELATING TO UNDEFINITIZED CONTRACTUAL ACTIONS.

(a) LIMITATION ON USE OF FUNDS FOR UNDEFINITIZED CONTRACTUAL ACTIONS.—(1) On the last day of each six-month period described in paragraph (4), the Secretary of Defense (with respect to the Defense Logistics Agency) and the Secretary of each military department shall determine—

(A) the total amount of funds obligated for contractual actions during the six-month period;

(B) the total amount of funds obligated during the six-month period for undefinitized contractual actions; and

(C) the total amount of funds obligated during the six-month period for undefinitized contractual actions that are not definitized on or before the last day of such period.

(2) On the last day of each six-month period described in paragraph (4), the amount of funds obligated for undefinitized contractual actions entered into by the Secretary of Defense (with respect to the Defense Logistics Agency) or the Secretary of a military department during the six-month period that are not definitized on or before such day may not exceed 10 percent of the amount of funds obligated for all contractual actions entered into by the Secretary during the six-month period.

(3) If on the last day of a six-month period described in paragraph (4) the total amount of funds obligated for undefinitized contractual actions under the jurisdiction of a Secretary that were entered into during the six-month period exceeds the limit established in paragraph (2), the Secretary—

(A) shall, not later than the end of the 45-day period beginning on the first day following the six-month period, submit to the defense committees an unclassified report concerning—

(i) the amount of funds obligated for contractual actions under the jurisdiction of the Secretary that were entered into during the six-month period with respect to which the report is submitted; and

(ii) the amount of such funds obligated for undefinitized contractual actions; and

(B) except with respect to the six-month period described in paragraph (4)(A), may not enter into any additional undefinitized contractual actions until the date on which the Secretary certifies to Congress that such limit is not exceeded by the cumulative amount of funds obligated for undefinitized contractual actions under the jurisdiction of the Secretary that are not definitized on or before such date and were entered into—

(i) during the six-month period for which such limit was exceeded; or

(ii) after the end of such six-month period.

(4) This subsection applies to the following six-month periods:

(A) The period beginning on October 1, 1986, and ending on March 31, 1987.

(B) The period beginning on April 1, 1987, and ending on September 30, 1987.

(C) The period beginning on October 1, 1987, and ending on March 31, 1988.

(D) The period beginning on April 1, 1988, and ending on September 30, 1988.

(E) The period beginning on October 1, 1988, and ending on March 31, 1989.

(b) OVERSIGHT BY INSPECTOR GENERAL.—The Inspector General of the Department of Defense shall—

(1) periodically conduct an audit of contractual actions under the jurisdiction of the Secretary of Defense (with respect to the Defense Logistics Agency) and the Secretaries of the military departments; and

(2) after each audit, submit to Congress a report on the management of undefinitized contractual actions by each Secretary, including the amount of contractual actions under the jurisdiction of each Secretary that is represented by undefinitized contractual actions.

(c) WAIVER AUTHORITY.—The Secretary of Defense may waive the application of this section for urgent and compelling considerations relating to national security or public safety if the Secretary notifies the Committees on Armed Services of the Senate and House of Representatives of such waiver before the end of the 30-day period beginning on the date that the waiver is made.

(d) ESTABLISHMENT OF REQUIREMENTS WITH RESPECT TO UNDEFINITIZED CONTRACTUAL ACTIONS.—(1)(A) Chapter 137 of title 10, United States Code, is amended by adding after section 2325 (as added by section 907) the following new section:

"§ 2326. Undefinitized contractual actions: restrictions

"(a) IN GENERAL.—The head of an agency may not enter into an undefinitized contractual action unless the request to the head of the agency for authorization of the contractual action includes a description of the anticipated effect on requirements of the military department concerned if a delay is incurred for purposes of determining contractual terms, specifications, and price before performance is begun under the contractual action.

"(b) LIMITATIONS ON OBLIGATION AND EXPENDITURE OF FUNDS.—(1) A contracting officer of the Department of Defense may not enter into an undefinitized contractual action unless the contractual action provides for agreement upon contractual terms, specifications, and price by the earlier of—

"(A) the end of the 180-day period beginning on the date on which the contractor submits a qualifying proposal to definitize the contractual terms, specifications, and price; or

"(B) the date on which the amount of funds obligated or expended under the contractual action is equal to more than 50 percent of the negotiated overall ceiling price for the contractual action.

"(2) Except as provided in paragraph (3), the contracting officer for an undefinitized contractual action may not expend with respect to such contractual action an amount that is equal to more than 50 percent of the negotiated overall ceiling price until the contractual terms, specifications, and price are definitized for such contractual action.

"(3) If a contractor submits a qualifying proposal (as defined in subsection (g)) to definitize an undefinitized contractual action before an amount equal to more than 50 percent of the negotiated overall ceiling price is expended on such action, the contracting officer for such action may not expend with respect to such contractual action an amount that is equal to more than 75 percent of the negotiated overall ceiling price until the contractual terms, specifications, and price are definitized for such contractual action.

"(4) This subsection does not apply to an undefinitized contractual action for the purchase of initial spares.

"(c) INCLUSION OF NON-URGENT REQUIREMENTS.—Requirements for spare parts and support equipment that are not needed on an urgent basis may not be included in an undefinitized contractual action for spare parts and support equipment that are needed on an urgent basis unless the head of the agency approves such inclusion as being—

"(1) good business practice; and

"(2) in the best interests of the United States.

"(d) MODIFICATION OF SCOPE.—The scope of an undefinitized contractual action under which performance has begun may not be modified unless the head of the agency approves such modification as being—

"(1) good business practice; and

"(2) in the best interests of the United States.

"(e) ALLOWABLE PROFIT.—The head of an agency shall ensure that the profit allowed on an undefinitized contractual action for which the final price is negotiated after a substantial portion of the performance required is completed reflects—

"(1) the possible reduced cost risk of the contractor with respect to costs incurred during performance of the contract before the final price is negotiated; and

"(2) the reduced cost risk of the contractor with respect to costs incurred during performance of the remaining portion of the contract.

"(f) APPLICABILITY.—This section does not apply to the Coast Guard or the National Aeronautics and Space Administration.

"(g) DEFINITIONS.—In this section:

"(1) The term 'undefinitized contractual action' means a new procurement action entered into by the head of an agency for which the contractual terms, specifications, or price are not agreed upon before performance is begun under the action. Such term does not include contractual actions with respect to the following:

"(A) Foreign military sales.

"(B) Purchases of less than $25,000.

"(C) Special access programs.

"(D) Congressionally-mandated long-lead procurement contracts.

"(2) The term 'qualifying proposal' means a proposal that contains sufficient information to enable the Department of Defense to conduct complete and meaningful audits of the information contained in the proposal and of any other information that the Department is entitled to review in connection with the contract, as determined by the contracting officer.".

(B) The table of sections at the beginning of such chapter is amended by adding after

the item relating to section 2325 (as added by section 907) the following new item:

"2326. Undefinitized contractual actions: restrictions.".

(2) Section 2326 of title 10, United States Code (as added by subsection (d)(1)), applies to undefinitized contractual actions that are entered into after the end of the 180-day period beginning on the date of the enactment of this Act.

(e) DEFINITION.—For purposes of this section, the term "undefinitized contractual action" has the meaning given such term in section 2325(g) of title 10, United States Code (as added by subsection (d)(1)).

SEC. 909. COMPETITIVE PROTOTYPE STRATEGY REQUIREMENT FOR MAJOR DEFENSE ACQUISITION PROGRAMS.

(a) ESTABLISHMENT OF REQUIREMENT.—Chapter 139 of title 10, United States Code, is amended by adding after section 2364 (as added by section 234) the following new section:

"§ 2365. Competitive prototype strategy requirement: major defense acquisition programs

"(a) COMPETITIVE PROTOTYPE STRATEGY REQUIREMENT.—Except as provided in subsection (c), the Secretary of Defense shall require the use of a competitive prototype program strategy in the development of a major weapons system (or a subsystem of such system).

"(b) QUALIFYING STRATEGIES.—An acquisition strategy qualifies as a competitive prototype strategy if it—

"(1) requires that contracts be entered into with not less than two contractors, using the same combat performance requirements, for the competitive design and manufacture of a prototype system or subsystem for developmental test and evaluation;

"(2) requires that all systems or subsystems developed under contracts described in paragraph (1) be tested in a comparative side-by-side test that is designed to—

"(A) reproduce combat conditions to the extent practicable; and

"(B) determine which system or subsystem is most effective under such conditions; and

"(3) requires that each contractor that develops a prototype system or subsystem, before the testing described in subparagraph (B) is begun, submit—

"(A) cost estimates for full-scale engineering development and the basis for such estimates; and

"(B) production estimates, whenever practicable.

"(c) EXCEPTION.—Subsection (a) shall not apply to the development of a major weapons system (or subsystem of such system) after—

"(1) the Secretary submits to Congress—

"(A) written notification that use of a competitive prototype program strategy is not practicable with respect to such system or subsystem; and

"(B) a report that fully explains why use of such a strategy is not practicable, including cost estimates (and the bases for such estimates) comparing the total program cost of the competitive prototype strategy with the total program cost of the alternative acquisition strategy; and

"(2) 30 days elapse after the Secretary submits the notification and report required by paragraph (1).

"(d) DEFINITIONS.—In this section:

"(1) The term 'major weapons system' means a major weapons system that is acquired under a program that is a major defense acquisition program.

"(2) The term 'major defense acquisition program' means a Department of Defense acquisition program that—

"(A) is not a highly sensitive classified program (as determined by the Secretary of Defense); and

"(B) that is estimated by the Secretary of Defense to require an eventual total expenditure for research, development, test, and evaluation of more than $200,000,000 (based on fiscal year 1980 constant dollars).

"(3) The term 'subsystem of such system' means a collection of components (such as the propulsion system, avionics, or weapon controls) for which the prime contractors, major subcontractors, or government entities have responsibility for system integration.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2364 (as added by section 234) the following new item:

"2365. Competitive prototype strategy requirement: major defense acquisition programs.".

(b) EFFECTIVE DATE.—Section 2365 of title 10, United States Code (as added by subsection (a)(1)), shall apply to major weapons systems (as defined in subsection (c)(1) of such section) that enter the advanced development stage after September 30, 1986.

SEC. 910. TESTING OF CERTAIN WEAPON SYSTEMS AND MUNITIONS.

(a) SURVIVABILITY AND LETHALITY TESTING AND OPERATIONAL TESTING.—(1) Chapter 139 of title 10, United States Code, is amended by adding after section 2365 (as added by section 909) the following new section:

"§ 2366. Major systems and munitions programs: survivability and lethality testing; operational testing

"(a) REQUIREMENTS.—The Secretary of Defense shall provide that—

"(1) a covered system may not proceed beyond low-rate initial production until realistic survivability testing of the system is completed in accordance with this section;

"(2) a major munition program or a missile program may not proceed beyond low-rate initial production until realistic lethality testing of the program is completed in accordance with this section; and

"(3) a major defense acquisition program may not proceed beyond low-rate initial production until initial operational test and evaluation of the program is completed in accordance with this section.

"(b) TEST GUIDELINES.—(1) Survivability and lethality tests required under subsection (a) shall be carried out sufficiently early in the development phase of the system or program to allow any design deficiency demonstrated by the testing to be corrected in the design of the system, munition, or missile before proceeding beyond low-rate initial production.

"(2) In the case of a major defense acquisition program, no person employed by the contractor for the system being tested may be involved in the conduct of the operational test and evaluation required under subsection (a).

"(3) The costs of all tests required under that subsection shall be paid from funds available for the system being tested.

"(c) WAIVER AUTHORITY.—The Secretary of Defense may waive the application of the survivability and lethality tests of this section to a covered system, munitions program, or missile program if the Secretary, before the system or program enters full-scale engineering development, certifies to Congress that live-fire testing of such system or program would be unreasonably expensive and impractical.

"(d) WAIVER IN TIME OF WAR OR MOBILIZATION.—In time of war or mobilization, the President may suspend the operation of any provision of this section.

"(e) DEFINITIONS.—In this section:

"(1) The term 'covered system' means a vehicle, weapon platform, or conventional weapon system—

"(A) that includes features designed to provide some degree of protection to users in combat; and

"(B) that is a major system within the meaning of that term in section 2303(5) of this title.

"(2) The term 'major munitions program' means—

"(A) a munition program for which more than 1,000,000 rounds are planned to be acquired; or

"(B) a conventional munitions program that is a major system within the meaning of that term in section 2302(5) of this title.

"(3) The term 'major defense acquisition program' means—

"(A) a conventional weapons system that is a major system within the meaning of that term in section 2302(5) of this title; and

"(B) is designed for use in combat.

"(4) The term 'realistic survivability testing' means, in the case of a covered system, testing for vulnerability and survivability of the system in combat by firing munitions likely to be encountered in combat (or munitions with a capability similar to such munitions) at the system configured for combat, with the primary emphasis on testing vulnerability with respect to potential user casualties and taking into equal consideration the operational requirements and combat performance of the system.

"(5) The term 'realistic lethality testing' means, in the case of a major munitions program or a missile program, testing for lethality by firing the munition or missile concerned at appropriate targets configured for combat.

"(6) The term 'configured for combat', with respect to a weapon system, platform, or vehicle, means loaded or equipped with all dangerous materials (including all flammables and explosives) that would normally be on board in combat.

"(7) The term 'operational test and evaluation' has the meaning given that term in section 138(a)(2)(A) of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2365 (as added by section 909) the following new item:

"2366. Major systems and munitions programs: survivability and lethality testing; operational testing.".

(b) EFFECTIVE DATE.—Section 2366 of title 10, United States Code (as added by subsection (a)), shall apply with respect to any decision to proceed with a program beyond low-rate initial production that is made—

(1) after May 31, 1987, in the case of a decision referred to in subsection (a)(1) or (a)(2) of such section; or

(2) after the date of the enactment of this Act, in the case of a decision referred to in subsection (a)(3) of such section.

(c) TIME FOR SUBMISSION OF ANNUAL REPORT OF DIRECTOR (OT&E).—Subsection (g)(1) of section 138 of such title (as redesignated by section 101(a) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433)) is amended by striking out "January 15" in the second sen-

tence and all that follows through 'is prepared' and inserting in lieu thereof "10 days after the transmission of the budget for the next fiscal year under section 1105 of title 31".

SEC. 911. GOALS FOR INCREASED USE OF MULTIYEAR CONTRACTING AUTHORITY IN FISCAL YEAR 1988.

(a) IN GENERAL.—The Secretary of Defense shall take appropriate actions to ensure that the Department of Defense increases the use of multiyear contracting authority in fiscal year 1988.

(b) MULTIYEAR PROCUREMENT GOAL.—The total amount obligated under multiyear contracts (authorized by section 2306(h) of title 10, United States Code) for Department of Defense procurement program eligible for multiyear contracting during fiscal year 1988 should be an amount that is not less than 10 percent of the total obligational authority used by the Department of Defense for procurement programs of the Department during such fiscal year.

(c) APPORTIONMENT OF GOAL.—The Secretary of Defense shall specify the percentage of obligational authority of each military department and Defense Agency that is to be used for multiyear contracts to achieve the goal prescribed in subsection (b).

(d) BASELINE REPORT.—Not later than January 1, 1987, the Secretary of Defense shall submit to the Committees on Armed Services and on Appropriations of the Senate and the House of Representatives a written report which contains—

(1) a list of all procurement programs which the Secretary determines to be procurement programs eligible for multiyear contracting that are subject to the requirements of section 2432 of title 10, United States Code (as redesignated by section 101(a) of the Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433));

(2) the Secretary's assessment of the feasibility and desirability of the multiyear procurement goal prescribed in subsection (b); and

(3) whether the Secretary expects to achieve the goal prescribed in subsection (b) for fiscal year 1988 and, if the Secretary does not expect to achieve such goal, the reasons why such goal will not be achieved.

(e) DEFINITIONS.—As used in this section the term "procurement program eligible for multiyear contracting" means a procurement program of the Department of Defense—

(1) which satisfies the conditions of clauses (A) through (F) of section 2306(h)(1) of title 10, United States Code; and

(2) under which production of fully configured end items is planned for a period exceeding three fiscal years.

SEC. 912. FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS.

(a) IN GENERAL.—(1) Chapter 139 of title 10, United States Code, is amended by adding after section 2366 (as added by section 910) the following new section:

"§ 2367. Use of Federally funded research and development centers

"(a) LIMITATION ON USE OF CENTERS.—Except as provided in subsection (b), the Secretary of Defense may not place work with a federally funded research and development center unless such work is within the purpose, mission, and general scope of effort of such center as established in the sponsoring agreement of the Department of Defense with such center.

"(b) EXCEPTION FOR APPLIED SCIENTIFIC RESEARCH.—This section does not apply to a federally funded research and development center that performs applied scientific research under laboratory conditions.

"(c) LIMITATION ON CREATION OF NEW CENTERS.—(1) The head of an agency may not obligate or expend amounts appropriated to the Department of Defense for purposes of operating a federally funded research center that was not in existence before June 2, 1986, until—

"(A) the head of the agency submits to Congress a report with respect to such center that describes the purpose, mission, and general scope of effort of the center; and

"(B) a period of 60 days beginning on the date such report is received by Congress has elapsed.

"(2) In this subsection, the term 'head of an agency' has the meaning given such term in section 2302(1) of this title.".

(2) The table of sections at the beginning of such chapter is amended by adding after the item relating to section 2366 (as added by section 910) the following new item:

"2367. Use of Federally funded research and development centers.".

(b) GAO STUDY.—The Comptroller General shall conduct a study of the national defense role of federally funded research and development centers. Such study shall consider the following:

(1) The effectiveness of procedures in effect on the date of the enactment of this Act in ensuring that such centers are established on the basis of the criteria set forth in Office of Federal Procurement Policy Circular 84-1.

(2) The effectiveness of such procedures in ensuring that work placed with such centers is within the purpose, mission, and general scope of effort of such center as established in the sponsoring agreement with such center.

(3) The growth in the size of such centers during fiscal years 1982 through 1986, measured—

(A) in dollar value of work placed with such centers; and

(B) in man-years of effort required to complete work placed with such centers.

(4) The effect of the exemption of contracts with such centers from the competitive procedures required by section 2304 of title 10, United States Code.

(5) The relationship of such centers to their sponsors.

(c) GAO REPORT.—(1) The Comptroller General shall submit to Congress a report on the study required by subsection (b). Such report shall include a discussion of each of the matters listed in subsection (b).

(2) The report required by paragraph (1) shall be submitted not later than one year after the date of the enactment of this Act.

PART B—REQUIREMENTS RELATING TO THE ACQUISITION PROCESS

SEC. 921. SMALL BUSINESS SET-ASIDES.

(a) PROPORTION OF CONTRACTS SET ASIDE DETERMINED ON INDUSTRY CATEGORY BASIS.—Section 15(a) of the Small Business Act (15 U.S.C. 644(a)) is amended—

(1) by inserting "in each industry category" in paragraph (3) after "Government", and

(2) by adding at the end the following new sentences: "For purposes of clause (3) of the first sentence of this subsection, an industry category is a discrete group of similar goods and services. Such groups shall be determined by the Administration in accordance with the four-digit standard industrial classification codes contained in the Standard Industrial Classification Manual published by the Office of Management and Budget, except that the Administration shall limit such an industry category to a greater extent than provided under such classification codes if the Administration receives evidence indicating that further segmentation for purposes of this paragraph is warranted due to special capital equipment needs or special labor or geographic requirements or to recognize a new industry. A market for goods or services may not be segmented under the preceding sentence due to geographic requirements unless the Government typically designates the area where work for contracts for such goods or services is to be performed and Government purchases comprise the major portion of the entire domestic market for such goods or services and, due to the fixed location of facilities, high mobilization costs, or similar economic factors, it is unreasonable to expect competition from business concerns located outside of the general areas where such concerns are located.".

(b) AWARDING OF CONTRACTS AT FAIR MARKET PRICES.—(1) Section 15(a) of such Act (15 U.S.C. 644(a)) is further amended by adding at the end the following new sentence: "A contract may not be awarded under this subsection if the award of the contract would result in a cost to the awarding agency which exceeds a fair market price.".

(2) Section 8(a)(1)(A) of such Act (15 U.S.C. 637(a)(1)(A)) is amended by striking out the semicolon at the end and adding in lieu thereof the following: ". A contract may not be awarded under this subsection if the award of the contract would result in a cost to the awarding agency which exceeds a fair market price;".

(c) ASSURANCE AS TO COMPOSITION OF LABOR FORCE.—(1) Section 8(a) of such Act (15 U.S.C. 637(a)) is amended by adding at the end the following new paragraph:

"(14)(A) A concern may not be awarded a contract under this subsection as a small business concern unless the concern agrees that—

"(i) in the case of a contract for services (except construction), at least 50 percent of the cost of contract performance incurred for personnel shall be expended for employees of the concern; and

"(ii) in the case of a contract for procurement of supplies (other than procurement from a regular dealer in such supplies), the concern will perform work for at least 50 percent of the cost of manufacturing the supplies (not including the cost of materials).

"(B) The Administrator may change the percentage under clause (i) or (ii) of subparagraph (A) if the Administrator determines that such change is necessary to reflect conventional industry practices among business concerns that are below the numerical size standard for businesses in that industry category. A percentage established under the preceding sentence may not differ from a percentage established under section 15(n).

"(C) The Administration shall establish, through public rulemaking, requirements similar to those specified in subparagraph (A) to be applicable to contracts for general and specialty construction and to contracts for any other industry category not otherwise subject to the requirements of such subparagraph. The percentage applicable to any such requirement shall be determined in accordance with subparagraph (B), except that such a percentage may not differ from a per-

centage established under section 15(n) for the same industry category.".

(2) Section 15 of such Act (15 U.S.C 644) is amended by adding at the end the following new subsection:

"(o)(1) A concern may not be awarded a contract under this subsection as a small business concern unless the concern agrees that—

"(A) in the case of a contract for services (except construction), the concern will perform at least 50 percent of the cost of the contract with its own employees; and

"(B) in the case of a contract for procurement of supplies (other than procurement from a regular dealer in such supplies), the concern will perform work for at least 50 percent of the cost of manufacturing the supplies (not including the cost of materials).

"(2) The Administrator may change the percentage under subparagraph (A) or (B) of paragraph (1) if the Administrator determines that such change is necessary to reflect conventional industry practices among business concerns that are below the numerical size standard for businesses in that industry category.

"(3) The Administration shall establish, through public rulemaking, requirements similar to those specified in paragraph (1) to be applicable to contracts for general and specialty construction and to contracts for any other industry category not otherwise subject to the requirements of such subparagraph.".

(d) EXPANSION OF ANNUAL PARTICIPATION GOALS.—Section 15(g) of such Act is amended—

(1) by striking out "having values of $10,000 or more" in the first sentence; and

(2) by adding at the end the following: "For the purpose of establishing goals under this subsection, the head of each Federal agency shall make consistent efforts to annually expand participation by small business concerns from each industry category in procurement contracts of the agency, including participation by small business concerns owned and controlled by socially and economically disadvantaged individuals. The head of each Federal agency, in attempting to attain such participation, shall consider—

"(1) contracts awarded as the result of unrestricted competition; and

"(2) contracts awarded after competition restricted to eligible small business concerns under this section and under the program established under section 8(a).".

(e) DISCLOSURE OF INFORMATION CONCERNING APPLICANTS FOR PROCUREMENT SET-ASIDES.—Section 15 of such Act is further amended by adding at the end the following new subsection:

"(p)(1) Except as provided in paragraphs (2) and (3), the head of any Federal agency shall, within five days of the agency's decision to set aside a procurement for small business concerns under this section, provide the names and addresses of the small business concerns expected to respond to the procurement to any person who requests such information.

"(2) The Secretary of Defense may decline to provide information under paragraph (1) in order to protect national security interests.

"(3) The head of a Federal agency is not required to release any information under paragraph (1) that is not required to be released under section 552 of title 5, United States Code.".

(f) REVIEW OF SIZE STANDARDS.—Section 3 of the Small Business Act is amended—

(1) by inserting "(1)" after "SEC. 3. (a)"; and

(2) by adding at the end of subsection (a) the following:

"(2)(A) The Small Business Administration shall establish a program for the review of the size standards for eligibility of business concerns in the industry categories described in subparagraph (B) for a procurement restricted to small business concerns under section 8(a) or 15(a).

"(B) Subparagraph (A) shall apply only to business concerns in the following industry categories:

"(i) Construction.

"(ii) Architectural and engineering services (including surveying and mapping services).

"(iii) Ship building and ship repair.

"(iv) Refuse systems and related services.

"(3) If the Administrator determines, on the basis of any such review, that contracts awarded under the set-aside programs under such sections exceed 30 percent of the dollar value of the total contract awards for that industry category, as determined under the last sentence of section 15(a)(3), the Administrator shall adjust the size standards for such industry category establishing eligibility for a set-aside program to a size that will likely reduce the number of contracts which may be set aside to approximately 30 percent of the value of contracts to be awarded under such sections.

"(4)(A) An interested person may petition the Administrator at any time to review an adjustment to a size standard made under paragraph (3) or any designation of an industry category made under section 15(a)(3) if the petitioner presents credible evidence that any such adjustment or designation—

"(i) is not likely to further the purposes of paragraph (3)(A) or section 15(a); and

"(ii) has caused the petitioner to suffer severe financial loss.

"(B) The Administrator shall render a final determination on any petition filed under subparagraph (A) before the end of the 30-day period beginning on the date that such petition is received by the Administration. Such determination shall be reviewable in the manner prescribed in chapter 7 of title 5, United States Code.

"(C) The Administrator shall prescribe regulations to carry out the provisions of this subsection.

"(5) The Administrator shall conduct a review under the program established under paragraph (2) at least once during every three years. Such review shall be completed and appropriate size standard adjustments made with the expiration of 180 days after each three-year review period.".

(g) EFFECTIVE DATE.—Except as otherwise provided in subsection (h), the amendments made by this section shall take effect on October 1, 1987.

(h) INITIAL REVIEW OF SIZE STANDARDS.—(1) Paragraph (2) of section 3(a) of the Small Business Act (as added by subsection (f)) shall take effect on the date of the enactment of this Act.

(2) The first review conducted by the Administrator under such paragraph shall review the periods beginning on October 1, 1983, and ending on September 30, 1986, and shall be completed not later than 180 days after the date of the enactment of this Act.

(3) If the Administrator of the Small Business Administration determines, on the basis of the review referred to in paragraph (2), that contracts awarded under the set-aside programs under sections 8(a) and 15(a) of the Small Business Act in any industry category subject to that review exceed 30 percent of the dollar value of the total contract awards for that industry category, as determined in accordance with the last sentence of section 15(a)(3) of such Act, the Administrator shall propose adjustments to the size standards for such industry category establishing eligibility for a set-aside program to a size that will likely reduce the number of contracts which may be set aside to approximately 30 percent of the value of contracts to be awarded under such sections. The Administrator shall publish such proposed adjustments in the Federal Register for public comment. The Administrator may not issue final regulations implementing revised size standards for an industry category under section 3(a)(3) of such Act (as added by subsection (f)) until October 1, 1987.

(i) REPORT ON EFFECT OF AMENDMENTS MADE BY THIS SECTION.—(1) The Administrator of the Small Business Administration shall submit to the Committees on Armed Services and the Committees on Small Business of the Senate and House of Representatives a report on the amendments made by this section. The report shall include the Administrator's views on the advisability and feasibility of implementing such amendments.

(2) The report shall also include—

(A) the Administrator's findings and determinations under the review of size standards for businesses that qualify as small businesses carried out pursuant to section 3(a)(2)(B) of the Small Business Act (as amended by subsection (f));

(B) a determination of whether or not the amendments made by subsection (f) will further the interests of the set-aside program; and

(C) recommendations for furthering the interests described in subparagraphs (A) and (B) in a more efficient or more effective manner than provided in such amendments.

(3) In preparing the report required by paragraph (1), the Administrator of the Small Business Administration shall seek the views of all affected agencies of the Government and the views of the public, including the views of business concerns of all sizes and of trade, business, and professional organizations. The views of such agencies, and a summary of the views of the public, shall be included in the report.

(4) The report shall be submitted not later than July 15, 1987.

(j) LIMITATION RESPECTING GREAT LAKES NAS.—Of the total dollar amount of the contracts awarded for fiscal year 1987 for construction and/or refuse systems and related services at Great Lakes Naval Training Station, Illinois, not more than 30 percent of such dollar amount may be under contracts awarded through the so-called small business set-aside programs under sections 8 and 15 of the Small Business Act.

SEC. 922. THRESHOLDS FOR CERTAIN REQUIREMENTS RELATING TO SMALL PURCHASES.

(a) SMALL BUSINESS ACT NOTICE THRESHOLDS.—Section 8(e)(1) of the Small Business Act (15 U.S.C. 637(e)(1)) is amended—

(1) in subparagraph (A)—

(A) by striking out "$10,000" both places such term appears and inserting in lieu thereof "$25,000";

(B) by striking out "or" at the end of clause (i);

(C) by striking out the comma at the end of clause (ii) and inserting in lieu thereof "; or"; and

(D) by inserting after clause (ii) the following new clause:

"(iii) solicit bids or proposals for a contract for property or services for a price expected to exceed $10,000, if there is not a reasonable expectation that at least two offers will be received from responsive and responsible offerors,"; and

(E) by striking out "subsection (b); and" and inserting in lieu thereof "subsection (f);";

(2) by redesignating subparagraph (B) as subparagraph (C); and

(3) by inserting after subparagraph (A) the following new subparagraph (B):

"(B) an executive agency intending to solicit bids or proposals for a contract for property or services shall post, for a period of not less than ten days, in a public place at the contracting office issuing the solicitation a notice of solicitation described in subsection (f)—

"(i) in the case of an executive agency other than the Department of Defense, if the contract is for a price expected to exceed $10,000, but not to exceed $25,000; and

"(ii) in the case of the Department of Defense, if the contract is for a price expected to exceed $5,000, but not to exceed $25,000; and".

(b) OFFICE OF FEDERAL PROCUREMENT POLICY ACT NOTICE THRESHOLDS.—Section 18(a)(1) of the Office of Federal Procurement Policy Act (41 U.S.C. 416(a)(1)(A)) is amended—

(1) in subparagraph (A)—

(A) by striking out "$10,000" both places such term appears in and inserting in lieu thereof "$25,000";

(B) by striking out "or" at the end of clause (i);

(C) by striking out the comma at the end of clause (ii) and inserting in lieu thereof "; or";

(D) by inserting after clause (ii) the following new clause:

"(iii) solicit bids or proposals for a contract for property or services for a price expected to exceed $10,000, if there is not a reasonable expectation that at least two offers will be received from responsive and responsible offerors,"; and

(E) by striking out "and" at the end;

(2) by redesignating subparagraph (B) as subparagraph (C); and

(3) by inserting after subparagraph (A) the following new subparagraph (B):

"(B) an executive agency intending to solicit bids or proposals for a contract for property or services shall post, for a period of not less than ten days, in a public place at the contracting office issuing the solicitation a notice of solicitation described in subsection (f)—

"(i) in the case of an executive agency other than the Department of Defense, if the contract is for a price expected to exceed $10,000, but not to exceed $25,000; and

"(ii) in the case of the Department of Defense, if the contract is for a price expected to exceed $5,000, but not to exceed $25,000; and".

(c) SMALL BUSINESS SET-ASIDES.—The first sentence of section 15(j) of the Small Business Act (15 U.S.C. 644(j)) is amended by striking out "$10,000" and inserting in lieu thereof "25,000".

(d) CONFORMING AMENDMENTS.—(1) Section 8(f) of the Small Business Act is amended by striking out "subsection (e)(1)(A)" and inserting in lieu thereof "subparagraph (A) or (B) of subsection (e)(1)".

(2) Section 18(b) of the Office of Federal Procurement Policy Act is amended by striking out "subsection (a)(1)(A)" and inserting in lieu thereof "subparagraph (A) or (B) of subsection (a)(1)".

SEC. 923. REQUIREMENTS RELATING TO PROCEDURES OTHER THAN COMPETITIVE PROCEDURES.

(a) LIMITED SOURCES.—Section 2304(c)(1) of title 10, United States Code, is amended by inserting "or only from a limited number of responsible sources" after "only one responsible source".

(b) UNSOLICITED PROPOSALS FOR SERVICE.—Subparagraph (A) of section 2304(d)(1) of such title is amended by striking out "a unique and innovative concept" and all that follows and inserting in lieu thereof "a concept—

"(i) that is unique and innovative or, in the case of a service, for which the source demonstrates a unique capability of the source to provide the service; and

"(ii) the substance of which is not otherwise available to the United States, and does not resemble the substance of a pending competitive procurement; and".

(c) FOLLOW-ON CONTRACTS.—Subparagraph (B) of such section is amended—

(1) by inserting ", or the continued provision of highly specialized services, such property or services may be deemed to be available only from the original source and may be procured through procedures other than competitive procedures" after "highly specialized equipment";

(2) by inserting a one-em dash after "would result in";

(3) by paragraphing clauses (i) and (ii) and aligning their margins so as to be cut in four ems;

(4) by striking out the comma after "competition" at the end of clause (i) and inserting in lieu thereof a semicolon; and

(5) by striking out ", such property" and all that follows and inserting in lieu thereof a period.

(d) EFFECTIVE DATES.—(1) The amendment made by subsection (a) shall apply with respect to contracts for which solicitations are issued after the end of the 180-day period beginning on the date of the enactment of this Act.

(2) The amendment made by subsection (b) shall apply with respect to contracts awarded on the basis of unsolicited research proposals after the end of the 180-day period beginning on the date of the enactment of this Act.

(3) The amendments made by subsection (c) shall apply with respect to follow-on contracts awarded after the end of the 180-day period beginning on the date of the enactment of this Act.

SEC. 924. EVALUATION FACTORS IN AWARD OF CONTRACTS.

(a) EVALUATION FACTORS.—Subsection (a) of section 2305 of title 10, United States Code, is amended—

(1) in paragraph (2)(A)(i)—

(A) by striking out "(including price)";

(B) by inserting "(including price)" after "sealed bids"; and

(C) by inserting "(including cost or price)" after "competitive proposals"; and

(2) by adding at the end the following new paragraph:

"(3) In prescribing the evaluation factors to be included in each solicitation for competitive proposals, the head of an agency shall clearly establish the relative importance assigned to the quality of the services to be provided (including technical capability, management capability, and prior experience of the offeror).".

(b) CONFORMING AMENDMENT.—Subsection (b) of such section is amended by inserting "cost or" in paragraph (4)(B) before "price".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to solicitations for sealed bids or competitive proposals issued after the end of the 180-day period beginning on the date of the enactment of this Act.

SEC. 925. COMPUTATION OF CONTRACT BID PRICES.

(a) IN GENERAL.—Section 2301(a) of title 10, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (5);

(2) by striking out the period at the end of paragraph (6) and inserting in lieu thereof "; and"; and

(3) by adding at the end the following new paragraph:

"(7) the head of an agency, in issuing a solicitation for a contract to be awarded using sealed-bid procedures, not include in such solitation a clause providing for the evaluation of prices under the contract for options to purchase additional supplies or services under the contract unless the head of the agency has determined that there is a reasonable likelihood that the options will be exercised.".

(b) EFFECTIVE DATE.—Section 2301(a)(7) of title 10, United States Code (as added by subsection (a)), shall not apply to solicitations for sealed bids issued before the end of the 180-day period beginning on the date of the enactment of this Act.

SEC. 926. PRICES FOR SPARE OR REPAIR PARTS SOLD COMMERCIALLY.

(a) ESTABLISHMENT OF COMMERCIAL PRICING REQUIREMENT.—(1) Section 2323 of title 10, United States Code, is amended to read as follows:

"§ 2323. Commercial pricing for spare or repair parts

"(a) LIMITATION ON PRICE OF COMMERCIALLY AVAILABLE PARTS.—Except in the case of an offer submitted with a written statement under subsection (b)(2) and except as provided in subsection (c), if the head of an agency, using procedures other than competitive procedures, enters into a contract with a contractor for the purchase of spare or repair parts which the contractor also offers for sale to the general public, the price charged the United States for such parts under the contract may not exceed the lowest commercial price charged by the contractor in sales of such parts during a period described in subsection (b)(1).

"(b) REQUIREMENTS FOR INCLUSION IN OFFER.—The head of an agency, with respect to an offeror who submits an offer to the head of an agency to enter into a contract for the supply of spare or repair parts under a contract awarded using procedures other than competitive procedures, and who also offers such parts for sale to the general public, shall require that the offeror—

"(1) certify in such offer that, to the best of the knowledge and belief of the offeror, the price proposed in the offer does not exceed the lowest commercial price at which such offeror sold such parts during the most recent regular monthly, quarterly, or other period for which sales data are reasonably available; or

"(2) submit with such offer a written statement—

"(A) specifying the amount of the difference between the price proposed in the offer and the lowest commercial price at which such offeror sold such parts during a period described in paragraph (1); and

"(B) providing a justification for that difference.

"(c) EXCEPTION TO LIMITATION.—Subsections (a) and (b) do not apply in the case of a contract with respect to which the contracting officer includes in the file on the

contract a written determination by such officer that the use of the lowest commercial price with respect to such contract is not appropriate because of—

"(1) national security considerations; or

"(2) significant differences between the terms of the commercial sales of the parts to be acquired under such contract and the terms of such contract, including differences in—

"(A) quantity;

"(B) quality;

"(C) delivery requirements; or

"(D) other terms and conditions.

"(d) AUDITING.—(1) In order to verify any certification or statement made under subsection (b) with respect to a contract, the contracting officer who awards such contract (or any representative of the contracting officer who is an employee of the United States or a member of the armed forces), during the time period specified in paragraph (2), may examine and audit all records of sales (including contract terms and conditions) maintained by or for the contractor that are directly pertinent to sales by the contractor of spare or repair parts identical to those covered by the contract during the period covered by such certification or statement.

"(2) The head of an agency shall require an offeror who submits a certification or written statement under subsection (b) to make available the records, books, data, and documents described in paragraph (1) for examination, audit, or reproduction for the purposes of such paragraph during the three-year period beginning on the date that the offeror submits such certification or statement to such head of an agency.

"(3) The authority provided by this subsection is in addition to the authority of the head of an agency under section 2306a of this title.

"(e) REGULATIONS.—The Secretary of Defense, after consultation with the Secretary of Transportation and the Administrator of the National Aeronautics and Space Administration, shall prescribe regulations to carry out this section. Such regulations may not require the disclosure or submission of any data related to any element underlying the price of a commercial product not otherwise required by law.

"(f) DEFINITIONS.—In this section:

"(1) The term 'spare or repair part' means any individual piece, part, subassembly, or component which is furnished for the logistic support or repair of an end item and not as an end item itself.

"(2) The term 'lowest commercial price' means the lowest price at which a sale was made to the general public of a particular part. Such term does not include the price at which a sale was made—

"(A) to any agency of the United States;

"(B) to any person for resale by such person after such person performs a service or function in connection with such part that increases the cost of the part, unless the agency procuring the part can demonstrate that the agency is procuring the part before such service or function has been performed by any such person;

"(C) to a subsidiary, affiliate, or parent business organization of the contractor, or any other branch of the same business entity;

"(D) to any person at a price that, for the purpose of making a donation, has been substantially discounted below the fair market value or regular price of such part; or

"(E) to a customer located outside the United States.

"(g) APPLICABILITY.—This section does not apply to a contract entered into using simplified small purchase procedures established under section 2304(g) of this title.".

(2) The item relating to section 2323 at the beginning of chapter 137 is amended to read as follows:

"2323. Commercial pricing for spare or repair parts.".

(b) EFFECTIVE DATE.—Regulations prescribed under section 2323(e) of title 10, United States Code (as amended by subsection (a)(1)), shall take effect on the date of the enactment of this Act.

SEC. 927. ALLOCATION OF OVERHEAD TO PARTS TO WHICH CONTRACTOR HAS ADDED LITTLE VALUE.

(a) IN GENERAL.—Section 2304 of title 10, United States Code, is amended by adding at the end the following new subsection:

"(i)(1) The Secretary of Defense shall prescribe by regulation the manner in which the Department of Defense negotiates prices for supplies to be obtained through the use of procedures other than competitive procedures, as defined in section 2302(2) of this title.

"(2) The regulations required by paragraph (1) shall—

"(A) specify the incurred overhead a contractor may appropriately allocate to supplies referred to in that paragraph; and

"(B) require the contractor to identify those supplies which it did not manufacture or to which it did not contribute significant value.

"(3) Such regulations shall not apply to an item of supply included in a contract or subcontract for which the price is based on established catalog or market prices of commercial items sold in substantial quantities to the general public.".

(b) DEADLINE.—The Secretary of Defense shall prescribe the regulations required by section 2304(i) of such title (as added by subsection (a)) not later than 180 days after the date of the enactment of this Act.

(c) REPEAL.—Section 1245 of the Department of Defense Authorization Act, 1985 (Public Law 98-525, 98 Stat. 2609), is repealed.

SEC. 928. CLARIFICATION OF REQUIREMENTS TO MARK SUPPLIES TO IDENTIFY SUPPLIERS AND SOURCES.

(a) EXCEPTION FOR CERTAIN COMMERCIAL ITEMS.—Section 2384(b) of title 10, United States Code, is amended—

(1) by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively;

(2) by inserting "(1)" after "(b)";

(3) by inserting "(other than a contract described in paragraph (2))" after "delivery of supplies"; and

(4) by adding at the end the following new paragraph:

"(2) Paragraph (1) does not apply to a contract that requires the delivery of supplies that are commercial items sold in substantial quantities to the general public if the contract—

"(A) provides for the acquisition of such supplies by the Department of Defense at established catalog or market prices; or

"(B) is awarded through the use of competitive procedures.".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to contracts entered into after the end of the 180-day period beginning on the date of the enactment of this Act.

PART C—PROCUREMENT PERSONNEL POLICY

SEC. 931. CONFLICT-OF-INTEREST IN DEFENSE PROCUREMENT.

(a) IN GENERAL.—(1) Chapter 141 of title 10, United States Code, is amended by inserting after section 2397a the following new sections:

"§ 2397b. Certain former Department of Defense procurement officials: limitations on employment by contractors

"(a)(1) Subject to subsections (c) and (d), a person who is a former officer or employee of the Department of Defense or a former or retired member of the armed forces may not accept compensation from a contractor during the two-year period beginning on the date of such person's separation from service in the Department of Defense if—

"(A) on a majority of the person's working days during the two-year period ending on the date of such person's separation from service in the Department of Defense, the person performed a procurement function (relating to a contract of the Department of Defense) at a site or plant that is owned or operated by the contractor and that was the principal location of such person's performance of that procurement function;

"(B) the person performed, on a majority of the person's working days during such two-year period, procurement functions relating to a major defense system and, in the performance of such functions, participated personally and substantially, and in a manner involving decisionmaking responsibilities, with respect to a contract for that system through contact with the contractor; or

"(C) during such two-year period the person acted as a primary representative of the United States—

"(i) in the negotiation of a Department of Defense contract in an amount in excess of $10,000,000 with the contractor; or

"(ii) in the negotiation of a settlement of an unresolved claim of the contractor in an amount in excess of $10,000,000 under a Department of Defense contract.

"(2) In the application of paragraph (1) to a former officer or employee of the Department of Defense or a former or retired member of the armed forces, a person's status as a contractor shall be determined as of the date of the separation from service in the Department of Defense of the officer or employee or member or former member involved.

"(b)(1) Any person who knowingly violates subsection (a)(1) shall be subject to a civil fine, in an amount not to exceed $250,000, in a civil action brought by the United States in the appropriate district court of the United States.

"(2) Any person who knowingly offers or provides any compensation to another person, and who knew or should have known that the acceptance of such compensation is or would be in violation of subsection (a)(1), shall be subject to a civil fine, in an amount not to exceed $500,000, in a civil action brought by the United States in the appropriate district court of the United States.

"(c) This section does not apply to any person with respect to—

"(1) duties described in clause (A) or (B) of subsection (a)(1) which were performed while such person was serving—

"(A) in a civilian position for which the rate of pay is less than the minimum rate of pay payable for grade GS-13 of the General Schedule; or

"(B) as a member of the armed forces in a pay grade below pay grade O–4; or

"(2) duties described in clause (C) of subsection (a)(1) which were performed while such person was serving—

"(A) in a civilian position for which the rate of pay is less than the minimum rate of pay payable for a Senior Executive Service position; or

"(B) as a member of the armed forces in a pay grade below pay grade O–7.

"(d) This section does not prohibit any person from accepting compensation from any contractor that, during the fiscal year preceding the fiscal year in which such compensation is accepted, was not a Department of Defense contractor or was a contractor under Department of Defense contracts in a total amount less than $10,000,000.

"(e)(1) Any person may, before accepting any compensation, request the appropriate designated agency ethics official to advise such person on the applicability of this section to the acceptance of such compensation. For purposes of the preceding sentence, the appropriate designated agency ethics official is the designated agency ethics official of the agency in which such person was serving at the time such person separated from service in the Department of Defense.

"(2) A request for advice under paragraph (1) shall contain all information that is relevant to a determination by the designated agency ethics official on such request.

"(3) Not later than 30 days after the date on which a designated agency ethics official receives a request for advice under paragraph (1), such official shall issue a written opinion on the applicability of this section to the acceptance of compensation covered by the request.

"(4) If a designated agency ethics official, on the basis of a complete disclosure as required by paragraph (2), states in a written opinion furnished to any person under this subsection that this section is inapplicable to the acceptance of compensation by such person from a contractor in a particular case, there shall be a conclusive presumption in favor of such person, for the purposes of this section, that the person's acceptance of such compensation in such case is not a violation of subsection (a)(1).

"(f) In this section:

"(1) The term 'compensation' includes any payment, gift, benefit, reward, favor, or gratuity—
